RHYTHM

From 'The Irish Bell News'

THOSE Irish readers who had the privilege and honour of listening to or ringing with the members of the Central Council no doubt were struck by the perfect striking by the various teams. As the various towers will be getting into their stride after the summer holidays, in preparation for the competitions, some notes on striking will not be out of place.

Perfect rhythm necessitates an equal space between each pair of bells. There is no other way to achieve this than by listening to one's own bell striking. There are many ringers, including some of the most prominent ringers, who are unable to pick out their bell when ringing. Having picked out your bell, it is necessary to use your sight and to estimate the time-lag after the bell you are following, in order that the bell will strike at the correct moment. To enable that to be done the correct pull must be given to the rope to enable the bell to swing to the correct height and to permit the clapper to fall at the right part of the bell's swing, to strike the bell also at the correct degree, whilst the bell swings up again.

These three faculties are all necessary in achieving perfect rhythm. They apply equally to a perfect ring of bells and to a ring which has odd-struck or difficult running bells.

Let us now examine the time element. For a ring of eight bells of, say, 20 cwt. tenor, the average number of changes or rows is 24 per minute, for simplicity. The time for ringing every two rows, i.e., 'hand' and 'back,' is 5 seconds. There are 16 notes in each whole-pull, plus a gap for the open-handstroke lead. This gap is the equivalent of one bell, or a silent 17th note. The time between any two bells, except the tenor at back and treble at hand, should, therefore, be about 0.3 sec. Assuming 0.3, therefore, as the actual time interval, this would give an open handstroke lead of 0.6 sec.—in other words, the gap between bells should be slightly less than $\frac{1}{3}$ sec., and at treble handstroke lead of less than $\frac{2}{3}$ sec.

To the 'layman' these times seem incredible to achieve, yet the finalists of the Murphy Cup very nearly achieved it. The 'experts' from England generally did achieve it. Supposing all bells were ringing in perfect rhythm, except one bell, and its time varies up to 0.1 sec. or 33 $\frac{1}{3}$ % of the

time element. The time of ringing would, therefore, be, assuming No. 5 was the culprit: Treble 0.3 sec., second 0.3, third 0.3, fourth 0.2, fifth 0.4, sixth 0.3, seventh 0.3, tenor. It will be seen that the fifth is too close to the fourth and the sixth has a big gap after No. 5.

We are now talking in terms of 1/10th sec.—such times are big for bell-ringers. If No. 5 ringer is 3/10th sec. out of time, we will get something like this: Treble 0.3 sec., second 0.3, third 0.3, fourth and fifth 0.6, sixth 0.3, seventh 0.3, tenor. Here we have a clash of fifth on fourth and a gap equivalent to two bells for the sixth or if the fifth holds up to the extent of 3/10th sec. we get this: Treble 0.3, second 0.3, third 0.3, fourth 0.6, sixth 0.3, seventh 0.3, tenor. The sixth if it maintains its time has to clash with the fifth, but what generally happens is for the sixth to pull in if the fifth is too close to the fourth and hold up if the fifth is too slow, with the result that the rhythm throughout is upset.

In the case of the open handstroke lead, we should, for perfect rhythm, get this: Tenor (back) 0.6, treble (hand) 0.3, second 0.3, third 0.3, fourth 0.3, fifth 0.3, sixth 0.3, seventh 0.3, tenor 0.3, treble (back). If the treble is unsteady, even up to 0.2 sec., its lead will either be too quick or too open. The rhythm is generally upset throughout because the second will try to cut in after treble where it is too close to tenor or to hold up if the lead is too open, again upsetting the rhythm.

The treble ringer is a member of the recently-formed company of the restored church at Little Horkesley.

SOUTHWELL DIOCESAN GUILD**Mansfield District's Good Start**

The first meeting of the newly-formed Mansfield District was held at Edwinstowe on July 26th with 50 ringers and friends attending from East Markham, Bolsover, Daybrook, Nottingham, Newark, Gamston, Greasley, Holme Pierrepont, Mansfield and Warsop, with the local band.

Ringing commenced at 2.30 p.m. and the bells were kept going to a variety of methods until an excellent tea was taken in the Church Hall at 5 p.m. kindly provided by the local ladies.

At the short business meeting, the chair was ably taken by Mr. S. W. Fossey, Mansfield District chairman, and 16 new members were elected to membership of the Guild. By kind invitation of Mr. B. A. Sollis, hon. secretary of the East Derbyshire and Notts Association, it was decided to hold the next meeting as a joint meeting with that Association at Sutton-in-Ashfield on October 25th. The Bell Fund collection realised the sum of £1 3s. 0d. Mr. H. T. Rooke, of Warsop, was elected Ringing Master. Votes of thanks were accorded the Vicar of Edwinstowe for the use of the bells and the ladies for providing such an excellent tea.

Ringing again took place after tea until 7.30 p.m. when the ringers joined the Rev. Mr. Pickles in saying Evensong. Ringing followed until just after 9 p.m. when the bells were lowered in peal. Methods rung during the day included rounds for the learners, Grandsire and Siedman Doubles, Plain Bob, Double Court, St. Clement's, Oxford Treble Bob, Kent Treble Bob, Killamarsh Treble Bob, Oswald Delight, Cambridge Surprise, Norwich Surprise and Annable's London Surprise. D. H. R.

THE SUFFOLK GUILD**Saxmundham District**

A meeting of the Saxmundham District was held at Peasenhall and Yoxford on July 12th. The attendance was low, but, thanks to visitors, the bells were kept ringing until almost 9 p.m. with many methods being rung at both towers. The visitors included Mr. F. W. Lalk, of Hunts, Mr. and Mrs. Marriott, of Ipswich, Mr. Alan Clarke, of Grundisburgh, and one from Waltham Abbey. The Rev. Mr. Thickett took the service at Peasenhall and gave an interesting address. The Rector's wife, Mrs. Thickett, kindly arranged and provided tea at the Rectory. Next meeting: Tunstall with Blaxhall, September 20th. A. R. B.

LAVENHAM OUTING

Ringers from Lavenham and District held their annual outing into Hertfordshire on July 19th.

The morning ringing was at Bennington and St. Peter's, Hertford, after which the party did ample justice to the lunch at the White Hart. This was followed by further ringing at All Saints', Hertford.

A short run brought the party to Bengoe to enjoy ringing on the light eight. After partaking of tea, also at the White Hart, Hertford, tracks were made for the last tower of the day, Epping. Methods rung were Grandsire Caters, Stedman and Grandsire Triples, Plain Bob, Double Norwich, Kent, Oxford and Cambridge Surprise.

Many thanks are due to incumbents and ringers who met us, also to Mr. F. Mortlock for arranging such a happy day.

M. T. S.

LETTERS

(See also page 515)

SCIENTIFIC TRIPLES

Dear Sir,—I would like to offer my congratulations to Mr. Robin G. Leale and his band, for accomplishing a peal of Scientific Triples at Hampton recently. From a mental point of view, this is undoubtedly the acme of Triples possibilities, especially in view of the fact that, when the method was first published by John Carter in 1908, it was regarded as too hard to ring! His original composition was also a harder one, and liable to put anyone off! Mr. A. J. Pitman is also to be congratulated on producing an easier one.

There seems little left to do now in Triples ringing, except to go to a meeting and hear a well-struck touch of Grandsire.—Yours sincerely,

A. PATRICK CANNON.

Dorking, Surrey.

TUNES ON HANDBELLS

Dear Sir,—I agree that a book on handbell tune ringing would be very welcome, especially if it could start with an octave of bells and then 10, 12, 15 and on to the highest numbers. There must be many systems in use, from one bell in each hand, using figures to table ringing from music with over 100 bells.

I have access to a book on table ringing, also a catalogue of handbell music by the late William Gordon, of Stockport, but I expect they are now both out of print and would not be economical to reprint.

However, a collection of systems such as used by Messrs. G. E. Symonds, A. D. Barker, F. Sharpe, H. Chaddock and others could be made, also figured tunes for various numbers, so that a choice could be made to suit requirements.—Yours faithfully,

St. Albans.

H. V. FROST.

A loss to the East Grinstead Guild is the impending departure of its chairman, Mr.

S. G. Ponting, from Ticehurst to Milford, Surrey, where he has been appointed headmaster of the local school. Mr. Ponting came to Ticehurst nine years ago and there learnt to handle a bell and his change ringing at Wadhurst. He quickly progressed through plain methods to Surprise Major. Mr. Ponting will be missed particularly by local peal ringers as he was always willing to take part and provide transport for others.

The ringer of the seventh in the peal at Thorpe Bay, Essex, on July 5th was Mr. Frederick J. Cullum and not Mr. Frederick E. Cullum, as stated.

Comments a correspondent in sending a quarter peal from Devon: 'Our joy knew no bounds as we crashed into rounds.'

Mr. Joseph Thornley of Farnworth, Lancashire, would like to thank Mr. and Mrs. Harold Rogers, of Isleworth, Middlesex, and other London ringers (all Guilds) for a very warm welcome extended to him during his recent holiday in the London area.

Apropos the stained glass window at Sharrow, Yorkshire, Mr. H. V. Frost writes that in the belfry of St. Peter's Church, St. Albans, there is a stained glass window depicting bells and ringers recording a victory peal in 1945. A picture of this window was reproduced in 'The Ringing World' of May 9th, 1952.

After an absence from the art for about 14 years, Mr. and Mrs. L. Wright rang in two 720's of Plain Bob Minor for morning and evening service at St. Mary's, Rougham, Suffolk, on July 27th. This arose not only from the strong persuasions of the conductor, Mr. R. Rose, but because their 14 year old daughter wants to take the right course and learn to ring.

BELFRY

GOSSIP

Those friends of Mr. and Mrs. R. G. Edwards who have enjoyed hospitality at 140, Beeches Drive, Erdington, Birmingham, will be sorry to hear that Mrs. Edwards is at present in Birmingham General Hospital, after having been knocked down by a car. We are pleased to hear that she is making good progress, and we all wish her a speedy recovery.

The surnames in a quarter peal rung at Cannock, Staffs, on July 22nd all began with a letter 'B.'

Churches dedicated to St. Lawrence should note that Sunday, August 10th, marks the 1,700th anniversary of his martyrdom, writes Mr. R. Collins. His church, St. Lawrence's, Chobham, has no less than 11 lady ringers, all residents and communicants.

Ringers from London, Kent and Nottingham who have been holidaying at Stratton and Bude, rang quarter peals at Stratton and Pyworthy and 'grabbed' many new towers, Mr. M. F. Oakshett, on behalf of the band, desires to thank local ringers and incumbents for permission to ring and especially Charles Sangwin and Harry Stacey, who have the amazing ability in being able to get that extra tower at a moment's notice.

Mr. Peter Crook, of Bolton, has left England for a four month holiday in Ontario, Canada. Mr. Crook recently lost his wife and has gone to visit his married daughter, Mrs. G. Annie Paine, and her three children. Before emigrating to Canada Mrs. Paine, as Annie Crook, rang many peals for the Lancashire Association and conducted several. She also took part in a Father and Daughters peal of Grandsire Caters at Manchester Cathedral some years ago. Mr. Crook also has a son, Peter, jun., who is a ringer. Father and son are both members of the National Police Guild of Bellringers.

WIDENING THE SCOPE OF BELL MUSIC IN CHANGES

THE question, 'How many rings of bells have you in your tower?', would seem to most ringers, no doubt, a bit odd; and a typical answer might be, 'I don't know what you mean, but we've got a nice ring of eight.' But if to this came the reply, 'Ah, eight bells? Then you've got at least twenty-three rings!'—it's pretty certain it would be regarded as some sort of a poor joke. Nevertheless it would be, in a sense, quite true; and not merely theoretically so; because the realisation of these possibilities in ringing can be interesting musically as well as useful practically; at least for all other than peal ringing.

The possibilities arise from two factors—the attendance of fewer ringers than bells in the tower, and the nature of the occasion of ringing—joyous or sad; and these considerations are quite apart from the cases where a 'semitone-bell' has been added to a tower ring to provide a 'light eight' or 'minor eight,' etc.

As to the first—for example, in meeting short—it is important to realise that the necessarily silent bells need not be those at the upper end of the ring. Rings of rather more interesting groups of notes may be derived by careful selection; and in some the retention of the tower treble may be found to be an advantage. Even in a 5-bell tower selections of rings of less than five bells are possible, it being assumed that ringing will proceed with as few as four attending. Depending on the nature of the occasion at least one such selection might be considered preferable to the ring of five. Of course, the more bells in the tower-ring, the greater the possibilities. The table below gives some of the possible selections on rings from five bells upwards. It should stimulate interest in appropriate circumstances. The 'Code' or number-letter in the left-hand column indicates, by the figure, the number of bells employed, and identifies, by the letter, the particular selection for that number of bells. (If a selection omits bells, i.e. there are gaps in the normal sequence, the ring is referred to as 'open'.)

As to the second factor—occasions of mourning or memorial—it is possible to select rings in a minor mode, according to the number of ringers available. Such rings are distinguished in the table by a star against the code. They do not necessarily furnish the exact notes of a minor scale, but they do yield cadences with a distinctly nostalgic atmosphere, and sometimes of an almost haunting sadness.

The number of selections included in the table may seem surprisingly high, but, even so, they have been chosen for their musical characteristics, which become the more apparent when changes are evolved. It is recommended that 'rounds' of the various rings be tried out on, say, a piano keyboard, or tapped on handbells. Those finding most favour could then be marked for trial in changes. Some selections, particularly on the higher numbers, may be considered to yield surprisingly attractive effects as the course ends roll up. But every selection or 'ring' has its characteristic tone effects.

To avoid possible selection-error in using the table, which, to save space, has not repeated in any one group the selections set out in the preceding group, it should be borne in mind that if a selected ring is taken from a bell-group of other, i.e. lower, number than in the tower itself, then the bell numbers given in the table must be adjusted accordingly. They must be regarded as 'from the back,' since the highest number always refers to a tenor bell. For example, if, in a six-bell tower, only four ringers turn up, and it is decided to select a ring from the 5-bell group, say, No. 4A, where the bell numbers are given as '1345,' then these numbers, applied in the six-bell tower, become '2456.'

TO USE THE TABLE

Refer to the group appropriate to the tower ring, and, if desired, from there to lower groups. For example, if in an 8-bell tower, refer to Group III primarily. Pick out the code number of the number of bells to be rung, either in this or in previous groups, as determined by the number of ringers (and by bells in the case of broken ropes or stays) available. In the present case suppose a requiem touch is to be rung and only seven ringers are present, then either of rings 6H

(group III) or 5E (group II) may be selected for the particular purpose. But if all ringers are to be used, and music in a minor mode is not the prime consideration, then any of the major-6 or major-7 rings in group III may meet the case.

In practice, it may be helpful to post up in the ringing chamber as much of this table of rings as is appropriate to the tower ring; and to refer to it whenever the full ring cannot be employed. Variety in musical effect is then always available.

TABLE OF SELECTIONS OF RINGS—FIVE BELLS AND UPWARDS

GROUP I: 5-BELL TOWERS (FOUR RINGS)

Code No.	Kind of Ring	Selection	Bells used	Methods effectively rung
4A	Open Major-5	Omit 2nd	1345	Singles covered. Minimus.
4B	Major-4	Back Four	2345	
4C*	Minor-4	Front Four	1234	As "above"—sad occasions.
5A	Major-5	All	12345	Singles with 4/5 dodging. Minimus covered. Doubles.

GROUP II: 6-BELL TOWERS (NINE RINGS)

Of these nine rings, four may be selected from or upon the back five bells of the tower ring, being those given in Group I above, where the numbering is, of course, as for a 5-bell tower. The other five rings are as under:

Code	Ring	Selection	Bells	Class of Method
5B	Open Major-5	Omit 2nd.	13456	As in 5A in Group I
5C	Open Major-5	Omit 3rd.	12456	
5D	Open Major-5	Omit 4th.	12356	
5E*	Minor-5	Front Five	12345	As above—sad occasions.
6A	Major-6	All	123456	Doubles covered. Minor.

GROUP III: 8-BELL TOWERS (TWENTY-THREE RINGS)

Of these 23 rings, 9, as given above in Group II, may be had from the back six bells of the tower ring. The other fourteen rings are as follows:—

Code	Ring	Selection	Bells	Class of Method
4D	Major-4	Front 4	1234	Singles covered. Minimus.
5F	Open Major-5	Omit 3 5 7	12468	As in 5A in Group I.
6B	Open Major-6	Omit 2 and 3	145678	Doubles covered. Minor.
6C	Open Major-6	Omit 2 and 4	135678	
6D	Open Major-6	Omit 3 and 5	124678	
6E	Open Major-6	Omit 4 and 5	123678	
6F	Open Major-6	Omit 3 and 6	124578	
6G	Open Major-6	Omit 5 and 7	123468	
6H*	Open Minor-6	Omit 2 and 8	134567	As above—sad occasions.
7A	Open Major-7	Omit 2	1345678	Minor covered. Triples
7B	Open Major-7	Omit 4	1235678	" " non-covered.
7C	Open Major-7	Omit 5	1234678	" " " "
7D	Open Major-7	Omit 6	1234578	" " " "
8A	Major-8	All	12345678	Triples covered. Major.

GROUP IV: 10-BELL TOWERS (FIFTY-NINE RINGS)

Of these 59 rings, 23, as in Group III, may be had on the back eight bells of the tower ring of ten (adjusting the bell numbers accordingly). A further, and quite different, 9 rings, as given in Group II above, may also be had from the front ring of six of the tower ring of ten. The remaining 27 rings are as follows:—

Code	Ring	Selection	Bells	Class of Method
5G	Open Major-5	Omit 24579	13680	As for 5A in Group I
5H*	Open Minor-5	Omit 13460	25789	" " " "
5J*	Open Minor-5	Omit 25790	13468	" " " "
6J*	Open Minor-6	Omit 1340	256789	" 6A " " II
6K*	Open Minor-6	Omit 1460	235789	" " " "
6L*	Open Minor-6	Omit 1470	235689	" " " "
6M*	Open Minor-6	Omit 1790	234568	" " " "
6N	Open Major-6	Omit 2368	145790	" " " "
6O	Open Major-6	Omit 2457	136890	" " " "
6P	Open Major-6	Omit 2468	135790	" " " "
6Q	Open Major-6	Omit 2479	135680	" " " "
6R	Open Major-6	Omit 2579	134680	" " " "
6S*	Open Minor-6	Omit 3790	124568	" " " "
6T	Open Major-6	Omit 4579	123680	" " " "
6U*	Open Minor-6	Omit 4790	123568	" " " "
6V*	Open Minor-6	Omit 5790	123468	" " " "
7E*	Open Minor-7	Omit 140	2356789	" 7A " " III
7F	Open Major-7	Omit 248	1356790	" " " "
7G	Open Major-7	Omit 346	1257890	" " " "
7H*	Open Minor-7	Omit 790	1234568	" " " "
8B	Open Major-8	Omit 24	13567890	" 8A " "
8C	Open Major-8	Omit 36	12457890	" " " "
8D*	Open Minor-8	Omit 40	12356789	" " " "
8E	Open Major-8	Omit 45	12367890	" " " "
8F	Open Major-8	Omit 47	12356890	" " " "
9A	Open Major-9	Omit 4	123567890	{ Triples covered by 8/0.
				Major covered. Caters.
				Caters covered. Royal.
10A	Major-10	All	1234567890	

(Continued overleaf)

HANDSWORTH RINGERS VISIT SHROPSHIRE

On July 19th a party of thirteen ringers from St. Mary's, Handsworth, Birmingham, arrived at Claverley on the first stage of their yearly outing. The fine tone of the pleasant eight here made a good start to the day and Grandshire and Stedman Triples were duly brought round. Before going on to Bridgnorth the party visited Worfield, where the long draught tends to obscure the fact that the six bells certainly go well enough, with care. Here Plain Bob Minor and the inevitable Grandshire were cautiously rung.

The first tower at Bridgnorth was St. Leonard's, which has a truly magnificent 18 cwt. ring of eight. The noble tone of the bells, the pleasant and spacious ringing chamber and the welcome of Mr. H. G. Thomas combine to make this the sort of tower one could ring in all day. Despite the encouragement the bells provided, Bob Major could not be induced to sort itself out. The other Bridgnorth tower was the beautiful church of St. Mary Magdalene, which has a light eight and a tiny ringing chamber. It was very kind of the Rector of St. Mary's to compliment us on our ringing, and, recovering from surprise, we pushed on to Chelmarsh and ate a picnic lunch before ringing at St. Peter's.

The bells here proved to be a pleasant country six which only need to be rung more often to be very good, and several Doubles methods were rung. After this we visited Highley, which yielded a bumpy and intriguing six which delighted by their novelty. The fourth and fifth are the original 14th century bells, the fourth particularly being a fine bell, and Kent Minor.

The next tower was Cleobury Mortimer which proved to be a medium-weight six and which went well despite having no local band to ring them. The Vicar is very keen to hear his bells rung and visiting bands are most welcome. By this time everyone was quite used to ringing all sorts of bells and the competition to conduct Grandshire Doubles was much keener here than in the home tower.

After a high tea at Cleobury we went on to Rock, the last tower of the day and the only one of the trip in Worcestershire. By this time exhaustion was becoming apparent, and if the highlight of the day was the Stedman at Claverley then the lowlight was certainly the rise at Rock which only succeeded at the second attempt. Touches of Grandshire Triples here tended to get out of hand at about the fifth consecutive single, and we did not really do justice to the excellent bells.

The courtesy shown us by the incumbents and tower captains at every tower was much appreciated indeed and certainly made the Ringing Master's task lighter than it would otherwise have been. There was one thing, however, that we could not help noticing at every tower we visited—even the most petite of our ringers had half a yard of backstroke over and above her requirements. Can it be that the Wee Folk ring in Shropshire towers while Shropshire Lads are fast asleep?

M. F. H.

REDENHALL AND DISS OUTING

The annual outing of the Redenhall and Diss ringers was held on July 19th with a visit to Ely and Cambridgeshire. After picking up Miss Reeve and Harry and Mrs. Fuller at Thetford the party of 32 first stopped to ring at Hilgay, then moved on to Littleport. Arriving at Ely 12.30 p.m., a brief look round the lovely Cathedral preceded lunch, after which ringing took place at St. Mary's Parish Church.

The next call was at Soham where the ten bells were rung. On to Cambridge for tea where all agreed that the 91 steps to the tea room was the highest climb of the day but the meal was very welcome.

Ringing took place on the recently rehung eight at St. Andrew the Great and finally at Trumpington. On the return journey a stop was made at Newmarket for supper, and Diss was reached about 11.30 p.m. The thanks of the party go out to Mr. William Flatt who again organised the outing, also to all ringers who met us and to the incumbents.

A. G. H.

THE POWER OF CONCENTRATION

..Course the treble's not a bad bell when you think about it. Don't really think I could have managed inside tonight—it's too hot for one thing!

Treble's going! She's gone! Now we're away. I really must concentrate tonight. I'll try and look like one of those supercilious ringers who never even look at you when they're ringing.

Dodge-lie-dodge, down to 3-4—must say I'm striking this well. More than I can say for Bill—fancy missing that dodge with me!

Lead at hand—now over the three. Can't think what made Pam wear that skirt tonight—it doesn't suit her at all. Perhaps she didn't have anything else clean. Lead full—now at back. Phew! Isn't it hot? Can't say nylon's very good for ringing. Suppose I ought to have worn my—Oh blow! Missed 3-4 up and there's Pam glaring at me!

I really must pull myself together. After all, I'm only ringing the treble! 3-4 down, now into lead, lead full. Just got that last lead in right. Thank goodness I'm not tone deaf! 'Course old Vi is. Can't think how she's got as far as she has! Dodge-lie-dodge at the back with Ruth. I must lend her my Vitapointe—her hair is just like straw tonight! Must be the weather! Oh my goodness! Was that the second dodge behind or the first? I'm all right—don't panic! Pam's frowning like mad, so I must be dodging with her! Phew! that was a near thing—nearly tripped!

It's really too hot for a peal. Mum would think I was crazy if she knew! Still it will look jolly good in 'The Ringing World'! 3-4 down with Barbara. Wonder where she got that blouse? Looks like Marks to me!

Dodge-lie-dodge behind—dum-de-dum. Anyone would think Pam was calling 55 methods instead of Kent! Still I couldn't do it, can't concentrate—that's my trouble!

3-4 up with Bill. Nice boy. Pity he's so young—Oh my gosh! Now I'm lost! Oh someone help me out! This is the third time I'm leading—I must have finished at the front! Good old Pam! Can't think how she knows what I'm doing—puts you right just like that!

Dodge-lie-dodge—dum-de-dum. We'll never keep this pace up—it's too hot for one thing. Probably the fastest on the bells or something. 'Course that would look good in 'The Ringing World.'

Hello! Bill seems to be fiddling around! Why he doesn't concentrate I can't think! Oh dear!—that's two of them now. I must keep right—they ring by the treble. Lead full, now at back. Over me, Bill! (I hope that's right!) That was a near thing! Pam's the only one who hasn't made a trip now. We must have rung over half-an-hour. What's this? Pam's saying 'Go round'! Go round! Whatever for? The 720 was false! Stand!

You know I can't think why these conductors can't concentrate! J. K. B.

WIDENING SCOPE OF BELL MUSIC—Continued

GROUP V: 12-BELL TOWERS (SEVENTY-TWO RINGS)

Of these 72 rings selected for Group V, 59 rings, as given in Group IV, may be had on the back ten bells of the tower-ring of 12. The remaining 13 rings are as follows:—

Code	Ring	Selection	Bells	Class of Method
5K	Major-5	Front Five	1 2 3 4 5	Selectively, as all in Group I
6W*	Minor-6	Omit 1 and back 5	2 3 4 5 6 7	As for 6A in Group II
6X	Open Major-6	Omit 2 4 6 7 9 e	1 3 5 8 0 t	
7J*	Minor-7	Omit back 5	1 2 3 4 5 6 7	
8G*	Open Minor-8	Omit 1 3 6 t	2 4 5 7 8 9 0 e	7A " " III
8H	Open Major-8	Omit 2 4 6 8	1 3 5 7 9 0 e t	8A " " "
8J	Open Major-8	Omit 1 6 7 8	2 3 4 5 9 0 e t	" " " " "
9B	Open Major-9	Omit 3 5 7	1 2 4 6 8 9 0 e t	" " " " "
9C*	Open Minor-9	Omit 3 6 t	1 2 4 5 7 8 9 0 e	9A " " IV
10B	Open Major-10	Omit 2 4	1 3 5 6 7 8 9 0 e t	" " " " "
10C	Open Major-10	Omit 6 7	1 2 3 4 5 8 9 0 e t	10A " " "
11A	Open Major-11	Omit 4	1 2 3 5 6 7 8 9 0 e t	" " " " "
12A	Major-12	All	1 2 3 4 5 6 7 8 9 0 e t	{ Caters covered by 0/t. Royal covered. Cinques. Cinques covered. Maximus.

Some selected rings may have an instant appeal: but, of course, tastes vary.

Such rings may include the 'MAJESTICS', i.e., Nos. 5G, 6Q and 6X, especially when rung to a slow rhythm: also some of the minor modes, e.g., 5H, 5J, 6J, 6K and 7E, with their nostalgic atmosphere: and the 'ECHO' rings—8J and 10C, especially if these two last are rung to 'repeated' minimus and 'repeated' doubles, respectively. At all events, plenty of scope will be found for imaginative selection. (The table is not exhaustive.)

JOSEPH BRYANT LTD BRISTOL 2

MAKERS OF THE FINEST BELL ROPES FOR NEARLY 250 YEARS

LETTERS TO THE EDITOR

SOUTH DEVON RINGERS AND 'TAKING STOCK'

Dear Sir,—The front page article in a recent issue inspires me to write—not so much in connection with the problems of circulation of 'The Ringing World' as with the stated aspiration to 'knit ringers into one big fellowship.'

As you know, call-change, as distinct from change ringing is the predominant feature of the 'ringing world' in the West Country. In a recent issue of the journal I was naturally interested to read that, at the invitation of the B.B.C., a list of towers where good ringing may be expected was submitted to the Corporation. My reaction, somewhat naturally, was to wonder whether any call-change towers had been included. With this in mind I wrote to the secretary of the Central Council to express the hope that as call-change ringers are, after all, church bell ringers too, some consideration was given to us of that 'persuasion.' I also asked whether there might not be room on the Central Council for call-change representation.

The answer to my question regarding the inclusion of Devon call-change towers in the list submitted to the B.B.C., I quote, 'would be "no" . . . as change ringing is the Council's main consideration.' To my enquiry regarding representation the answer was in effect that were it granted 'offence' (!)—my exclamation—would be given to the Guild of Devonshire Ringers. Incidentally, my own personal experience gainsays that supposition. This attitude surely is a mistaken one and does not help me and several others on both sides of the 'fence' here in Devon who are working to achieve and maintain a happier relationship of better understanding between the two schools of thought. Prebendary E. V. Cox, John Scott (now Vicar of Clawton) and Maurice Atkins, well-known figures in the Guild, share my endeavours in this direction, and it seems so much the greater pity and frustration that the Central Council of Church Bell Ringers—and I emphasise the appellation 'Church Bell Ringers' in the title—should pretend to the non-existence of call-change towers and non-qualification for consideration, except when its members wish to ring in our towers!

Surely the purpose and overruling consideration is for the Glory of God and the service of His Church and this should be the inspiration of enlightened thought on both sides of our metaphorical 'fence.'

Mr. Barnett ventured to commend me for my interest in the 'wider field' but I could only point out that that qualification 'cuts both ways.'

Be assured that this letter springs from no sense of ill-feeling. My great desire is to have our church bells rung Sunday by Sunday and rung well and, whether in call-change or 'scientific,' to see the great brotherhood 'all one in Christ Jesus.'—Yours truly,

B. E. BARTLETT,
Hon Secretary,
South Devon Ringers' Assoc.

The last course of each part should be called W. H., not M. H. as printed

SHAROW WINDOW

Dear Sir,—With reference to your query in 'Belfry Gossip' about the uniqueness of the stained glass window in the belfry of Sharow church may I make a few comments.

Firstly Sharow is a parish adjoining Ripon city, Sharrow, the name given in 'Belfry Gossip,' is a district in Sheffield; some confusion frequently arises through the misspelling of the names of the two places.

The window was provided by Thomas Clarke, the conductor of the peal; he was a retired road surveyor, a good ringer and a man of a very hospitable and generous nature.

Clarke's enthusiasm was unbounded. He kept a horse and wagonette which he used for conveying his ringing friends to local churches and local inns. Unfortunately his generous habits brought him into reduced circumstances and he died in a Poor Law institution.

At the inaugural meeting of the Yorkshire Association in 1875, Clarke was present and it was due to his influence that the bells at Sharow were augmented from six to eight and the Cathedral ring increased from eight to ten.

The window at Sharow commemorates the Golden Jubilee of Queen Victoria in 1887.

In the previous year the city of Ripon celebrated a thousand years of municipal independence and a peal of Kent Treble Bob Major was rung at the cathedral. Clarke rang in the peal and a stained glass plaque was placed behind an existing window in the cathedral ringing room recording the peal, Clarke was the donor of this plaque.

Thomas Metcalfe, a great figure in North Yorkshire ringing circles for many years, was born in Sharow parish and scored his first peal in the jubilee peal at Sharow. Almost fifty years later he paid a visit to Sharow and called another peal of Kent Major on Sharow bells. I rang the seventh to this peal.—Yours faithfully,

EDWARD HUDSON.

Sharow, Ripon.

ST. ANTHONY'S BELL

Dear Sir,—'Tantney' or 'Tantony' bells, according to H. B. Walters, are usually old priests' bells named after St. Anthony the Hermit, who had as one of his emblems a small bell attached to his tanstaff or suspended from the neck of his attendant pig. The small bells attached to the necks of cattle in Northamptonshire used to be called Tantony bells. As Walters also refers to instances at Weedon Bec, Great Oakley, Stanford and Lamporn in Northants, it would seem that your correspondents will easily be able to get further information not far from home. At Stanford, St. Anthony and his pig may be seen in a window.—Yours, etc.,

H. V. FROST.

St. Albans.

THE PAYMENT!

Dear Sir,—At a recent wedding of a landowner's daughter in a church with three bells the ringers were a boy and a girl of 12 and two boys of 16. No payment was made but a carton was found in the belfry containing six bottles of ale with a note 'For the bell-ringers!'

—Yours truly,
Bruton, Somerset.

H. B. MAKINS.

DIFFICULTIES AT HULL

Dear Sir,—Not knowing what difficulties, if any, exist at Hull, it would appear that Mr. A. Stone should contact his Vicar immediately and ask him to make it known through all parochial organisations that ringers are urgently needed.

A band raised from young local churchpeople would be far more satisfactory than one formed from the 'good ringers' to whom Mr. Stone appeals; in any case if it's a Sunday service band he wants no good ringers would be available, they would all be occupied in their own towers.

What a wonderful opportunity Mr. Stone has.—Yours truly,
Watford, Herts.

R. G. BELL.

Dear Sir,—While wishing success to Mr. Austin Stone in his appeal through your columns for ringers to man the bells of Hull Parish Church, I cannot help feeling that he is trying to find an easy way out of a nation-wide problem, and he will eventually have to accept the fact that there is only one solution—go forth into the world and recruit and train.

Let him take two London towers as examples:

Stamford Hill. Until recent years only a modest Grandshire Doubles band existed. 'The Ringing World' columns have shown the result of the past few years of intensive recruiting and training—two more bells and a band (including a girl of 12) capable of ringing Glasgow Surprise.

Walthamstow. A parallel case to Hull, a ten-bell tower reduced five years ago to Grandshire Doubles on Sunday mornings, evening ringing 'by arrangement,' and no practice. The intervening years of recruitment are now bearing fruit in the form of Double Norwich and Stedman Caters for morning service and a quarter-peal attempt most Sunday evenings (Stedman Caters recently with six 'firsts').

So go out, Mr. Stone, talk to church and other youth clubs, scout and guide groups, and make useful contacts such as school-teachers who may be a possible source of recruits. It's a long job, with disappointments and frustrations, and only by looking back over the years is it possible to see the length of the path which has been travelled and the heights so far attained, and then look forward to more unremitting effort continually to recruit and train. But it's immensely satisfying and *it's the only way.*—Yours faithfully,

A. B.

Westcliff-on-sea.

PRINTING OF COMPOSITIONS

Dear Sir,—In 1946, at the Norwich C.C. meeting, I moved a resolution to the effect that compositions should be printed with the notation before the C.E. It found no favour with the Council, probably owing to my poor presentation, for I have not that facility of expression which some people so happily have.

Now today I find that the idea is gaining favour, and in your issue of July 25th four composers have compositions printed there, which to my mind is the logical way. No amount of argument can controvert the fact that the calling comes *before* the C.E. More-over one does not first put the answer to a sum before its working out.—Yours faithfully,

IPSWICH. CHAS. J. SEDGLEY.

A RINGING EPISODE OF 100 YEARS AGO

The Aberdeen Opening in 1858

By DAVID CUBITT

AT the Reformation, the three bells at the Church of St. Nicholas, Aberdeen, became the property of the Town Council. To these, two more were added by the Council between 1795 and 1802 and they remained five in number until 1858. In 1857, the inhabitants ('prompted by the revived musical taste of the town' according to 'The Dundee Advertiser') decided to add three bells to complete the eight and sought advice from Mr. E. B. Denison (later Lord Grimthorpe), who told them that the proposed octave would make a more perfect ring than any other in Scotland. A Bell Committee was formed and a subscription list opened. Mr. John Smith, a Leeds banker and a native of Aberdeen, gave the price of the new treble, sixty guineas.

The new bells, two trebles and a tenor, were cast at the Warner foundry in London and on Saturday, April 3rd, 1858, were brought up to St. Nicholas' steeple amid the clangour of the bells they were to join. The tenor weighed rather more than 32 cwt. and Smith's treble over 7 cwt.

Through the instrumentality—and generosity—of Mr. Smith, the St. Peter's Company of Ringers of Leeds were invited to open the augmented ring and stay in Aberdeen for a week. The St. Peter's Company, however, could not muster more than six of their number to make the journey and William Milnes and Joseph Paul Healey, of Wakefield, were asked to join the party. In fact, nine ringers went to Aberdeen—six from Leeds (Kendall, Hubbard, Iles, Priestley, Gawkrödger and Bird), Milnes and Healey from Wakefield and a Shropshire man named Brooke.

They travelled at the end of August, 1858, with William Gawkrödger, President of the Leeds Company, in command.

They first rang on the bells at St. Nicholas' on Saturday, August 28th, finding the bells less of a handful than they thought they would be. 'The Aberdeen Journal' of September 1st, after noting that during the previous four days 'a variety of peals of change ringing' had been performed, went on to say: 'Although the surpassing beauty of this bell-melody of "merry England" seems to be duly appreciated, and indeed has excited many feelings of the utmost pleasure and admiration, yet among those who are ignorant of the character and capabilities of change-ringing we have heard some feeling of disappointment expressed that no regular tunes have been played. In explanation, it may be mentioned that change-ringing is quite a distinct art and its professors are not necessarily musicians in the usual sense of the term. They consider, too, that church bells are not adapted for playing tunes, and that to do this is quite illegitimate and inferior use of of them . . . !'

CERTIFICATE OF MERIT

The extent of the ringers' repertoire during their week in Aberdeen was Grandsire and Stedman Triples and Kent Treble Bob Major, and their longest length 1.260 Grandsire Triples, rung on the Monday of their visit. After this quarter, the following notice was issued:

Aberdeen, 30th August, 1858.

'The St. Peter's Company of change-ringers, Leeds, do hereby certify that the peal of eight bells in St. Nicholas Church, Aberdeen, are for power and richness of tone, the finest peal of bells, of their weight, in the United Kingdom. They also consider them in perfect tune. Should a company of young men from eighteen to twenty-five years of age come forward and place themselves under the tuition of Mr. Hubbard, there is no doubt of Aberdeen being put in

the possession of as good a set of change-ringers as any other town in the Kingdom can boast of.—William Gawkrödger, President of the Company.'

Hubbard was retained by the Aberdonians as tutor to aspiring change-ringers, who, 'The Aberdeen Journal' pointed out, 'will have no fees to pay,' and who would not disturb the townspeople unduly as the chief part of the instruction would be given on handbells.

The ringers had, incidentally, taken a set of 12 handbells with them and on two evenings they 'gave performances (gratuitously on their part) on the handbells, which were enthusiastically applauded by respectable and numerous assemblages.'

On Friday, September 3rd, the ringers returned to Yorkshire, leaving behind 'a very favourable impression as to their professional ability and personal character'—'Aberdeen Herald.'

Although Hubbard had been engaged to teach ringing in Aberdeen, it would seem he did not remain there long, for soon after returning to Wakefield Healey was asked to act as instructor. He returned to Aberdeen, taking his wife and family with him, and remained there for five and a half years.

Healey was then 32 years old. He rang his first peal (8,000 changes at Liversedge) when 17 years of age and his last (5,004 Grandsire Caters at Wakefield) on November 15th, 1883. His peals included the last on the bells of St. John's Church, Wakefield—5,056 Kent Treble Bob Major, composed by Joseph Tebbs, conducted by Henry Senior, and rung on Sunday, February 18th, 1844.

ACTIVITIES OF THE KENT COUNTY ASSOCIATION

Maidstone District Outing

The English summer honoured us by returning for the Maidstone District ringers and friends' outing on July 19th. An 8 a.m. start was made and after picking up various people en route, the coach nosed its way westwards to invade the neighbouring county of Surrey.

Our first call was Shalford where we were joined by our rearguard of two cars and a motor cycle from the remote parts of the Maidstone district. Ringing on the eight musical bells under their metal spired tower was much enjoyed and we were surprised to find how quiet the bells sounded outside. Guildford, with its cobbled streets, was our next objective. At the Cathedral Church of Holy Trinity we were welcomed by Mr. W. J. Robinson who joined with us to ring a course of Cambridge on these lovely-toned bells. A sandwich lunch was partaken by the river at Guildford.

Owing to a slight misunderstanding we arrived at Frensham some twenty minutes late having journeyed through pleasant countryside, passing Frensham pond, which looked cool and tempting. At the church we found our rearguard had 'leap-frogged' us and were taking full advantage of our late arrival on the mellow six. We then crossed the Hampshire border to ring on the light eight at Grayshott. These bells proved to be rather tricky for the less experienced. Here we rang the special method of the day, Montgomery Bob Major. Striking was not of a high standard, which was a pity because the bells sound very loud outside.

Tea at 'The Sally Lunn,' Hindhead, was welcomed by everyone. The final tower of the day was St. Bartholomew's, Haslemere. The beautiful little ring (tenor 10 cwt.) was put to full use, but the ten bells did not receive the striking they so fully deserved. Plain and Kent Royal and Grandsire Caters were reasonably performed, but Stedman galloped to its miserable end and 'Monty' was again flogged on the

YORKSHIRE ASSOCIATION

Successful Meeting at Scarborough

A very successful meeting of the Northern district of the Yorkshire Association was held at Scarborough on July 12th, about forty ringers taking part in the day's proceedings.

Amongst those present were the ringers of Richmond Parish Church, who combined attendance at the meeting with a day's outing to Scarborough; unfortunately they were not favoured with good weather.

The bells of the parish church were rung in a variety of methods ranging up to Yorkshire Surprise Major, which was made possible by the attendance of members from the Southern and Eastern Districts of the Association. These members proved to be very helpful and welcome visitors to a district not rich in change-ringers.

Evensong was rung in the very fine old parish church, recently enriched by the addition of a new east window.

The Scarborough ringers and their wives provided a very bountiful tea in what must be one of the finest parish halls in the Northern Province. The Vicar of Scarborough and his wife were very welcome guests at tea and it is of interest to note that the Vicar has previously held two other livings in Yorkshire with rings of bells, Ossett and Acomb.

At the business meeting thanks to the Vicar and local company were expressed and Mr. Fred Hodgson was elected Ringing Master for the Northern District. The meeting was undoubtedly the most successful held in the District for some years.

back eight. We were indeed very sorry to leave these lovely bells but time had to be allowed for the long journey home.

We arrived in Maidstone at the respectable hour of 11.15 p.m. after dropping Dr. Hatcher and shorts (together) at Offham. All agreed it had been a splendid day. Our thanks are extended to those who made it so, particularly to all incumbents and ringers who welcomed us to their towers. M. L. H.

Canterbury District at Margate

That the Canterbury district's quarterly meeting was to be held at Margate no doubt encouraged members, who had visions of a breath of sea air, as well as ringing at the parish church, to turn up in force. Eighty members were present, representing sixteen towers in the district. It was also one of the finest and warmest days of the year, thus adding to the general enjoyment. Ringing during the afternoon was followed by the usual service, which was conducted by the Vicar, Rev. S. A. Odom, who was assisted by his curate.

At the Church House members were entertained to an excellent tea by the local ringers, their wives, mothers, and friends of the Mothers' Union. Arriving at tea time were the ringers from Birchington, who had spent the afternoon at Quex Park, recording for the B.B.C.

Mr. J. A. Russell occupied the chair for the business meeting at which six new members were elected, Herne was chosen as the place for a by-meeting (September 6th), and the collection given to church funds. Of interest to all Kent County members will be the news that the district decided to recommend the association to hold its annual general meeting at Margate, this tower getting a two to one vote against Canterbury. Grateful thanks were expressed to all who had entertained the members to tea.

B. J. L.

SOUTHAMPTON AND READING UNIVERSITIES TOUR THAMES VALLEY

On July 6th past and present members of Southampton University were wending their way towards Oxford Youth Hostel. Almost everyone arrived with their bicycles in time to ring at Headington (6) for Evening Service, but distances actually cycled ranged from four to 84 miles! The tower captain here very kindly let us borrow his handbells for the evening, resulting in many interesting questions from American hostellers.

Members from Reading University, being less energetic, arrived at Cowley (6) the next morning by car and motor bike; the school-children here must have wondered why their playtime had been extended! After some welcome refreshments, we carried on to Radley (6) where Miss M. R. Cross welcomed us. It was as well that lunch had been consumed before we rang the first ten of the tour at Abingdon as some members found them hard to manage. Later, our efforts at St. Nicholas' (6) were unexpectedly curtailed when a policeman walked into the belfry and asked us to stop as the Assize Court was sitting next door.

After some good ringing on the handy eight at Drayton, we journeyed on to Long Wittenham (6) where the untuneful ring hardly does justice to the rest of the church. The cyclists stayed the night at the local youth hostel. The Reading contingent returned to Radley where they were hospitably entertained by Miss Cross. Her helpfulness in finding accommodation was much appreciated.

A BOILING SUN

Meeting together again at Dorchester Abbey the next morning, we were disappointed we could not ring on this octave due to a broken stay; instead we spent the time profitably by exploring that wonderful building before proceeding to Wallingford. One of the finest sights of the tour, Watlington, was enjoyed before the climb over the Chilterns beneath a boiling sun. When the position of West Wycombe church on the top of yet another hill was viewed, one wondered whether everyone would have enough energy to reach the belfry, but some good ringing, including a course of Surprise, showed that there was plenty of stamina left. Many people had their first experience of twelve bells at High Wycombe and we were grateful for the help the locals gave us. After a pleasant ring at Marlow, the cyclists went to Henley where they did not do justice to the bells, due to the exhausting day, while the others went to the practice at St. Mary's, Reading.

The next day began at Boyne Hill, Maidenhead (8), and afterwards, even though we were directed to miss the centre of the town, some people managed to find it! However, we all eventually reached St. John the Baptist, Windsor, but one member liked the place so much that, on arriving at Old Windsor, he discovered he had left his jacket behind, so had to retrace his steps. Lunch was consumed at a spot on the Thames near Datchet, ideal except for one thing—the nearest public house was miles away! We enjoyed ringing on Slough's lovely ten and only wished we could have stayed longer; however the energetic ones carried on to Uxbridge (8) and took it in turns to ring and buy ice lollies. Afterwards, it was a relief to leave the main roads behind and reach the picturesque village of Fulmer, where a course of Beverley Surprise Minor was rung on the pleasant six. The final tower of the day was Beaconsfield where we were joined by Mr. Cyril Lewington. At this tower 'Treble's going' was NOT followed by 'Treble's gone' to Jill's great surprise! Here Southampton's indefatigable Master and Secretary decided it was time they sampled luxury travel and tried to leave in Mary's car, but as they could not find the ignition key Reading victoriously left for Ruislip where they stayed at the home of Mary's parents, while the rest had to be content with the amenities that Jordan's Youth Hostel could offer.

MADE NEWS FOR LOCAL PAPER

The ladies' pet aversion—an almost vertical ladder—confronted us at Rickmansworth (10) the next morning. Our ringing was unfortunately not up to standard here, but we made up for it later on Watford's magnificent ten. A reporter was so interested that our visit appeared in the local paper the following day. By the time we reached Hemel Hempstead (8), we were beginning to wilt again in the heat, and both here and at the next tower St. Michael's, St. Albans (8), the ringing suffered. Here we were joined by a past member whom we were pleased to see for the rest of the week. After tackling the heavy going ten at St. Peter's, replenishments fortified us for the long climb up to the ringing chamber at the Cathedral. Methods were rung on all numbers from six to twelve. Then the campaign of 'car rides for all' was renewed, this time Southampton winning, as the two undaunted members were squeezed in and taken to Hatfield practice. The less fortunate travelled there by bus and bike, but it was noticed that after actually experiencing Mary's driving, the enthusiasm waned considerably. That night Reading had the experience of staying in the guest house of a convent, (the male member inhabiting the chaplain's lodge).

The old church of St. Stephen in St. Albans was visited first the next morning followed by the journey to Harpenden—a very pleasant town and equally pleasant bells. The ten at Luton were also a joy to ring but we did not really do justice to them. After lunch we came to the ancient priory at Dunstable (8) where Jill's explorations nearly left her stranded on the

outside ledge above the west door. Several local ringers joined us at Leighton Buzzard (10) and we were glad of their assistance. The last ring of the day was on the erratic six at Ivinghoe. The 'go' was such that the person on the tenor having asked for Minor hastily shouted, 'Go Grandsire Doubles.' Fortunately, or unfortunately whichever way you look at it, we were all together on the last evening as the motorists were allowed to stay at the hostel by special permission. After a cross-country walk to give the luxury travellers unaccustomed exercise, and a drink at the 'local,' some people thought the fire escape between the men's and women's dormitories admirably situated.

Saturday, the last morning of the tour, saw us setting out promptly for Tring (8). The church was beautifully decorated in readiness for a wedding and the bells must have sounded very melodious outside. Capes had to be worn for the first time for the journey to Wendover (6) and also to the picturesque village of Monks Risborough (6). At Thame a number of Triples methods were rung before we reached Wheatley (6) near Oxford; our final tower. It hardly seemed possible that we had rung in six counties during the week—Oxfordshire, Berkshire, Buckinghamshire, Bedfordshire, Hertfordshire and Middlesex. Goodbyes were then said, everyone making their separate ways home, but most people hoped that such a joint tour would become an annual event.

We would like to thank all incumbents and ringers who met us at all the towers; all who arranged accommodation for us; Don Exell for taking charge and last but not least our organiser David Blackwell, without whose efforts there would have been no tour. M. B.

THE RINGERS' CROSSWORD — No. 2

By BERT SUTTON
CLUES ACROSS

3. 11 & 12. New recruit's first business in the belfry.
8. Prominent 19th century ringer, grandfather of Charles Henry Hattersley.
10. Lectern provides us with a ring of 6.
- 11 & 12. See 3.
13. Method of bell tuning introduced in 1885.
15. First organising secretary of the Bournemouth Rally.
18. Fruit of the dog rose.
19. A Cornish peal of 6.
21. An insect having '14 down' feet.
- 22 & 14 Down. For purposes of Twin-Bob composition in Stedman Triples this can be either 'bobbed' or 'plained.'
23. His pilgrims progress on annual tours.
- 24 & 26. Founder, donor of the Bell-founders' window in York Minster (1330).
29. Adds brightness we are told.
31. Here, bells are swung round and round.
32. Strong desire.
34. Roman magistrate whose chief business was to superintend public buildings of all kinds.
35. Keen resentment.
36. Big Ben has been described as the this of London.
37. A kind of broad linen tape.
38. No wedding bells when they do this.

CLUES DOWN

1. A composition of copper, lead, tin and silver, of which Roman coins were made.
2. St. —, one of the three parishes of Fenchurch ('The Nine Tailors').
4. An officer of 'The Yeomen of the Guard.'
5. Channelled and ridged as bells are below the 'shoulder' and, usually, above and below the 'sound-bow.'
6. Pertaining to the nose.
7. Scottish town with ruins of a once-magnificent cathedral, the 'Lantern of the North.'
9. Unit of resistance (electricity).
12. Club-formed and thickened toward the end.
14. See No. 22 across.

16. If all participants are not members, the peal may not be this.
17. She participated in the first peal by a band of ladies: now president of the Bedford Association.
19. A Devon peal of 6.
20. Special form of single introduced into Grandsire Triples composition about 1755.
21. Tropical shrub used by Easterns for producing orange dye.
23. Necessary sequel to composition of peals.
24. Short poem with a recurrent refrain.
25. Eucharistic wine flagon.
27. St. Leonard's or on-Severn there's an octave there.
28. Brother's or sister's daughter.
30. 'Here lies the body of Samuel —'.
That for fifty years pulled the tenor ball' ('The Nine Tailors').
32. Ring too close.
33. To give pain to: weary.

DEDICATION

ALDBOROUGH, NORTH YORKS

On Sunday morning, July 6th, in the presence of a large congregation, the ring of six bells at St. Andrew's Church, Aldborough, was rededicated by the Dean of Ripon (the Very Rev. Frederick Hughes).

The bells were removed from the tower in September of last year by Taylors of Loughborough, who have recast the treble and third, retuned the second, and rehung the six on a new iron frame. All fittings are new, the fourth, fifth, and tenor have been fitted with cannon retaining head-stocks. A new floor has been put in under the bells, and the old wooden bell frame which was infested with the beetle has been scrapped. The bells, which are rung from the ground floor, have rope guides fitted and are a first class Taylor job.

During the dedication they were chimed by members of the Aldborough band, assisted by ringers from Boroughbridge, Ripon, and Stillington. Included in the band were two ladies. The bells were rung by the same band for a short time after the service.

The restoration of the bells and tower has cost over £1,000, and the last £300 was raised by a garden fete on the previous Saturday. On view at the fete, and also at the dedication, was a model ring of six bells, loaned for the occasion by a Stillington ringer, the plan of the bell frame being the same as the one in the tower. Many people present at the fete and service, who were unable to climb the tower, were thus able to see what the actual work looked like.

The inscriptions and weights are:—

Treble. To honour God and King in melody we ring. 1790. 4 cwt., 2 qtr., 10 lbs.;

Second. I call the people, I adorn the festivals. 1784. 5 cwt., 0 qtr., 16 lbs.;

Third. Chapman and Mears, London, fecund. 1782. 5 cwt., 1 qtr., 26 lbs.;

Fourth. Sancte Toma Ora Pro Nobis. 7 cwt., 0 qtr., 6 lbs.;

Fifth. Sit Nomen Domini Benedictum. (Foundry mark of Henry Jorden, London.) 8 cwt., 1 qtr., 20 lbs.;

Tenor. Jesus be our speed. 1627. 11 cwt., 1 qtr.

The ring is in the key of G.

B. H.

Gratefully Acknowledged

The Editorial Committee acknowledge with gratitude the following donations towards the cost of producing 'The Ringing World':—

Personal.—West Dorset Branch 10s., Mr. J. Thornley 2s. 6d., Stratford-on-Avon Ringers 6s.

Peals.—Wootten Wawen 3s., Swindon 5s., Neath 10s., Stratton St. Margaret 3s., Warwick 12s., Langford Budville 3s., Cardiff 4s., Arlesey 2s. 6d., Cotleigh 3s., Taunton 4s.

Quarter Peals.—Cheltenham 2s. 6d., Can-nock 3s., Pyworthy 3s., Savernake 4s., Evershot 3s., Somerton 4s. 6d., Southwark 2s. 6d., Havant 5s. and 5s., Rayleigh 5s., Wimbledon 2s. 6d., Aylestone 2s., Chatham 2s., Waltham-stow 5s., Talgarth 3s. 6d., Studley 2s. 6d., Winlaton 2s. 6d., Ruardean 4s., Honiton 1s. 6d., Hatch Beauchamp 2s.

The quarter peal rung at Southwark Cathedral on Sunday, July 6th, for morning service was the first for morning service since the bells were rehung in 1946. Service times have been altered for the first Sunday in the month in future, and for those interested the starting time is 9.15 a.m.

OBITUARY

MR. WILLIAM R. CATCHPOLE

By the sudden and unexpected death of Mr. William R. Catchpole of Buxton, Norfolk, at the early age of 48, the Norwich Diocesan Association has lost one of its keenest members. Ever since a boy he had served his church loyally as a chorister and ringer. He was taught to ring in 1925 by Mr. W. C. Duffield and in 1950 was elected Ringing Master.

His enthusiasm was infectious and it was mainly due to his efforts that the last year or two has seen a revival of interest in ringing in North Norfolk. He was genial and lively, always willing to help others.

Pressure of work prevented him from taking part in many peals early in his career, but he had rung nearly 50 in the last 18 months. He rang, in all, 81 peals, conducted 18, ranging from Doubles to Surprise Major. Only three weeks ago he made a 300-mile journey to achieve one of his ambitions, which was to ring a peal at Loughborough Bell Foundry.

The bells were rung half muffled before and after the funeral service on July 29th and hand-bells over the grave. A half-muffled peal of Plain Bob was rung in the evening.

His kindness, his helpfulness and his Christian charity were qualities which made him so valuable a member of the community, and we are all the poorer by his passing. Our sympathy goes to his wife, son and daughter.

J. R. S.

MRS. W. GORRINGE

We regret to learn of the passing of Mrs. W. Gorrington, wife of Mr. W. Gorrington, of Milton-next-Gravesend, and mother of Mr. W. Gorrington, jun. of Hawkhurst.

To her memory at St. Lawrence's Church, Hawkhurst, 672 Grandsire Triples was rung on July 27th by M. Collins 1, Miss L. Wood 2, L. J. Jarvis 3, W. Gorrington, jun. 4, A. H. Kemp 5, Mrs. M. Cloke 6, M. Cloke (cond.) 7, E. Baker 8.

GUILDFORD DIOCESAN GUILD

A Guildford District meeting was held at Cranleigh on July 26th when the Rector, the Rev. H. L. Johnston, welcomed the ringers and conducted the Guild Office.

After the service, tea was taken in the Church Room and this was followed by a short business meeting in which John Parsons, of Cranleigh, was elected a junior member. The bells were available afterwards and ringing continued in a variety of methods; directed by the District Ringing Master, Mr. T. Mark White.

Guild members were pleased to welcome visitors from outside the diocesan area—including an Oxford Bob Triples contingent from Crawley, Sussex.

OUTINGS

ST. JOHN'S, HILLINGDON

On June 28th the Hillingdon band, together with friends, visited four West Country towers. The first stop was at Wantage (8, 21 cwt.) where ringing started encouragingly with a course of London but then degenerated rapidly on the call of coffee and cakes in a nearby cafe.

An hour and a half in the coach brought us to an excellent lunch at Paganhill followed by ringing at St. Lawrence's, Stroud (10, 20 cwt.). Although a little odd-struck and difficult to hear the bells yielded to treatment and gave forth some very good Caters and even a half course of Cambridge Royal.

The most memorable stop was to ring the fine twelve at Painswick; the bells went well and the band rang very creditable touches of Stedman Cinques and Kent Maximus. Our success at Painswick, however, was not maintained on the twelve at Cheltenham; and some choppy Stedman Cinques was soon abandoned in favour of tea and the journey home.

All who attended the outing will want to express their thanks to the incumbents concerned for the use of their bells and also to Fred Goodfellow for his masterly organisation.

N. D. R.

GRIMSBY, Lincs

It was a glorious day, July 19th, as Grimsby ringers met for their outing. Together with ringers from Ulceby, Walesby and Goxhill we set out for Loughborough at 7 a.m. After stopping at Newark for coffee, train spotting and ice lollies, we arrived at the foundry at 10.30 a.m. to be met by Mr. P. L. Taylor. Several ladies got their toes dirty inside the foundry due to wearing sandals, and how interested our tenor ringers were in the bell rung up by electricity!

As to the foundry bells, where the tenor goes easier than our treble, after a few bounces, we managed some Grandsire and St. Clement's.

A tremendous lunch followed and we then proceeded to Oakham by way of Rempston, stopping to watch a steam engine rally. It was so hot at Oakham that several ringers spent more time on the church roof than in the ringing chamber!

From Oakham to Spalding for tea. The driver, in league with two of 'the boys,' sounded his horn at every young lady between Oakham and Surfleet where we rang after tea. For many of us it was our first twelve bell tower and we were sorry that all we could manage on all twelve was rounds.

We then made our way to Boston and its 285 steps. Our congratulations to our oldest ringer on reaching the top!

The return journey was made all the more enjoyable by the choir of five voices; one bass, two tenors, and two fine sopranos. Grimsby was reached at 10.30 p.m. after a truly enjoyable day. Our many thanks to Frank Kennington for his excellent arrangements, to Mr. Paul Taylor for the interesting tour of the foundry, to all incumbents for use of their bells and to everyone who so kindly met us. Hurry up 1959.

M. and B.

WIMBLEDON, SURREY.—On July 27th. 1,272 Spliced Oxford and Kent Treble Bob Minor: E. Jacobs 1, Susan Jacobs 2, J. Tomsett 3, A. Bishop 4, M. Sinden 5, F. Corfield 6. First quarter Spliced for all the band and on the bells.

WALTHAMSTOW, ESSEX.—At St. Mary's Church, on July 27th, 1,299 Stedman Caters: H. Rumens 1, T. Hawkings 2, Miss G. E. Newcombe 3, F. C. Maynard 4, F. W. Sykes 5, E. E. Holman 6, A. J. N. Boyack (first of Stedman Caters as cond.) 7, B. R. Downes 8, D. Hewitt 9, B. Collard 10. First of Stedman Caters for 2, 3, 5, 8, 9 and 10. A 15th birthday compliment for F. W. Sykes. For Even-song.

NOTICES

New Scale of Charges

Meetings: 3/6 (minimum) for 30 words, afterwards 1½d. a word. Each additional insertion half charge.

Other Notices: 4/- (minimum) for 36 words, afterwards 1½d. a word.

Displayed: 6/6 per single column inch.

BIRTH

CHAPMAN.—On Tuesday, July 22nd, 1958, at 66, Pilgrims' Way, Canterbury, to Elizabeth (nee Bate) and Dennis, the gift of a daughter, Elizabeth Mary. 2789

ENGAGEMENT

The engagement is announced between Robt'n, only son of Mr. and Mrs. W. J. Willis, of Swindon, Wilts, and Margaret, elder daughter of Mr. and Mrs. C. Brook, of March, Cambs. 2714

PERSONAL

MARRIAGE THRO' SOCIAL INTRODUCTIONS.—The only social service of its kind enjoying the warm approval of both Clergy and Press. It is completely confidential and operates throughout Great Britain. Interesting free brochure under plain sealed cover from The Bournemouth Bureau, 176, Old Christchurch Road, Bournemouth. 2731

MISCELLANEOUS

TO ASSOCIATION SECRETARIES.—The 1959 Ringers' Notebook and Diary will shortly be going to press. Will Association secretaries who have not already done so kindly forward without delay the usual details for insertion.
