THE 18½ TON RINGING BELL,
the Bourdon of the Carillon of 64 Bells, about to be installed at
RIVERSIDE CHURCH, NEW YORK, U.S.A.

THE LETTER AND THE SPIRIT.

Those who have followed the controversy over what should constitute a peal of Minor or Doubles will be interested in the suggestions put forward in another column by the Rev. E. S. Powell. He offers for consideration certain definitions out of which might eventually be evolved 'conditions' which all would be prepared to accept, and doubtless these proposals will be fully discussed. Experience, however, shows that what we want to be clear about is not only the form of words, but the interpretation which is to be put upon them. It has been obvious in this discussion that what, at first sight, appeared to be perfectly plain English has been construed by different people to have diametrically opposite meanings. We are inclined to think that this has arisen, not so much from any ambiguity of language, but because there are two opposite purposes in view. There are those—and we imagine them to be in a majority—who desire, when a peal of (say) Minor is rung, that it shall consist of consecutive true extents. There are others who, as Mr. Willson aptly puts it in his letter, are satisfied with anything as long as it comes right in the end.

At the moment the conditions required by the Central Council for peals of Minor and Doubles are those which were adopted at Hereford. The essential point of the motion that was then passed is that the 720's in peals of Minor and the 120's in peals of Doubles shall be true and complete, and that no row (rounds or otherwise) shall be repeated in any 720 or 120 respectively. Mr. Powell suggests as an alternative definition that 'compositions of Minor must be in 720's and not in smaller touches; compositions of Doubles must be in 120's and not in smaller touches, and these 720's and 120's are to be true in themselves.' If this is intended to mean what it appears to mean, that the consecutive rows in each 720 or 120 included in a peal must be true and that any splicing must be in true round blocks, then, subject, perhaps, to the modification which has for many years existed in the conditions for peals of Minor, that 'a peal may be lengthened by the addition of any number of 720's fulfilling the same conditions, with or without one touch of less than 720' (and similarly with the 120's), there seems little objection to be raised to it by those who support the spirit of the Hereford motion.

But what is to be read into the expression in the third section of Mr. Powell's suggestion, which refers to "groups of 720's or 120's"? If it is to mean such combinations of three 720's as in the Rev. E. B. James' Cambridge in which (counting rounds as the first row) three extents, each of 720 consecutive true rows, are rung, well

and good; if, however, the object is to cover the admission of a combination of permutations made up of each of the 720 changes rung three times, without observance of any rule by which each of the three blocks of consecutive 720's must be true in itself, then the Council and the Exercise must decide a matter of important principle. They must decide the plain question, what is and what is not to be recognised as a true peal of Minor or Doubles? Hitherto the standard laid down has been that the extents must be in 720 or 120 consecutive true rows. It is for them to say whether anything lower is, at this date, desirable. When the Council next debate the subject there must be no sophistry. Any definition which is proposed must be made perfectly plain in its spirit, as well as in the letter.

SALISBURY DIOCESAN GUILD. DEVIZES BRANCH'S SUCCESSFUL YEAR.

The annual meeting of the Devizes Branch was held at Devizes on Saturday, January 5th, a large number of members and friends being present. The towers of St. John's (eight bells), St. Mary's (six bells), and St. James', Southbroom (six bells), were all available for ringing, which commenced about 3 p.m. At 4.30 p.m. an interesting ceremony took place in the ringing chamber of St. John's, when two peal boards, one recording a peal of Grandsire Triples, the other a peal of Cambridge Surprise Major, rung there, were unveiled by the chairman of the branch (Mr. C. D. Heginbotham), and dedicated by the Rector (the Rev. A. H. T. Clarke).

The Guild service followed, conducted by the Rector, who gave a short address, Mr. H. H. Baker being the organist. A verse of the National Anthem was sung as a prayer for H.M. the King's restoration to health.

Tea followed in the Parish Room, to which 71 sat down. Afterwards, the chairman (Mr. C. D. Heginbotham) presided at the business meeting, and welcomed the visitors. In his resume of the work of the branch during the past year, he congratulated those members who had rung peals in the advanced methods. He also stated that the whole of the money had been collected for the restoration of the bells at All Cannings. He also thanked the captains of bands belonging to the branch, and the officers, for their support during the past year.

The Secretary (Mr. F. Green) presented the balance sheet for the past year, which showed a balance in hand and an increase in members.—The usual honorarium was voted to the secretary.

Apologies for absence were received from Mr. H. Brownlee West, of Devizes, Mr. J. T. Dyke, the respected secretary of the Bath and Wells Association, and Mr. J. Stafford, Bradford-on-Avon.

The whole of the officers of the branch were re-elected, and 21 new members were elected.

The usual votes of thanks were passed to the Rector for the use of the bells, and conducting the service, to the organist and to those who prepared the tea.—The Rector replied in a humorous speech.

Ringers, including the Vicar of Bishop's Cannings (the Rev. S. L. R. Sharpe), were present from Devizes (St. John's and St. Mary's), St. James', Southbroom, Bishop's Cannings, All Cannings, Chippenham, Bratton, Bromham, Rowde, Holt, Warminster, Swindon, Wootton Bassett, Market Lavington, Trowbridge, Melksham. THE BATES APPEAL FUND.

We are glad to record this week that the fund for the assistance of Mrs. Bates (the widow of Mr. E. Bates, of Darford) and her family has reached £50. This practical sympathy, which has been shown by the Exercise at a moment of tragic bereavement and financial worry, has done much to lighten the burden in a home suddenly robbed of the breadwinner. As it is now desired to close the fund, any further contributions should be sent without delay to Mr. T. Groombridge, jun., 127, Crayford Way, Crayford, Kent.

sire and Stedman Triples, Bob Major, Double Norwich, Superlative, Kent Treble Bob Major, and the usual six-bell methods, were rung during the afternoon and evening.

The following places were selected for the next three meetings, if the bells are available, viz., Potterne, Holt and Westbury.

A word of praise is due to those who made the arrangements for what proved to be an excellent meeting, the utmost harmony prevailing throughout: The secretary (Mr. F. Green), for the work he put in; and Mr. S. Hillier, the senior Ringing Master, for his excellent arrangements for all to have a pull, and whom everyone present was pleased to see again after his recent accident; and to the steeple-keepers for having everything ready.

BELFRY GOSSIP.

Another ringer with a long connection with the Sussex County Association passed away last week in the person of Mr. Joseph Sharp. He was associated with various towers in Eastbourne, and had rendered valuable aid to the art in that part of the county.

The very fine half-muffled peal of Stedman Caters which was rung at Wrington, Somerset, on August 11th, 1927, in memory of the late Mr. Pryce Taylor, of Loughborough, and Mr. E. D. Marshall, of Wrington, has been permanently recorded in the tower by the erection of a handsome tablet presented by Mr. E. Denison Taylor. The tablet is the work of Mr. C. H. Webb, of Croft, Leicester.

Among ancient ringing societies was one at Redenhall, Norfolk, which was established in 1736. It is on record that on January 13th, 1838, Samuel Thurston conducted a peal of 5,280 Oxford Treble Bob at the church, to celebrate the 102nd anniversary of the Ancient Ringing Society.

Thirty years ago next Monday the first peal of London Surprise Major in the City of London was rung by the St. Peter's Society, Brighton.

On January 14th, 1818, died James Barham, of Leeds, Kent, at the age of 93 years. From the year 1744 to the year 1804 he rang in Kent and elsewhere 112 peals, not less than 5,040 changes in each peal, and called bobs and singles for most of the peals, and on April 7th and 8th, 1761, assisted in ringing 40,320 Bob Major on Leeds Bells in 27 hours.

The Ancient Society of College Youths rang the first peal of Double Bob Major on January 14th, 1726, at St. Dunstan's Church, Fleet Street.

A complete peal of Plain Bob Tripples, the first true peal of five thousand that ever was rung here, was rung at St. John's, Craydon, on January 17th, 1735.

On January 18th, 1844, 7,126 Stedman Cinques was rung at St. Peter Mancroft, Norwich.

THE FIRST PERFORMANCES OF HOLT'S ORIGINAL. THE NORWICH RECORDS.

In our issue of December 21st it was stated that the first recorded performance of Holt's Original, in which the conductor rang one of the bells, was at Saffron Walden on Christmas Day, 1753. Last week Mr. T. E. Slater's correction of this was made. The peal had been rung twice before under the same conditions at Norwich. Mr. G. H. Cross now sends extracts from the 'Norwich Mercury' of the time, and suggests that the records at Saffron Walden and St. Giles-in-the-Fields, and in the 'History of the Ancient Society of College Youths,' should be corrected.

The following is taken from the record now in St. Peter Mancroft belfry, as copied from the 'Norwich Mercury' by Mr. Philip Sadler, of Norwich:—

ST. MICHAEL'S COSLANY, NORWICH.

On Saturday, August 22nd, 1752, was rung at St. Michael's Coslany a complete 5,040 of Mr. Holt's Tripples in three hours, without changes alike, or a bell out of course, it being the first time ever performed by eight men only, so intricate it was thought no man could ring a bell and call the bobs. It has been rung in London and at Stonham Aspal with prompts, but was rung by these men without a prompt.

The following is from the record now in St. Peter Mancroft belfry, as copied from the 'Norwich Mercury' by Mr. Philip Sadler, of Norwich:—

ST. GILES', NORWICH.

On Sunday, October 22nd, 1752, was rung at St. Giles' in ye City of Norwich, 5,040 Grandsire Tripples, with only two doubles and no alterations. This true peal has been very lately found out by Mr. John Holt, of London. The bobs were called by William Dixon, the peal being so intricate the London Bell-ringers thought it impracticable for a man to ring one of the bells and call the bobs at the same time. The peal was completely rung in three hours and six minutes by the following persons: William Dixon treble, John Gardiner 2, Thomas Hart 3, Charles Jarvis 4, Samuel Shelver 5, Robert Dyke 6, Charles North 7, Fred Whitfield tenor.

DEATH OF CHELMSFORD'S SUB-DEAN.

The Essex Association has lost an old and valued friend in Canon H. A. Lake, Sub-Dean of Chelmsford Cathedral since 1924, and Rector of Chelmsford for 34 years. He passed away on Monday at the age of 81 years, as a result of an attack of pneumonia.

Canon Lake had always been deeply interested in the Essex Association. He was usually present at the annual meeting, and last year at Chelmsford recalled his experiences at the coming-of-age of the association, and said he was looking forward to the jubilee celebration next Whitsun.

The deceased cleric, when at Cambridge University, was a prominent runner, and had always been a great supporter of Essex and amateur sport.

By a coincidence a report will be found in another column of a peal rung at Braintree on December 29th in honour of Canon Lake's birthday.

PEALS OF MINOR AND DOUBLES.

To the Editor.

Sir,—It is well known to us all that it is no unusual thing for Parliament to pass an Act and for the Courts to decide subsequently that the wording is such that the thing actually done is the direct opposite of the intention of the Legislature. After the interesting and valuable correspondence in your columns it can be a matter of little surprise that the Central Council, late on in the afternoon after a long session, should have fallen into a trap of this kind.

By this time we must be all agreed that it is no easy matter to set down on paper the conditions that we feel should govern these peals. Either we find ourselves banning some that ought to be accepted, or allowing what might with advantage be rejected.

We are all agreed that Mr. Bankes James' arrangement is an advance on what has gone before, and must on no account be banned. Most of us at this date cannot accept his 720's as true and complete. It follows (does it not?) that some modification is essential in the Hereford resolutions.

Apparently we all are agreed that the acceptance of this arrangement of 720's involves the acceptance of Mr. Pitman's 240's. And I will go further. You cannot logically allow these without accepting Mr. Morris' as well. The three stand or fall together.

Personally, I think that a mistake was made in compressing the conditions for a peal of Minor (or Doubles) into a single resolution. At the present time, when splicing and the like is much to the fore, a 'portmanteau' resolution is likely to have the effect of crabbing valuable advance. I would venture to suggest that we put our heads together and try to draw up a series of individual conditions which will carry us some way on the road we wish to travel, and which can be added to subsequently as needs arise.

With this view I venture to put forward the following for criticism, amendment and addition:—

CONDITIONS FOR PEALS.

(1) Compositions of Minor must be in 720's and not in smaller touches. Compositions of Doubles must be in 120's and not in smaller touches. These 720's and 120's are to be true in themselves.

(2) In a peal of Minor no two 720's may be alike in both calling and method. In a peal of Doubles 120's in round blocks will be recognised with inevitable repetition of calling, but there must be as much variety as the nature of the method, or methods, admits with the use of the ordinary calls employed in the method, or methods.

The wording of this resolution will need careful consideration. It is of the utmost importance that a peal of Grandsire Doubles should consist of at least 10 differently called six-scores, and one of Bob Minor of seven different 720's. At the same time it is not easy to provide for this without excluding what we ought to allow.

(3) At the end of each round block, whether this consist of 720 changes of Minor or 120 changes of Doubles (or groups of 720's or 120's), the bells shall immediately go off into the next block.

(This is intended to provide that at the end of a six-score (say) rounds is only to be struck once.)

There may be other points which it would be well to include, but I feel sure that the acceptance of these three conditions in some form or other would go a long way towards standardising five and six bell peals in the way we all desire to do, while the respective merits of Messrs. Pitman's and Morris' arrangements can best be left to the practical commonsense of the Exercise. If they are worth preserving they will continue to be rung (Central Council resolutions or not). If not, they will naturally disappear.—Yours, etc.,

E. S. POWELL.

PROGRESS OR DEGENERACY?

Sir,—The time is ripe for some plain speaking, and I think that most ringers who value the prestige of our Art will endorse and support your editorial attitude.

Will any unbiassed person state what progress is made by the latest 'jiggery-pokery' of the five and six-bell merchants? An attempt is being made to prove that nothing matters so long as it comes right at the end. The abortion put out by Mr. L. Morris, supposed to be a peal of Grandsire Doubles, has four leads missing—3542, 4235, 3524, 2435—the bells run round at the 39th change, and the rest are false. On what basis does any sane person—and I include especially Mr. J. A. Trollope—suggest that such piffle should be accepted as a 'peal'?

If language means anything, a peal on five bells is 120 true changes (NOT 240) from rounds to rounds. On seven bells a peal is 5,040 (not 10,080), and if the Central Council has at any time sanctioned anything different, it has been done by the casuistry of a few, who seem to annually hoodwink both members and chairman.

Many first-class performances on higher numbers of bells have been condemned, and rightly so, because of the repetition of a single change, yet on five bells wholesale falseness is permitted, solely for the glorification of the bob caller, for it is nothing extra to the ringer. It is almost unthinkable that after 300 years of progressive change ringing men of intellect can be found to provide a 'reason' (?) for such retrogression.

Under it, anything can be foisted on the Exercise as a 'peal.' Under it, a 'Bob-and-Swindle' peal is assured before it begins. We have seen enough of that in years past, and we ought to see that

history does not repeat itself. Where falseness does not matter, what else can be banned? Every conductor of experience can surely see what a gateway it opens to fraud. If the object in view is to exercise the minds of the ringers, then Grandsire Doubles, however manipulated, will not do much. There are more methods now in existence than will ever be rung. There is more brainwork in a seven-method peal than in one method, no matter what calling is used. Since it has been stated in your columns that the Central Council endorses these monstrosities, I beg to ask Mr. Alex Young the secretary, to tell us from his minute book when and where such resolution was passed.

W. WILLSON.

MORRIS' ARRANGEMENT OF DOUBLES.

Dear Sir,—I note with pleasure your brief rejoinder to my letter this week, in which you submit to such expressions as, 'In our opinion.' It would be as well to point out that this style of language should have dominated your recent leaders and references to the subject, in view of your complete failure to ventilate partially the outstanding facts and features of the two arrangements of Grandsire Doubles in question.

As I have already proved, both are true and complete in themselves, inasmuch that both contain in their respective 240's each of the possible 120 changes twice, and are therefore, as quoted by Mr. Trollope, legitimate and allowable.

I therefore object to such expressions as 'false' being attributed, as they are certainly both misappropriate and misrepresenting.

LESLIE W. G. MORRIS.

Leeds, Yorkshire.

[The 'outstanding fact and feature' of Mr. Morris' arrangement is that it does not comply with the resolution passed at the meeting of the Central Council at Hereford, which says, 'That peals of Doubles consist of at least 42 true and complete 120's rung without interval and without rounds or any other row being included or rung more than once in any 120....' (The emphasis is ours.) If we have failed to 'ventilate' this, even 'partially,' we are sorry, but we had not previously realised that we had not made it plain. On the contrary, we thought we had put it quite clearly, so that even the meanest intelligence could understand what we meant. However much Mr. Morris may object that the expression 'false' is 'misappropriate and misrepresenting,' it does not alter the fact that, in his 'arrangement,' rounds or other rows are included and rung 'more than once in any 120.' The repetition of rows excludes an equal number of other rows. Therefore, no 120 is true and complete. And if it isn't true, what is it?—Ed. 'R.W.']

SPICED EXTENTS.

Sir,—The reference in your correspondence to the fact that Pitman and Bankes James' peals are upheld by the Council should be amplified by pointing out that spiced 240's, etc., are also upheld—e.g.,—

A QUESTION OF DEGREE.

Dear Sir,—My object in referring to Triples was to point out that repetitions are not there allowed. The reason, of course, is that Triples are always rung in an eight-bell tower, and if a long peal is desired it can be rung in a Major method.

In order to get 5,040 in lesser numbers, such license as repetitions is allowed. It is therefore only a question of degree, whether the license now asked for should be allowed.

The discussion is both interesting and instructive, and it is a pity it did not take place before the last Council meeting. I fear very few of us grasped the point at issue, and if the Council does reconsider the matter it need not be taken as a precedent.

I am afraid I am not worried by the thought of the 'whim of any composer who happens upon some freak composition.' I should be only too glad to see it, and then the Council could adjudicate on its merits.

HERBERT DRAKE.

AN ABRIDGED SYSTEM OF PROOF.

BY 'MINORMANIA.'

[The following is the third portion of a short treatise on Method Proving, a subject thoroughly understood at present by comparatively few. A close study of these articles should help many more ringers to an understanding of this advanced side of the science.]

Earlier in this article we considered four false heads, obtained in the orthodox way, from rows 9-22 and rows 11-24, viz.: (1) 18427365, (2) 14638752, (3) 16724385, and (4) 14658237. We found that 1-2 and 3-4 are related, each to the other, by their proving values, and I stated that 1-3 and 2-4 also are related in a similar way by the positions occupied therein by the lead-end. I should like briefly to explain what was meant.

Actually, this 'proving value' is a double transposition, although this is not apparent because the numbers and positions (at rounds) happen to coincide; but, reading the bells one above another in the two rows, this is how it appears on paper:—

If the FH (1) 18427365 be related to the HF 12345678, then the HF 12345678 is related to the PV 14638752 (FH No. 2), and similarly with the false heads 3-4. False heads 1-3 and 2-4 are related, with the lead-end as the Hidden Factor, thus:—
If the FH (1) 18427365 be related to the HF 14628375, then the HF 14628375 is related to FH (3) 16724385.

To return to our rows 5-26 and 7-28, a similar relationship exists between the false heads obtainable from these four rows, and there should be a direct way of finding the formation of the course ends pertaining to rows 7-28, once we have established those which govern rows 5-26, but, unfortunately, it has proved to be elusive. We obtained the combinations without recourse to rows 7-28, but it seems that these rows will have to be treated in the same manner as rows 5-26, in order to ascertain the formation of the course end rows. This substitutes the production of the combinations by the alteration due to the lead-end, as the four which come from rows 7-28 may just as well be produced in the ordinary way, without recourse to the lead-end at all. The latter has, however, served to illustrate the point, that one pair of rows will determine whether the four rows have a clean proof scale, or not.

I have dealt with rows of like nature herein, because they lend themselves more readily to explanation, being nearer to the orthodox system, and I must leave the final difficulty for the reader to solve, if he wishes to avoid recourse to the upward treatment of rows 5-26 and to both treatments of rows 7-28, in search of the false course ends.

Before touching upon the alternative system, we can summarise what has gone:—

We take, from a symmetrical section, two rows of like nature with the treble in the 'odd' place, and apply Blocks Y-Z downwards. If there is no combination the matter rests there—the whole section is 'clean.'

If there are one or more combinations from this downward application, we trace the formation of the false course end, or ends. The upward treatment will bring reversed combinations in certain false courses, which probably will be identical.

It will then be necessary to deal with the other two rows of like nature, which have the treble in the 'odd' place, in precisely the same way.

If the section is asymmetrical, repeat the above for the rows with the treble in the 'even' place. It may happen, in such a section, that, while no combination is found in the treble's 'odd' place, several may come from the rows with the treble in the 'even' place; or vice versa.

THE ALTERNATIVE SYSTEM.

The system which deals with rows of opposite natures, and which, for several reasons, I much prefer, I have termed the 'Half-Lead Practice,' because, in 90 per cent. of the sections, these rows will appear in the same half of the lead, and only the half section (plus the lead-end row) will be necessary if the section happens to have a clean proof scale. If Operation B reveals combinations in the pair of opposite nature rows, the other two rows in the lower half of the lead will have to be produced, by transposition from the lead-end or some other means, in order to establish the formation of the false course ends therefrom; unless, of course, the reader discovers the relationship existing between the false course ends from four rows. In this event the alternative system will be truly 'half-lead practice.'

Operation B, here, will not be quite so apparent as in the other, but the remainder is more simple and just as effective. I shall deal very briefly with the subject, in view of the detailed explanation that has gone, because it more or less follows, and shall refer only to symmetrical sections, it being understood that an asymmetrical section will exactly double the work. The same section is dealt with as that in the full-lead practice, viz., that which covers rows 5-26 and 7-28.

OPERATION B.—Collate two rows of opposite natures, and apply Blocks Y-Z for coursing pairs in positional pairs as before, but with this difference: The positional pairs will be represented by the lead-end numbers which replace them, the coursing pairs will be as usual, and, when a combination has been found, the positional pair quoted therein will be a proper pair belonging to Blocks Y or Z, and which will be indicated by the substituted lead-end numbers.

The following table, which is standard, is useful for Operation B. It indicates the pairs which any lead-end will substitute for the positional pairs of Blocks Y-Z.

If the lead-end of a method be:—	The substituted pairs will be:—						
	Block Y.			Block Z.			
	2/3	3/5	5/7	7/8	2/4	4/6	6/8
12436587	2/4	4/6	6/8	8/7	2/3	3/5	5/7
13254768	3/2	2/4	4/6	6/8	3/5	5/7	7/8
14628375	4/6	6/8	8/7	7/5	4/2	2/3	3/5
15372846	5/3	3/2	2/4	4/6	5/7	7/8	8/6
16847253	6/8	8/7	7/5	5/3	6/4	4/2	2/3
17583624	7/5	5/3	3/2	2/4	7/8	8/6	6/4
18765432	8/7	7/5	5/3	3/2	8/6	6/4	4/2

The procedure is thus:—

Rows. The lead-end 14628375, according to our table, substitutes 4/6, 6/8, 8/7, 7/5 for the positional pairs of Block Y; and 4/2, 2/3, 7/8 + 5.2.1.7.8.3.6.4. 3/5 for Block Z. Observe these pairs in row 5, and under them, in row 7, search for

any proper coursing pair belonging to the block. Thus: 4/6 in row 5 have 46 under, which are the wrong way for Block Y; similarly with 6/8 and 8/7. The 7/5 have 72 under, the 4/2 have 45 under, and these are not coursing pairs. But 2/3 in row 5 have 53 under, and 3/5 have 32 under, both coursing pairs being the correct way for Block Z. Here, then, we have two combinations, 53 in 2/3 and 32 in 3/5; but 2/3 and 3/5 are the lead-end symbols which are replacing the proper positional pairs of 4/6 and 6/8 respectively. Thus the proper combinations are 35 in 4/6 and 23 in 6/8, from the downward treatment of these two rows.

Now exactly repeat this for the upward treatment. (The reversal of the combinations does not apply here, because we are dealing with a 'cross' collation; it comes later, as will be shown.) This produces two combinations which happen to be identical with the first two, viz.: 35 in 4/6 and 23 in 6/8. Incidentally, these two treatments (downward and upward) are very easily done together. After a time it becomes natural to search both rows at once, for both positional and coursing pairs. For instance, we can look for 4/6 in row 5 and observe 46 below, and, vice versa, 4/6 below and observe 46 above; and so on.

We can ignore, for the moment, the four combinations which should come from the other pair of rows (viz., 26-28), and can trace the formation of the false course ends.

(To be concluded.)

FUNERAL OF MR. H. H. CHANDLER.

The funeral of Mr. H. H. Chandler, of Hillingdon, whose death was reported in our last issue, took place on Thursday, January 3rd. The interment took place at Hillingdon Cemetery, the Vicar of Hillingdon (Rev. H. J. Kiteat) officiating.

As the cortege passed through the village, the bells of St. John's were rung fully muffled to touches of Grandsire Caters. The ringers were: Mrs. F. W. Goodfellow 1, F. W. Goodfellow 2, A. R. G. Twinn 3, F. Corke 4, J. J. Pratt 5, F. G. Baldwin 6, J. H. Lucas 7, A. H. Fulwell 8, W. Honor 9, F. Smith 10. Among the large company present at the graveside were ringers from Hillingdon, Uxbridge and Ealing. The ringers from the two former places also sent wreaths.

At the conclusion of the burial service four ringers, one at each corner of the grave, rang, as a last farewell, a course of Grandsire Triples on handbells: F. G. Baldwin 1-2, A. H. Fulwell 3-4, F. W. Goodfellow 5-6, F. Corke 7-8. And so he was left within sound of the bells he loved so well. R.I.P.

WARNHAM RINGERS' LAST TRIBUTE.

The Warnham (Sussex) band met on Thursday, January 3rd, to pay their tribute of respect to their old friend and erstwhile conductor, Mr. H. H. Chandler. Touches of Grandsire and Oxford Bob Triples were brought round, and also a touch of Canterbury Major, in which method Mr. Chandler, called the first peal and also the greatest leifth. The ringers taking part were J. Stanford, T. Branch, J. Cook, P. Charman, W. Hooker, J. Branch, W. Pettifer, A. Charman and Wal Charman.

OLD COLLEGE YOUTH'S DEATH.

The death of Mr. Thomas Coxhead occurred recently at York Street, Lambeth, at the age of 72 years. He was born at a village near Aldbourne, Wilts, and his knowledge of horses secured him employment with the London and South Western Railway Company. For over 44 years he was a horsekeeper at the Nine Elms Depot. Six years ago he retired on a pension of 17s. a week, but when he reached 70 years of age the company reduced it to 7s., as he was then entitled to the old age pension.

Deceased was at one time a regular ringer at St. Saviour's, Southwark, with the local band, but when the bells were relung alterations were made, and the ringers disbanded, members of the choir being instructed to ring in their places. The late Mr. Coxhead rang many of the tenors behind to peals in South London and other places, and was always ready to oblige for a peal. He was an old member of the College Youths, and also a member of the St. James' Society and the Waterloo Society.

LIGHTING THE TOWER.

To the Editor.

Sir,—When the bells at St. Augustine's, Kilburn, were rehung last year we reorganised the lighting very much on the lines set out by your correspondent re Truro, and have found the central light over the bell frame to be of very great convenience indeed. The flex of the central light in the ringing chamber passes through a hole in the ceiling, and is fixed with an ordinary counterbalance weight to the roof of the intermediate chamber. This enables the height to be regulated and the lamps to be lowered to be replaced without it being necessary to erect a scaffold.

It is interesting to know that the two towers, which are replicas of one another and such splendid examples of Pearson architecture, are lit in the same way.—Yours, etc.,

E. M. ATKINS.

'AN IDEAL ARRANGEMENT.'

Dear Sir,—I would suggest the following as being an ideal arrangement for the electric light installation for Ufford tower:—

The lights in the staircase, between the ground level and the ringing chamber, should be controlled by two two-way switches, one in the bottom and one at the door of the ringing chamber. This will enable the lights to be switched on at the bottom, and off at the top, or vice versa. The remaining lights in the staircase can be switched off from a switch placed just outside the ringing chamber door.

The lights in the ringing chamber should be controlled by a switch inside the ringing chamber, and that in the clock room by a switch in the clock room, and that in the bell chamber by a switch in the bell chamber.

These lights should be fixed lights, and of sufficient wattage to provide adequate illumination. It may be necessary to have, in addition, a portable light in both bell and clock chambers, and for this purpose a separate switch and plug should be placed in a convenient position in each chamber.

Regarding the lights for the ringing chamber, if the ceiling is white in colour, a 100 watt lamp with a bowl shade will probably give very satisfactory illumination, but in any case a very satisfactory light will be obtained by using a 100 watt pearl glass light with a Holophane shade, and situated in the centre of, and close to, the ceiling.

As regards the installation itself, I do not recommend one using lead-covered or metal sheathed cable but prefer the surface wiring system of the Macintosh Cable Company, Ltd., which does not require any earthing or bonding, and can be installed with a maximum neatness.—Yours faithfully,

P. W. CAVE.

A STAFFORDSHIRE PEAL RESTORED.

The peal of eight (tenor 14 cwt.) at St. Chad's Church, Pattingham, near Wolverhampton, has been recently rehung on ball bearings and overhauled by Messrs. Gillett and Johnston, of Croydon.

The oak frame, which was loose in its members, has been tightened, while the foundation beams have been anchored to the walls by means of steel channels.

The bells were rung once more for Christmas, and the 'go' is all that can be desired.

LONDON COUNTY ASSOCIATION.

NORTHERN DISTRICT.

A meeting of the Northern District of the London County Association was to have taken place at St. Sepulchre's, Holborn, but owing to the death of the Vicar there was no ringing at this church. It was, however, decided to apply at St. Andrew's Rectory for permission to ring on the fine ring of eight there instead, and although both the Rector and his wife were absent, the vergers were able to give the necessary permission. On hearing the good news, the members soon found their way into the tower. The bells were raised at about 4 p.m., and some good ringing followed, although short touches were the order of the day in order to give all present a 'pull' in the limited time at disposal. The methods were varied, Grandsire, Stedman, Bob Major, and Cambridge being successfully brought round, and at 6 p.m. the bells were lowered.

The business meeting was very short, the next meeting of the district being due to take place on Saturday, January 19th, at All Saints', West Ham (see notice column).

A very hearty vote of thanks was accorded to the church officials at St. Andrew's for the kindly way in which they gave permission to ring there. The attendance numbered about 25, and would doubtless have been greater if the ringing had been at the other tower, as many went away from St. Sepulchre's without visiting St. Andrew's.

The officers of the district wish, through the medium of 'The Ringing World,' to tender their very sincere apology to all those members and others who waited outside St. Sepulchre's, and, concluding that there was 'nothing doing,' went away disappointed, although, at the same time, they hope that they will realise that the circumstances were utterly unforeseen, and could not have possibly been helped.

RING OUT THE OLD.

SOUTH WEALD, ESSEX.—On December 31st, just before midnight, with the bells half-muffled, a quarter-peal of Grandsire Doubles (1,260 changes) in 48 mins., with ten different callings: F. Everitt (first quarter away from tenor) 1, J. Harridge 2, F. Wood 3, G. Miles (conductor) 4, A. Benbow 5, E. C. B. Sharplin 6. First quarter-peal on the bells by an entirely local band. After midnight, 360 changes by the same band with the bells open.

HAYES, KENT.—On Monday, December 31st, 720 Wells Surprise Minor: T. R. Flint 1, F. Keech 2, J. Hack 3, O. Gilbey (conductor) 4, H. Brown 5, J. Brown 6. First in the method on the bells and by all the band.

ARKSEY.—On New Year's Eve, 1,344 Grandsire Triples in 48 mins.: F. Garner 1, E. Cooper (conductor) 2, G. Clarke 3, H. Arrand 4, Jos. McCluskey 5, Jas. McCluskey 6, T. Bysouth 7, T. Revill 8. First quarter on an 'inside' bell by T. Bysouth, who is 74 years of age.

SOUTHGATE.—On December 31st, with bells half-muffled for the old year, a quarter-peal of Stedman Triples in 52 mins.: Gilbert Slater (first quarter-peal on an inside bell) 1, J. Armstrong (conductor) 2, W. Pickworth 3, D. Ovington (first quarter-peal in the method) 4, J. E. Miller 5, H. Miller 6, S. Wade 7, A. G. Crane 8.

SEALE, SURREY.—The bells were rung half-muffled for a quarter of an hour before midnight on December 31st to ring out the old year. To ring in the new year and to celebrate the first anniversary of the formation of the Guildford Diocesan Guild, a quarter-peal of Minor consisting of 720 Kent Treble Bob and 540 of Bob Minor was rung with the bells open, by: E. Gardner 1, B. Court (first 'inside') 2, H. Gardner 3, J. Beagley 4, C. Newman 5, E. Beagley (conductor) 6.

BICESTER RINGERS' SUPPER.

The Bicester bellringers sat down to their annual supper on New Year's Eve at the Rose and Crown, Bicester. The Vicar presided, and there were also present Messrs. A. E. Clifton, T. Clifton, H. Hatfield, W. Scarrott, J. Evans, B. Cox, F. Neale, W. Farmer, and the vergers, Mr. H. J. Walker.

After supper the loyal toast was honoured, and the company spent the remainder of the evening in community singing and touches on the handbells until 11.30.

An adjournment was then made to the church tower for muffled ringing until midnight, after which the bells were rung open until 12.15, and thus ended a very enjoyable evening.

MALDON RINGERS ENTERTAINED.

The ringers of All Saints', Maldon, were entertained to supper on New Year's Eve by Mr. H. J. Mansfield, one of the All Saints' company.

The programme commenced with the usual evening practice, when five methods were rung by members of the band.

The supper took place at the home of Mr. Mansfield, where thirteen sat down to a sumptuous feast. Despite the supposed ill-luck of the number, the evening was successfully and enjoyably spent, the time passing all too quickly. Some gramophone records of bellringing were heard, and comic songs were rendered by Mr. J. H. Waldeck and Mr. J. Amos. Mr. W. Chalk also entertained with a recitation of his own poetry. After some handbell ringing, the company walked to the tower to ring out the old year and ring in the new. For this purpose 672 changes of Grandsire Triples were rung by E. Johnson, S. E. Linnett, W. Chalk, J. Amos, Miss A. E. Waldeck, H. J. Mansfield, F. Chalk and F. Ford, Mr. P. Chalk conducting.

A more fitting finale to the old year, or a more happy prelude to the new, would be difficult to find. The hearty thanks of the ringers are due to Mr. and Mrs. Mansfield for their hospitality, and the company unite in wishing them a very happy and prosperous new year.

WEST HALLAM BELLS.

The new bells at West Hallam, Derbyshire, have been hung in the tower, and thus complete the octave. They are to be dedicated by the Bishop of Derby on Sunday, January 20th, at 3 p.m. The tower will be at the disposal of visiting ringers on Saturday, January 26th, from 2.30 to 8 p.m.

VETERAN CLERICAL RINGER DEAD.

FORMER TREASURER OF THE GLOUCESTER AND BRISTOL ASSOCIATION.

The death has taken place at Cheltenham of the Rev. Henry Courtney Courtney. Mr. Courtney was in his 92nd year, and had been in orders 66 years. From 1902-3 he was curate of St. Stephen's, Bristol. In 1904, he became curate to Dr. Wilkins, with the charge of Redland Green Chapel, where he worked for 15 years.

The deceased clergyman was well known by the older generation of ringers. Mr. Courtney went to Bristol from Dunster, where he had rung many peals under Mr. C. F. Winney's conductorship. In all he had rung 33 peals for the Bath and Wells Association. His first peal for the Gloucester and Bristol Association was rung at St. Stephen's on January 29th, 1896, and for that association (of which he was hon. treasurer in 1901-1902) he rang seven peals, his last being Stedman Triples at Thornbury on August 20th, 1904, which was conducted by the late Rev. F. E. Robinson.

WORPLESDON RINGER'S DEATH.

Mr. Reginald George Tickner, of Worplesdon, Surrey, whose death we briefly recorded last week, was 27 years of age, and the youngest son of Mr. and Mrs. James Tickner, of Worplesdon. He was playing football for Worplesdon on the Saturday before Christmas, was taken ill on Sunday, and died the next day.

Mr. Tickner was a native of Worplesdon, and was employed as an office porter at the railway station. In addition to being a ringer, he was very popular as joint secretary of the Men's Club and a playing member of the local football and cricket clubs. The funeral took place on Saturday week, when members of the cricket, football and men's clubs acted as bearers. The Guildford Diocesan Guild, of which deceased was a member, was represented by Messrs. G. Hazelden (District Ringing Master), W. Melville (district assistant secretary), W. Robinson and C. N. Burdock. As the funeral cortege approached, the bells were rung fully muffled, and at the conclusion of the service handbells were rung over the open grave. Afterwards on the church bells the 'whole pull and stand' was rung.

The deceased will be greatly missed in the belfry, for he was a competent change ringer, particularly on six bells, and a regular member of the service band.
