## GILLETT\& JOHNSTON CROYDON, SURREY.

The Recast Tenor (30 owt.) at ROCHESTER CATHEDRAL,
New Ring of Ten opened May 14th, 1921,

## A HINT TO CONTRIBUTORS.

With our first number of a new year and a new volume, we want to say a few words affecting ourselves. The increasing activity in the Exercise makes the pressure upon our space heavier and heavier as the months go by, and our sixteen-page journal cannot now provide room for all the matter which we would like to include in its columns. Every week we have to hold over, or put aside entirely, reports of doings of varied importance, simply for lack of space. The majority of ringers like to see their performances recorded, the general interests of the Exercise demand that the numerous ringing meetings should be noticed, and it is essential, in order that there shall be no break in the records, that the peals rung should find their proper place in the paper. Yet these requirements already more than fill our available space, and articles of general and special interest, whenever they occur, can only be given at the expense of other matters, It is a matter of real regret to us, that many things have from time to time to 'go overboard,' but where there has been any disappointment to coutributors, we must ask them to bear with us and believe that it is no fault of ours.

The remedy lies in a larger paper, which would of course be weicomed by all our friends, but we are equally sure they will realise that this is a step which can only be taken if the financial support given to the journal warranted it. When, nearly two years ago, we emerged from the ' war stage,' we asked ringers to help us raise the circulation by at least a thousand copies a week. It may be news to many to know that only about half that number of additional subscribers was obtained. To provide a larger paper than the present, without increasing the price, it would be necessary to double the circulation, and, the apathy which exists among a large body of the Exercise, and the pernicious habit which still prevails in many places of taking just one copy for 'the tower,' makes us hesitate before even considering such a step. Obviously it could not be taken without some guarantee against financial loss.

Until it is possible to provide more pages to accommodate the matter sent in, there is one means by which contributors can help us, and that is by sending in their reports and other communications without loss of time. It is an every week occurrence just as we are on the point of closing our pages for press, to receive numerous reports of peals, meetings and minor performances which have taken place not on the preceding Saturday or Sunday, but ten, seventeen and sometimes nany more days before! This is hardly fair to us and it is certainly not fair to our

## A QUERY ABOUT A PEAL.

A correspourlent, writing will regard to the peal of Bob Major rung at Ficadcom on December 16th, 1922, composed by Frank Bennett, condueled by A. E. Fdwards, that he presumes the ringers that wook part in this peal feel justified in publishing the recort. He unterstands than no singles were 'made on' 'called,' althongh the conductor warned tho band that two Singles were in the perl, ant 9 and 3 made them. He asks Mr. Edwards to be geod enough to thll those who are interested (through the columns of this prper Whern to finl the figures of the peal called, and so satisfy the members in that dislriet of the Kent Association.

## BATH \& WELLS DIOCESAN ASSOCIATION. BISHOR'S TRIBUTE TO RLNGERS.

A largo gathering of ringers assemblen at Corstion, near Bath, on December 16th, at the invitation of the Rector the Rev. C. U. Parkery, who is Master of the Bath and Wells Diocesan Association. There was ringing turing the afternoon, amd a spechal service wiss belt, at which the Bishop of Bath and Wells was the preadser. I'ho branches of the association reppesented, included Burnham, Elminster, St. James's (Taunton), Midsomer' Norton, Weston-super-Mare, Hillou, Bridgwater, Uphild, Chedzoy, Taunton St. Mary's, and Wedmore. Among the representatives of the association who numbered about 60, were Messis. E. E. Burgess (hon. secretary), F. C. Rich (lnon. secretary, Bath Deanery), W. J. Prescott (the late Bath secretwry), W. A. Qave (Bristol), C. H. Jennings (Sulisbury Guild), G. Yoo (Chew Deanery secretary), D. G. Taylor (Ilminster), and S. T, Uyke (secretary, Midsomer Norton Deanery), Wh. Farley (Wells), aud 'I. F'. King (Bath). Most of the Bath towers were represented.

The special form of service guthorised by the late Lord Bishop for the use of this association was adopted. Prayers were read lyy the Rector (the Rov, C. O. Earker), Preb. F. A. Bromley (Vicar of A! Saints', Weston) acted ns the Bishop's chaplain, and the lesson was read by Preb. M. D. Hoets, R.D. $\mathrm{T}^{1 / 2} \mathrm{l}$ e Rev, Paget L, Bayly (Rector of Newton Sit. Loel was also present. The churchwardens took their accustomed part in the service, and the surpliced choir attemdet. The service included three special hymms, among then the " Ringers' Hymn,' an adaptation of a passage of Tennyzon's ' In Memoriam.'

The Bishop took for his text, Isainh ixii. 6, 'I have set watcly men upon thy walls, $O$ Jerusalem, which shall never hold their peace day nor night: ye thet make mention of the Lord, keep not silence, and give Him no rest, till He establish, aud till He mako Jerusalem a praise it the eartlt. ${ }^{1}$ In the course of his address, Dr. Wyane Wilson said the ringers in the glorious towers of the churches of Somerset, the comnty's pride, were the watchmen on the wall. As they slood in the belfy towers calling God to hear men and calling men to praise God, they should realise that theirs was a great office; they should realise fheirs wats a great function in the life of the Church. They were the Lord's romembrancers in church life and in the life of the uation. The bells annotnced a birth into the worid, rang merrily as a man ant maid book life's most stupendous step, and in the deep solemn notas told of tho passing of a human sonl. Their bells, too, celebrated the great Christian festivals. Their appeal was almost human, and the sound of the bells cha still summer's Sunday brought back menories of Sundays in childhood's happy days. Sometimes the bells tore the very heartstrings. In national life the bells were the peoples common expression, and rang for victory or for sorrow. In the winter montlis they were the messengers who prodnimed the coming of a new year and a new life. In that county he hoperd the hells of the Lord's remembiancers would ring out every careless, foolish and selfish thought. It was the bells of everg belfy tower which called men to rememher-w Lest we forget.' was their message. Might the bells, as fhey ranti, reach their learts and help them to the realisation of the full wonship of God.

## A LYE BODY OF GHURCH WORKFRS

After tho service the company adijourned to tea in the Villaro Hall. After tea the Rector of Corston welcomed the Lord Bishop and the other guests. Tn doing so, Mr. Parker observed that le was enabled to welcome the company in a dual capacity, firsty as Rector of Corston, and, secondly, as Master of that association. As Rectar of that parish, he was proud to welcome the Bishop that day. Corston was one of the most ancient panishes in that diocese. It wre mentioned in Domescay Book. and the church was evidently of very considerable autiquity. He was glad that the Bishop's first official visit to Corston was in his capacity of President of the Association. That association consisted of a thoroughly live body of church workers (hear, hear). He believed that the ringers in their association werc as good as any other church workers who could be found, and he did not beliefe that any other body of church warkers exceiled them in intelligence. He did not mean to imply that other chureh workers were necessarily unintelligent. but he referred to the porticular qualities whieh change ringing temanfed. Fe dut not suppose that their president lasd yet fully realised what those qualities were. Change ringing demanded the exercise of very great intelligence. very great concentwation, and very great perseverance. The Rector then referred to the patriotism which the ringers of Somerset had displated in the European war and to the memorial fablet in Bath Abhey, which recorder that 30 of the members of their association had sacrifeed their lives for their Ring and monntry Not only had they this record of sacrifice, but they gave belp in other wa.pe during the struggle. During the war the association continued its activities in spita of the ifficultios of rumning such an organisa tion at such a time. Their thanks were due to their secretary. Mr Burgess, who carried them thougls those difficutt times. They dit
so well that they did not even have to raise the subscription of their members above a shilling. They had found it necessary, however, to atlopt the rule that every parish in which there was a band of ringers belonging to that association should affliate itself to the assaciation by paying a small fee for that honour. They felt that it was a very great advantage to have a band of ringers in a parish who belonged to that association. In the case of probationers-persons desirong of leatming change ringing-an aftitation fee of 2s. pey tower annualiy was paid, and he heljeved that most Church Conacils if apponched in the right wry would be only too willing to give a small sum as an affiliation fee of $5 s$.
In the usinal way the members of that association exercised a selfdeuying ordinance at their meetings by forgoing any clarge for tra, hut abtiat evening's gathering tho tea lad been provided by certain friends in his parish, lis Church Council, and ladies associated with the ringers without any charge on tho association funds. Notwithstanding their difficulties their finances hat materially improved, and they had been able during the past year to publish a full report of their activities. The Rector expressed bis regret at the fact that several churches in Bath were not affliated to the association, and that eaveral others had not their Full band of ringers. The Rector acknowledged the services of Mr. F. C. Hich, the local Eacretary, and remarked that he believed the association had been doing and was continuing to do a good work. Fe again expressed bis thanks to the Bishop for encouraging the work of that association by his presence that day.

## THE BISHOP'S APPRECIATJON OF RINGERS.

The Bishop thanked the Rector for his welcome, and humorously congratulated Mr. Parkey on the success with which be bad extended that welcome in a dual capacity. He also thanked him for his hospitality, and expressed his appreciation of the service in the church. Ho also further thanked Mr. Farker in his capacity as Master, for tha information which lie had given lim about the work of that association. Dr. Wynne Willson described with erjdent enjopment, the attempt which he made to 'cram ' himself hurriedly, with the assistance of a book he procured from his chaplaiu, on the subject of change ringing, aud the mysteries of "Grandsire Triples, Bob Mrjor, and oliner things. He could assure the Rector that he already appreciated vine enthusiasm of those who practised changu riuging. and the value of the work of that association. As he went alout his diogese, lie har learned to realise the value of that wort, even before $\mathrm{Mr}^{2}$. Parker told him. He hoped that the bell rimgerg would continue to realise the sacred character of their office, and
dhat when they had concluded their task of calling people to church riey would themselves remain for the scrvice, and that the bellringers' pex would always be full. There was 110 combty, he added, in which such exquisite towers wero to be found as these whict were the glory of Sonderset. Personally he should never forget the deep impression made on him by the peal whig in the evening on Nov. 19th, 1921, ou the bells at Wells Cathedral under the direction of his fryend. Mr. J. T. Dyke, to celebrate his nadretion and enthronament as Bishop of the Diocese. He wislued the membere of that association every success in theip emtearours in that diocese, (applause).

## A SLENT BATH TOWER.

Prebendary M. E. Hoets, R.D., in proposing it vate of thanks to their entertainers for their hospitality, expressed regret that the tower of Christ Clureh, Bath, was still silent. He explained that to pat the bells in a condition for clange uinging wourd juvolve an expenditure of possibly $\approx 150$; and at present his churel had to meet other urgent claims. Perhaps a friend of the chnrel might make a thankoffering iu the future which would enable this work to be carried out. The probable sequel would he complainte from the proprietors of lodging houses and othor residents in the vicinity of the maise of the luells (laughter).
Prebendary F. A. Bromley (chairman of the Bath Deanery), who seconded, said he considered that Corston possessed a peal of bells with sweet and beautiful tone. Ins regretted that there were still some towers in the Bath Deanery without sufficiont ringers; and he loped that sman infuouce might be brought to beal to remedy this. In his parish of Westan they were very grateful for the help which other ringers very kindly gave them.
Tlianks were expressed to the Rector of Newton St. Loe and to the Vicar of Twerton who had also placed their fowers at the lisposal of the wisitors.
Mr. C. H. Temnings. of the Salisburs Guild, brought the meeting best wishes and greetings from his Guild.
At the husiness meeting, the members of the associthon aposed to assist the Viear of Mells. whose bells have just been rehurg hy helping to complete a hand of ringers, and a collection was taken at the sutgestion of Mr. Parker, towards the fund for \&ोe carrying out of this work.
The colleotion towards the rehanging of the bells at Melle realiged 5255.8 d

The next quatterly meeting will be held at Tlminster on the scond Saturiay after Faster.

## BELFRY GOSSLP.

When the representalives of the Salisbury Diocesan Geidd invited the Central Council to visit Heir Cathedral City for the next meeting, they promised the members a great welcome. We understand a unique programme is mnder consideration, and of such a nature that members of the Council should make every effort to reach Salisbury for this gathering. They will assuredly emjoy the visit.
Our recent reference in this column to the first peal in Scatand, at Dundee in 1873, leads a correspondent to say that he believes the first peal over the border was rung by a party of York ringera, when they opened a ring of eight from Whitechapel, at St. 'Andrer'r, Edinhargh, about a century ago. The method was Treble Bob. Can any of our readers give us information upon this?
Clained to $b_{e}$ ' the first true peal ever rung in London in that mothod,' a peal of Norwich Court Bob Major was ruly at St. Matthew's, Bethnal Green, on Monday, Jamuary 74, 1788, by the Senior Society of Cumbernand Youths. It was called by John Reeves, and the claim is especially significant in view of a peal in the sama method rung at Bethnal Green by the Tunior Cumberlands in 1786. It is generally accepted that the latter peal was false.
The first peal of Oxford Treble Bioh Caters was rung at Birmingham on January 7th, 1817
The College Youths, on Jamuay 6 th, 1851, rang a peal of 7,524 Stedman Cinques at Cripplegate, and this length stood as the record in the metbod until 1858 . It was a band of men who became famous in London ringing that took part in this peal: John Cox, Tohn Bradley, William Cooter, William Banister, James Mash, Matt. Wood, IN. Haworth, Gcorge Ferris, Ed. Lansdell, H. Littlechild, James Dwight, and John Austin.
Several of them were in the peal which recovered the record for the College Youtbs in 1861, and concerning whicl Jinmy Dwight lapsed into verse. His poetry on the subject is still remembered by some of the London ringers of to-day.
On January llih, either 1716 or 1717 , the London Schoiars rang a peal of Grandsire Caters at St. Bride's, Fleet Street. This is believed to have been the first ten-bell peal ever rung, and the only peal of Gaters rung at St. Bride's while the tower contained 10 bells. Hemry Johnson died on January 7th, 1890
The peal of Bob Minor at Pickleton, recorded in our issue of Dec. 22nd, was rutig on Dec. 16th, not Dec. 2nd as printer.

On Dec. I8th last there passed awar, at Mortlake, at the advanced age of 94 years, Mrs. Jdwin Sykes, widow of the late Mr. Edwin Sykes, solicitor, and mother of the late Mr. D. F. E. Sylkes, historian, novelist and solicitor. Sho was the grandmother of Mr. Toseph E. Sykes, of Huddersfield.
Mr. R. O. Street points ont that the date towch of Stedman Caters published in our last issue is false in the second and minth courses.
Il is lioped that the dedication of the bells at Lambeth Parish Chume, which Messrs, Mears and Stainbank are recasting and rehanging, will take place at the forthcoming Parisit Festival on Feb. 2nal.
Mr. A. Prior has been electell Ringing Master of the South-West Dipision of the Essex, Association, in place of Mr. E. Wightman, who has been accorded the thanks of the members for his services during the past two years. The divisional secretary was re-elected.
The Yorkshire Association, and particularly the Leeds district, has suflered a great loss by the death of Mr. John Thackray, of Christ Church, Upper Armley, who passed away on Dee. 23rd, at the age i, 68. He had been a ringer at his clurch for over 40 years.

The bells at Staminore, Middlesex, with the 3 rd recast and twa trebles added, were, after rehanging by Messrs. Mears and Stainbank, rederlicated on Dec. 23 rd .
In reference to our recent article upon twelve bell peals, Mr. G. E. Symonds calls attention to the fact that a peal of Cimques at Ipswich, rung on May 5th, had apparently been omitted from our calculations. This is correct. The record was overlooked througly it not apparing under the customary heading.
This makea a total of 35 twelve-bell peals on tower bella rung during 1921 up to the diale of our article, of which 19 were rung in or around London, four at Painswick, three at Birmingham and thise at Ipswich, leavigg only six, spregr over five towers. viz., Wolverhampton (2), and Leicester, Norwich, Chelmsford and Sheffield.

## FARNBOROUGH BELLS RESTORED.

The bells of St. Peler's Chureh. Farnborough, Hanis, which have been restoredi by Mossrs. Gillett and Johaston, of Croydon, were dedicater by the Rector (the Rev. Canon W. A. Clialincombe) at the morning service on Christmas Eve, and sfterwards Fung by the local band of ringers. The bells have been rehnig in a now ateel
 accuratety tured.

## A TIME FOR GOOD RESOLUTIONS

## To the Editor.

Nifr, —May I add to your suggestions under this heading one or two minor, but not unimportant, subjects for good New Year resolutions by the ringing fraternity?
(1) Punctuality in keeping appointments. A man who keeps seven others waiting in a beltry is wasting their time, not his own; one who fails to turu up without urgent excuse commits an act of great discourtesy to others. Whenever I road in peal reports that ' meeting one short for one nethod, a band had to substitute another, or possibly ring on fewer hells, 1 wonder what was the defaulter's reason (or no reason) for non-appearance. If it was 'cussedness,' of carelessness - of botli which mental states I have known exampleswill he turn over a new lear this year?
(2) Civility in disagreement. Why gannot men who disagrea with each other an matters where diference of opinian is possible and legitimate, do so whothomputing either gross ignorance or crooked motives? That they cannot always behave thus, your columns, sis, have recently shown some flagrant examples; and here again, 1 would respectfully suggest is a field for goad New Year resolutions.
(3) But someone will say, 'You clergy also ought to make good resolutions in regand to your belfrjes and ringers." I guite agree. have in the past spent much time and trouble in this direction with my clerical brethen, I fear without much result. Many years ago, when I spoke to the Rector of an important parish, who allowed a set of paid rimgers to monopolise his belfyy and keep change ringing out of $i t$, he declined to interfere on the ground that this had nothing to do with the church! More recently I have heard of a parisl, with a fine ring of bells, and a well-established band of change ringers, respectable men and ( $I$ an told) regular communicants where a nowly-appointed incumbent took no notice whatever of belfry or of ringers; until, after he had addressed the local branch of C.E.M.S. upon 'Sociabiliby,' it was suggested to him that he should put lis teaching into practice, find out who rang the church bells, and himself pay a visit to the belfry. For some clergy, as well as for ringers, there is obviously a a time for good resolutions.

## LLANDAFF \& MONMOUTH DIOCESAN ASSOCIATION.

THE CARE OF BTESFRIES.
The annual meeting was beld at Llandaft on Tuestay, Dec, 26th Theve was a good attendance, includiog tisitors from Bristol and Reading. The Vicar of St. Johm's, Cardiff, had readily given permission for the uso of lis bells during the day, and full advantage was taken of it. The bells of the Gathedral were also kept busy until service time, at 4 o'clock. In the unavoillable absence of the Dean. through indisposition, the Arcladeacon or Llandaff kindly took the service. Tea followed in the Prebendal House, and the business meeting was afterwards held, the Archdeacon taking the chair.

A very cordial welcome was accorded to the association by tho chairmath, on helialf of the Dean.

The Rishop's letter sanctioning the alteration of the title of the association was read by the hon, secpetary.
Officars for the ensuing year were next elected, including Master. hon secretary and anditors.
It was decided to hold the next amual mecting at All Saints', Newport, the mext Monmouthslive quarterly meeting at Ghepstow, and the next Glamorgan quarterly meeting at sully.
Instructors' reports were received, and showed goad pragress at several towers.

A suggestion was made that the attention of the clergy throughout the assoriation's aren should the called to the desirabilhy of all ringing chamhers receiving the same regular carc and attention by those responsible ar the other parfs of the ehurch. -The Arch Jeacon said that it would he a pleasure to him to hring it before the elergy at lis next visitation.

Quite a mumber of new members were electer, including the whole of the tingers at. St. Andrew's, Dinas Powis.
The usual vote ol fhanks was accorded to the chairman, and also to the Dean and Mus. Griffith for their kindness in arranging everything, and providing the tea.
The bells of both the Cathedral and St. John's, Cardiff, were again rung during the evening, bringing to a close a most useful and pieasant meeting.

## TEN-BELL TOWERS. To the Editor.

Dear Sir,-Tour Editorial on the twelve-bell towers of our " IRinging Isle 'fores us to the conclusion that it is not from them that we got that uame, and I am certain that it is not from the ren-bell towers. Theso do not even help to uphold our clain to the title. No one can dispute your assertions, nor can they dispute the fact that the ten-beli towers are as $3 \frac{1}{2}$ to 1 in proportion to the twelvebell towers, who are now fast hastening to set their honse in order I believe that only seven of the 12 -bell rings are now unpealable. Hut one sludders when one thinks of the ten-bell towers. Ont of 140 I find that only e0 put up a peal (or altempt) daring the year and only a very few of these can elaim that half or more of the batad were regulal service ringers at these churehes. So the twelve-bell towers have it with a percentage of 2.857 towers, putting up a peai against i percentage of 2.3 for the ten-bell towers.
We must of course, bear in mind that the percontage of teu-bell towers which are not pealable for various reasons, is greater than that of the twelve-bell towers. But when towers are unused even for Sunday services becauso the ' neiglabours' object, and bocase not enough ringers can he had, one must come to the conclusion that there is a screw loose. I know of several such towers. One I know where six is the rule for morning service-they are only paid to ring eight at any lime-and another where more than six are never heard unless a visiting band calls in. One could use up reams of papar describing the state of tho ter-bell towers, but only dynamite and the undertaker will remove many of the obstacles to reform. Let us hope that this new year will cause a few more of our Tons to help us to uphold our title of "The Ringing Isle."-Yours sincerely,

## DEATH OF MR. WILLIAM WARD.

By fle death of MI. William Ward, at Watford, on December 10th, the Exevcise loses one of the most careful of ringers, and at man of most obliging and unselfish character. Mr. Ward was not a prolific peal ringer, mainly owing to the fact that he nearly rlways confinent his attempls to peals arranged by the local band to which he belonged, and seldom iravelled afield. This is strikingly illustrated hy the fact that lis first 40 peals were rung at Crawley, Sussex, in the tower in which be learned to ring.
Allogether lie took part in 98 peals, of which a list is here given. These include the first peal of Allinuce Major and the lona peal of 9,312 of Superlatise (in which he did not make a single trip), botla of which were rung at Crawley.
The deceased moved to London in 1896, and took part in several peals with the Royal Cumberland Youths, and witl the Ednonton band. Later he went to Watford, but business curtailed his ringing, althougf he rang with the Oxhey band until about seven years ago, when failing liealth compelled him to give up ringing altogether. He leaves a widow, a son and two daughters. His peals were Grandsire Triples, 6 (conducted 1 ) ; Boh Triples, $1:$ Courf Boh Triples. 1: Stedman Triples. 15 (conducted 2): Treble Bob Wajor, 9 (conducted 2); Alliance Major, i: Double Norwich Major. ## DEATH OF MR. ARTHUR SLATER

${ }^{M r}$. Arthur Slater, of Norlon, near Sheffeld, whose death has already been briefly announced, was a former member of the St. James' Society, Norton, which he joined in 1890 . He was a member of the old East Derbyshire Association, and took part in many sixbell peals and contests.

It a later period (1886) he joined the Yorkshire Association, and rang eleven peals of 5,000 and upward under the banmer of this prominent and illustrious sociely. His most moteworthy performance was at St. Mars © Church, Bolsterstone, in the Year 1900 , when he rang in a peal of 8,288 Kent Treble Boh Major, composed by Mr. Arthur Craven, and conducted by Mr. Arthut Jnights. This peal confaned the 60 courge ends. If was angular fact that five of the ringers in this peal possessed fhe Christian mame of Artinar

Faling lealth for the last [ew years hept int. Slater from follow ing the art which he lowed, although his deep interest many times prompted him to undertake journeys to be amongst members of the craft in the varions towers of tle district. His geniality and bindness drew around him a large circle of friends, both in the ringing and commercial world. He leaves a witow, daughter and two sons to mourn their loss.

The interment took place at the Abbey Lane Cemetery, Norfon.

## WHAT IS DIOCESAN?

## To the Edilor.

Sin, May I be allowed a word in reply to the Rev. H. Dirke's letter appearing in your issue of December 22nd? I submit that your correspondent confuses the case and evades tho issue, and that it is mecessary to tescend from the clouds whither lie takes us, and get to fundamentals.

First, as to the three charges he prefers against the Worwich, st. E, and I. Assoriation-anmexation, monepaly, and iuflated titie. If these things fire to be reckoned as faults against us, his new association exprily falls under the condemmation; a detail he quite over Jooks.
Then as to the diocesan title. For 45 years past (the association was founder in 1877) the ringers of Eact Sulfolk lave consistently used the title ' diocesam' and during all that time have enjoyed the confience of their diocesan. In 1914 , in cowmon with other churchmen in the Suffolk Archdeacany, they were placed under the first Bishop of St. E. and I., who rave them, thercupon, his blessing. And to-day the East Suffolk ringers continue their work under their clergy exactly as heretofore. Hence it is with reason that they clam recognition as parochial and as diocesan workers, just as, for instance, the organists and the choirmen do.

Aud they cannot, if they would, belong io any other diocese than St. Edmundsbury and Ipswich. It is not evident, therefore, in what respect the ringers of East Suffolk fail in a duty in whicl the West Suffolk ringers succed. In descrting the majority of his ringers, as be has done, the present Bishop has, it seems, been badly advised.

Lastly, as to "St. Edmumbbury." Ipswich, and the whole of Fast Suffolk, are as much in the diocese of St, Edmundshury and Ipswich, as is West Suffolk; and it follows that in amending and amplifying their diocesan title, it must be the full, and nothing but the full, title taken. Besides, it must be remembered that for many yearslong before the new association was thought of-ringers in Feat Suffolk have been members of the Norwich, St. 受. and I. Association; and more may yet wish to join it. Mr. Drake's advaeacy of the diocesan style for his association is inconsistent wilh the bric ${ }^{c}$ history of the new society. At first, the title " Suffolk Connty " was chosen; then changed, on second thoughts, to 'Sulfolk Diocesan. It was only after the Norwich, St. E and I Association lad adopt -1 their new style, that it occurred to the West Suffolk men that the title was in any way desirahle-a case, in fact, of second-comers jumping a claim previously pegged ont.-Yaurs very truly

## BRISTOL SURPRISE.

## To the Editor.

Dear Sir,-It is quite easy to prove that the melhods given in to-day's "Ringing World" are not even remolely related to Bristol Surprise Major, quid what is still more strange is the fact that the Maximus given by Mr. Bramble is not even related to the Royal.
In March of this year, 1 sommenced convassing the views of other composers to see if there was any likelinood of my riews being uscepted by the majority, with the following resnlt,
Uf the 23 composers writren to, 15 agree with me that the following Minor, Major, Royal and Maximus are in proper progression, or, us we generally say, the same mellod. Of the remairing eight two agree with me that the Major, Royal and Maximus are all one, but they are doublful about the Minor. Three composers have nobreplied, one prefers to remain neutral, onte suys it is an Oxford exiension, and one says, 'No, they are all different methods.

## THE AUTHOR'S PREFERENCE

Dear Sir,mI camot but admire Mr. York Bramble's admirable system of arriving at his conclusions. The plan seems to ba this: Clioose the method whose elaims you are going to

Find all tho poiuts that will help you it vour argument, and cali them 'inevitable inter. relationships "-a nice long word that-ignore any es* sential facts that militate against your argument; anf there yon are!
Mr. Bramble has given us a complete octave ol' these "i-i-r's. and he allows that there are others: he is right, there are. Here is one of them: In Bristol Surprise Major no fell ever riordres on the leatl or hehind with any other hell than its course hell, of the hell that is coursing it
Your readers may be interested to apply fliss rula to the figures that Mr. Bramble offers us as Bristol Maximus.

Of course. I was aware lane ago that by an Orford extension it was easy to produce some stoln extension as that which he has given us, hut I proforyed the extension that I give here.
With regard to his mevitable inter-relationships, ( and (e) are ohviously untemable.
With regard to (b), I mipht just as well say that in Superlalive Royal the bell that strikes in ninth's place when the treble is in fifth's must go on dodging until the troble turns her from belind; and as to (e) I might assert that in Cambridge Roval the bell that is being coursed down by the " bell-hehind-at-ihe lead-head-another fine word that!-must, rin straight in to load.
I may ard that $I$ am still convinced that the extension thrt I sent vou is correct, hut, as I do not exnect that there is more than one in a thousand of your readere who is at all intmested in the matter, t will not wasto your valuahle space in enlargint on the snbjectYours truly,

## CHEERIO!

## By : W. W

This is the festive season-that is, as 1 write; lint by the time this appears in print the frisky feeling will have fizzled out somewhat, and we palerfamitias will be scrounging aronnd the corners of our pockets in a forlorn hope of discovering-what we know is 'not there, no, not there -sorne Hotsam and jetsam from the wreck of the good ship Treasury.
Thene are certain signs of the approach of the festive seasou which are ummistakatale, and can be cliagnosed by anyone accustomed io being 'tanched.' The dustbiu men, who, for fifty-ono weeks lave taken a pure delight in slaking surplas refuase orer the front pavement, suddenty alter their tactics, call me 'Sir" give ma their unasked opinion of the weather, and hope I an well in health. Everyone who brings anything to the rioor, hands it over reluctantly, and with an expectant air as though I ouglat to give it back gaain 11 return for bringing it

As Christmas approaches, those of as who have families, are not allowed to forget it. After bejug under an appreliension for geverad days, we feel that the blow is about to fall-and it does.

I believe in giving sensible presents; don't Font, dad? Then I tremble all over like a horse that has just been down for the firsi time. You may rppear to be too busy to lear, but it gets there ald the same. Such a guestion puts you in a cleft stick, or, in the vulgar tougue, "up the pole,' for 'seusible presents " may mean anything from a box of nose-powder to an antomolile, and in any case there is a sudden clrop of the finameial barometer from fair to freezing.
Then the letter-box jattles incessantly, and every time I go to pick up the missives I find nothing bui bills, bills, ata still more bills. I wonder why tradesmen whll persist in pesteriug one with these reminders of filty lucre at such a season of goodwill.

Still, I am $n 0$ Sorooge nor curmudgeon, and for the sake of tha Founger gencration we will laugh with fhose who langh, though we are conscions of having reached the hilitop, and are taking the first steps down the other side, when Christmas and the festivities which it brisge in its train do not appeal to us as they did. The ghost of 'Christmas Past ' peers over our shoulder, and brings back memories of years agone when the festive eenson was a landmart in our history, in the days when we set our faces to the risiry sun, fearless of the future, Wo have passed many milestones since then. Memories of our dearest and our best; the friends of the honto and of the belfry who made merry with us it map be only one short year ago, and who lave preceded us to the land of shadows, come back to us at this time, and wo noukd not liafe it otherwige, for some day, we hope that those who follow us, will recall our happiest hours. Omar felt the Kindred seirit when he wrote:-

And when thyself witla shiming foot shall pass
Amid the guests star-scatered on the grass,
And in thy joyous errand reach the spot
Where I made one-turn down an empty glass!
And that reminds me, 'Landlard! Landlard! wise is also empty. A mild and bitter, please, and a word in thine ear, good Bonifacenot so mucly troth (no personalities). ## THE CARE OF RINGING CHAMBERS.

The Llandalf and Monmouth Diocesan Association could not have seized upon a better opportunity than a meeting at which an Archdeacon was present for a resolution, calling attention to the desirability of all ring ing chambers receiving the same regular care and attention, by those responsible for the upleep of churches, as the other parts of these buildings receive. Upon the Archdeacon devolves the responsibility of seeing that church authorities, among other things, exercise due care in maintaining the churches, and the Archtleacon of Llandalf quickly seized upon the opportunity which the resolution provided, of assuring his association that it would be a pleasure to him to bring this matter before the clergy at his next visitation.
We hope that many other associations will follow the example set by that for the Diocese of Llandaff and Monmouth, and, if they cannot get an Archeleacon to their meetings, they will carry their resolution to the Archdeacons and get them interested in it. "There is no portion of the church buiding which, in the past, has been mote neglected than the belfry, and even to-day the condition of many ringing chambers is lamentable. There are, of course, a large number of belfries up and down the country which are a pattern of cleanliness and neatness, and fully in keeping with the rest of the church, but the condition of most of these is duc to the zeal of the ringers themselwes, and not to any effort made by the church authorities. In assisting the cause of 'belfry reform ' the clergy have lost no opportunity of reminding ringers that the beffry is a part of God's House, but many of these same clergy have done nothing to make the ringing chamber conform worthily, in its upkeep and appearance, with the resti of the building.

Ringing chambers have been, and in some cases still are, made the lumber room of the church, the receptacle for all unwanted furniture, where dust and cobwebs accumulate for years. Indeed, there is to-day at one of the most famous London churches, a belfry almost as black as a chinney. This sort of thing ought not to be, Ringers, by their own labour and often at their own monetary cost, have worked wonders in many towers, but it is not right that this matter should be left entirely to them. The choir are not called upon to clean out the choir stalls, and the ringing chamber should be just as carefully attended to by the church authorities as the nave, the chancel or the vestry. Where the condition of affairs shows obvious neglect, an association would, we imagine, be fully warranted in bringing the matter to the notice of the church authorities, through the incumbent I or the Parochial Council; and if tactful representation had no effect, a direct appeal to the Archdeacon to bring his influence to bear might have some result.

## A PEAL IN 30 METHODS.

GllEAT AOHIEVEMENT BY A CHESHIRE COMPANX.
A triumph of six-bell ringing has been achieved by the enterprising bsurl at Norbury, Cheshire, where on New Years Day a peal of Minor in no lass that 30 methods, all contained within the scope at seven true extents, was rung. The peal was rung at the third attempt. The first was on December 23'd, and the second on Boxims Day. These attempts failed in the fourth 720 each time. On both owasions the striking was very good, and the first trip upset everything. No trip occurred is the final aitempt, and the striking throughout was faultless.

Alt lhe methods will be found in the present edition of the C. C . Collection of Legitimate methods, with the exception of Bogedore, Thowell, Grove Delight, Poynton and Overton, which, however, are also regular. Fifteen of the methods have, on previous occasions, been first rung and anamed by the Norbary company.

To those ringers whose efforts are largely limited to six bells, there is ample seope in the Cential Council's Collection, and what can be done by way of increasing juterest, wariety and intricacy is demonstrated by the men at Nombury. No one can say that six bell ringing need be ' lame' after this.
In addition to the Norbury peat, it is interesting fo note that a peal in fourteen Surprise methods was rung at Thornham Magna on December 30th.

## THE FIRST PEAL AT EAST ILSLEY.

In the peal columas last weok was recorded the first peal in the tower at Jast Ilsley, Berks. It was decided at the couclusion of the great war to add a bell to the old five in the tower as a mernorial to 21 men of the parish who gave their lives (most of this has been printed bofore, but 'Lest we forget, Mr. Erlitor, we would like it printed again). Well, after great disappointments and difficulties tackled and deleated, a seventh bell was promised prorided the octave was completed, and after a preat fete one summer day in 1919 the job was placed with the firm of Mears and Stainbank, who took the old bells away, fond taned them, cast three trebles, than which no sweeter little bells swing in the county, and hung the peal on a specially designed frame to suit the tower.
Tt was hoped that an entirely local band would ring the first peal, but the difercnce between five belis and eight has proved too big a jump at present, so it was agreed by all that a peal ought to be rung hefore 1922 went out. Therefore, five Ilsley men, with the help of three natives of adjoining parishes. Fang a Berkshiremen's peal. which was excollently struck throughout. It very seldom lappens

What several men in a peal can say that they fist rang a beil in a certain lower on a poor old ring of five That would take all the pulling aud all the handling that men could give them to get a good six-score, and that now they have rung a first-rate peal on one of tue sweetest litte rings of eight that can be found. Hearty congrutula tions from the villagers, and especially from the local ringers who were left outside, stowed the good feeling umong tho band. Tho wisitors were enferfained by Mr. Ams Mrs. W. Hibbert after the peal Mr. T. Hands is a mative of Yattendon: G. Essex. of Hagbourne: and the Rev. C. W, O. Jenkyn, of East Garston.

## DEATH OF MR. ЭOHN THACKRAY.

A PIONEER OF HANDBELE RINGING IN LIPDS.
As briety anmounced in our last isstre, the death has occured at Upper Atmley, Leeds, of Mr. John Tluackray. The deceased, who Wats in bis foth year, comnenced ringing in the wear 1881, when tho phal of six bells was liting in Clirist Claurch, uppur drmpey, ant when opportunity offered, rapidly advanced to he one of the formost six bell ringers in the district, being possessed of a fine ear, which made lim noted for good striking. In the dags when hambell ringing was liltle known in the county, in conjunctian with Mr. T. Whitaker (now a veteran indecd), sund his Lrother, Mr. J. Thaekray, under the leadership of $\mathbf{M r}$. For many years the cleceased earnesty advocaterl the addition of two trebles at Armley, and early in 1922 the peal was rehning by Messrs. M"aylor. Largely owiug to the energies displayed by Mr. Thackray two trebles were added to the existing peal of six, and this was a soturce of greath gratification to him.
The funcral took place on Tucsday, December 26th, when a large and representative gathering of vingerg assembled at Clust Churoz where the first part of the funeral service wis held. Dr. W. On January $13 t_{1}, 1772$, a peal of 6,048 Imperial Treble Boly was rung at St, Michael Coslany, Norwjeh, where, a year earlier, en January 15th, $1771,5,700$ Nor"ich Courth Boh had been rung by the Norwich scholars. This last named was, we believe, the first peal in the Nownich variation of Court Bob, of which there is any record. Teals of Court Bob in other rariations had previously been rung fu Loudou.
On January 18th, 1844, a record was put up at St. Peter Mancroft, Norwich, when a peal of 7,126 Stedman Cincues was ramy in 5 lus. 17 mins., and the peal tablet recording the performance affirms that the bold and regular striking attracted the notice of the public, and is allowed to exceed any, other performance over attempled in England upon Twelve Bells, Charles Middleton, whose name is so inseparably limked with Cambridge Surprise Major, and Henry Hubbayd, who in his day did mucls work for the att, took part in this peal.

The first peal of Forward Maximus was rang at St, Matiu's, Birmingham, twenty years ago tomorrow.

On January 14th, 1899, the St. Peter's Society, Brightion, then at the zenith of their fame, rang the first peal of London Surprise in the City of London. That was at Sit. Stephen's, Coleman Sircet, it we renember alight.
At a meeting of Gravesend Council, on Dec 20th, it was unanimously yesolved to contribute from the borough funds one hundrett guineas towards the vecasting of the bells at the Parish Church.
Mr. John Owerton has been re-elected Ringirg Master of the Bridgwortla Branch of the Hereford Diocesan Guild, and Mr. W. Hayward hon. secretary. It is hoped that more of tho towers in tho district will join the Guild during the coming year.
There are not many towers in which a peat of Cambridge Major, Royai and Maximus lias been rung, but St. Martin's Guild, Birmingham, have just completed the circuit on the famous bells in the Bull Ring.

## ENGLISH BELLS FOR AMERICA.

MESSRS, GYLLETT AND JOHNSTON'S GREAT CONTRACT.
The carillon of 42 bells ordered by Mr. J. D. Rockefeller, from the celebrated Croydon foundry of Messrs. Gillete and Johnston, for the campanile of the Park Avenue Bapfist Clurch, New York, will bo the largest on the American Cantinent, and, owing to the perrection to which the founders have brouglt the art of bell tuning, it will also be nnequalled for purity of toue atal tune.
The bells will be played by a skilled carilloneur, by means of a hand clavier, fitted also with foot pedals, this method giving complete control over the volume of sound produced, and cuabling the operator to play the most elaborate music, the great number of the bells allowing for an unlimited repertoire.
Before selecting the Croydon firm, Mr. Rockefeller secured the services of a well-known American musical expert to visit and report to him upon the leading bell founders of America and Europe, and Messrs. Gilett and Johnston are to be congratulated that, after such a critical investigation, they have scoured, in the open market ot the world, a contract of such interest and importance.
The churcli, situated in the mewest and pertiaps the most faslionable avenue in New York Cify, is of an unusual type, inasnuch as, owing to restricted ground space. the Sunday Sehool classrooms aro built in vertical tiers outside the lofty nave, and are raached by means of large capacity express elevators. The building is surmounted by en exceptionally beautiful Gothic campanile, the delicate tracery of which will allow the music of the bells to be hoard to the luest advantage in the broad boulevard beneath,
At present the largest carillon on the Continent is that of 23 bells, with in 4 -toan tenor, installed by the same founders earlier this year at tho Metropolitan Methodist Clurel, Toronto. Recitals have been given on these belis throughout the summer, and a novelty in the way of carols was prepared for Chrisimas by uniting the voices of the large and perfectly trainedi choir, conducted hy Dr. Fricker, formerly organist of Canterbury Cathedral, Empland, with thos of the hells, the choir singing in the actual belfry, grouped round the carillonenr.

## A BELE WARMING * AT HASTINGS

A quarlerly meeting of the Eastern Division was lield at All Saints Hustings, on Saturday last, when the members had a very hearts welcome from the Rector (tize Rev. F., A. Penson). The bells, which until quite recently were a ring of six, have now hean augmented to eight by Messrs. Tayior and Co., of Loughlorough, and the go: of the belis is spleudte
The following towers were representod at the mecting: Battle, Bexhiill, Eastbourne (St. Saviour's), Brede, Hailsham, Christ Church, St Leonards; Christ Church, Blacklands, aud Pevensey. tar. Piper (Esstbourne), MIr. C. Piayer (Stoue, Asliford), and Mr. G. Kenward (Westield) were present, together with the local ringers. During the afternoon tonclies in the standard methods were rnig, followed by a service, which was conducted by the Rev. I. A. Penson,
After the servioe, the Recior kindly eatertained the members to tea in the Parish Roon, and presided both at this and at the ausiness meeting which followed. He was supported by the lady organist, and by Mr. Wray, who gave a most interesting account of the history of All Saints' tover wad bells for the past 500 years.
The foliowing new members were elected: Leonard Giles and Seavle Driver (Blacklands), and Charles Relf (Batte).-The place for thr? mext meeting was discussed, irr. W. Framks proposiug Salelutst, which was agreed to unanimously.
With reference to a sum of 13 s . 1 d , which was coilected at the Hotlerfeld meeting in June last, under the title of 'Tho Sussex Docesan Bell Festoration Fund, as no such fund existed in the gssociation, Mir. G. H. Howse proposed, and Mr. W. P'. Smith secondell, that the sum be transferred to the general fund. This was put to the meeting, and carried.
Mr. Howse proposed a hearty vote of thanks to the Rector for the kiud invitation extended to the associatiou for the use of the bells, and for so kindly entertaining the members to tea.-This was supported by Mr. G. Penfold, of Pevensey, and carried by acclamation.
Tho lector, in reply, said that it gave him great pleasure to haye such a goad mumber present, and he considered it an honour to All Saints for the association to pay a visit. He remarked that usually, when they built a new house, they had a "house warming,' and so when they had a new peal of bells it was only right that they should have a "bell warming." He hoped that overy memier present had enjoyed himsolf.
The members then returned to the tower, aud the bells were kept going in different methods until 8 p.m.

## WESTERN DPVISTON AT CHICHESTER

The business meeting concluded with thanks to Mr. J. T. Rickman For presiding, and Mr. Tonkins (the Jato Master) for making the necessary arrangements, also to Dean Hanuah for granting tine use of the bells.
A further visit was made to the campanile, where the party was joined by Miss Burneti, who taok part in various touches until the time arrived for the ringers to depart to their various destinations. The campanilo is one of the few oxamples left in England, being a separate structure from the Gathedral, and contains an excellent ring of eiglit.

## ILLNESS OF MR. JAMES MOTTS.

At the annual meeting of the St. Mary-le-Tower Society, Ipswich, held on January 2nd, regret was expressed at the serious inliess of Mr. Tames Motts. The following officors were elected for the ensuing year: Master, NIr. James Rose; Deputy Master. Mr. Williem Tillett; stoward and steeplekceper, Mr. Frederick J. Tillett; auditors, Messrs R. H. ## DONCASTER \& DISTRICT SOCIETY.

## A SUCCESSFUL FEAR.

The annual meeting of the above society was held at St. George's, Doncaster, on Saturday, Dec. 30th. There was an attendance of about 40 members, representing somo 12 different towers. Ringing commenced about 3 o'clock, and touches of Grandsire and Stedman Triples, Kent Treble Bob Major, Bob Major, and Doutle Norwich Court Bob Major were rumg.
A short service was hald in the Forman Chapel, and was con* ducted by the Rey. T. H. Mousley, M.A., S.C.F., the new eurate at the Parish Clureh. In the absence of the President (the Ven. Arch. deacon Saudford, M.A.), the Rer. H. T. Eddershaw, B.A., gave the address. The preacher apologised for the absence of the Vicar, and said that somelhing rery important indeed must have kept hims away, as it always gave him great pleasure to come and speak to tho ringers. He thanked the ringers for their serviees, and said how much tho clergy and offerss of the elurch appreciated the good work which they did Sunday after Sunday in calling the people to charch, and reminding all that there was a God to be worshipped. Thees was no music, the speaker said, that was so beautinal as that produced by a peat of bells when they were well rung. In the name of tho Vicar, he welcomed the ringers to St. George's, and wishe! them a successful new year.
The address, which was inspiring to a degree, aud had to be given at a moment's notice without any preparation, was much appreciated by all who heard it.
Tea was sorved in the Memorial Hall, and was followed by tho business meeting.-The Rer. T. H. Mousley was voted to the chair, and he was supported by the wice-president (Mir. G. Halksworth), the Ringing Master (Mr. G. Clark), the hon. treasurer (Mr. H. Woodhouse), the hon. secretary (Mr. Farold Waiker), and Mr. C. D. Potter, hon. searetary of the Barnsley aud District Society.
The Secretary yeported a successiul year's work in 1922, and his report was adopted.
The Charman, who said that he was already a member of the Surrey Association, was elected a member of the society, together with three ringers from Adwick-le-Street.
Mr. G. Clark was re-elected Ringing Laster, to serve another three years.
Votes of thanks were accorded tho Vicar for the usc of tho bells. the Rev. H. T. Eddershaw for his splendid address, and the local band for having the bells ready, the chairman for his services, and the hon. secretary for his work during the past year. Coupled with the hon, secretary's name was that of Miss K. Jackson, who is a most enthusiastic worker for the society.

In a brief reply, the Secetary said he was looking forward to the timo when the Doncaster and District Society would be the foremosi society in the country, and be appealed to tho nembers to put asido all petty jealousies and to work together for one thing, that was progress of the saciety.
The Chairman, in his reply, said how pleased he was to be at the meeting, and to be elected a member of the society. He could ring a bell, but that was all, and lae hoped to be able to get umongst the ringers a bit more in the future. He was very glad, he said, to see in the report a reference to the fact that ringers should give of their best for Sunday ringing; and also he was glad that ringers who had been called to higher service were not forgotiten in the annual report.
This meeting was held a montl earlier than usual, owing to the fact that the annual general meting of the Yorkshire Association is to be held in Doncaster on January 27hh, je being twenty years since the last general meeting of that association was held at Doncaster.

## AN EASY WAY TO SUPERLATIVE

Dear Sir,-Some ringers will make such a fuss of the odd place in Superlative. If the novice will learn what is Treble work, odd place first, odd place last, long dodge last, and lont dodge first, and then ring the method by the treble, the method sloould not be any trouble at all.
Threo times in a course you leave the front and the back. Now my experience has been this, that no mather's son requires to be told that long dodge last is followed by long dodge first. The remaining two occasions you lease it for either odd place first or odd place last-which?
Never nake odd Bth's when the treble is in 7-8, nor make odr Srd's when the treble is in 1-2, but please remember that the odd place does change your direction.
Again, on leaving places the treble is pirlier in the direction you are going, or you leave it behind you. If the treble is not in your path do the intermediate dodge and then treble work. Iì it is in your path you take it in $3-2$ or $6-7$ according to the direction you are going and do long dodge last.- Youre traly,

SUPERLATIVE.

## STANMORE BELLS REOPENED.

The bells of the Parish Church of Stanmore. Middesex, entered upon a new phase of their existence on Saturday, Dec. 23rd. Taken in 1851 from tho old church they were ralung in the belfry of the new ehurch, which had just been completed, and they have been well-known ringers since then. For some time past it has been realised that the whole of the framework, etc, was unsafe, and that the bells required overhauliug. With the assistance of the Rector and churchwardens the necessary funds were secured. and then lo everyones pleasant surprise a member of the congregation came forward with the offer to complete the peal by ilie arldition of two new bells in memory of members of her family. This olier was gratefuly accepted, and the whole of the work placet in the hands of Messrs. Mears and Stainbauk. Upon examination it wha foum that No. 5 bell was badly cracked, and would require recasling. The work, how. ever, was pushed alonf, and the sequel came on Salurday, Dec. A3rd. when a shost dediration service, which inchuded special prapers and laymns, was held.-The Reetor gave a brief address, it which he traced the origin of bells from the earliest recorded times.

After the scrvice, the folloming rang thee courses of Steiman Triples: Hubert Fdon 1, Percy Parsloe 2, William Whiteliead 3, Fred Brinkiow 4. Chas. Leman 5, William Seeley 6 , Maurice Hibhert (conductor) 7, George a. Hughes 8. At the couclusion of this the ringers adjourned for tea at the Institute. On returning to the tower, several tonches were rung, the methods including Cambridge, Superlative and Grandsire. Great praise is due to Messis. Mears and Stambank for The splendid splice whicl: has been effected, and also for the 'go' of the bells, which is now perfect

## BELLS TOO NOISY FOR RTNGERS,

## WHE THHERE IS NO BAND AT ANSDELL

The December meeting of the Fylde Branch of the Lancashine Assaciation was held at Ansdell St. Joseplıs Roman Caholic Cburca on Saturday, Dec. 16th. The bells are a lioht and liandy ring of eight by Mears and Stainbank, cast whortly alter the way broke ont The fower was orecled a little earlier, and, according to one of the workmen, when mearing completion ou their arrival to begin wark one marning they were astomished to find the tower had subsided about eighteen inches during the preceding night. After further investigation the official in charge of the worls was couvinced that there would bo no furthes subsidence. I'his incident, logether winh tilse outhrak of the war, catased a delav of twelve months between the casting of tho bells nand fheir preotion in the tower, the bells reanwhile boing at the fonndry, paid for in advance.
At presamt the ringing einmber is immediately under the bell chamber, tho maise from the hellk is terrific, and they have not oeen rung simee Armistics Day, 1918. Mr. Maries, of Lytham. spent mans arduous months in trwing to get a band of ringers, hut falled, and wo wouder. for the din is too much for any hat the sleadiest of ringers. Originally it was intended to have the ringing chamber in the room lvolow, but this would have intarfered a little with the choir, so the hells ate intringable becauso of the ringers being too mear the bells.
This lower room is from 16 to 18 feet high. and it was the opinion of the moeting that $\&$ foor could be placed midway. wlich would allow ample epace for the choir in the lower part and the ringing chamber ahove.
Tho members found the holls in admirable going order, except the third, which wented a little attention. When this had heen made risht touches of Boh Maior, Stedman Triples. Treble Boh Major auri Minor were Euccessfully brought round. Besideg the usual Blackpoal coatingent, there were two members present from Lytham Parich Cburcli, one from St. AnnessouSea Parish Church, and Mr. nohinson, of the Preston branch.

## WHY NOT A REFERENDYM?

## To the Editor.

Dear Sir,-There are soms things in the Rev. H. B. Woolley's letter in your issue of the 29 h December wifh which I am practically in agreement with him; there are again other things-matters of opinion-as regards which we differ, antl as to which he is, of course, entitled to his own view, and I to minc. But when dofnite statemonts of fact are concorned, there can he wo such latitude allowed. If positive assertions are made they must be acourate. It is here 1 find myself in confict with Mr. Woolley.
To quote from his letier: ' and call it by the same title as the Bishop lias already given to the diocesan association." The exaclith verse is the truth. The title, St. Edmaudsbury and Ipswich, had already been adopted lyy our Suffolk branch just four moaths before the Bishop announced his decision also to take it for the new as sociation. All this is on record in the 'Ringing World,' q.v.:-
Feb. 10th, 1992 , p. 89.-Norwich and lpswicls \&itle extended to N. St. E. and I. meeting at Ipswich Feb 4th.
Feb. 24th, p. 125.-非ecting of Suffolk Diacesan Association at Ipswich, Feb. Ath.
May 12th, p. 297. - Meeting of S.D.A. at Ipswich left it to Bishop to decide as to title.
May 26 h , p. 327.-The Bishop amounces his decision to elmano title to sis. E. and I

I think, therefore, $I$ ann justified in objecting lo that part of $\begin{gathered}\text { d }\end{gathered}$ Woolley's letter, and further in complaining that he does not read his 'Ringing World ' as carefully as he ought.
And to quote again: 'Last is East, and West is West." Exaelly no. We of Narwich, st. E. and I, had always respected that view, innl appreciated the difficulties of the case. May I appeal to history again? The ecclesiastical frontier between E. and W. Suffolk was removed when the new diofese of Si. E. and I. was founded in I914. For a period ofeight years from that date, the Norwich Association was content to accept the old posilion, and made no move. Not so our West Suffolk frienrs, who as carly as May 9th, 1914 (see. Ringing World," August 26thi. 1921, 13. 513), passed a resolution to inaugutate a campaign of penetralion of East Suffolk. Only the war for a time prevemid this action. But in 1921 they slarted the invasion an arnest, first of all by arrogating to themselves a title emhracing the whole of Suffolk (Suftalk Gounty Association); then in 1922 holding a meeting at Ipswich on Felortary 41 ; and lastly demanding the Ent render of our East Suffolk menibers. All whs and more. Now, whon once St. Fimundsbury had gome to Jpswich, how can lpswich reasonabls he deaied the equivalent as yegards Fit. Edmundsbury?
And theu as to the Referendum proposal. A refereudum is generally understood to be a reference to a whole couvtry, or a whole district, collectively upon a given question, as distinct from putiurg that quitestious to the vote sectionally. By claiming the whole diocese as the spliere for the new association, Mr. Woolley, ipso facto, defones the electoral area. Fet he now would decline to abide by a referendum in it.
It is greatly to be regretled that when the present Bishop eame to the diocese lie did not adopt the bold course of becoming pafron of his ringers boith Last and West; fusion would then assuredly have come about-or, lee might lave followed his predecessor, and mado diSuffolk the mucleus of his new diocesan pesociation, whon it might have been relatively easy to win' the West, which was unattached. selecting the minority in the West for his favour, le was juevitably up against, the majority in tho East, which moveover was not unattached. The expectation of easily winuing the Fast failed; as it was bound to do. Recourse has since heen had to a form of coercion. which bas not only failed, but brought in a feeling of bitterness. Hence the present impasse. And now West Suffolk is too small an entity to carry on by itself economically. Yours very truly

## A VALUABLE AGREEMENT.

There has just been issued in printed form the 'conclusions ' arrived at by the conference between the Central Council and the Society for the Protection of Ancient Buildings, and this report will, we understand, come up for discussion at the Council's meeting at Salisbury. The conclusions have been arrived at as a result of complete agreement between the representatives of both bodies, and the report is a complete vindication of the position which ringers have all along taken up in regard to bell hanging in ancient, and indeed in all, bell towers. In past years there has been a feeling among ringers that the restoration or augmentation of bells in old steeples has, in a number of cases, been obstructed by the \$ociety for the Protection of Ancient Buildings, through, it has been felt, the mistaken but wholly honest belief that sucb work could not be carried out without detriment to the tower. Led by the late Sir Arthur Heywood, who laid the foundation of the movement with his book upon the subject, fortified by the indisputable scientific calculations of Mr. E. H. Lewis, and with the many practical proofs provided by the leading firms of bell founders in hanging bells upon sound engineering principles, the Central Council, through the Towers and Belfries Committee, have convinced the Society that it is perfectly possible to carry out such woris, and the 'conclusions' of the conference lay down the principles by which it can proceed. To have reached this stage is eminently satisfactory, and the report is an extremely valuable agreement, for we now have two interested bodies pulling in the same direction instead of in opposition, and we hope that this report may reach all Church authorities contemplating bell restoration.

The methods which the conference recommends should be applied when bells are to be rebung or augmented in ancient towers are just those which any ringer conversant with the subject would advocate, and which all our leading founders in these days put into practice. There is one recommendation, however, which we are pleased to see included in the findings of the conference, and that is, that - in no circumstances should a pre-Reformation bell be recast or its canons removed, and that when such bells cannot be retained in the ring, that they be used as single bells or preserved as a valuable and interesting work of the past. This is a point which we have urged in this column, and we are glad to see that the preservation of these relics is thus strongly advocated. As bells, many of these castings are not fit to take a place in modern peals, hut as examples of the work of old founders and specimes of an ancient craft, in which after all, ringets have a deep interest, these antiquities of the pre-Reformation period, all too many of which have disappeared, ought to be saved from the melting-pot.

As will be seen from a notice, the new trebles, completing the ring of twelve at Exeter, are to be dedicated on Feb, 3rd.
What was probably the first peal on twelve bells, was a peal of Grandsire Cinques ab Si. Bride's, Fleet Street, recorded as having been rung on Thesday, lite 19th of January, 1724. Among those who took part in the peal were Benjamin Amable and Robert Catlin, who was a London bell founder, und carried on the business brought from Reading by Samuel Knight.

On January 19th, 1767, the London Fouths rang 6,200 Oxford Treble Bob Royal at Shoreditel, and ten ycars later, on Jan, 20th, 1777, the Gumberlands rang 6,240 in the same method on the same bells.
On January 21st, 1788 , a peal of $6,600 \mathrm{Bob}$ Maximus was rung at the Churcil of St. Mary the Great, Cambridge.

In 1898, on January 2lst, a peal of Cambridge Surprise Royal, which sot the lead for modern Surprise Royal ringing, was accomplished at Cheltenham. It was believed to be the first peal of Surprise Royal, although, of course, it is now known that a peal in this method was rung at Wakefield in 1822.
A peal of 'Garthing's Trebles ' -Garlhon's peal of Grandsite Triples-was jung at St. Margareb's, Lynn, on January 20th, 1740.

- Thet most ingenious and intricato poal, Norwich Court Bob Maximus,' was rung for the first time aE St, Peter Mancroft on January $20 \mathrm{th}, 1817$.

The first peal by the Winchester Diocesan Guild in Hampshire was rung 39 fears ago last Wedneskay, at Soberton, Hants, and was Mr. George Williams' first peal. Guriously enough Mr. Williams rang his first peal as conductor in the same tower exactly a year later. Since then he has rung over a thousaad!
Owing to umforeseen circumstances the annual meeting of the Ohew Deanery Brauch of the Bath and Wells Association is postponed until February 3 rd.
' Loner peals ' of Cambridge Major' are few and far between, but the enterprising Leicestor men rang, last Saturday, a 7,008 by Mr . Fred Dencli.
Mr. Wilfred Overton, of Bridgnorth, writes to point outt that the peal of Oxford Bob Triples at Holm Lacey, published in our lest issue, cannot be clamed as the first in the method by the Hereford Diocesan Guild. A peal in this method was rung by the association at Bridgnorth on January 11th, 1902 .

The annual meeting of the Nottingham District of the Kidand Counties Association is to be held at Nottinglam on Jauuary 27 th (the same day as the dinner to honour the memory of William Doubleday Grofis), and nof on the 2oth, as advertised last weok.

Mesers. Mears aud Stainbank, of the Whitechapel Foundry, have recently secured the order for a large carillon for Oshawa, Canada.
The peal of eight at Northallerton, North Yoiks, has been rchung by the same firm.

Congratulations to Walier P. Whitelead upon his furs peal as conductor. To call a peal of Superlative at the age of 15 years is more than a promising performance.
In their annual report the Lancashire Association have set an example in bringing the doings of the Ceutral Council under the special notice of their members by printing a summary report of the last meeting.
The Lancashire Association has now a total membership of $\mathbf{1 , 4 5 0}$, of which 1,163 are ringers attached to towers in the county.
At Beverley Minstor belfry, just before midnight on New Year's Eve, the old custom was observed of reading Tennyson's poen, "King out, wild bells.' Following a touch of 395 Grandsire Caters the Vicar read fhe poem, and after the hour of midnight had struck the now year was welcomed by another short touch.

On January 66h, after the Epiphany ringing, the Westminster Abbey company of ringers were entertained to lunch by the Dean (Bishop Ryle) and Mrs. Byle, at the Deanery, an exceedingly enjoyable time being spent.
A Weymouth paper has recorded the ' keen appreciation and delight ' of the iubabitants of the town at learing the bells of Christ Church, King Street, at midnight on New Year's Eve, for the tirst time for many years. Iy ymus were rung, and the bells' pealed forth a joyful welcome to 1923.' Congratulations are extended to those who have put these bells in order after they liad been allowed to rust in inactivity for so long a time.
We should also join in the congratulations were it not for the fact that these bells are saucer-shaped and worked on the barrel principle

## BELL HANGING IN ANCIENT TOWERS.

## OENTRAL COUNCIL AND SOCIETY FOR PROTECTION OF

 ANCIENT BUYLDINGS.1. Bell cages can be mado to satisty the various requirements oi bell ringers, archmologists and architects, having particulat regard to the protection of ancfent towers.
2. The design and workmanship of a cage are of more importunce than the material of which it is made.
3. When the renewal of an old bell cage or the recasting of an oid boll is under consideration, the benefit of any doubt should remain with the retention of what exists.
In these words the Conference betweon the representatives of the Central Counci] and the Society for the Protection of Ancient Buildjugs summarise their agreed findings on the subject of bell hanging in uncient towers, a subject upon which there has been considerable disagrement between the two bodies in the past.
The report containing the conclusions of the conference has just been printed, and it opens with the general statement that 'during the past quarter of a century or so very many different statements witli regard to the right way in which bells should be lueng in oid towers have been made; and a considerable difference of opinion appeared to exist iretween bie recommendations made by the society und the Central Council. Added ta this difficulty the bell hangiug tirns were still, to a great extent, experimenting with metal coges, and recommending new and untried methods of construction,"

The Conferance between the two bodies resulted 'in complete agreement," and the primiples agreed upon are put forward as a guide to be used by those who bave the care of rings of bells in ald towers, i.e., towers built bofore the end of the 16til century or thereabouls. Tho first recommendation is that with regard to any ghestion concerning tzeir church bells or work in theit towers. Parish authorities are strongly urged to consult the Advisory Commitfee set up in their own dionese or the Central Committee for the Fiotection of Churebes and their Tremsures, with whom the parties to the conference would be prepared and wiling to adise on technical points.
The recommendatious go on to deal with the technicalifies of bell hanging, urging the importance of the careful distribution of the strains and stressed, the protection of belfries from birds ancil weather, tho proper rentilation and care of the ringing clamber, the care of the bells and their fittings.
The report advocates that in no eircumstances should a pre-Reformation bell be recast or its canong removed, and that, when such bells cannot be retained in the ring, they should be used as single luells or preserved as a valuable aud interesting work of the past, also that bells of special interst of post-Reformation date, such as those ast by such famous flounders as Miles Gray ar Abraham Rudhall should not be recast without reference to the authorities reforree ta above.

Clocking ' of hells is strongly deprecated, and atiention is diracted to tha necessity to quarter-turn a bell whes it wears thin, and also to the importance of the form and condition of the clapper. The report adds this significant paragraph, "With rogard to bearings it is doubtful if any advantage is gained by the uge of ball bearings.
To the report, whicin is signed by Mr. A. R. Powys, secretary of the Society for the Protection of Ancient. Buildings, and Mry E. Alexander Young, seoretary of the Central Council, is appended a schedule setting out the merits and demerits of various materials for the construction of frames, viz., oak, chestnut, teak and metal. The only demerits urged against the metal frame are that it needs regular painting to prevent corrosion, and has not got the shockabsorbing qualities of timber; but, it is added, in a properly corstructed frame iu proper condition shock does not arise.

## ELY DIOCESAN ASSOCIATION.

A most successful meeting of the Funts district was held at St. Neots on Saturday last, The ringers present camo from a wide ser. Roxtan, Chateris, Lyerton, Sandy, Cambridge, Hitahin, Long Stanton, Nemnarket and Fulbourne being represented. Various touches were rung on the magnificent eight at St. Neots, and at Fynegbury (6) and Eaton Socon (6), the methods including Plain Bob, Trebie Bob, Cambridge Surprise Minor, Grandsire and Stedman Tripies, and Double Norwich. A short'service was held in the fine churcla of St, Noots, with an address by the Vicar. At the tea, which was held in the commodious Clurch Room, 32 ringers were present.
At the subsequent meeting the chair was taken by the Rev. Wh. Knights, Vicar of 㿽t. Neots, and several new members were admitted. It was decided, if possible, to hold the mext mecting at Iuntingdon on February loth.
A hearty vola of thanks to the incurabents of St, Neots, Eynestury and Entan Socon for the use of the bells, and to the Rev. W. Knights for lis excellent address, was proposed by the district secretary (the Rev. H. B. Woolley), seconded by Mr. J. Wilis, and caryied unenimously.
This district is evidently * a lite branch."

## BRISTOL UNITED GUILDS' DINNER.

This infant had its second trip on Saturday last, and, although I should suly there were not quite so many present as last year, it was in every way quite as successful.
The speech of the Ven. Areludacon of Brisial was much appreciated by everyone. It was thelivered in a fulet, conversational tone, that made those present feel that he was spenking to them personally. He knows what ringing is from practical expericnce, and the association is fortunate in having such fan excellent repiescntative ais one of its vice-presidents.
The nasical programme last year was an excellent one, but this year it was even batter. Mr. Fmery's party were reinforced by friends of Mr. Leaker from St. Thomas choir, and as one of those present remarked, "the concert alone was worth the maney." To do proper justice to it would mean to describe each item, and I am afraid space cannot ba spared for this. Suffico to say, there was not a weak item from stare to finish.
The ringing preceding the dinner included four courses of Stedman Cinques at St. Mary Redclife, conducted by Mr. Albert Walker, one of those taking part being the esteemed and respected hon. secretary of the Bath and Wells Association, Mr. E. E. Burgess, of Taumton, and this was his first pult on twelve. Judging from this finstance there is no reason why we should bave to wait long 「or a peal of Cinques by a local band at Tanntan.
Sunday duties sent many away from the dinner earliter than wo could have wished, notably $\mathrm{Mr}^{\text {. Eates, of Cheltenlam, who, to avoid }}$ auriving home af 3 oblock in the morning, had ta leave Bristol by the 7.48 train. The chairman also lad to leave before the close or waik seven miles. He chose the formar (so should I). Our friends from Birminglam, Loudon and Croydou stayed over tho week-end, aud raug Cambridge Royal and Stedman Gaters at St, Stephen's for service.
Congratulations are due to the secnatary for the smootll manaer in which everything passed off, and to the treasurer for his aclive assistance. A mecting wilt shortly be held to fix the date for vext year's function and, election of officials, and against, these two Ela words 'no change' will undoubtedly be written by the unanimous vote of all present.

## RESTORATION OF OTEEY PARISH OHURCH BELES.

The dedication of the Ottey Parish Churel bells, which have just been recast, and rehung in a new metal frame, toot place on Friday, December 2and. Before the dedication ceremony by the Vicar (Canon IR. P. Hadand), an address was given by the Rov. G. C. Marshall, Ficar of St, Mad's, Far Headingley, and Presidenti ot the Forizshire Association.
After the dedication service the bells were rung for about half an hour. Many of the fownspeple wore listening for the familiar notes, and their beautiful tonal quality was a subject for general comment. Later the ringers were inwited to supper provided by a few friends in honour of the oncasion. Here they weve joined by Canon Hadland and Mr. O. F. Johnston, af Messrs, Gillett and Johnston, of Croydon, the firm of bell founders who have carried out the repairs and alterations.

Commenting on the Otley bells and the ringers, Mr. Johnston asid That he was taking home with birn a photograply of tha three oldest ringers-Mr. W. D. Clough, Mr. O. Ralphand Mr. J. Harner-whose total age is 214 jeas, and whose fotal years of service in ringing is 170 Vears. That was a record to be proud of, and he doubted if it coulci be beaten anywhere in the country.

Ganon Hadland congratulated the staff of Messrs. Gillett and Johnston on their workmanship. He said there were quite a lot of men in Otiey who really understood the engineering part of the alterations, and they lad spoken most appreciatively of the steel frame work which had replaced tine old oak beams. Tine bells liad also lyeen subjected to a most minute inapection, am? everybody was full of praise for the obviotuly excellent job made of them. The old peal Was thotght to be excellent, but the new peal was bettor stiti.
The recast bells now form a ring of eight, witla a 17 cwt , tenor

## DURHAM CATHEDRAL

With reference to the anouncement in these columns on Dec 29th, that the bells at Durham Cathedral, which lave just been relung, cannot yet be rung owing to the condition of the tower, it should be pointed out that the defects that lave appeured in the stonework are in ne way whatever due to vibration caused by the ringing of the bells since their restoration. As a matter of fact the bells have not yet been rung, and it is not intended that they slould be rung mitil the extensive repairs to the tower lave been completec. The defects which have recently appeared are old ones, and were discovered before the bells were completed.

## LANCASHIRE ASSOCIATION.

The meeting of the Bolton Branch at Holy Trinity, Bolton, was another proof of the protress that is being made in this branch. Considerably more interest is leeng shows in the higher methods by the youmer aspirants of the ark. Over 40 members were presen from 17 towers, and the methods rung included Grandsire and Stedman Triples, Plain Boh, Kent, Oxford, Double Norwicl, Superlative and Cambridge in the Major methods, many takine part in thein first touch in these methods
It was decided to hold the next meeting at the Bolton Parish Chureh.

## KENT COUNTY ASSOCEATION

## THE WAR MEMORTAL SCHEME

A very successful meeling of the Roclector District was held at Northffeet on danuary 6th, upwards of 50 members atlending. This district is well served with the quality of its ruming, and this was motntained at the meeting all methods up to Cambridne and Superlative being the order
The ringers' service was held in the church, conducted by the curate-in-chare (the Rev. II. H. Hurwood), the organist and eloir also being in attendance. In an excellent address, it was wery gratifying to hear the reverend gentleman saying how pleaser he was to know that the ringers were doing good service by their attendance in the belfry and at church-one hears nowadays the reverse of that from some pulpits

Tres and business moeting were beld in the Schools adjoiming. The tea had been prepared by the Ladics' Commitiee of the clurch, and a hearty note of thanks was proposed to them for thoir kind thought and attending to the riugers' wants.

The Rev. H. H. Hurwood presided over the lusiness meeting, supported by the churchwardens (Messrs. P. A. Terry and Snelling, Mr. 4. Clements, the district representatives (Messus, Haigh and sjuce) and the district secretary, Mr. F. M. Mitehelh. - Mr. John Avis (Minton-ment-Gravesend) was electec a life member, Meopham tower was again brought into uniou, and two hotorary members the Rev. Tait, Meopham, and $\bar{J}$. Clements, Northfeet and sixteen pracfising manmers were elected.
Mr. W. Haigh gave a report of the amual committee meeting and the action of the representatives In voting for the wat memorial to he proceeded with was approved, the members unanimously supporting them in their vote.

The district secretary urged all members and secretalito of towers to hurry on with their collecting cards, and stated that their tolal sum raised to date lowards the memorial was over $£ 10$. Fe also asked them to try and get more honorary members.
Two towers were put up for the next meeting, in April, Cliffe finally being chosen. This peal is to be rehung, and it is hoped it will be completed in time for the association to visit faud if this should meet the eye of the bell hanger, it is hoped he will make a note of it). If Cliffe is not available Mcopham was decided upon.
Mr. W. Haigl proposed a hearty rote of thanks to the curate-incharge for the use of the bells, for his excellent address, and presid ing over the meeting; to the organist and chois, and the churchwardens for their attendrace, and to the Ladies' Conmitioe for proriding such an excellent tea.
The Chaiman, in responding, said they were plersed ta welcome the ringers to Northfleet, and were pleased to see euel a large number' present. They would be assured of a hearty welcome at any uture date.
Ringing was again indulged in, and all expressed the opinion that his was the "best meeting for a long time. ${ }^{\text {a }}$
In addition to the district members, ringers nfended from Dartford and Maidstone districts, Southend and Swindon.
A collection at the service for the war memorial realised 13s. fid.

## SPEEDY RINGING.

How fast is it possible to ring clanges? This question arises from the fact that at Long Stanton on Sumay afternoon, after an unsuccessful attempt for a handbell peal of Grandsire Caters, a 720 Bob Minor, was rung ' in hand 'in 10 mins. 40 secs, which is at the rate of about 67.5 changes per minute! The ringers were: W. H. J. Hooton (conductor) 1-2. J. B. Woolley 3-4. R. W. Woolley 5-6. The report adds that this was the fastest 720 by all. That is not gurprising.

## EXTENSION OF BRISTOL SURPRISE MAJOR

Sir:-Now that Mr. York Brambie and the Rev. E. B. James Have produced their figures, and also made their full statement of criticism of my figures, kindly allow me your space to make ono reply, for the sake of your readers, in support of the accuracy of mine and the errer of theirs
Do both these gentlemen recogine the two basic laws which must control both construction and extension of all treble dodging methode That there is one bell commouly temed the pivot bell, which must make a plate either 1si, 3rd, 5th or 7 th , at the sume time ns the treble lies lier whole pull belind, which is the centre ling of a single method. The second halit of the method is simply a reflection of the first half, opposite liand, backwards.
When we come to a double method this reflection or centre niue occurs when the treblo has completed half her jourtsey outwards, wiz. passing from the $3-4$ to $5-6$ dodging positions, or, say, one quarter of the treble's course. The whole work in any double method is revealed in this first portion up to the reflection line, but tho keystone io any double mothod is found in the position in which the two necessary places are made as the ireble crosses the line. 1st, 3rd's, 6th and 8th places can all be made, as follows: lst and 6th, or 1st and 8th's, ord's and 8th's, or 3rd's and Gth'e. The last is what occurs in Bristol Major
Now then, turt to the figutes of Major and take stock of all the work which has been done. We find that 1234 awe doing ordinary Treble Bob dodging, while 5678 have heen making places, 5th's and 8th's is theil turm, exactly fitting with the repetitious rowa of 1234 as these bells dodged. While the mecessary lat and 4th's places are made to allow the breble to pass from $1-2$ to $3-4$ dodging prositions 5678 altemate with a snap to fit. If this work is carefully examined we find we can sum the whole work up under two items,
(1) That the treble todyes all positions up and down, and (2) that all other bells make the nearest place to the treble immediately before and after passing or dodging with her. I give a balf lead of Major, Royal and Maximus, and ninvite all to examine them when they will platinly see the accuracy of the extension I publishod-Yours
faithfully,

## THE SIMPSON PRINCIPLE'OF BELL TUNING

 IS IT OVERDONL゙?During nearly thres weeks' enforced idfeness in bed and confinement to my bedroom, the question of the Simpson Principle of beil turing has been the predominant theme running through my mivd.
In auy renarks I may make I wish it to be clearly and distinctly understood that I do not wish to make any imputation against the firms who so strenuously adrocate this particular principle; thenwork, honour and integrity being unimpeachanve. I only attack the primciple as applied to church bells generally
I am prepared to admit that, from a scientific, musical and logical point of view, the Simpson principle of tuning may be correct, when applied to a bell used singly, where it does not matter how long yout have to wait for the note which oventually comes, though belated, but in applying that same principle to a peal of bells where the sounds follow in quick succession, it becomes quite a different matter I ask any ringer carefully to listen for and nate this fact on Simpson-tuned bells, and see for himself if it is not strictily true, that when the elapper strikes the bell you get a very lam irony twang, the full note coming when it is mixed up with all the other twangs and notes, the regnlt being pandemonium, which may be described as the striking of so many iron pots followed by a conglomeration of sounds ending in a weird howl. This has been my experience of the Simpson Principle up to the present time. I do not say all peals are as bad as each other, the bells in some belfries being a little further off; therbiore, the uoise is somewitat subdued, but that pandemonium is there all the same. Now, I am asked to believe that all this is good bell music. My good ofd trusty earp which has given me lifelong pleasure and enjogment, tclls me it is naything but that.
Some years ago $I$ was cycling with a friend to a ringiug meating where there had been recently installed a Simpson-tuned poal of bells, which I had heard several tines, though my friend had not. As we came within hearing we dismounted and listencd, and almost at once he said. 'They are certainly not a bat peal of bells.' said, 'Wait till we get near, we are at present a mile away.'
We eventually came close, and after some minates listening to the ringing, came to the conclusion that my description of tha noise wiss a true one, which was confirmed to an even grealer degrce when wo got up inlo the belfry. I have rung several peals on these bells, as well as on another peal of bells tuned on the same principle a few miles from here, where forlunately the ringers are a little further away from the bells and the noise is less painful, but in ringins a peal, as the bells work themselves into certain positions, that periodical howl is nothing short of nerve racking.
A year or two ago I was at the inauguration of a mew peal of bells in the neighbourhood, replacing a beatiful modern peal or eight fit to grace any Catherral tower in the land, for the sole reasoa that they were not Simpson-tuned. This I have always considered to be little short of sacrilege, a fact which I did not hesitate to tell that famous clurch dignitary who was responsible for their installation iu a conversation which I bad with him some time after. But, he said, 'surely you do not question the musical ability of Though, but --P' I said, 'No, I do not, they are not ringers, easy to see the impression formed in that worlar's mind by thos

Now, in replacing that leatuiful peal of bells, have they given us a better peal in their stead? I am absolutely convinced in my mind they have not, and that the old peal was better than the new, and that opinion is shared by many of the local ringers and others who liave heard and rung on both peals.
My true ideal of a good peal of bells is where the full note is produced immediately the clapper strikes the bell. Abraham Rudhall always gave us that note, and he knew how to give us good musio with his beautiful bells which have never heen beaten, Take F'ainswick bells, and those of St. Martin's-in-the-Fields, London, both Rudhall's bells, I believe: what better music could you wish for than these bells give? Then, to conne to more modern founders, take Southgate and Swanscombe. It is always a pleasure to listen to and ing on these beautiful parls of bells. These particular peals of bells I have quoted are only some of those with which I liappen to be acquainted, and are, of course, only a few among very many others. In conclusion, as a word of advice to those incumbents and church authorities who may be augmanting or recasting their bells, I say to not allow yourselves to he taiked to by these musical "cranks,' so that you do not know whether you are standing on your head or your heels, but if possible horrow one of our good friend Willian Hillson's battleazes, and approach the bell founder, something like this: ' We wint our bells augmented or recast (as the case may be). Are you prepared to give us bells similar to Rudhall's? If not hands off. We will hie ourselves to another bell founder who will." In all seriousuess. I believe, the Simpson principle of tuning, its applicd to church bells, is overabone; the note it produres being a ery thin, weak, soulless one, and a reaction against it is inevitable. In fact, I think that reaction las arrived, for many ominent pingers throughout the country are loudly condemning it
E. BARNETT, Senr.

## 'THE QUICKEST PEAL ON THE BELLS.'

Very few reports of peals appear in our columns without a footnote attached relerring to some point, more or less of interest, conceming the performance. From time to time we read ' Quickest peal on the bells.' 'This statement has, of course, a certain amount of interest, but has it any real merit? When we set out to ring peals we do not measure our performance by the speed of our ringing, but by the number of changes rung, and we ought not to judge it by the rapidity of the siriking, but by the quality of it. We are not reflecting in any way upon those who have put out claims to have rung the fastest peal in any tower, nor referring to any performance in particular, but merely discussing the question from a detached standpoint, prompted by the many recent clains which huve been made for local speed recorcis-

From first to last the striking should be the thing that matters, and everything else, pace included, should bu subrervient to this necessity. It should be borne in mind that, when peais are rung on church bells, the ringers have a large audience, many of whom, let us franikly admit, may not care for long continued spells of ringing, and if bells are driven at an excessive pace it appears to many of the uninitiated to be one long-drawn-out jangle, without beat or rhythm. It is true that when bells settie down to good striking they naturaliy quicken a little in pace, because the smooth rumning of the changes is not broken by wide blows or hesitancy which leads to or is caused by trips. But this is a totally different matter to racing the beils to knock a few minates off the time of some previous peal in the same belfry.
The fact that peals are rung far more rapidly at one church than at another is, of course, outside the question, for not only does the difference in weight have to be taken into consideration, but more important still in its effect is the method of hanging, whether bells are 'hung out, or 'tueked up,' with a consequent difference in the size of the wheels. Then, too, the iength of rope has its effect, for, generally speaking, it is not possible to drive bells as fast when there is a long draught, as when there is a short one. Moreover, some bells, with other things more or less equal, seem naturalys more 'suggish' than others, but with any given ring of bells there is generally a limit within which they can be rung with the best effect from the listener's standpoint, and it is this standpoint that ringers ought constantly to bear in mind. We do not for one moment say that there is any harm in endeavcurring to ring the quickest peal on the belis-so long as the striking is good-bat it would be a far better thing to be able to say that it is the best peal ever rung on the bells.

## BELFRY GOSSIP.

The comping week marks the anniversary of the death of several ringers who played a noted part in ringing in their day and generaion.
On January 29th, 1886, Henry Haley died at Bethmal Green, at the age of 66 years. Much could be written of Henry Haley's performances, but only ordo or two points from his ringing career can be given here. He rang altogether 182 peals, of which lie conducted 155 and composed 105.
In his early days, with a band of youths, he ' lapped ' a number of peals, 16 of which he conducted, inclurling Stedman Cinques and Double Norwich Masimus.
When he look ur tower hell ringing with the Cumberland he composed ant conducted his firs peal, 5.079 Stedman Caters at Furlham, at the age of 23 . He went to America in 1850 on a tune ring: ing engagement, and at Phinclelpha, with his four companions and three other ring ans, fang the fist peal on the American continent.
In 1854 he joined the College Foutlis, and among his stibsequent peals were 8,580 Stedman Cinques at Connhill, 15,840 Treble Bob Major at Bethral Green, 8.448 Treble Bol at Christ: Church, Spitalfields (where the tenor' is 33 wis), and a 'silent' peal of Grandsire Triples (Holt's Original) at St. Giles-in-the-Fielce. He rang in the first peal it Ireland, and the first recorded peal in Scotland

When it is remembered that la passer ont of ringing nearly 40 years aga, it must be admitted that lis record was a wonderful one, just as his ability as a ringer was fur above the average,
One of the greatest of pioneers of ringing, Benjamin Amiable, died on February Dst, 1756 . It was recorded of Amble in Hearme's Diary, 1734, that he is judged to understand ringing as well as, if not better than, any man in the world.
Henry Burgtow, of Horsham. Sussex, who was famed for his knowledge of folklove songs as well as, in Sussex, for his binging, died on January 30th. I916, at the advanced age of 89. When well past his 80th year he could sing from memory over 400 songs. As a boy he knew the pinch of poverty, and despite a lifetime of hard work, he died as he hat lived a poon but lioness and honourable man.
On January 26: 1 , 1865, that marembus performer of "tapping, Elijah Roberts, committed suicide at Liverpool. Roberts never had an equal at his particular forte mail Mr. Morris of Harwich, came on the scene in recent years, and tapped peals in a number of methods.
A new record in juvenile performances has been made, wo feel sure, by Wilfred Taffender, sots of the Master of the London County Association. On Saturday week ho seared his first peal, at the age of 15 years, by ringing a working bell to a peel of London Surprise Major! Peals in this method usually come to ringers only after years of patient work, and those who have made it their first peal are extremely few. To do this at the age of 15 is a performance pot which this young London ringer is heartily to lee congratulated.

The reward of perseverance has certainly come none too soon do Mr. Ton Smith, of the Fork Town band, Surrey. He wang his first peal of Grandsire Triples last week at the 37 h attempt! There was, doubtless, feeling in his comment, when the bells came round, "At last!
Following closely upon the 720 of Bob Minor rung by Messes. W. Motion mud J. and C. Woolley in less than eleven minutes, comes the report of a peal. comprising e seven 720 's rung by the same band, in the remarkable time of 63 minutes. This is at the rate of 79.37 changes per minute. One thing seems pretty certain there could not have been any trips.

## THE CENTRAL COUNCIL.

The annual meeting of the Council will be held on May and (Whit Tuesday) next, at Salisbury. Full particulars of the meeting will be published later. Notice of any proposed motion should ba sent before April 21st.

Secretaries please note that the amoral subscription is now due, and should be sent to the hon. secretary, Mr. E. Alexr. Young, 155, Rusisey Green, S.E.6.

## NEW PEAL FOR COLLATON, DEVON.

Orders have been given to the famous West of Fingland firm, Messes. W. Aggett and Sons, Church Bell Works Chagford, for the evection of a peal of bells at St. Mary's Church. Collator. Devon. The bells are to be fixed on the most modern principles, and hing on the firm's parent adjustable bearings.
The bells will be inscribed with the names of the men of the parish who fell in the great Fer. The work, it is hoped, will be completed by Lady Day.
Messis. Agget and Sons also hope fo commence the pent of bells, of thington, during the next fortnight.

## BALL BEARINGS FOR BELLS

## To the Editor

Deav Sir,-I was interested in your wo articles dealing with the conference between the Central Council nud the Society for the Pro teetion of Ancient Buidinuss, and while, I think, mosi ringens will consider the result satisfactory, many would like to know how the conference arrived at one ar two of its decisions, 1 have in mind the paragraph (which you rightly call * significant'), stating that * with regard to lycarings, it is doubtful if any advantage is gained by the use of ball bearings!
Is this conclusion the desult of experiment, or of observations made by men well versed in the nuechanics of bell langing? Or is it a casual dismissal (one hardly likes to suggest it) by a body chiefy composed of architects and arelifologists, of a subject with which Hey are not very farmilin.
I have no prejudice in favotry of ball bearings, knowing that bear ings of the old type kave so often proved efficient. But at the present time, when ball bearings are widely used, for almost afery class of machiae, and fyequently for heavy duties, the decision of the conference provides food for thought.

The advantages of ball bearings are obvious-the chief being easiness of ruming, and freedom from lubrication troubles. I have cerfan ideas as to possible disadvantages. One, I think, would show itself in unequal wear upon the balls and races, due to the fact that under nomal conditions, a bell only turns little more than one complete revolution for each stroke. Consequently, as the balls can mever travel conpletely around the bearing, some must continually sustain more weight than others, and will not bear equally upon all pares of the innew and outer races. For this reason. ball bearings mirght not stand the test of time so well as some plan bearings, or those in which the 'brasses, are oasily renewed.
In the case of a tower where there is much oscillation, ordinary hall bearings would work under condilions for which they are not designed, as there would be end thust to deal with. I am not sure whether it is customary to use 'thrust bearings' in such caseslhese would overcome any difficulty, probably at an increased cost.
When dealing with heary bells, eentrifugal force would no doubt have to be constiered, except when 'tucking up' to an abnormal exten is resorted to, as in many Continental and Amerion bells.

I believe many would like to read the opinions of some ringers who hove cousidered the subject from a purely mechanical point of wiew. Possibly Mr. E. I.I. Lewis or Mr. Itesso could enlighten us, thereby oarning the thanks of myself and other seekers after knowledge, Yours faithfuly.
Mnnclester.

## SIMPSON TUNING.

 To the watitor.Siri-I was very pleased to read in 'The Ringing World' of Jenuary $19 t h$ both Mr. E. Barnett's remarks on the 'howling' of bells tuned on the 'Simpson principle, and also the advice of the Cenbral Conncil and Protection of Ancient Butildings Conference as to ball beatings ancl other modern fads in bell hanging.
With regard to rine former matter, all the ringors I have met, who have rung on, or leard, bells tuned on the Sinpson prineiple have complained of this dismal howling. But what. I most deplore is, that to produce hells tuned thus, so mant medieral bells-and good modern bells, too-have been sacrificed. Not only this, but an emormous amount of money has been umecessarily spent on such fads. and at a time when moner is so urgently needed for other church Murposes of more importance.
As to ball bearings and other modern fads in bell lranging, as I have often remarked before, many of these may be an apparent staccess when first installed: but what will ther be a few years hemae, if not properly looked after and renewed from thme to time? People seem to forget that a bell is not like an engine or a moteredar, which is constantly overhauled. When a holl is once properly lung she is supposed to go for an indefinite time, with a lithle oil when required, anth an oceasional serewing up of bolts and unts in a wery dry season. Resides this, any bell up to, say, two tons, can be lung on the old pan to go perfectly well for all ordinary purposes. Tours, etc. J . R. JERRAN.

## LONDON COUNTY ASSOCIATION.

## BRISTOE UNITED GUILDS" DINNER.

 A HAPPF GATHERING.As briefy recorded in our last issue, the second ammal dimner of the Briscod United Guilds Fras held on January $13 \mathrm{H}_{\mathrm{h}}$, at the Grand Hotel. 'I'lie Master (Mi' G. Gould, of Heubury) presided, ard the guest of the evening was the Awhdeacon of Bristol. Hhe company numbered aboul le0, and among those present were the Rev, M, E. 'thorold (Viear of SI. Philip's, vice-chairman, Mr. E. Guje (hon. secretary, st, dames'), and M1. P. C. Williarns (lion, treastier, St. Fhilip's), Messus. J. Carter, is. Roper (London), I. M. Affer the loyal toast had been homoured, tite Minster gave a hearty welcome the Audadeacou of Bristol, and said thair gataexing that erentug spoke or the fellowship existing betwean ringens, in coutast to the spicit which prevailed forty or more years ago, when thene was a colduess, estrangemeut, and sometimes hostility among riagerg,
AR. Henry T. Howell, proposing . The Churd, claimed to be a Charchman of some 50 yeass stamding. He first learned change ringing at Thonbury, and on removing to liristal was at once called upas to wonimue. bifty years ago there were many douscs in the belftr, but when the posidion was put to the ringer as to whether he would take bottles and cups into the chancel of vestry things quietiy changed, and flere were no abuses to-day. Contimuing, lie said the Church semed bo be massing through a crisis. There was an andercurcat working against them, ant it hehoved the clergy, laymen and rimgers to pull iogether.
The Archdeacon of Bristol (who was heartily mecejved), replying, addressed the company as fellow ringets, He suid ho spoke on belalf of evervone present, for they were all tho Cluwch. He began bell ringing at Cricklade in one of the tallest towers in England, where the bell ropes stretched a foot before onc got the bell (laughter). Til these days ringers were very inportant people, and their ussociation showed that they intended to maintan that position. ILe suggested that it was not beli ringinu, hut its purpose they should remenber. He wished they would make people understand what bell ringing stood for. They should ring not for the sake of ritgiug, but to make it a voice of the Ghumen calling people to chareln and join in theil joys; and, by mutfled peals, show thcir spmpathy with those who were boreaved; to make the people feel that ringers were learlers, that ringitg was a science and used for the glory of God. Ho wished every success to the association (applause).

## BHESTOL CARHEDIRAL LACKING JN BIELLE.

Mr. Abert Witker subnitted - The Gloueester and 乃ristol Assomit tion." He said the association held first rank among findred societies in this ringing isle. Forty-five years ago the assochation was formed, and was a pioneer organisation in improving change ringing and refomming the ringinar chambers. The spenker ancutioned the names of several outatanding pioneevs and members pasi and preseut. Among then were the Rov. Es. Banks James, the composer of the " Bristal Surprise." Any who could fing that pould ring anvothing- (liear, hear). The speaker mentioned the uanes of several presenti, and referred to their skill abd wृork. There was plenty of scope for the younger mea, who hat maty splendid cxamples to follow (hear, hear). They should endeavont 10 maintain the high traditons of the association. Over 300 aingers from the association went to the war, and 60 never returned. Memorial bells hasl been evected at Therkepy. Members hax assisted to ring several famous peals, iuchurling peals an the bells of Heveford, Wells, and Exeter Cathedrals. Bristol was a cily of clunches, bells aut ringers. The ambition of all whs to have 12 hells and 12 bell practices (heas, hear), He suggesied that the bells of St. Nicholas should be brought up to 12, as al Redeliff Church. It was curions that Bristol Cathedral had not a jing of bells-a thing nearly unique among cathedmals. It. was a black marts to the citp, Moderin metliods of liaging almost enabled brick walis to carry bells, hence a ring could be placed in the central tower; if not there, one of the western towers. He hoped such a ring would be provided (hear, heav)
IIn", E. Guise (hon, secretary) responding, seid he was proud to be hon. secretary of the Brisfol Vuited Guids because tine members were a mosi loyal lot of Sellows. Members were altays readp to respond to anfthing which was taking place. Fou the Berkeleg themorial bells the moncy Has readily raised. The nssociation was moping forward with rapid strides. It ought to have suphort flom tho westries. especially as ringers came from every class-meluding the clergy and churchwardens-and recognise them as an importan part of thn Church. There were 200 towers with bells in the dioceses of Bristel and Gloucester. Ife thought the association miglut take credit for the reformation that lad been wronght in belfries. Tlay had had great support from the local press. Ho thought the Central Goundl should embody lise idea of a Roysi Society of Campanologists, which wonld elleotrage the study and prathe of change ringing.

## WHAT DOES DIOCESAN MEAN?

## To the Editor

Dear Sir--Iu his last three fetters Mr. Burlou evidently believes in giving us news. It is always so interesting to hear what you have been doing especially when you had no idea of il. And as the nows comes from over filty miles nway, of course, it simply must be true. Moreover, as Mr, Burton lives in Norfolk, he muzt lnaw acchrately what we Suffoik pooplo have been doing, and not ouly whiat is good for us, but what we want, much better than we do ourselves.
But if the contents of his letters are wonderful, much mote wonderful are the omissions: I wrote a letter asking what does Diocesan' mean? In a letter which lie tels us is a reply, so that we may make no mistake abont it, he does not answer the question at all. I will, theraiore, answer it myself. It meaus belonging to a bishop as regards the area of his Sec, just as 'episcopai' means belonging to a, bishop ns rcgards ,himself personally, much hetter if we used the lattor word in many ways. The two are of ten quite interchaugeable: thus I conld well say that Mr. Burfon would never dare to find fault will or to dictate to his own Diocesan (meaning the Bishop of Worwich), as he cloes to ours.
That being so, is it wot absurd for three geutlemen in Norfolk to arrange for our Bishop as to what his Association is to bo; and when he remonstrates with them to insisi that they will constitute his Society for lim; aud stifl persist in it in your columns, to the immense armusement of the whole of cleristeudom?
I would not for worlds spoil his pretty tale from Norwich, sind besides it cannot be mearly so interesting to liear what we thoumprat we had ourselves been doing: hut as there are some misguided people who prefer the Suffolk history of Sufiolk to the Norfolk history of Suffolk, I will shortly recite the true but prosaic facts thercof.

A couple of years ago, some Suffolk ringers, who had for many years heen wantiug a local Association, decided to make a start. The See being then vacant, there was no Bishop to arrumge a Diocesan Associafion; and to begin with they enlled it a Combly Association. When there was a new Bishop they asked me to approach him as to whether lie would consent to a Diocesan Assaciation being formed. He agreed to this, and (as I was anxious he should) he glano agreed to coutimue as patron of tho old Association. Otur idea was that ultimately there would be an union of two Dlocesan societies. the Norwich Association were already this, as Mr. Burton says it is, there would clearly bo no further conflict. At that time, however, the old Association had, two years before, deliberately dropped the word " Diocesan front its title: and it was not until the next year (1922) that any proposal was medo that such a word should he used by it. Therefore, instead of it being four months earlier (as Mr. Burton states), it was several months laier in ming the word than the newer Association. At the nest mosing of the new. Association the secretary of the Suffolk Brancls of the old Associntion attended. as he fold us, as the representative of the old Association. He was told by the chairman in clear and defuite language of the amoyance of the Bishop at the oid Association using the term Diocesay without consulting him. The Secretary of the Suffolk Branche expressed his great sorrow that they lad annored the Bishop. and promised That the Association would fall in. With his wislies in the mavter. Thlis, of course, was quite the right thisig to do. Unfortmately, however, this promise was only mado to a Bishop: and as the Nor folk men seem to think that, if thov call themselves Diocesan, they ary ahove the Bishop, thoy proceeded to break it. Of course, tha Bishop resigned from their society; what eiso could he dop
I have not sech the Bislion on the matfer (since that meeting), so I know no more of his mind than your readers do, but as be chose ior us exactly the same title as the old society pretends to, be clearly means ns to understand that there can only be one genuine Diocesan Society in one Diocese; that lie is the only person to say which is the Diocesan Soclets, and that he has in this case saicl that the new Association is it. After this there is nothing more that our Norfolk friends can do, whatever they maty write or say: they can only sucoed in making themselves ridiculous. They are not so much as entitied to say hat they are Diocesan even for Norwich, for it is guite cortain that the Bishop of Norwich will not allow the new title to be used merely to defy his brother Bishop.
After this, it is useless to add that the new title has been illegally adopted, according to thee rules, and that the old Association has no legal right to any of its property ar any of its peals.
This brings wis to the most extraordinary omission in Mr. Burton's repd that My argument was that the new title lends itself to fraud and that peals rung under it were rung under false pretences. Will it he believed that Mr. Burton docs not refer to this at all? He woula refuse to ring a penl in which he knew there was a false change, still more one 131 a false method; but the muth more important matter of a filse titlo does nat trouble him al all. It is not only making all the menlers of the old society ridiculous now, but it is entering on the records, statements which will make the ringers of these peals riflictlous for all posteritr. People will wonher why the ofrl society should pretent that their peals are rung
by the new one.

## NOTICES.

Mr. Hurtow makes Wie mifousded statement that our Bishop has deserted the mailority of his rimfers. It is the old Association which is lrying to alignato its old sitpporters: il has bineady old Associathe clergs in many ringing records; and it has illegatily expelled from tion by his many mang two active Suffolk members thare. Ar. Burtom also says, It is greatly to he regrebed that when the present Dishop came to the Diocese he did not erlopt Lap holrd cants of becoming pation of lis ringers both East and West." What Mr. Burton neans I cannot inngme, as he knows quite well that for the first year of his episcopate, Dr. David was patron of both Assoma. tions, and only left the old one when whey as good as told ham they did not want him.
Just as Mr. Burton is cquite wrong in all his references to our Bishop, so he is in all ihose referving to the mew Association. There hits been no demand for the sumemer of the East Suffolk members I suppose he is referring to the tinkered docmont to whinh Mr Coleman affixed my " signature. This is more Norfolk history of Suffolk. It Suffolk there have heen no failures of expectations, or of anyfluing else; everylling has gone according to plats: no form of any kind of "coercion, no "impasse, and no 'bitterness. We are all friends logether in Suffolk, and ringintr together just as we have always clone. In spite of what Mr. Burton says, there is no Sufolk ringer but regrets that aur oft Association is so foolishly defring the Bishon. Whe do not like being put into such a phticulous osition, but there are worse blongs to bear even that miduld.
Of courge, if aur Forfolk frients have been trying to absorib the strange things that have been written in the Norfolk history o Guffolk they may woll be surfering from indigesion. and fron bittorness, too. It is to be hoped that they will for the fulure eschew these sensational mixtures, and return to ihe gemuine ancl healthfu rue Suffolk brew
Ufford Rectory, Woadbriage, Suffolk.

## THE TUTLE • DIOCTSAN.

Deat Sir, - tundar to Mr. Burton an apology for my mistakes in Chonology, bat they to not affect the genceral arrmment. Wr. Liviton las himself mate in important omissiou. In his uccount of the senuence of extents, which is cloubtless correct in other pernts, the concluding paragraph jeats as follows: *May 264h, p. 327.- The
 Mr. Burtou has omitied the words 'Diocesan Association' ufter' 'si E. and I." It should read "The Bishop announces his rleciston to clange fitle to St. E. and I. Diocesan Association of Ringers.

This, of compe, decides the mater, for in all diocesnan atairs the Bishop is the final court of appeal. Whaterer difference of opinion may exist as to his being well advised, there can be no fuestion as to his atuthority.
is wery satisfantory to observe that Suffolk towers antiated 10 Nomwh lave dropped the , Diocesan, in their reports of peals to this week's Ringing World, thus taking one step towards a settlement. There is one accomplished band, however, which shows a true appreciation of the real position by reporting under. Norwich and Ipspich Association.' To this title no exception can be taken, and 1 believe that the general adoption of this of a similar title woud allay any misapprelension, and solve the problem for good and sil.Fones truly,

## THE BLEHOP'S APPCAL

The Bishop of St. Bdnundsbury and Ipswieh, in a New Teat lelter to his clergy, says with regard to the St. Edmundsbury and Ipswich Diocesall Association:-

There las recently bean formed a Diocesan Assaciation, of which I am patron, the Archdeacon of Sudbury, president, and the Rev, 1.1. Drake, of Ufford, secretary. It is much to be desired that all our ringers slpould belong to it. But many in East Sufiolk prefer thetp old allegiance to the Norwich Association, which is natimally unwilling to let them go, and "bas added "St. Wdmundsbury" to its mame. I do not suggest that any great pressure should be used in favour of our own organisation, which is bound to win its way in time but I should be glad if incumbents wonlde use their influeuce for its benelt as opportunitg offers. I understa fint that there are a great number of crucked bells in the Diocesc, and that this is cansed by tho clapper being tied by a cord so that it doms not lang fuee to rehourd at tlie moment of striking. This is done to sllow the bell to he struck more ensily. I trust that this dangerous practice will be dismontinued, and that every care will be taken to protect our bells, witicl form on valualle piece of church property

## THE TOLL OF DEATH.

Death, who is for ever taking his toll, has laid a heavy hand upon the Exercise this year already, and in this issue we have the sad duty of recording the passing of all too many stalwarts of the Exercise-men who in their day have done good solid work for ringing. For more than fifty years Edward Hynds, of Stebbing, gave devoted service to his church, and of few, like him, can it be said that for over half a century they rang regularly, Sunday by Sunday, in one tower. Such men as these are the backbone of the Exercise, for they labour not in the limelight, but very largely behind the scenes, where results are not measured in peals, but in self-sacrificing effort. Another to whom the call has come is George Woodiss, of Twickenbam. He was well short of the allotted span, and his death came unexpectedly ; but here again was a ringer who in his day had done some valuable spade-work-work which laid the foundations of change ringing in one corner at least of the Winchester Diocese. Then, too, death has claimed the venerable Dr. Nichols, of Boston, U.S.A., than whom the art had no greater advocate outside these islands.
Great as is the loss caused by the death of these and other members of the Exercise which we record this week, a loss which will be keenly felt in the circles in which each moved, something akin to universal regret will be felt by the passing of James Motts, of Ipswich. In him we had one of the outstanding figures of our craft ; an enterprising and accomplished ringer whose initiative and skill helped to make ringing history. With William Catchpole he was the inspiration of the St. Mary-leTower Society more than a quarter of a century ago. He proved himself a real leader, and revived in East Anglia the prestige which the men of Norwich had gained many decades before. One bas only to look at the 'first performances ' for the Norwich Diocesan Asociation, which he conducted, to realise the type of ringer he was, and as an example one need only point here to the first peal of Cambridge Surprise Maximus ever rung-a stroke of enterprise which brought this method within the bounds of practical ringing. The fact that he rang between 500 and 600 peals for the Norwich Association shows the work he did for his native society, and we imagine there are few men who have done more to help neighbouring ringers than he did in the dinys gone by. Twenty years or more ago the name of James Motts was one to conjure with, and even to-day the Exercise is not possessed of any superfluity of ringers of his type. He has gone to his rest, the belfry will see him no more, but in East Anglia at any rate 'Jinmy' Motts will long remain a cherished memory and a shining example of an accomplished ringer. Requiescat in pace.

At St, Potor's, brighton, they have an aversion to 'gtarring ringers in peal reports, but there must have been several f frs in the metiod ' in the peal of Norfolk Surprise rung there last week Following upon a peal of $B_{r}$ intol a short time before, this looks like a return to the good old days when the St. Pefor's Society made history in method ringing.
Last weak we commented on the fact that at the age of fifeen years Wilfred Taffeuder rang Lonton Surprise Major as his first peal. This week we reçord his sccond peal-Stedman Cingites af Bow-and he rang it without a semblance of a trip. This young riager is diminutive in statare, but he promises to be a giant in ringing intellect.

## THE SUFFOLK CONTROVERSY. <br> To the Eititor.

Dear Fir, - You late extended to me the courtesy of your column in several recent issues of your paper, and I have, therciore, the less desire to make any further demand on four valuable space. On the main points af issue, I am satisfierl I lave succeeded in making good the case of out Norwich, St. Elmundsbury and Ipswich Dip. cegan Association, and I might, therefore, have been content at this juncture to hare left myself in the hands of your readers, and to rely on their judgment and sense of fair play, as I am not in the least concemed with further quibhling over mere details.
But I must enter my very strongest protest at the insiulation concerning my friend. Mr. A. L. Coleman, in the last paragraph but one in the letter of the Thev. H. Drake appearing in your last issue. Does Mr. Drake realise what is implied by the deplorable statement le makes- the tinkered document to which Mr. Coleman effiren my signature '? And that lie is practically accusing Mr. Coleman of forgery? It ought not to be necossary to ask the question, but how otherwise could MIr. Coleman have affixed Mr. Drake's signature? I happen to have seen the document concemed-a fetter from the Res. F. L. Fuwcett, in M. Fawcetr's landwriting. and signed by Mr. Fawcett himself, and it bears Mr. Drake's endorsement right enough. Mr. Drake lias once previously had the temerity to ask how his signature got there. Sirely "he himself shoutd be able to answer that question better than anyone else.
I should not in any case lane felt justified in continuing an argument with anyone-eren a bishop's advocat -whose method of controversy condescends to suct a base standard.- Pours very Erulp.

[8, the speaker gave a brief outline of the orisin of bells, and urged his hearers to realise that the bells proctaim the love of God in a world devoted to sordid money getting and werelandise, and that as by their ringing they acter as tho mossengers of God, to let the thought that they were acting as fellow-workers with frod dignify and omoble flueir own lives in order that those with whom they came in contact night take them as a worthy example.

The business meeting followed in tio Memorial Hall immediately beside tho chureh, the president (the Rev. C. ©. Marshali) occupying the chair, supported by Messrs. F. Willey, J. Broadley and P. J. A hearty vote of thanks was accorded to the Viear of Doncaster (Fen. Archdeacon Sandiord), great regret being expressed at the reverond gentleman's illness. A WONDEREUL COMBLNATJON OF •RINGS.
The dedication of the two trebles at Excter Cathedral Lomorrow puts the final seal upon what is probably tht finest-certuinly the greatest-ringing peal in the world. The gitt of Mr Aethatr Thomas, as a thankoffering for recovery from prolonged illuess, the bells have been cust by Messus. The extra bell, which is in A flat, renders it possible to produce ten distinet ringes, wis., four of sis, three of cight, two of ten and one of twelye-a combination which gives fixeten Cathedral a proud distinction among the belfries of this country.
The inseription on the new beils is:-
A thankoffering from an Exeter citizen, 1922. In Terur Pax, Hominibus Volumtatis (Peace on envth, goorwill amony men).' Hach bell in the peat bears eilher the name of the donor or founder, except the 8th, which is known as "Doam. How it came by this titie is not clear, but by some it is bolieved to be the bell tolled on the oecasion of exectitions. The peal as completed is as follows :-

Grandissan, Stafford and Fox are manes of Eishone: Earle and Cobthorme are those of Deans.
The 4th. Sth and Gth bear the mames of the founders, and they wero cast respectively in 1616, 1658 and 1676 . Purdue was also the founder of tho 8th, gth and 1lth. Eunns cast the A frat hell in 1729, at the same fime that he cast the loth find fle former Grandisson
The interesting diagram given bejow. was prepared by Mr. W. J. Southwood. hon. secretary and treasurer of the Exeler Branch of the Devon Guild, and convegs in a striking manner the combinations that will be possible on the Cathedral beils. Mr. Soulhwoad has also printed an exceedingly interesting sourenir of the cleditation.

The ceremony is to take place at $2 \mathrm{p} . \mathrm{m}_{\text {., }}$ in the tower, following which there will be a special service and enensong in the Cathedral. Then the various rings will be demomstrated by the Cathedral band, and afterwards members of the Deron Guild and ringing visftors will be admitted to the tower. ## DEATE OF MR, JAMES MOTTS.

## PASSING OF A GREAT RINGER.

It is our sad duty to ennounce the death of Mr. James Motts, who passed away at his residence, 25, Orchard Street, Jpawieh, on Sumday, Jamuary $21 s t$, it the age of $\mathrm{ES}^{2}$ years. He came of a ringing family, for his fatice and gwanlather were rimgers before bim, and one of his predecessors was the noted Seymorr Molts.
Mr. James Motts rang his first 720 in the year 1874. His firsb peal ( 5,120 Hob inajor') was at Fressingield on May 12th, 1875. He then rang about 16 peals (most of wheh were not association feals) before tre rempved to Ipswich in 1882. His first peal wilh the Tower Society was one of Oxford Royal, which lag alsa conducted in 1882.
Mr. Motls' iliness began abour a year aco. Arker conducting his last peal, which came into rounds at midnight on Dec. 31st, 1921, he had a slight attack of gasiritis. Athough he innproved in foealth at times, he had not bean really well since that date. As months weut on other complications developed, includiag leart trouble, and the end came somewhat unexpeciedly to his ringing friends.
The funcral took place at Ipswich Cemetery on Wednesday, the 24th, amid manifestations of profound sympatiny. In addition to the relatives there were about 20 rimgers present, and It. H. Smith, C J. Sedmley, F. J. Tillett, R. H. Brundie rang a course of trandsire Triples at the greveside. The wreaths wero from his affectionate sister Anma; Plil, Dora ana little Beryl; Mr. and Mrs, Whitman; 3Ir. The last year of Mr, Motis' ringing eaveer (I921) was a very menorable one. In it he and his company raug Double Norwich Courf Tol Major. Royal and Maximos, also Cambridge Surprise Major, Royal ant Maximus. Of these six peals he conducted five. How he mised the standard of ringing is shown by the first performances he conducted for the origiual Norwich Diocesan Association.

## WARWICKSHIRE GUILD.

POINTS FOR SUNDAY RINGING DISCESSED.
On Saturday, January 20th, the Warwicksirire Guitd beld a pery successful quarlerly meoting at Leamington Spa. it is some years since a meeting was held there, and menljers turued up in force from Allesley, Berlswell, Coventry, Exhall, Nuneaton, Stoke, Jutg by and Warwick, several of the local baud being also present. Wha beils of the Parisl Chumit, and those of St. Peter's R.E., were open for ringing during the thernoon and evening.
During the ringing at the Parish Church a very pleasing incident occurred. The Bishop of Coventry, being on a visit to Leamington, was induced by Canou Back (Archdeacon of Warwick, and President of the Guild) to male the acquaintance of the mombers as sombled, and ascender the tower while ringing was in progress, fot that purpose. In a few interesting remarks, ho mentioned the last two parishes low wat (Great Yarmouth aud Sheffeld) each had a peal of twelve bells, and he gave a short account of the relanging at Shefiche. He thanked the ringers for their services in the various paristes, who, he said, owed a debt of gratitude to tha men who rang the bells for the church services, and hoped the Guild would continue to flourish.
A. short service was held in the Earish Church, at which the Vicar (Canon Feist) officlated, and gave the address, whicli was both interesting and instruclivo.
Tea was served in the liuroka Cafe, and at the business meeting whicl followed, the Ringing I\#ster (Mr. A, Roverts) presided.
A resolution congratulating the presiclent on lis appointment as Archdeacon of Warwick was unanimously passed, nud the hon, secretary was also instructed to send a letter of condolence to the relatives of the late Canon Reed, of Nuneaton, who was an honorary member for some years.
Stratford-ou-Avou was selected for the next quarterly meeting April, if the bells can be obtained, failing which Bedworth was сцозен.

A hearty wote of thanks was accorded to Canon Feist for the use of the bells and for his address, $n$ similar compliment being passed to Canon Barry, of St. Peter's.

A member asked if it was lhought desirable for each tower to keep a record of all ringing for the services of the church, and at the end of the wear compare the points on the same basis as that allowed by the points committee on the Central Colncil. He thonght this would create more interest in the ringing if it were done. The Ringing Master mentioued that the same idea was discussded several years ago: it was then thonght undesirable, and he was of the same opinion now. - After some discussion it was decided no action should be taken
It was resolved during the summer montlis, by way of an experiment, to hold monthly meetings in each district.
${ }^{\prime}$ 'linee uew members were duly elected.
The methods rang during the day inclucled Grandsire oud Stedman Triples, Bob Majov, Double Norwich, Superlative, Bristol and London. The falling of the bells in peal at 8 p.m. brought a very suc cessitul meeting to a close.

## DEATH OF MR. F. K. BIGGS LOSS TO WYCOMBE BAND

The High Wycombe ringers have sustained a loss, by the deatl
 Tuesduy, Jaunary 16th, at the age of 53 yeats. The deceased had been in failing health for some time, but his demise was unexpected by his colleggues.
Francis Kingston Biggs was formerly a member of the Hughendea tower, but on coming to Wycombe he joined the latter belfry, aud was a member watil his death. His total of peals rung was not fery large, being somewherg in the region of fifty, but, considering the disability he suffered by having an artificial leg, the number speaks rolumes for his tenacity aud keenness. Mr. Bigges was exceptionally pleased with two performances in particular-that $l_{1 i s}$ first peal of Major rung at Hughenden was one of London Surprise; and a penl of Sterman Cingues at Newcastle, where he was engaged in husiness during the war. l'articularly kecn on "striking,' lie was not slow to voice his opinion of a touch or peal, and his good humoured crilicism was often the means of a lively iuterchange of views. He had conducted one peal of Stedman Triples. His last peal, in the Wycombe lelfur, was two years ago, on New Year's Eve when he was one of the regular Sinday service band who scored Stedman Caters-a trying performance for his leg. "Erank was highly amused when called to the colours, and he related with gusto his experiences with the medical board-liose of us who knev him can appreciate this incident.

The fumeral took place at the pretty little churcly at Fughenden on Safurday. January 20th. where lie was borme to his resting-place on the shoulders of hrother ringers. On the Sunday evening following, a nuffled nunrier of Grandsire Caters was rung to his memory on tho bells of the Wycombe Chureh.-R.I.P.

## LANCASHIRE ASSOCIATION

## STIRRING UP THE FYLDE BRANGH.

A combincd meeting of the Freston and Fylde Branches of the Lancashive Association was held on Saturday, Jutuary 20th, at Kirkhana, a small town of aboul four thousad inhabitants, situated about midway between Prestow and most of the towers izthe fylde. It was hoped there would be a good vesponse from the somewhai easy-going Fyide rowers, and that ithe presence of the esteemed president of the association would act is a stimulus to the art which is apparenily losint its attraction. About seventeen members of the Prestor: branch were present, the quota fram ille Fyide lueng teth representing five towers. Five of the local band were present. Thcy cau only ring rounds and call changes," but are very desirous o: learning clange riuging. The Fylde Searetary (Mri, Sharples), a few weeks ago, offered his strvices as instructor, but the week previous to the reethg the Kector was notifier that if any person came to teach change ringing the chief ringer and another ringer would resign. This amlooked-for situation had delayed matters a litile, but it was hoped the diffeulty would be set right with the resignation of the two objegtors.
The ring of eight bells (tenor 21 owt.) was kept going marrily to Stedman, Double Norwich, Grandsire, Superlative and Treble Bob Minor, a course of Cambridge Major just failing to be brought round. The bshls are a lovely-toned ring, and are in exvellent going order, having been thoroughly overhauled by Mears and Stanbank last July.
Tea was partaken of by 26 ringers, including Canon Elsee, presideat of the association, and the Rector of Kirkiam and Rural Dean of the Fylde. A shont address was given by the president, and listened to with eager attention by all present. He reminded his hearers that the first president of the Lancashire Associstion was a Kirkham ringer, and lie said he was sorry there had been a diference with the local men regarding change ringing. Some men got fixed opinions on certain things. and refused 10 alter their wews, lout he hoped lefore vory long there would lee a keen and enthusiastic band of change ringers in Kirkham. He did not see why the Fylde district should be behinn the other branches of the association in clange ringing, and he udvised the Fylde mernbers not to loce heart, for, with a litile patiance and encosragemont, their efforts were sure to hear fruit,
Several of the Preston Branch memhers spoke of the dass when their branch was in a similar state of aputliy or drift when meeting after meeting was abandoned because there were not suficient memluers to ring a Minor method. With perseverance, lowever, interest could he aroused.
At the conclusion of the meating there was a feeling of optimism that the combined gathering had dove a solid piece of good work for the Fylde Branch.

## SWINTON'S FINE BELLS.

The montlily meeting of the Manchester Bratuch was held on Saturday, January 20th, at Swinton Parish Church, where there is a magnificent peal of eight bells (tenor 23 cut.) hang in a massive iron frame, of ample proportions, and designed for ten bells, with all the latest improvenents, including ball bearings. Whicla Hessrs. Taylor, of Loughborough, have recently installed. The wisitors numberend hetween fifty and sixty, and made good use of the bells. Members were preent from warious towers in the branch, and from Moorside, Oldham, Bolton, Warringlon ahbl Hyde, with Mr. Price Taylor representing the founders.
At the husiness meeting the Vicar the lier. Tiseount Mountmoytes. M.A.) took the clair, and gave the visitors a cordial welcome. He loped they woull be as pleased with the bells as he was.
There was a discussion on a proposition by ML. W. Wolstencroft. that the meetings should be lehe at the various towers iu rota, and the suggestion was agreed $i o$, subject to the first meeting of the yeay beins held at the Caihedral and the last one at the Town Hall, which has been the custom for a good number of years.
Mr. R. Longden, of St. Tohn's, Deansgate, all the members of we Swinton tower, and the Vical, aiso Mr, A. Saul, of Miles Platiling, were clected to the associntion.
It was proposed to hold the next, meeting at St. Jolu's, Deansgate, failing that at St. Feler"s, Ashton-muder-Lyne. on Saturday, February 17tly.
Votes of thanks to the Yiear and elurell nfficials, also the lofal ringers, were carried manimously, and further ringing then took place. It was the opinion of the ringers that the tone and 'go' of the lulls were all that could be thesired, and that the founders larl malded greatly to their reputation by their latest adelitions to ihis mart of the comiry. it was hoped that org long the other two hells would be put in to complete this splendid ring.

## FINANCIAL DIFFICULTIES.

That the strain of printing detailed reports every year is telling upon the financial strength of many of the associations, is more and more evident as time goes on, and following the suggestion which the Norwich, St. Edmundsbury and Ipswich Diocesan Association put out not long ago, a proposal has been brought before the Yorkshire Association to cbarge a fee of threepence to each ringer taking part in a peal, to help meet the cost of printing the record in the annual report. Without doubt, these annual publications are a great drain upon funds, which in these days the ordinary subscriptions are insufficient to meet. A report like that of the Yorkshire Association is really a very substantial one, and if members desire their society to issue a publication of this kind, each ought to be prepared to pay for his copy. It is sometimes difficult to get ringers to realise what these publications involve in money alone, without taking any account of the time which has been given to their compilation. As bas been previously pointed out, the cost of printing the peal records is usually the most costly part of the report, and, while it has been urged that booking fees place an undue tax upon those who are doing their best to raise the standard of peal ringing, there are those who are not constant peal ringers who contend that the printing of the details of other people's performances should be borne by those who take part in them. There is much to be said from each standpoint, and we can imagine that there will be strong discussion wherever the question is raised.

But now, along with the existing financial perpiexities of some of the associations, come the first sounds of agitation which may add to the difficulties. A meeting of Lincoln Diocesan Guild members have decided to approach the Commitree of the Association with a suggestion that the annual subscription should be reduced. This is principally on the ground that wages have fallen, and in an agricultural county such as Lincolnshire is, the effect of this decline is a serious one to the wage earners. Many ringing organisations-we are not sure if the Lincoln Guild was one of them-raised their subscription to meet the all-round rise in their expenses. These latter bave not yet fallen, but if there is any general demand for reduction in subscriptions, the position of some of the associations will be serious. In order to bring into affliation all ringers, wbatever their personal circumstances, it is, of course, absolutely essential to make the annual contribution as small a une as possible. As ringers give their services to the Church, why should not the Church be asked to give help to the ringers' organisations? An

[^8]affiliation fee, say, of ten shillings a year, for each tower paid out of the parochial fuads, would be no serious burden on any church, but it would be the means of keeping many associations solvent, and, in some cases, no doubt, would euable a reduction to be made in the amount of the individual riager's subscription.

A dinner organised by a few of the nost active members of the Liverpoed branch of the Lancashire Association was held at the Brupswick Hotel, Liverpool, on Saturday, Jan. 27th. After the toast of :The King; proposed by the chairman, had been duly honoured, a violin solo was excellently readered by Mr. E. Boumphey.

The toast of the 'Liverpool Brameh' was proposed by Mr. S. F. Barnes, apd, in the unavoidable absence of $\mathrm{Mr}^{2}$. W. Hughes, was regponded to by Mr. J. Martiv.

It was pleasing to notice the presence of Messirs. W. T. Robson atul T. W. Bell, who the company would like to see more ofter in the tower. It would not be right in this account of the proceedings to omit the name of Mr . Lamb, who bas gone to reside at Wantage, Berks, and whose bealth was toasted during the evening.

Votes of thanks to the clairman, the artistes amel organisers mere responded to by Messrs. Newton, Wilkinson and Glmour, the two latter heing thanked for their excellent dinuer arrangements.

By kind permission of the Vicar (the Rev. H. K. ## BELERY GOSSIP.

There were several points of interest about the peal of Troble Twelve at Sonthwark on Saturday by the London County Association, not the least notoworthy being the fact that it was the lirst occnsion upon which a husbatin and wife had taken part logether in a peal ou twelte tower bells. To Mr, and Mrs. Arthur D. Barker falls this distinetion.
Then, too, wilfred Taffender rang his third sucessive peal. His first was Londan Surpriso Major, his second Stedman Cinques at Bow. and his third Treble Twelve at Southwark! Some slart for a lad of 15 !
At the heacy end we find Mr. James George, in his 70h year, ringing the 50 ewt, tenor, and turning her in withont turning a hair. It is really wonderful when you think about it. We think Mr. George must unquestionably be the oldest ringer to ring this bell single-hantled to a peal of Maximus.

The six ringers who took part in Mr. George Bolland's birthder peal at Tong on Saturday have between them 255 years service in the belfiry of their parish church!
The meeting of the Worcestershire Associntion recorded last weets was a Norlhern and not a Western Bradch meeting, as reported.
The peal at Rawmarsh on January 13tly was rung in 3 hours ab minutes, and not 2 hours 20 minutes, as published.
Among the long peals, of which tho anniversaries fall next week, are the 14,016 Kent Treble Bob at Olalam on Feb. 12th. 1821: 7,018 Grandsire Cinques at Cornhill on Feb. 14th, 1731; 13.001 Grandsire Oinques at Yainswick on Fel, 14th, 1920; 9,999 Grantisire Major at Oldham, on Feb. 15th, 1825; 14,224 Bob Mrijor at Aston on Feb. 16thl, 1789 : aht 8,448 Stedman Cinques at Painswick on Feb. 16th, 1858.

## BALL BEARINGS FOR BEELS.

To the Editor.
Dear Sir,-Your correspondent, Mr. R. F. Deal, asks same questions with regard to ball bearings, and quotes the report of the conferenco between the Society for the Trotection of Ancient Buildings and the Central Council. That report must be read with referenca to the main object aimed at, namely, the bost way of preserving old towers. The conclusion arrived at was not a 'casual diemissal.' Indead every paragraph was most carefully considered by both sides. Nor can the conclusion be the result of experiment, because ball bearings for bells lave not yet been tried for a sufficient number of years to constitute a reliable experiment. From the point of view of stress on the tower, bali bearings can have no effect clifferent to that produced by the older type of bearing, provided the latter is maintained in suel reasonable order as to avoill any ecrious knack.
One of the undoubted advantages of ball bearings is the saving of labour to the hellbanger in the tower, and the consequent fower initial cast of hanging. But generally the members of the conference felt that the question of ball bearings was an open one, depending on local circumsiances, and they were not prepared to commit thenselves to a definite opinion.-Yours faithfully,

EDWTN H. LEWIS.

## NORFOLK AND SUFFOLK RINGING ASSOCIATIONS.

To the Editor.
Dear Sir,-I think that the argument alout the areas of ringing associations in Norfolk and Suflolk has been caused by the fact that when the Apt for increasing the Tpiscopate was mexpectedly passed in 1913, the authorities were nat well advised in the areas for the nes Bishoprics they laid out. West Norfolk and West Suffolk are very near the Cathediral at Ely, and. further, parts of West Norfolk ate also not far distant from the Cathedral of Peterborough, Now that Leicesterghire has practically been taken away from Peter: borought, it seems to me that East Norfolk and Eask Suffolk should have been the area of one Bishopric, and the west portions of the counties should have gone to Ely.
But although that malter has been settled, and must be made the best of, I do not see why the accomplished fact should upset ringing. After all, bells sltould be used first and foremost for ringing regularly for Sunday services; for which, of course, you moust have rimgers. Now, bands camot be lomed and maintainet withond at times outside help, which can ouly be given suffciently by some person in each district: and the enthusiasm of diatricts can only ba maintained by peal ringing of associations. I consider that East Norfolk and Fast Suffolk. hecause of rail and road communieations, ars naturally linked together, and should siways be together. We in the Waveney Galley, with our towers allornately in Norfalk and Suffolk. would regret a separation more than any other purt of the old aiocese.
I was one of thore appointed in 1914 to inferview the late Bishop of Suffolk oa the matter: All he said was he wishecl for an association for his Diocese, and the wisl of the East Sufolk ringers generally for a jount associntion he would make no comment on. As to hour to keep ringing going I do not suppose he knew anything.Yous truly,

FRED R, BORRETTT.

## THE • TFOMAS PEAL

The Cashedral band then rang the peal of eight in $E$ Rat, to be known as the 'Thomas Peal,' and the Graudisson peal of 12 in B flet, bringing in both the new bells. Canon Coleridge took part in the ringing, which contimued until 2.40 , when the bells werc chimed for evensong at 3 o'clock, specially adapted to the occasion. There was a large atteudance of the general public, who with the visiting ringers and olhers comportably fillod the nave.

A procession from the west cud of the uave inchded representatives of the Dovonshire Guild of Ringers, the Cathedral ringers, the donor, the choir, clergy, and Cathedral clergy, among those present being Revs. Maitland Kelly, of Kelly (president of Devon Guitd) E. After the servico the Cathedral ringers ratag the Cobthorne six, the Slafiord eight in $C$ minor, and other combinations, as well as the full peal, and rimging was contimed by the visitors in relays until nbout 8 p.m.
Tea was provided for the ringers by the Dean and Chapter at Deller's Cafe.

Courses of Grandsire and Stedman Cinques were rung by a mixed lenul of Plymoulh and Taulton fingers.
On Monday evenimg the Cathedral clergy, representative citizens, Cathedral ringers, and offeers of the Guild will be entertained at finmer by Mr. A. C. Thomas.

Exeter Gathearal now boasts of one of the most remarkable combinations of peals in the country, as well as holding tho distinction of having the treaviest tenor and the heaviest peal in the world liang for ringing. Visitors on Sunday were delighted with the new twelve, and Mosers. Taylor and Co. are to be congratulated upon the suecess of their work.

## RINGERS' HATS IN THE BELFRY.

A mecting of the North-Eastern Division of the Essex Association Was lield on Saturday, Tan. 2011, at Great Brimley, 24 members, representing 11 bramches, being presont. Sonc good ringing was done, notably $720^{\text {Combrige }}$ Carprise, conductea by the Master (Mr. W. J. Nevard). Tea was served at the Spread Eagle Hotel at the kind invitation of the Brester. who pesided, supported by the Vicar.
Allusion was made to the old custon in this parish of laving the hats of the old ringers hung up in the corner of the belfry. These were a novel and interesling sight, the last one being dated 1823. Mr. Nevard (Master) and Mr. R. W. Stamard (secretary) were rcenected unaminously, and after electing the Ficar and churchwarden as bon. members, handbells ant musie were indulged in. Tendring was selected for the May meeting, and Harwich for midsummer.

## SIMPSON TUNING.

## To the Editar.

Sir,-Quol homines, lat sententia! But sonse of your correspondents are surely unfortuate. In spite of Messrs. E. Barmetr, sem., and J. N . Jerram, there are a great many emineat ringers who do not loudly condema the Simpson principle of tuning. In this towa there has been lately installed a recast. peal of tea for the ohd Parish Church of St. Nicholas-a first-class example of ull modern - hevesies," for the bells are in a stee] frame, with ball bearings, and are tuned on the Simpsou priuciple. But he would be more than rash who would alecty them either from the point of wiew of the ringer inside the tower or the listaner outside. And these bolls are only one example of many.

There are just two simple points which many people overlook, but Which might well be borne in mind by the Simpson cribics:-
(1) That bells are primarily for the glory of God-aud for this notbing less than the wery best should be accepted-and not for personal idiosyncrasies of the ringera.
(2) That many bells are called. Simpson thaned' which have little or no right to the name. Any who wouti know how beatiful a Simpsay peal is have ouly to listen to the latest products of the famous oroydon or Loughborough foundries, who lave cath many peals which refute tha charges laid agatist bells of this type. ## THE THOUGBTS ON A FLAT

Sir - A fcw thoughts on Simpson lunimg. Has this method justi-
fied its purpose? Judging by the reports of various openingg all fied its purpose? Judging by the reporls of various openings all
over the worid it must lave. Anywar, it prevents such awful peals of beils as everyone is familiur with. What does Simpsen tunome do? Much what the frock coat and top hat does. While not making a gentleman of anyone, it certainly makes them a little more presentable.

Now, as I have not get a battle axe, I must he a bit cautious in my yomarts. The critic should remember that bells were inteaded to be heard more than a mile away. That is why they are put in the tower, and not in the chancel. Also, that follnders cannot all be Rudhalls, any more than ringers can all loe Wibliam Pyes. No doubt Rudhall harl some ' bad eggs.'

But what tiekles my funnybone is that the eritic say⿷ "I have rung pals on them.' Now, this is ans army melliod of calling the slew and then cating it. Theminds me of a conversation I heard a short time ago. The canducter was holdiug forth on the musical qualities of various nethods, when someone said, "Yon stand for music? ' Yes, all the time," was the reply. s Then why the policeman did you call such a rotten momposition this afternoon?"
From the public point of wiew, excepting on special orcasions and for their proper purpose, bells are tolerated, sad no more. And, like the riuger, the public are just as pleased when a peal conses round, but from a different point of view, Nowadays Ehere scems so much humbug about the ringing fraternity: yes, give them a peal of bells that go well, and which they can ring as much as thoy like, and what care they if the haymonics have gat the rlaumathes most of it goes out at the top. As to the masical part of the public, they have the foggiest nolion about it. As I heard one sas" "Fancy play
ing all your tunes in E fat!'- Yours thul?

Unforturately, owing to the illaness of a little child in the vicinity of the church, there was na ringing on the tower bells, but pandbell ringing ocenpied a little of the time. Mr. J. E. Groves and a young nember of St. John's band taking part

He also drew attention to the future care of such yecords as still exist, deploring the loss of W. D. Crofts peryonal peat book, through a piece of pure sentiment, and the sale of a peal of cup haudbells left by Crofts to the ringers at st. Maly's, Notlingham, by one who was merely the custodian.
Opinions were expressed as to the best way to preserve these manuscripts, and one of the methods may be adopted, if tios presente holker gives consent

## 30 METHODS IN SEVEN EXTENTS.

## To the Edtor.

Sir,-I was naturally much interested in Mr. Dawson's inguiry which appeared in your issue of Jawary 26 th. In reply, $I$ wisli to poind out thet lise idea and plan of spliwins Minor Methods has been betore the Exercise it least 10 or 12 years. I think I am cortect in saying that the Rev. H. Law James was the first to make knowin and to practise the idiea. Through him the matter was discussed tu the Gentral Council meeting in 1912. In the issue of " The Ringing World,' August 23rd, 1912, M $\mathrm{M}^{\prime}$. E, K. Lewis described the rules by which the splicing could be done. A peal which contained extents in spliced methods was rutng here on $\sqrt{\text { fuly }} \mathbf{1 2 t h}$, 1913, and, logether with the peal, the figutes were publistuen in an early issue of "The Ringing World.'

I would like to add that the practice of splicing invests Minor ringiug with considerable aditional interest, which fact has often made joe very mucls surprised that the practice bas not been more widely adopted. I hope that as a vesult of this inquiry it may be come so, end if any further purticulars are desired I should be ouly too glad to sire them. - Yours, etc.

## BOBS AND SINGLES IN MINOR.

Sir,-I was plensed to see Mr. Dawson's letter congratulating the Norbury company upon their secent achievement in ringing a spliced peal of Minor in 30 methods, and also wish to add my own congratulations to his, as I trak part in the first, peal of its kind in 14 methods at Edenhaw, Lincolushire, conposed and conducted by the Rev. Law Jagres ir February, 1911. If Mr. Dawson would inquire of that gentieman le would give him all the information lee requires,
As to the suggestion of giving the ljob and Single leads of Lite methods in the ' Collection, I have geen this question asked many times. The Rev. Insw James, in answer to an inquiry which I made when the collection first came out, stated that in all Manor methods 4th's place is raade at a boh instead of 2nd's or 6in's whinch ever it mary be af a plain lead. A single is made hy making 4th's as ata a bob, and the plain lead place whichover it is and aiso the place tretweon tham. Frow example:-

It is a surprise to me that more six-hell ringers lave not taken up splicel-method ringing, as it inereases the interest in six-bell work, and also saves may mows of mands coming up wheu it is wished Lo ring a peal in more than ille seven methorls.
I should also like to see all those Surprise Methods rung by the Anston company (composed hy Mr. Fowler, 1 believe, and rung during the South African war and since), so that the best, could be added 10 the collection. I also notice the record of a 720 Bristol Winor rung at Aldringion. This would he interesting, as I have never seen the methad published mader this meme.-YOUTs, etc., F. BLOOD.

## MULTI-METHOD PEALS.

The recent achievement by the band at Norbury, Cheshire, of a peal of Minor in thirty methods within the compass of seven true extents, has served to stimulate interest in multi-method peals, and we hope it may be the means of many more bands taking up the prattice of spliced method ringing. It is more than ten years ago since this form of Minor extents was introducet, although, probably owing to the innate conservatism of ringers, very few bands have followed up the idea. Certainly no company has exploited the scheme as much as the Norbury men, whose success merits the warmest congratulation of the Exercise. It bas hitherto been adjudged a hall mark of competency in Minor ringing to ring a peal in seven methods, and many ringers who have done this imagine they have reacher nearly, if not quite, the top of the tree. But the Norbury peal proves that there is vast room for an advance, and we doubt, even, whether any peal in any one method on any number of tower bells can be said to surpass it.
It means that on an average no more than 168 changes are rung in each method, but the number of shunts from one method to another is far more than thirty, for a return may be made to a method two or three times in the course of a 720 . One needs sharp wits ancl a more than passing acquaintance with the methods themselves for gymnastics of this kind, and it must not only invest Minor ringing, as Mr. Fernley pointed out last week, with considerable additional interest, but make it infinitely more difficult as well as entertaining. For instance, consider this ats at four method extent; one lead of Wragby; ihrec leads of Grove; two leads of Neasden; five leads of College Bob; three leads of Wragby; two leads of Grove; five leads of Neasden; three leads of College Bols; two leads of Wragby and four leads of Grove. There you thave ten changes of method, and when it is remembered that seven such extents were rung and that each extent. was a combination of different methods, it will be realised that the Norbury ringers' performance was of extraordinary merit.

We do not, however, look upon even this as the final word in this kind of peal, but we shoukl like to see it the beginning of a much wider practice of spliced-methor! peals. In the same way we do not look upon the recent achievenent of the Cambridge University Guild in ringing a peal in three Major methods als in any sense a
"freak "performance, but prolably only the forerumner of many varieties of multi-methor peals on eight bells. There are, we believe, greater difficulties at the moment in providing true peals of Major on the multi-methot plan (Continued on page 9.s.)

[^9]than there are in Minor; but this obstacle, we imagine, will largely disappear when the Major methocis have been explored and published in the same exhaustive manner as the Minor, At present the choice of Major methods is extremely limited, whereas the possibilities are vast, and we believe the time will come when we sliall see peals of Major rung in almost, if not quite, as many methods as is now possible in peals of Minor.

## THE SUEFOLK CONTROVERSY.

## To the Editor

Dear Siry-It is a relien to find that Mr. Burton af last sees the danger of the yawaing gulf lyung before him and Mr. Coleman. But ho must not say that it is I who accuse the latter of forgery. It would not at all suit my argument to make out these my very good friends to be criminals! What I havo shown is that they have mate a blunder, because being in Norfolk, they do not understand the position in Suftolk. But it now apperis that they also do not understand the difference between a signature and an endorsement. You sign what is your own: you endorse what is another's-in order to show that, even if you to not agree with it, you will support it.
Now Mr. Furton, in Your issue of Feb. 2od, and Mi. Coleman in that of Nov. 174li, say that I holh endorged and sigued a certain clocument. In your issue of Nov. 24th, I pointed out that it is impossible and conliadiclory for both these words to apply to a rame written only once. They must decide which of these two opposita lines they ars going to take. Mr. Burton says this document is a ledter. But in your issue of Nov. I7th it is entitled s Copy of Memorandum another confradiction. In the middle of $i b$, is a starred note by mr. Fracett, whick proves that Mr. Burton lias blundered again in saying that the whole of it is his. Mr. Fawcett is evidently erficising Mr . Colemanis memorandum, which he las copied out verbatim, So that our statement that the document, was composen by Mr. Coleman himeelf, is evidentiy borne ouf, by the wording of it. It is above all clear that the document is mot mine, which is all that I meed fo prove. How, tisen, has it got the word " (Sigued) : inserted before my name? Most gertainly this was not there when I' wate my name on it.
Another blunder of Mr. Burbon's is when he says ' Mr' Drake fas once had the femerity to ask how Inis signatare got there.' My actual mords (Nov. $24 t h$ ) were: " What right has Mr. Ooleman to lef my name appear wneservediy, whon I atwached lengliy reservations to it $?^{2}$ To this serious question I lave received no yeply.
Mr. Burton may say that he was referring to my words in the next paragraph: "Why, then, is my siguature put at the foot, when 1 never attached my name to it ? But this would be a double bluwder. First he has introduced the words "got there," ontirely altering the meaning: also if he loaks at my letter he will see that the word " it," gramatically vefers (not to the memorandum at all) but to Mr. Fawcett's starred note. I was asking why is my ' ciguature ' attached to Mr. Faucett's starred note. Am I not abundantly justified in calling the donument tiukered "?
These seem enough blunders in ane short letter (all of them easily verified by anyone who compares the three issucs of the * Ringing World ' $)$ : but there is still the most fatal blunder of all. When Mr. Fawcett and I had gone to the trouble of endorsing Mr. Coleman's proposals, whar, of why did Mr. Coleman (with Mr. Burton) nse this loyal suppont of himself lo illegally turn us out of the commiltee?

## JAMES MOTTS: AN APRECIATION <br> By CHARLES E. BORRETV.

Hey I be allowed to add a few lines as a supplement to the memoik in your last issne, and also to that part of your very appreciative leader referring to the passing of James Motts?
Fou, Mr Editor, describe lim as "oue of the outstading fgares of our craft.' I think he was rez outstanding figure, for to my mind there las been no ringer like him in any age since change ringing began.
Gonsider conditions. In Ipswjeln, until 1899, save rings of six and five, there was only the twelve at Sit. Mary-le-Tower Gunch in 1899 St. Margaret's were incoased to eight, and so the numbers remain to-day. James lotts' ringing carcer in the town of his adoption occupied 39 years-from 1882 to 1921 -and only one twelve and one eight at home, and not a great many other eights in a 10-mile radius, Suffolk is largely agriculthral, and railways in such counties are fot particularly helpful, for late trains are unknown. 1 wonder how many miles Jimmy pushed his old 52 -inch ordinary, and aftermerds a safety bicycle, in tha pursuit of his hobloy? Even the day they scored the 16,60B at Debenham he rode the fourteon miles rom Ipswicin on his 52 -inch!
Norwieh was the nearest 12-until the advent of Farmonth, Chemsford and Saftron Viaden-and any of thom meant a long day's outing if $n$ peal was attempted. Then, too, Ipswich is a comparatively smali provincial town, and thus more diffeult ereate and maintain a crack company its, than in grent centres of population where there is more inducement for ringers to converge. There were ollher prominent men in the Tower Society during all these years, but it is ino disloyalty to the others to say there Tas anly ono real leader, and that was Tames Mots. To lend a fine progressive band for 39 years, and to have the respect of all! Is not that an outstanding nchievement? And let tlaere be no mistake-it is ten times harder successfully to lead a 12-bell band than an eights. I coult write much more in support of my claim, butw will pass on to the finest thing of all ahont Jimmy-his great modesty and absolute lack of all bluster or bounce. In spite nf great achievements lee tas quite unspoiled, nud would help any one who asked. I wonder if we shall ever agath see the lika of the two brathers? They were greatly altached, these two, in fheir plain homely way. Both were bachelors, and both equally quiet and hanasertive-Tames by nature the leader, and William one of the safest of ringers and most lovable of men. James Motts was so great a conductor that his ability as a composer is likely to be owerloaked, but he had compositions in atl the standard methods, althourh lie himself did not slavishly use them.

I do nol: know if ho kopt a peai book, bul i have dissected her record for our association. In doing so I came neross a curious error. Peal totals were published next mombers' mames, for the first time in our 1890 report, and in that list. James Motts is giren 93 Lower aud 35 laadbell peals. This slould have been 83 and z 5 respectively, and, of course, this mistake hes been repented ewery year since. The moper totals should, theretore, be 530 Lower aud 29 handhell peals. I ain unable to estimata the ummber rung for ather societies. There were a good many, I believe, for the Lissex Association, and one in particular pointed ont last week-the record London for the St. Martin's Guiled.

Below are particulars of the 559 Norwich peals-no less than 93 of them on tweive bells and in seven methods!
Jannes Motts then, I say", occupies the foremost place anmongst our great ones who have gone. May those who follow try and copy his great example! My sympathy goes out to thase of his comrades whom I always affectionatelg think of as 'the old brigade, who helped in these great performances. Only three rourin amongst our Irswiels members-Edgar Pomberton, Robert Brumde and Widiam Garrett, and the first named is now uable to ring. I must apologise for the lengtli of this appeciation, but my respect and admiration fat a greali rinter must he my excuse. Farewell, dimmy!

ROOHESTER CATHEDRAL, I92I.

# THE <br> CROYDON BELL FOUNDRY 

## DEDICATION OF LAMBETH BELLS,

WHITEGIAPEL FOUNDTVY'S 350 XEARS' CONNECTION WITE THE PEAL.
At a most impressive service on Friday week, the Bishop of Eonthwark dedicated the reatored ring of bells at the Church of St. Mary, Lambetly. We lave already given some parliculars about tire belis themselves, the restorntion haring consisted of recasting the treble, 2nd, ithl, 5 ths, 7 th and tenor, which were cracked, and the rehanging of the whole octave with new gudgeons and bearings. The cracking of the bells was due to the old 'Cast in' crown staples, which aro a frequent cause of this kind of damage. The old framework was found to jo in splendid condition, after 200 years' service. It is made of heavy section timbers, and of very good construction. The existing headstocks and wheels were of comparatively modern make, and were brought into use again.

The service was athended by a large congregation, and the Bishop, after dedicating tho bells, which were heard for the first time during the ceremany, preached an exceedingly interesting sermon. He dealt with tho great age of the bells in the tower, viz., over 400 years, and mentioned important historieal oceasions on which thev must have been vung. Ilo also dealt, with the effect of church bells on history, arehitecture and poebry, instaneing. in history, the threat loy the people of Florence to the King of France to ring their bells if the terns of a certain treaty were forcea, which would have the effect of turning every house in the place into a miniature fortress with disastrous effects to the enemy forcos. On nrehiecture, ihe effect of belts hari made it necessary to build fine lofty and mastive towers, and gave ecope for the various styles in architecture. In poetry, the Bishop mentioned several famols passages by renowned poets dealing with bells.

Alfer the sermon, fand during the singing of appropriate hymng, a parish procession took place, tho Bishop and clergy, church officials, the architect (Mr. Forsyth). the tounders (represented by Mr. A. A. Hughes, with whom was Mir. Alan Macdonalil), the huilder (Mr. Samson) being followed by the sconts, guites, school children and teachers, menbers of parochial organisations, the ringers, sidesmen. and Ghurd, Council. The procession passed down the Mave, up the worth aisle. past the alfar, though the side chapel sud south aisle. up the nave and througl the sanctuary. The service concluded mith the Te Deum fund the Blessing, pronounced by tho Bishop.
There was little timo left for ringing afterwards, but all who fried the bells, which now constitute a very fine peal, were delighted with their "go,' and Mussrs. Mears and Stainbank are io be congratulated upon the excellence of their work. Their comection with Lambeth hells, as has already bean mentioned, goes back 350 years.

## BOLSOVER RINGER'S DEATH.

## MODERN BELL TUNING.

The advantages of tuning beils on the Simpson tivetone principle were bound, sooner or later, to be called into question from the ringers' standpoint, and Mr. Edwin. Barnett's letters have expressed the views of quite a number of ringers after the gradually widening experience that is being gained. Whether or not these opinions can be said to outweigh the claims made for Simpson-tuned bells is not for us to say, and doubtless there will ever be two schools of thought upon the subject. It cannot be denied that to hear a Simpson-tuned peal in contrast with many an old ring is to be convinced of the vast superiority gained in the tones by the new methot, for overtones and harmonies ate rarely in evidence in the old-fashioned bells. Il they came out true it was more by luck than anything else, although the founders of days gone by must be given credit for seelsing, by form and mixture, to get as near as possible, within their limited mechanical means, to the perfect bell. That they occasionally succeeded is obvious by some of the very fine specimens still to be found up and down the country.

But there is something more in the arguments which Mr. Barnett has put forward than many advocates of the Simpson principle may be prepared to admit. For in. stance, the 'howl' of which he speaks is very noticeable in some towers, yet there are others in which it is by no means pronounced. Is this a matter, we wonder, of acoustics, rather than the fault of the bells themselves? If so, it might be possible by mechanical means to get 1 id of the dirgelike noises which seem to get into the heads of ringers when peal ringing in these particular towers. If the fault lay in the bells, and is to be found in some bells and not in others, it ought not to be beyond the wit of the founders and their tuners to overcome the drawback. We only make this suggestion, because we have never yet seen it stated what is the actual cause of the ' howl' which has been referred to. If the actual canse is not known founders might well investigate.

No one will attempt to deny that, from the important standpoint of the public, bells accurately tuned as modern bells are, whether strictly to Simpson principles, or with a flat seventh, are much more appreciated than old bells which obtained their harmonics more or less in haphazarel fashion. That is a matter that must not be lost sight of There is also another question which Mr. Barnett raises, namely, the life of a bell as a melodious instrument. Will Simpson-tuned bells, and, we presume, all other bells tuned on a lathe, lose their resonance sooner than the old bells? Will the metalfurgists enlighten us?

## BELFRY GOSSIP.

What was clamed as the Arst peal of Cambridge Surprise Major was rung exactly 140 years ago to-day. This was at St, Giles-in-the-Fields hy a College Youths Company (there were two sociaties of College Youtlis at that time), and was 'deemed the greatest performance ever achieved in the Campanistanean Art, as so intricate a method was never practised hy any other sett of men whatever
A poal of 6,048 in the same mebliod rung at sheffield in 1787 (foul years alter the London peal) was also claimed as the first in the methon is the country. This may liare meant outside Landon or perhaps the Slueffeld men hat not heard of the London peal.

Perhaps there never was three such capital performances in ye art of ringing ever before rung on ye same day as was rung ou Feb. 26ih, 1777 , for besides the 10,080 Caters at St. Margaret's, Leicester, and 10.080 Major at Shrewsbury, there was rung at Abingdon, in Berkshire, a peal of 5,040 Bob hoyal on tan handbells by five persons, it being the first peal on handbells in ye kingdom, and is thouglat to exceed a course of Treble Bob Twelve in ring by ye College Youths in Lrondon.' (From a journal, March lst, 1777.)
On Feb. 28th, 1881, 9,238 Steetman Cingues were rung at Birmingham, ou Fenry Jolmson's rand birthday; the last day of February heing also the birthday of Mr. Ted Horrex, who will be B5 next Wednesday, College Youths and ringers throughout the country will extend their good wishes to the Landon veteran upon this day.
Twenty years last Wednesday was rung the first (and only) paal of "Silent Stedman Cinques' in liand. This took place on Feb. $21_{s t}$. 1903, at Leicester. and of the band-J. O. Lancashiro I-2, G. Cleal 3-4, S. Cotton 5-6, W. Willson 7-8, J. Buttery 9-10, A. Millis 11-12, the first four men are like ' Charlie's Aunt 'still ruming.
It is interesting to note the commenoration of the 13,001 Grandsire Cinques rung in this Glonestershice tower three yearg ago, by a peal in which the same band rang the same bells. This was only possible, as the footnote indicates, by one of the band who had emigrated to Cquada, being in this comintry on a holiday. We wondor if ever they will all meet again to achieve a similar performance!
On Felb. 28th, 1880, a very musical date touch ' was Tuing abo Liversedge, Yorks, in the shaje of a 'World's Birthiday Peal.' Tho hand, consisting of Bradford nambers of the Ancient Society of College Youths, rang 5,884 Kent Treble Bol to represent the number of rears that had clapsed since man's creation.
Tt was also rung in honour or the Both lirthday of William Sottanstall. of Sowerby, Halifax. the composer of the peal, 'who for 60 years had taken a lively interest in any objeet to promote the art and science of clange ringing both as a ringer and composer, as that book published by him lestified.'
Lous peals rung our March lst include $\mathbf{2 3 , 4 4 0}$ Canberbury Pleasure Mnjor rung nt Waralam in 1889, and two peals of Grandsire Catore al Painswick, viz., 8.064 in 1734, and 10.080 in 1735.
The hells at Haslemere, Surrey, have been taken down this weak, prier to recasting at the Loughborougli Foundry. Major J. H. B. Hesse has been responsiblo for raising funds for this work. Ho hals been aclively comuected with at least a dozen such restorations.
Ringers will wish success to the Midland Counties Associntion band who to-morrow will alfempt the 12,898 Cambridge Surprise Major at Stoney Stanton. Kathing like this length of Camiuridge has yet heen nehimed.

## SIMPSON TUNING,

## To the Editor.

Sir,-The Rer. Cecil Fi. Clarke's latter in your issue of Feb. Sth alis for some further commentr from me. I am pleased to have found out that he is a ringer and doing excellent work in his dis trict. I wish wo had many more elergy of his stamp in our ranks. I hare not heard the new peal at St. Nicholas', Brighton, so cannot pass an opinion on them: but I should be inclined to think if they are all he represents them to be, it is probably the result of ant necident, or else fhe posilion of them in tha tower having a tendency to lide tlieir defects.
The fart that tho bells are primarily for the glory of Gad, I Jave never overlooked, aud there are few ringers to-day whose record for Sunday service ringing is better than my own during a period of forky-two years. But shrely those ringers who ring for ihe glory of God have a right to ask that the music of tho bells they ring shall be the hest possible, and not bo compelled fo submit to anything which afterds their cars, when in many instances it could so easily be othermise if it were not for the passing craze of
few musjed cranks who tell us that hne harmonics of a bell are uverything to be desired. Are they? There is not one ringer in a h.housand who cares a "surp of the fugers 'for any of the notes above where the clapper strikes, and if a bell is east the right Ihickness. that is the note which I contend gives the best result and daes away wih that distressiug howl which you invariably get an Simpson-tumed bells.
The Fhev. G. IH. Glarke's experience on the latter type of bells is cuidently yery limited. He seems to think that because a ringer dares to have als opinion of his ofli, lag is ignorant of the subject lwe is talking aloout, but mas experience of life tells me it is often the very opposite of that. The true judge of the musical qualities of a bell is the experienced ringer with "an ear.

Conmon sense seems to say that the note produced by a thin bell must be irony, compared with a proportionately thicker cast bell, the latter type giving a good hold note, which the former iacks.
Most of our old founders cast their hells as nearly as possible true to note. If they had had to cut and hack them about to tune then wo should never havo had many of the beautiful old bells which wo are so proud of to-day. The blow of the clapper has a much smeeter, resonating sound on a bell when the skin of the metal has not been hroken, than when the metal has been skimmed out as with a Simpsor-tuned bell.
It is a well-known fact that a perfect bell casting, which has nerer had its ' sfin ' broken, has a greater power of resonance and a longer resonating life than when it las been skirted with a fool, ant when a casting is skirted from top to bottom as some of our hig bells ave to get the five tones correct, you liare undermined the whole elasticity of the fabric, and $i t$ is only a question of pounding it long enourh to knock all its breath away. The reason we are getting so many Simpson-tuner peals of bells is, not that they late heen proved to be the best type of bell, but that the bell Fonnders who advocate that particulab type have found it so easy to talk over perlaps an ummusical incumbent and his equally unmusical churchwardens, who may be the village grocer and the village butcleer: but if theJ had had experienced ringers to contend with the result in many instances would he dingerent.

I woulde whieh of Brighton"s two peals of ten will last longest? fan thinking those of St. Peter's. if lefi ass they are, will be pouring oum their melonious voice long after those of St. Nicholas have ceased to exist. I have now had my say on the matter, and am perfectly satisfied if I have rrawn the alitention of the Exereise to some of the imparfections of Simpson thing. Yours, etc., $\quad$ E. BARNETT, Semr.

## A FULL TONE BELL PTREFERRED

Sir,-The Rer. Cecil H. Clarke, in tour issue of Feb. 9tht, quotes: So many men, so many opinions. Ho then assumes tile position of Gamaliel atd mildy abuses two very estimable members of the Exercise for having opinions of their own and the courage to express them.

As regards the two points put, forward, viz.: (1) :That bells are primarily for the glory of Gocl.' What churelman would dispute that? But who is to decide which are' the very best bells'? Presumably Mr. Clarke. (2) "Many bells are called Simpson-tuned, Which have little or no right to the name.'-Why not?-if they 'how' sufficienlly. At this juncture it would be apropos to place hefore youm readers, clergy and laity, musical and momsical memhers of our bell ringing profession. an extract from a copy of "The Funday Times.' dated April 11th, 1920. as follows:-

Your contributor leads ane to believe that this new system of tuning was first used in this counlry by Messus. Gillett and Johnsion fourteen years ago. I, however, beg to point out tliat Messis. J. W. Taylor and Ca, of Louglibarough, were the first to make use of this arstem considerably over fourteen years ago at the suggestion of the

Eate Canon Simpson, of Fittleworth, and Canon Simpson based his ideus on certain Coutinental bells produced in the latter part of the seventeenth century. Your contributor also leads one to think that, prior to this new system, all bells were tuned by hand chipping, but I believe that the fist power-driven tuming machine was erected a little over eighty years ago by the Old Whitechapal Bell Foundry (Mears and Stambank), which was established in 1570. and is still continuing busiuess.'
"It would appear from your lefter that all ald peals are out of tune. Simpson-tumed peals are strongly in the minority, ata, therefore, the vast majority of rings of bell are out of tine. There must bo many of your readers suffiently musical to know that such a statement is absurd.

* I havo devobed mucl time recently in muking a comparison between tila best of bells tuned on the old lines atud those tuned on the Simpsou five-toned principle, and I ans bound to confess that the new systen suffers by the comparison.

During my observations I have often asked myself, "Why do Simpson-tuned peals Lave a dirgelike, mourmful howl with them, when being rung in peal, and the ald tuned ringe a bright, cheerful eftect? The only reason I can find for this effect, which is agreed to by the majoriby of ringers with whom I have cone in contact. is that simp-son-tumed peals consist of a succession of octaves and fifths in harnoniss, which, as overy young student of music knows, is mgainst tho first lawe of lapmony, whereas the old duned peals. witls their strike notes and sevenths (instend of the ociane), give the effect of an incomplete cadence, and so brighten the sound of the balls when rumg in peal.

Perbaps some other roader can give a hetter reason for the " howIing " tone of Simpson-tuned bells. As examples of beantiful toned rings of bells tuned on the old system, may $T$ mention the fanous twelwes at Painswich, St. Peter Mancroft, Norwich; St, Mary-le-Bow. Cheapside, and Soutliwark Cathedral. The eight at Soutligate, Biddleser (now ten), and the delightful ving at Privett, Hants.
Some years ago I read a booklet by Thomas C. Lewis, the eminent organ huidder, and an unquestioned aththority on tone and tune. The pamplilet was embitled * A protesi against, tho modern development of unmusical tone. organs, charch bells, pianofortes.'
The following is an extract:-
Now, as a fact, there is nothing poorer in tone than a large bell having the tap or percnssion noto of a stated pitch, and the lower, or lum, note accompanying it an exact octare deepor. On the contrary, and in defiance seemingly of bamongr, a fina bell with the bercussion or tap tone, say, E, should have its lower, or hum, tonc major serenth lower, but flatteged to the extent of about a quarter of a semitone.

- To sum up, let us hare peals of bells which give a musical and plensing pffect. and not peals of harmonics giving forth a doleful dirge, which gets more depressily on longer acnuatntance. Mathe-matically-tumed bells may please, in theory, academical miads; the Chinese scale systen is mathematically corvect. but who wants to henr it, or what western car can be pleased by the sound of

Quot homines, tot sentendia.' The whole question resolves itself into one of likes and dislifes. Ringers as a hody profer a full tome bell. i.e., file assertion of the actual note of the bell with the strike of the clapper: not an embroidery of harmonics which give a comfuger number of tones and obfuscate the actual notes of the bells. What is wanted is that sonorous, or clear, sound whish one is accustomed to hear in those bells cast upon the lines of our old finmous founders. Just imagine tuning an organ. pianoforte, or mive other musical instronent upon the simpson principle. For applause an orchestra wotld probabiy get anpthing from a bojled csmot to an egg donbtful age. Yours trtuls.

ANOTHER EING OF EIGHT FOR NORTHAMPTON.
A noteworthy event in the history of the Parish Cluncel, Desborough, occurred on Saturlay, Tiebruary Jod, when two bells were dedicated in the presence of a large congrgation. Two twebles were equired to complete the octave, and the nucleus of a furd for providing these was supplied by the families and relatives of the Jate 2l", William and Ellen Burditt, and the fanilies of Deacon, Kilborn and Tailby (descendants of Jonathan Deacon). In addition to the new leylls. No. 1 bell las been recast. The work was carried out by Messrs. Gilleit and Johuston, the well-known firm, of Crovdon.
The rlenicatory service was conducted by the Fion (the Rer. ColeHamilton), After the Collect, the Ficar proceeded-during the singing of a hyman-rlown the mave towards the lower, where he ofterent prayers. The local band then rang a few rounds on the new belts. An elogueut sermon was preached by the Vicat, who toak as his text, "Lift up your hearts.
After the serwice $n$ touch of Sterlman Triples was rung by the following: M. H. Hobles $1_{1}$ W. Lawreuce 2, R. Black 3. F. Kilborn (Oadby) 4, R. Baxter 5, E. M. Atkins 6. W. Perkins 7. F. Kilmorn 8. An acljoumment was made fo the Cfurch Hall, where tea was pritaker or. At the tablo the Rev. Cole-Hamilton made a short speech, loucling appreaiatively on tho happy erent that had been made possible log their united efforts.
After tea, fingers from Irthlinghorouglt grve an aflmirable demonsiration of bnndbe! finging. Further finging in the tower, contimued until eight oclock, brought a memorable occasion to a cloge

Ringers were present from Peterborough. Northampton, kettor ing: Leivesfer, Rotlwell, Surleeh, Bronghton, Tsham, Crausley, Ge dinton, Wheckley, Tichmarsh, Irthlingborough and Draughton. Mr. Cpril Johnstan, of Messis. Gilleit and Johnston. received the congratulakions of all those present on the excellent splice which the firm had rchieved in the recasting of the old treble beld and the addition of the two mew ones, and on the pure and musical tone the new bells.

## MULTI=METHOD PEALS.

## To the Editor.

Dear sir,-I was much iuterested in Four leading article on MultiWethod peals in this week's ' Ringing World,' and whilst I yield to mo one in my admination for the splendit achievement of the Norbury men, I feel, like Mr. Dawon, of Leftonstone, I wond like to see the figures of the calliug.
Most Minor ringens have been conversant for years with the splicing of various methods, and those mentioned in your remarks can loo done quite ensily, is the lead ends of one are the lead ends of the others.
I assume the hon. sectetary of the Chester Dionesan Guild has been or will be supplied with the figures before registering the meal. Why, then. should not the whale Exercise have the same prisilege? I have before me a copy of the Central Council's publication of legitimate Minor methods
Ou page 9. No. 6, ts given as Morning Star, the first lead end of Whel is 35264. This method with Trowel. Drke of Norfolk, College Exarcise and Norbury appear to have comprised the second 720. Trowei has not liem mamed in the publication, but those of the remainder have, 64523. as the first lead end. I am a litule curious to know how these methods were spliced to complete a true 720 I hope, therefore, ML. Feruley whl kindly oblige, anongst others.
Yours faithfully, Fours faithfully,

Hon. General Secretary, Warwickshine Guald.

## BALL BEARINGS FOR BELLS.

## To the Editor

Sir, Since the last meeting with the Sociely for tho Protection of Ancient Wuildings, and the remark fhat it is doubthul if any and vantage is gained by the uso of ball bearings for bells, I must admit I laqualtered my miad. At that time 1 was more against ball bearings than for 1 hem . My firgio senson is the gudgens will not wear becatise the sleeve on which rhe balls run is fitted over the gudgena, and thus takes the wear, so where ball bearings are fiterl gudgeons will rery selfom require penewing unless breakge or damage takes place, which is most unlikely.
Take the case of the plain bearing. When the brasses wear, the gudyeons will wear, too, also wean oval. This will in time necessi ate the gudgeans being renewed: ar, if they are large onough. trued up in the lathe. This would mean stocks and gadgeous being sent to the works, and the gudgeons trued up on the stock in a lathe. Phis would cost a great den] bore that new ball bearings, as the cost of transpert alone would be a considerable itom, plus the cost of new brasses, new gudgeous, at truing up the old ones
As regarels the rlisatrantages that Mr, Deal speaks of. I atree with him about unequal wear, and also that it is most important to fit bearings to iake thrust in the case of a rolling tower.
Considerable thme is saved in lubrication where ball beatiogs are fitted, aud oil aud grease will not drop down from them on the bell, which is so deadening to the tone. Ag timo gors on probably there will he cases where a ball may split and the race get damaged. but 1 do mow think this is mearly so likely to happen wibl hell ball bearfugs as with ball barings fitted to heavy motor velijeleg. The bel bearing will lawe to stand the game lonfleacla swaty of the bell the maximum being when the bell 1 ungs the batiom centre; in the case of the motar velicle the load varieg according to road shock.
To sum it up, if I may express my opinion, 1 consider ball beariugs for bells an improvenent and a mechanical advantage cheaper to fit and cheaper to renew ancl a step in the riglit direction

## 46 YEARS A RINGER.

DEATH OF MR. जOHX ARMETRONG, OE HEPTONSTALL
The Fieptonstall fingerg havo sustained a loss by the death of one of their members, Mir. Johu Armstrong, who passed away an Tues diny, Feb, Gthr, at the age of 63 yemb. During the war Mr. Armstrong lost two sons at the frout, and slortly arterwards a daugher died at home. Those were great hows. and he never recovered his usual good spirits aud cheerful disposilion.
Mr. Armstrong had always been acifrely associated with Heplonstall Church and Sutuday \$2hool, nud for over 46 years was a bell ringer. He liad ruag a number of peals, and with the Hentonstall team took part in mumeroms contests. For many years he was conduefor of the Heptonstall handioll ringers. In his roungen days ha Wras the most popular hunorist in UPper Calder Yalley, and his Eervices were iu great demand; he was also ever ready to give his talents in aid of a food cause. It is estimated fliff Mr. Armstrong won prizes at over $\% 0$ compelibions, including a silver cup and many gold medals.
The funeral taok place on Saturday, Feb. 10th, at tho Tarish Church. As the cortege left the houge his brother ringers rang the whole pull and sland.' with the bells deeply muffled. and then deseended from the tower and carried him to his restinp-place. After ilie inferment they rang touches of Bob Major. athd the bells were also muffied for each service on the following day

## THE BIRMINGHAM GATHERING.

With the gradual disappearance of the men who had the privilege of knowing Henry Johnson in the flesh, one might have looked for some falling of iu the interest taken in the commemoration dinner, which is held every year in Birmingham, but the evidence of last Saturday's gathering goes to show that the event is tully maintaining not only its interest but also the spirit which prompted its institution. As a social function, of course, there is nothing in ringing circles which excels it. Birmingham itself is so centrally situated tbat it is accessible to all parts of the country, and year after year from the four corners almost of the land, ringers make the pilgrimage to share in the pleasures of the gathering, and to renew old friendships or to make new acquaintances. The spirit of fraternity which ringers boast so proudly of is seen fully revealed on these occasions; there is nothing cold and formal ; the atmosphere of true brotherhood is uppermost.
This feature of the annual gathering, important and valuable as it is, does not, however, outweigh the other phase. Henty Johnson was the embodiment of all that was best in ringing : humility, unselfishness; an unwavering desire to seek the true advancement of the art ; a kindiy, genial soul, whose readiness to belp others was an ontstanding trait. Many great ringers there have been, but few can lay claim to all the characteristics and accomplishments which made the Birmingham veteran so much loved and respected, and placed him as well in the forefront of the Exercise. Every ringer who values the art for the art's sake, looks upon Henry Jobnson not only as one of its most striking figures-a genius among pioneers-but one who stood for the maintenance of the best traditions of ringing. The opportunity that is thus provided every year of keeping alive the memory of this man, of reminding the present generation of all that his name stands for, and of holding up that name and reputation as a shining example to those who come new into art, is one which is of incalculable advantage to ringing: and ringers know and acknowledge this by the homage which they pay in attending the commemoration dinner.

The occasion provides no moment of melancholy thought, Henry Johnson himself would not have had it so; hut it serves to direct attention to the brightest and best traditions of ringing, to stimulate ringers to unselfishness in the craft, and to seek always for improvement. Behind the feeling of pleasant comradeship which the commemoration inspires, one can sense the spirit which keeps green the memory of such a man, and we hope that year by year this feeling may grow as the numbers who claimed Henry johnson as friend diminish.

## DEATH OF A PONTEFRACT RINGER

By the dealh of Mr. T. Watkinson, in his 60th rearr, on Feb 10th, tho l'ontefratt ringers have lost another old comrade. Ee had been nt ringer at All Saints' Church for about thirty Jears, and took pari, in several Forkshire Association peals.
The interment took place on Feb. 15th at Pontefract Cemotery, a good munber of his fellow ringers and also ringers of the Parish Ohurch attendinge. A course of Grandsire Triples was rung upon the handbols at the graveside at the close of the committal service, and in the evenine, at All Saints' Chureh, with tho hells anuffed, a quar-ter-peal of Grantitre was rung by the following: A. Walker, junr., 1. W. Tawley 2, B. Bloody 3, W. Penrson, scny, 4. W. Wormen, јunt., 5. A. Walker, zesr. (conductor), 6. J. Fryer 7, IT. Walters 8 .

## BOOKING FEES.'

## To the Editar

Dear Sir,-With regard to Mr. Broadley's notice of motion to be brought forward at the next meeting of the Yorkshire Association t'e a booking fee of threepeuce per member per peal for ail peals rung under this association's title, I an pleased to see the propesition has como fromi a regular peal ringer; therefore it carries a little more weight thau it otherwise might do. Doubtless, Mr. Broadley bas the support of bis fellow peal ringers in his district, or he must be a very brava man indeed to bring such a dobatuble matiter up for decision.
Whilst personally agreeing with the motion in primciple, I mu afraid that tho fee suggested is rather too much to be succesaful. Had the fee mentioned been ono penny per member per peai, probably po one would object. I do not know whether Mr. Broadley has had any actual experience of his suggestion being put into operation, but $E$ have in my mind that this method of producirg revenue was instituted by one of our. local district societics some years ago, aud was not a success.
Turning to the last report issued by the Yorkshire Association, 1 find that during the jear there were 68 peals rung on 6 , 8 and 10 bolls, which at threepence per member per peal would bring in a revenue of 8615 s ., whilst there is shown a deficiency of $£ 32$ in the issue of reports; therefore, the mohon, if carried, would not metet the deficit by even one quarter of the total amount.
In examining the committeos report thorein, I notice tboy are urging more members to bay reports, and suggest that at least every tower should buy oue copy for the company, to help the financial status of the association, adding that the only remedy is a greater sale, or to suspend the issus. Whilst admitting from a finauciul point of view this state of things is deplorable, I am certianly ot opinion the remedy mentioned is not the only one to level matters up.
There are many polnis to consider before further taxing tho worter, becuse where would any association bo without its peal ringers? For an association to be successful you must have interest. To create interest you must have aus object in wiew, and it is undoniable that the object of tho great majority of clange ringers is to become efficieut peal ringers in as mathy methorls as possible. Again, there is tive continuous advent of hegimens with the ambition of scoring peals, and these must be helped and eacournged, for this is where you build up the strenglh of your associations.
Just take into cowsideration for one moment tisat the peal riuger is the practical worker, for they put into exceution the brain work of the composers, who exploit upon the genfus of tho method builder; therefore, to my mind, to tax ilie peal ringer to any oxtent is not the proper way to male profits meet losses, for without the practical execution the whole fruits of labour of the other workers mantioned would be lost, and the stattis of our noble art would eventually reach a very low ebb indeed.
Supprosing the scheme is put into operation, will the associntion gain anything at the year's chd? I an iaclined to think that what they gail on the swings they will more than lose on the ronmabouts.
When one considers the jucreased cost of liviug and travel, coupled with lower wages and bad trade (even if fortunate enolgh to be enployed), I am afraid that if the fee is made too large, it will only create $n$ strong camp of objectors, and less peal ringing.
Again referring to the report, I also notice that in spite of the loss on the reports, the past year's working has resulted in a net gain of 82 1ls. 26 . Now this is where the peal ringer will argee as to where the loss to the association comes in, secing it is nat a pro-fit-sharing business concern.
Whilst ngreeing, as I heve said, in principle, I do so only on the grouad that the castal and uon-peal ringers should not be compelleal to pay more for their reports, because the regilar peal ringers are sending up the cost: but looking at the matter broadly, and from a business point of view, there is more than the one remedy referred. to, to put the matter on a proper footing without making more diffculties for the conductors, and causing dissension among the workers. Other mathods should be tricd, and the proposed scheme brought into operation as a last resource only.
SJueffeld.

## HEREWORD GUILD'S SUCCESSFDL EXPERIMENT

The Clifford District of the Fereford Diocesan Guild held their annual meeting at Eardisley on Sunday, Feb. 18th, when somo 40 ringers assembled from the following towers: Almeley, Brodwardine, Burghill, Cliford, Eardisley, Kington, Letton, Poterchurch, Stauntou-on-Wye, and Staunton-on-Arrow, the bells ware raised shortly after 2.30 p.m., and lept going until 5 p.m., when tho Rector (the Rev. s. H. Oslome, kindly jorited the visitors to ten at the Rectory.

At the short business meeling whing followed, the Rector took the chain, and gava the ringers a right learty welcome, gtating that os he suggested the meeting should be held on the Sunday he was rery pleased to sce so many present, as he understood it easily eclipsed ally proyious meeting held in the district. Peterchurch was chosen for the mext meetig.- Four probationers from Eardisley were elected, and eight from Stannion-on-Wye.-The balance sheet, as adopted, showed an increased balance in haud.-Two Guild certificanes wero presented, and the secretary gave a short resume of the year's working, pointing out that fair progress in change ringing had bean made, and thad the balance in hand was made possible through the increase of hon. members from 8 to 14. The Guild was greatly indebted to these ladies and gentlomen, who thus showed their appreciation of the work the ringers were doing for the churcl. The secretary also said he was very pleased to be in a position to report that last year he had bcon successful in getting the ringers' subscriptions paid by the Parochial Church Council for each of the towers in tire district.
A very hearty vofe of thanks was given the Rector and Mrs. Oshorae for their kind hospitality - Tlie Rector suitably replied, stang he had leard from the Bishop what a good worl the ringers as a body were doing.
Tho tower was again visited, and 240 of Bob Minor rung for the evening service, at whicl the Guild's special form was used. The Rector gave a very able addiess from part of verso 17, Acts xuvii., And they used helps.' After service the tower was again visited, and the bells kept going until after 9 p.m. During the afternoon and ewening the following methods weve rung: Grandsire Triples on handbells, Bob Minor, Grandsire, Plain Bob and College Singie Douthles. This is tile filst menting ever lield by the Guild on a Sunday: and proved to bo the bost attended and most useful meeting yet held ith the rlistrict.

## THE PEAL AT HEADCORN.

## To the Editor.

Dear Sir-With reference to the peal of Major at Headcorn, your correspolsdeat appears to be very auxious to set at rest the qualms of conscience which le ovideaty thinks the members of the Ashord district are grievously suffering from over this peal. In the hist place, he is watitug for a reply from the conductor of the peal, and from what I gatler lie can still wait. The conductor 130 doubt thinks the same as 1 do, that theve was no reason at all to rush jato print over the natfer, but a privato letter to the conductor himself would have no doubt resulted in a frrourable reply. I takn it that this concerus the band who rang in the peat, and no one else, and I know that seven out of tho elght who rang in the peal ore satinfied with it as a peal, and will record it in their awn list, let others do whet thoy will.

If your correspondent wishes for any further butormation on this matter let him put his mame, so that we may know whether it is someno really concermed in the mather anxious for right, and not spite or a busybody iu other men's matters.

A PEAL BOARD DEDICATED.
A meeting of the above was held at Appledore on Saturday, Feb. 17th. The weather was very favourable, and resulted in a good attondance. Baker (the donor) to conamemonate a peal of Grandsire Triples rung in that tower on Octolyer 21st last. It, mas tho klonor's first peal; Miss R. # HENRY JOHNSON COMMEMORATION DINNER 

GREAT GATHERING OF RINGERS AT BIRMINGHAM.

Witl undinivished entilusiasm, the Henry Johnson Commemoration Dimer was held at Birmingham on Saturday. Always a popular event, alize for the opportunity it provides for a raunion of old friends, and for the amosphere of goad fellowship which is over present, the gathering was larger than in many lormer gears, no ferer than 150 sitting down at the Imperial Hotel. Ringers from the towers within a considerable radius took part in the proceedings, and wisitors. came from fay und near, from as far away as weeds and Sheffield in the North; Newport aud Bristol and Gloucester in the West, Essex, North Wales, and, of course, London. The famous church fa the Bull Ring was the centre of gravity in tho atteruoon, Lut there was also ringing at the Cathedral, and one band was suceessful in ringing a peal at Deritend. The company which gathered round the festive board its the evening was a very liappy one, and the Rector of Birmingham (Ganon E. Grose Hodge, M.A.) presided ins au exceedingly genial manner. He was supporled by Alderman J, S. Pritcliett, M.A., B.C.L., presiding Ringing ifiaster of St. Mar riu's Guild; Messes. J. J. Kendall and F'ved W. Blake, charchmadens of St. Martin's; J. Belis, churchwarden of Edgbaston; W. R. Heaton, Mr. A. Paddan Smith (lnon. secretary of St. Martin's Guild) and DIrs. Paddon Smith, Miv, and Hrs. J. S. Goldsmith (Woking: 31r. Cyril Johuston (Croydon), Mr. Pryee Taylor (Thoughbaroush), and BIr. A. A. Htrghes (London). Among the visiterg were $\mathbf{M L r}^{\prime}$. P. J. Johnson (Jueds), hon, secretary Forkshire Association: M1: J. W. Jones (Newport), Ion, secretary Llandaff and Mommouth Association; Mr. Moore (churcliwarden, King's Norton), Mr. W. E. Cave and Mra, Wilkins (Bristol), Messrs. J. Austin (Gloucester), W. Saunders and party (Coalbrookdale), Ti. J. Salter (Kidderminster), W. J. Nevard (Essex Association), W. J. Hazell (Royal Cumberland Youths), J. Carter, I. G. Shade, G. W. Fletcher, R. Marshall (London), S. W, Palmer (Sleffield), Miss E. K. Parker (hon. sec. Ladies' Guild), Mrs. J. E. Groves (hon. sec. Midland District of the Ladies' Guild), Mr. J. Johmson (son of Henry Tohnson) and Mrs. Johnson, Messus. W. Favley (Wells), Millward (Nopthampton), A. J. Hughes (Bangor), and many others, The officers of the St. Martin's Guild inciuded Messes. W. H. Godden, J. Carter. J H. Sheplerd, W. Kent and T. Russam (vieo-presideuts). Albert Wal ker (Deputy Ringing Master), ©. Dickens (Erusteo), J. L. Wells and T. II. Reeves (trusteos), etc. There were numerous ladies, many of then ringers, in the company, aud the proceedings were wery en joyable.
After an excellent dimer, the toast of a The King, was honoured and the Hon. Secretary announced that messages of apology had been received from Bishop Hamilton Baynes (Rector of St. Flilip'si, the Rector of Soliliull. Afr. A. Phrsons, of Old Hill (who was confined to bed, Mr. Rodway (late churohwarden of St Plilip's, and
Mr. G. N. Fediss, an old friend of tine Guild. The following tele. gram was also received. : Wis wamest remembrances and Ineardy goed wishes. Wisis I could be with you. The Dean of Norwicis.
Hr. J. J. Kcndall submited the loast of "Glurch and State. That, being a gathering of ringers, he said, they would all acknow ladge the comection between Ohurch and State, As long as they hat the State supporting tho Clurcl and the Church leading thin State. they in England would newer go wrong. Fie hoped tle tims would never come when the Chum would be divorced from tho State, for the State would certainly be the poorer if it were not for the support which it received from the Church (applause).
The Rector of Birmiugbam said they all kuew the State had grows up round the Chureh. They did not mean the Church in any nar row sense, but the Clurch which was the whole people of God. Thr relation between the two was no new thing; it was not new at the Reformation. The Church had never been sovered from it, and, as Mr. Gladstone eloquently said, if ever the state were torn from the Church it would leave the State a lacerated and bleeding mass. So, as they had accepted the toast, and as everyone there was loyal to the State and loyal to the Church, and felt it was best that things secular should be permeated with things sacred, ho thonght no other solnowledgment of the toast was necessary.

## HENR 5 JOHNSON-THE MAN

The menory of the late Henry Jolnson " was proposed by Mr. Thamas Russam, one of the nimeteen persons prosent who knew the old gentlernan in the flesh. Mr. Tussan's speedh was a mose infer rsting one, showing from persomal recollection the wonderful eharacter of Elury Jolunson. What Lord Chief Justice Coleridge was to tha law, what Dr. Parry was to music, what Sir Oliver Lodge Was to science; what Dr. Grace was to cricket, ILenry, Tomson, said the spaker, was to the great art of camprinology (applause)
 son, and flomu thas thme until now it was inpuressed upon latil what it wondertul old man ne was, nob as a ringer actamalating peals,
 up a great record of ruging and cotaduct at BL. Murtins Church. hat princplo he was giad to say had been sollow cid to the present day by successive gencratous of ringens commected witl St. Martin's (applausa). Heury Johnson was a man who, by his uniailing colurtesy, gentleness, wisdom and uprightness, won tor himself the personal affection of everyone with whom he came in contacti No ono ever went to Henry Johnson with a request, homever small, concerning bell ringing ind came away empty banded; bat, with all his genteness of hearc, woebetide tive careless ringer (taughter). Tho old matu would not say nuch, but what he did say was seldom forgolten. They at Aston who kuew him when lue came to reside there used to sit at his feet and gather wisdom from his words, and the merry tinos they had with him hat leit nothing but pleasant me meries. He was just, fain and upright, but he had his veln of humour. Mr. Russani weut on to illustrate these brails in Hemry Johnson's character by wo personal anectotes. After the firat climner which they had in homour of the old man, at which Sir Artbur Heywood presided, lie (the speaker) was on his way home when he silw the old man in the centre of the Lown. Fe spoke to Jolinson, and they started away for home fogether. Standing in the road was A cah, and fley stood ant seriously diseussed whether they could
afford to hire it to drive them home. After bargaining with the driver, they got in and were driven to Aston, which they reached at the rate of about a mile an hour (hathon), and on arriving they discussed who should pay for the cab. Erentually they paid sispence each (langhter). He mentioned this to slow how Johuson was always ready to share and share alike. Willinm Chatfell, who was a ringer at St. Philip's, was \& great friend of Hemry Joluson. One day he went to the old man and said, "Henry, J" wain a peal of" Stedman Caters, of sucl a number and with such and such qualities.' 'Verg well, you shall have it, replied Mr. Tohnson. and, o courso, Chattell got what lie asked for. Johtson found out where ther weregoing lo ring the peal, and when. It was to be at Aston, and when the time arrived Chattell and hia frieurls started off for the tower. Which in those days could only be reached by walkimg. When they got nerr the tower, they lieard the bells going. They got down to the chureh, and found Hemy hard sfolen a march upon William. He had collected a hand. gone to tho charch, locked himself in, and rang the perl (langlater)
Thin torat, was drumk in silence, and afterwards thee leads of Trehle Bob Fonteen were ring bv T. Russam. A. Walker. P. Laflia. ${ }^{7}$ F. Swann. J. E. Smallwood.J. F2 Groves and A. E. Nomman. The tonch wis followert witl intense interesr, and its completion wha the sigmal for prolonged applanse

Aderman Pritchott again proposed the toast of Continued prosperity to the St. Martin's Guidd, and following his Msual custom gave a review of the year's doings. Referring finst to the losses which Irad been sustaired, heo spoko of Sir Edward MLalius, who for many years had joined them at those gatherings. They honouved him for the ligh position he held in his profossion, and, knowing hirr so intimately, they loved him as it man. Then they lud lost the late Lord Clief Justice of Inelamd, Mr. Cherry, who some 15 years ago presided at that dimer. He was a man of singularly amiable and simple character, and those riugers who had sung with him, felt ho whe ono of themselves. When ho oocupied the distinguislued position of Attoracy-General for Ireland, he (Mr. Pritelele) visited hin, and went with lim into the tower of St. Patrick's Cathedral. where he took off his coat, turned up lis sleeves and rang with lim: and that was his constant castom as long as his heallh permitted. They deeply lamented his death. The lato Mr. James Motts was for many years one of the country members of that Guild. Hiq ringing reputation was known to all of then, for doubtless they lad read the memoir which had appeared in 'The Ringing Workd. He might, however be specially mentioned that evening in connection with the record peal of London Surprise at King's Norton. He was the frst of the band to go, but they trusted the other seven would be epared for many vears to come, Proceeding, Alderman Pritoheth said they missed several old friends that night, who were absent from varions causes. Foremost. among them was Mr. Rock Snall, who so recently celebrated his g3rd birlhday. Anolher old gentleman who was with Lhem two rears ago for the last time ras Mr. Ted Iforrex, of London. who would celehrate Esis $85 t_{1}$ birthdyy on the $28 \mathrm{th}_{1}$ of the montlu. tion, and tell him how much they would havo liked to see him present that might (applause). The senior member of thet Guild was also absent, Mr. John Butfery. He was the only survivor of a party of enthusiastic young ringers who visited him (the speaker) at Oxford 50 years ago. He belfeved he had told them before how mueh they onjoyed that luge pigeon pie with the elaws stickiag out of the top, and how John 3 niffery mistook some extra strong ale for soda water (laghter), and how the tonch of Stedman at Magdalen College aftorwards omme hopelessly to grief thaghter'). Alderman Priteliett went on to exiend a hearty welcomo to all the friends who wore with them that viglit, and they specially welcomed, he said, the presence of so many ladies. They were glad to see most of the veterans, including Mr. Tom Russam, who was one of the senior members of the Guild and only about ten vears rounger than himself (laughter), Mr. Kent, Mr. Godden, Mr. Miller, the three brothers Dickens, and Mr. Toseph Joluson, son of the old wathy whose memory they were net to honour that aiglst. They hoper he would be uith them on many more occasions (applatuse).

## A NOTABLE PERFORMANCE.

They had, snid Aderman Pritchete, to congratuJate themselves that the Guild was continuing to prosper. Fe bad received a report from Mr. Walker, which stated that 21 tower hell peals and 15 hand. bell peals had been rumy during the gear, which was about the ayer age, There were some notable performances, tut the most iemarkable porformanee, not only of that Guitct, but of any other Gaila or change ringing society in the worli, was the peal of Stedman Sextuples ruog on mid-summer's day. The band who rang that peal was the same thot hat given them an exhibition of ringing on 14 bolls that night, and thoy also hat with them Mr. John Cartor, who had come lyam Park Lane to bo with them (laughter), who was the composer of the peal, and dr. Kent who was the umpire. He had not included in those 36 peals which he had mentioned zinother pead rung on Februaly 13 th for the birthalay of Mr. Russan and Mrs. Walker, which was cheff remarkable from the fact that it was condreted by Mr. Albert Norman, who thas called his first peal of Stedman Cingues on tower bells hefore the age of 21 years (applanse). They lieartily congratulated lim. Mi. Edgar slieppard, an other ringer of great promise, was mentioned in Mt. Walker's report. FIo was severely wounded in the war, and proudly wore the Military Modal (applause). A band ret the other day at Solinull for a peal of Stehnam Caters, bulu owing to illness they were unable to ring, and a peal on liandhelis was arranged at ones. Mr. Sheppard rong his first peal on handbells in this method without any preliminary practice. Ho was a great credit to the Guiln, acd in years to come would no doulst be one of their Leariers (applause). He could not conclude without expressiug their and his acknowiedgments to one or two men to whon they wore especially indebted; to Mr. Abort Walker, their energetic, conscientious and painstaking Pinging Master, for all bo had done in arranging peals and helping to manage the affairs of the Guild genorally (hear, hoar). They were specially indelbted to him for the social evenings of the Guild which liad been such a feature during the pasb year. For many jears now, continued the speaker, he had been ongaged in what was considered the hopeless task of improving the lily by panting it aud gilding refined golk, and he did not propose to coutinue that attempt to anlance the repatation of Mr . Padclon Smith with ringers and the esteem in which they all held him by auy more praise. all he would say was that he lad never known a bether organised series dingers than those in cannection with that Guild applause). The organisation had been absoluto perfection (applause). They would show their appreciation of what he had done by most heartily drinking his health (applause).
The toast was drumk with musical honours, and Mr, Smitla was received with loud applause on rising to respond. He did not know, he said, exactly how Jacob folt when ho was deceiving his father and accepting tha blessing that was intended for Esau; but he certainly felt in somewhat of an iavidious position, because owing io lusiness laving called him out of the country he bad had to leave a lot of the oremanmation and work connected with that gathering to Hr. Walker, but he could assure then it was a sitficient payment to them both to look round aud see eperrone so obviously happy and onjoying themselves. Mr. Smith then announced that in that room, only a few hours hefore, a further lononr in Freemasony had been conferred upor their Presiding Finging Master CAlderman Pritehett), who was installed as the Riglt Worshipfin] Provincial Grand Master of Warwickshire fat the Royal Order of Scotlend, a Masonic Order forzded to commemorate the memory of Robert Bruce. The ceremony was performed by the Rt. Honourable the Earl of Kintore, the Sovereign of the Order. Alderman Pritehett, continued the speaker, had been lifted from one step to another in the craft, wotil there conld be hardly any higher steps to mount, and they congratulated him unon the labest honour whieh had been accorded to him. It was a uuique thing that they ns zitugere should bere met
in the same room within a. few hours, and as they had got Aldorman Friticlelt with then he was roing to propose a harity vote of congratulation to him in an informal manner, which bo asked them to carry by saying 'Aye' in no uncertain manner.
The motion was carried with a roar that almost Ehook the roof and testified in a remartable way to the personal esteem in which the presiding Ringing aster is held by the Guild.

## "MUTTLATED BELLS."

## OONSISTORY COURT INQUIRY.

The Chancallor of the Diocese of Rochester beid a formal inguiny in the Darish Clutch of Chalk, mear Gravesend, on Saturday, Feb. 10th, into the mamer in which il faculby for rchanging the three ancjent bells had been carriced out. It was alleged, says the 'Church Times," that tho bells had boen injuret and mutilated through the Vicar neglecting to comply with the terms of the factilty, which made it a condition that the work should be done mader the instructions of an architect.
Evidence was given to show tildt of the three bells, one was cash by a founder who was probalily Thomas tio Weston, about 1348, and that the other liwo were by John Winer of Borden, in 1634, that they wero of great archaological valuo and intorest, lut that the canous had been out off when they were rohung. It was shown that every effort had beeu made first by the Registray and then by the arehitect to impress an the Vicar" the importance of not allowing the remoral of the canons; but while the work was in progress tha founder, M1*. Alfred Bowell, cif Ipswich, claimed that it was necessary to remove the canons on accolund of the nature of the new lieadstocks he liad prepared. The Ticar neglected to call its the architect to inquire into the matier. with the result that the canous were removed. The founder chained that the removal of the canons was a common practice, that, it made the bells oasier lo ring, that it was sometimes mecossary if the camons were liroken, and that he had dowe it in mumeraus olifer chupches in Fent. Ife admitted that it was not necessary to remove the canous to quarter-tarn ar bell, and that if he latd leen instructed fut first not to do so, he rould have prepared headitacks accordingly

The learined Clancellor found that the provisions af the froulty had not been carried out, and that the Viear had not land the work thoge inder the advice of the architect, hut had allowed the bells to be mutilated in direct apposition to his advice. He impressed on the clergy and Paroclial Chritch Councils not only the necessity of loyally carrying out the provisious of faculties, but also the importance of making fall tase of the system of Advisory Commithes recently set lip. Fille committoes included men of expert knowledge, who gnve their adwice to parishes free of charge. and tho clerent and all concerned shonld avail themselves of these achrantages. He said that those who refused to be guided by the committers, fund who ignored the conditions laid down in facullics, played into the hands of those who wishind ohr churches to he taken orel by the State. If tlie ecclesiastical courls were ignored it woult be saicl lant the Churelı was powerless to safeguard her own haildinges and the treasureg they contained. If the Diocesan Alvisory Committee sainl the advice of a particalar persan shonld be sought, it shonit be sought: and if that advice were included in a farulty, it would hatye to be followed. What the Vical had done in this ense amounter to contempt of Court, and might leat to the consideration of conerive
measures. He frusted the ciergy and Pavochial Chureh Contails would loyally support tha system as at presert administered.

Tlie Sectetary proposed a hearty vote of tlanks to the Denn for his presence. also for what be had done in the past rear to improve the conditions of the Cathedral belfry. ## THE TUNING OF CHURCH BELLS. <br> To the Editor.

Dear Sir,-Tzeferring to the recent letters whicli have appeared in rour columbs, 1 venture to suggest that the points at issue have mot been set forth with sufficient clarity. It is quite true that the preference for one systenn on the olber is a matere of personal taste. Boill sjefoms lave points in their favour, lout the mistake has been in the madter of comparisous. It is useless to compare a poor ring of bells on the old lines wilh a moderu ying wined on the nore recent system. Most of the old peals were tuned, either by hand chipping, or by now obsolete mathines, which only permitted the lunivg of practically one note in a bell, namely, the main tone. There are many old rings of bells in the country, where adjustment of the harmonits to tha lines the belis were originally cast for, would convert them inlo perfectly musical rings. There are also mayy old rings, which have been tast so near to correctness in ture one with wother, that the sliglte adjustment neeessary to the main cones has not affected the harmonits, and the restlt has been a very fine peal of bells. On the olher hand, mamy old bells have boen cast where the main note lias bean considerably out of tame with what has been regnired, and the tuning laving been restricted to this main tone only, has thrown the harmonics out of their original propordion. Fontumaly, modern machinery can overcone this difinulty, and this is a point which has been overlooked.
I hold no brief for either one system or the other, for as I lave stinted above, preference is purely a mater of personal taste, bith in all fainess, the matter needs properiy explaining.

Practice and theory do not always agree, and for all the seemingly theoretical correctness of the Simpson princtple, there are many rings of bells in the country on the old lines which have not yet been
rpassed.
One thing is ceptan, hamonics in any instrument should always be subriupif as much os possible. ath not accentuated. and the aim of the bell founder slonitd he to prodnee helds in which the tones are so hendad as to produee theasing musical result, in which hamonics or overtones cause 10 anmojance or displeasing effect. This we know, from experience, has been nehieved by old founders. It appearg to me that Simpson-tuned bells sound to the best advantage singly. or in setg of loells eyected for tuns playing only. where the time is math slower, but not to rines of lobls loung for change ringing, where the notes follow in such quick succession, that the too clominant liarmonics rum into eadl other and apparentl? ereate the medley of sound which is so perplexing to magy.

Another point to he remembered, in quoting musical persons as nuthoritits, is that being a juder of tone, and heing of musical ability. are two verv different things Mang a good organist or mianist is mo judge of quality of fone. Further, church behls camot lue judged in the same light as the general musical instrument. They are two matirely different propositions.
In conelusion, $T$ lifnk it cannot be too strongly poinfed out, that complete rings of bells should not bre yeast simply to obtain a more ecent system of tming.-Yours faithfulls.
A. PADDON SMITT.

## THE ULTTMATE JUDGES.

Sir, -I should like to thank Mr. Barmett for his very courteous reply to my letier of Feb. Sth, and fear I an not sufficiently advanced in metallurgy to bo able to diseuss the longevity of metal which has had its 'stim' broken. He is greatly in orror, however, when he speaks of "talking over anl unmusion inoumbent," ete, for it is the very musical who most appreciate the properly tunced bell. It is, perhaps, well that A Ftat Seventh , veils bimself under a Nom-do-plume. His letter is rather rude, and very ridiculous. The whole question resolves itself into one of likes and disilikes,' he says. Weil, 'de gustibus non disputandum,' but surely the ultimate judges of the very leat bells will not be ringers as a body, mor even 'A Flat Seventit' (nor nuy lumble self), but those who have to listen to them; and of these, musicians (pace Mr. Lrewis who certainly buili organs on the five-toned principle, and couldn't have done otherwise liad he triedl) are nearly all in agreement with the assertion that when the barmonies of a bell are all in perfece tume the resultant sound is infuitely preferable to one in which any or all are out of time.
His quotation from the 'Sunday Thmes ' is singuarly unfortunate. Simpson-tuned peals consist of a suecession of octaves and fiftis in liarmonies, which, as every poung student of musie knows, is against He first laws of harmony." I am glad of that plarase "every young student; because ouly a very, very young student could have madr such fin olementary mistake as to confuse the consecution of actaver and fifths in natural harmonics (whieln ave present in ang and every given mote, eithey of voice or iustrument') with the consecution of
octaves ant fiftia of principal hotes when sonnded together in wo on more parts.

Just imagine thang an orran, pinnofore, or any other musieal instirment upon the Simpson principle. Ilas ' A Fhat Seventh ever heard one that was not? It would be the eighth wonder of the world!-Yours; ete.

CECIL H. CLARKE,

## PEAL RINGING.

Peals, we think it is righly held, are the best indication of the advance of change ringing. Once get a man interested in the art and, if he has any ambition at all, he will not be content until he has rung a peal. Afterwards, much depends upon the kind of band he is ringing with and the manner in which his euthusiasm is developed. If the band is progressive, or even earnest, and the ringer's zest is maintained, they and he will go on to further peals and more advanced methods. And as the peals increase and new methods are practised, so the actual ringing, ought, and we believe in the majority of cases, does improve; indeed, if we may use a paradox, it takes a good band to ring a bad peal in a difficult method, because bad ringing will more often than not bring disaster. On the other hand, a good band, in the true sense of the word, would not tolerate bad ringing in a peal, and would stop.

Peals, then, are as a barometer to our art, and Canon Papillon points out in a letter which appears in another column, how the records in our last issue indicate gratifying progress. As a matter of fact, an analysis of the reports, in almost any week, show that quite a number of new peal ringers are coming into the arena. Probably the next best thing to a 'first peal' is the first in a fresh method, and in this direction again there is constant evidence of advance. One must not overlook the fact that, particularly in country districts, bands have sometimes the greatest difficulty in making progress. They may have the best will in the worid to go forward, but circumstances, over which they have no coutrol, place constant obstacles in the way. On the other hand, there are not a few bands in the country who show by their constant ringing of the simpler methods that sometbing is lacking in their enterprise. Yet there is plenty of scope. Recently a peal in thirty methods spliced into seven extents has shown what opportunities there are for six-bell ringers; no eight-bell band should be content until they have reached the 'Surprise' standard, and even on ten bells there have been recent demonstrations proving that there is no reason to remain in the rut, as witness the peals of Clifton and Middlesex Surprise Royal. Never did ringers have finer opportunties to advance than are presented to-day. Rings of bells are growing rapidly in number composers have given us a vast variety of methods and compositions to ring, and from the time a man sets his foot on the bottom rung of the campanological ladder there ought to be no pause till he reaches the top. But there are still large numbers apparently content to go-on just as they have done for years. It is another instance of that apathy which seems characteristic of many ringers, and lout of whicb even dynamite would hardly move them.

Tracing tha history and use of bells from the seventh century, he referred in strong teims to the evil of 'clocking,' and abtributed the improvements in our belfies to the introduction of scientific finging. He spoke of the curfew, the market bell, the gleaning bell which save the signal to the poor that they might go and gather the com, the fire bell, the parish bell, and the distincty religious use of hells to call men to worslip in their Farish Clmuch. He bore testjmony to the need of mental alertness in ringers, aud said how valuable fantal traiuing change ringiug supplied. He concluder witl all appoal that the religious character of a ringer's work should no be overlooked. so that God's Kitgelom might be exlarged by their lives and by their service.

## GUARDIAN OF BOSTON'S BELLS.

## TH電 LATF DR. A. H. NIGHOLS

Hoston, said the Roston Sunday Ferald' in a recent issue, las losl the guardian of her bells.
The man who knew and loved every bell of any size and value in the cily and who is responsible for nearly every set of chimes placed in belfries of the Hub and adjoining towns-Dr. Arthur H. Nichols. of 55, Mt, Yernon Street-died recentiy while visiting one of bis tenants in Roxbury.

He was 82 years of age, and one of the most public spiriten and esteemed physicians of his times

Modicime and surgery were his vocation, and bells his avoeation. Modesty on his part has prevented his remarkable story from being told, and only now-when his ears are deaf to the music of tha steeples-ase the facts available telling of his identity with the great bronze voices of chureh and sclool.
Seventy years ago as a boy he made friends wilh the bells of the old Nortll Clurch. and was proud and lappy to be assistant to the bell ringer. Many a time ho clambered up the disty stairways to the belfry loft, made famous by the lanterns of Paul Revere, and with the pigeons watched and listened.
He was more interested to know that Paul Revere was founder and ringer of bells than that ho mado his midnight ride to Lexington. As tha seasons rolled by. With many a new year rung in from Christ Glurch and from other Boston belfries, this roung enthusiast concoiven an ambition for his cily: that it might be noted for its beautiful bells and for its traned bell ringens.
He read eagerly all literature on bell ringing and on the qualities of bells. He studied right methods of bell hanging, and lie listened for exceptional tones and overtones. The bells becamo his friends, his companions, and Ife felt Ife could understand sombething, af least, of the messages they sent out over tho city.

His interest in this aerial music was more than that of a musician or of an expert mechanic; his soul was filled with aspirations and emotions lifted higls and carried out over tho city with the mammoth notes of harmonious belis.

He dreamed of a bell-laden Boston singing to the heavens from the up-reaching steeples. He was sure that a city of bells and of experienced bell ringers would help to lift its people to higher planes of thinking and of acting

Sach new bell installed was an eventrul oceasion for this youlh, and he studied inscriptions and learned the history of ench newcomer.

Much of his interest in Bostor's bells was instiuctive: his ancestors lad becu hell ringers, and their ancestors before them. It was in the blook, and his very nerves were knit together in tune with steeple melody.

To the very last he kept closely in touch will each belfry and tower, the homes of his belored bells. He knew them all, and on a Sunday morning would call attention of friends to this and that note as it colled its way across houselops amrl gardens.

The voices of Boston's bells were as familiar to hin as were words spoken by close relatives. Clurist Church, Advent. Second Parish, Dorchester, Old South, the steel bells of the Gemman Catholic Claurels in the South End-he understood and recognised them all.

Individual hells, howerer, had not the same attraction for this artist as lind sets of bells such as those iu the church of the Advent, Christ Church. Perkins Institute, Groton, and in a few other New Fagland towers. It had long been the ambitian of this veteran to have a "peal 'rumg in Boston such as 30,000 bell ringers in Fingland achieve frecruently, in 3,000 or 4,000 belfries.
This bell guardian of Boston watched opportunties for new peals, and when the Government began constuction of the Custom House tower he nud his friends brought pressure unon those responsiblo for the tower to place in the top a reproduction of the famous Bow bells, the largest and finest in the world.

The order was in its final stages, and the old man gloried in what ho believed would be a great artistic and musical addition to the city. He described to his frienns the inspiring offect of those prospective chines sending out their messages of melody and Inamony to the bus? citizens of Boston. Slips coming into the harbour would be met with a song: immigrants would be welconed to the new world: and fisherment, after weeks of storm and siress, would sail up the larbour to the tume of sweet bells

It was too good to he trike, and sinisien political forces-prominent among whom was a bell foundry turst-beame busy, and finally compelled the Govermment to reject the Bow hells from Lamfon. And to-day the tower stands in dunh protest rgainsf forces which deprive mankind of joy and art and inspiration.

Althougl this Boston lover of bells was one of the busiest professional men, ho found time to ken frack of all his bronze family, anrl held in his memory a store of infarnation nmazing to those who hare had no such avoration as bell riupine

In spite of preat enthusiasm on the part of a fow bell ringers and hell lovers in New England and in Amprica, with one exception there Ias been no peal rung in the United Stales. Once in Christ Church Philadelphia, there was a successfil peal, but that stands alone,

## SIMPSON TUNING.

## THE BAGPTPE DROND

Dear Sir, - I camot congratulate the Rev. Cecil H. Clarke upon his feeble attempt, in your issue of the and inst, to stultify my contention that the accentuation of the harmonies in church belle spoils their melody when ruag in peal, aud is productive of that dismal howl' which is so justly complained of by lovers of a clesc. toned peal of bells. The platitudes about consecutive octaves and firths are beside the point, and are only red licrrings dzawn across the trackanother instance of toderestimating file intelligence of ringers. My sincere thanks are, however, due to him for the opportunity he has afforded for the opinions of the other side to be ventilated.
The contribution of Mr. Faddon Smith upon the stibject is a most intelligible and lucid exposition of what las been latent in the minds of mathy experjenced rimgers for some time past.
We may all rest assured that with their morlera equipment for tuning bells upon mathematical calculations, there will still be founders, as in former days, producing well tuncd bells, whose timbie, or tone wolom, are not unduly interfered with by blatant harmonics.
In concluding my part in the controversy of 'Theory versus experience, I most, licartily ilande you, sir, for your courtesy in throwing open the colunns of "Tho Ringing World, for the purpose of alucirlating the cause of the bagpipe drone-yes! bagpipe, that is the plarase-what we have had lately inflicted upon us,
I am now convinced that it is produced by a medley of sounds occasionet by accentuated barmonics, when such bells are rung in peal.

The subject of lanmonies is far too complicated a playsical study o be enterod into here, and the serious student is referred to Helmlnoltz's 'Sonsations of Toues' cte., or Itills' , Caterlism of Hammory, Thorough Bass and Modnation,' which contaios all that is to be learmed of common chords, conseculives, triads ant my nom-de-plume. - Yours wuly,

## SOME EFFECIS OT SIMPSON TUNING.

Sir,-The preference of many persons for a bell funed on the old system is, I think, due to the faet that the hamonies of such a bell nise a major third and a perfect fifth, the lum-note being judged to $b_{a}$ of secondary importance (if not obtainable is unison), provided it is not too sharp. Such bells are bright in tone and distinctly heard, inside the ringing chamber and oulside, when rung in peal. It is assumal by many persons nowadays that il a bell is Simpson tumed it is hound to ho in luae, but I do not find this to be the caso with many "Siupson' hells, having under certain couditions of the wind and atmosplaere licard such lsells emit, a group of notes ahieh to a munimal car are offonsive. It appears that in order to get, say, the fundanenlal, nominal and lam-note of a $C$ boil in unison, the oller harmonies aro sacrificol, and become "lazy, the E becomiag almost, Th fat, whitht the $F$ also emerges. and clashes with $G$. At times one wonld sumpose the bell was in $F$. This is considered by many nusigism to he quile wro:g. it is, I think, the cauge of the dismal howl "complaned of by some of vour monders and if tried on a piano or ollher inshament lie offect woull be a freat deal nyal anylting for often to bell in n neal has a true labmonic third fite ull. rexcopt the lop-note of the sixth. which it is ofton diffrult to herr in tho ringing elamber. on account of ite bofng swallowed up,' "erthtir atmospheric enmditans increase this slight discoud by fattmane ithe bells slill fullher: hit the same canditions fend to immove the fone of a bell with a flat soventh. We have heard nothing from the foumders upon this question; they may have good reasons for what thes da. and some remarks hy them would donbtess bon very intpresting. Thepe is no roubt that the Simpson principle of luning rloes nat find liavour witle a lage number of ringers mat others, - Yours, etc. A LOVETR OF MUSIC.

## THE REMOVAL OF CANNONS

Sitr-Tlas chief objection to Simpton tuning seens to me to be tho destruction of so many good nomend bells, and good modern ones. loo, for the sake of this crave. I have two enses in mo mind at the
 the we me mans ofliers wheth I cannot enumerate. Probalidy bells hitited oa tho Simpson principlo are all very well for carillons for tume playing, but not for ringing purposes. Anyluow, the festruction of good bels, whether old ar new. is quite umwarrantable; let nlone the money speni: thereon which might be devoted to more useful Wificels.
Wifli raigard to rubting off camous. I. am somy to say that this Enbins positivaly meressary in the case of large ancient long-waisted ably aheve them if eanmons (the argent often projecting considerWitlicve themi if ther are to the made pealable.
With regard to the case of Chalk, mentioned in the "Gnardian," and in your issue of the 2ud inst., there seems no reason whatever for Whe jemoval of the cannomb, as they are only a light peal of three with a tenor mater 10 cwt -Yours, fle, J. R. JERRAM,

## NOT HALT DONE.

Sir,-Being an admirer of 'true' Simpson tuning, $x$ was very interested' ins the question raised by Mr. H. Barmett, 'Is the Simpsan tuming overdone?' The auswer is given clearly and concisely by the Rev. Cecil H. Olarke, and I and of the same opinion as the reverend gentleman, but would have auswered another way. No! it's not Lalf tone (sometimes), and it is my candid opinion that tit las come to stay. Now, when Mr. Barnett says, That not one ringer in a thousand canes a snap of the fingers for any of the motes abote the clapper strikes,' I say, 'Oh, Well, I bhink that's an borizontal, fnilanious lyperbole!' And that's that! Bub wait, he then goes on and says, "The true judge of the musical qualities of a bell is the experienced ringer with an ear.' Now where are we? Another probpem raised pertaining to acousijes, which is in my opiniou equally as diversified as tho views of ringers on the subject of "S.T.'-however, it would $b_{0}$ of interest to hear the views of ringers mith ' Lwo ears' (probably they be more evenly balanced and unbiassed), especially on peals which are 'tuned,' I believe, on the S. P., such ris Bradford Cathedral, Westbury, St. George's, Hyde, Ditcheat, Exeter Cathedral, and that insignificant peal of ten at Beverley Minster. which has in "Great John' a bass acconpaniment. Are these peals melodions? ar are they odiously ornithological? Then Mr. Barnett speaks of "broken skin' (and in a former letter of sacrilege). Now I have been in a few towers seeking knowledge in one of the mamifications of English archmology, and I fund as a riuger and archeologist, that move sacrilege and vandalism were perpedrated by parsons and churchwatdens in towns as well as villages, at the begiming of the 19th century, when it was tho eraze to obtain bells cast by a per foumer. who was at fliat period eujoying az monopoly, Illis was responsible for the loss of more old bells than the " 8 . [ ${ }^{1}$." craze is todey! Concerning' broken skin,' the skinning as done upon 'S. T.' bells is, in my opinion, an advantage; for it slows ap porosity ' (if there), aud his skinning is by far superior to the bacting as much as three-quartera of an inch off the whole circumfereuce of the lip! and at tixass the whole harrowing of the entire intemal waist, in perpendicular lines reaching from soundiow to shoulder, in a succession of ridges such as one finds on a leg of roast pork, or a lady's accordion-pleated skitt Tle question has now resolved itself into this: If ancient bells, which lave been abominably Hacked and disfigured to achiove the brilliancy of tome which they ate atiributed to possess, can and do retair both resonating brenth and elasticity, I fail lo see why a good, sourd, liomogeneous coliesive bell casting of the 20th century, imned (skirted, if thime plarase is preferred) on the 'S. P.,' will not rethil both tone and resilienee equal to its post-Reformation or medieval predecessoms which frue been hacked and chopped internally by the old tumer.
If a bell, old or new, is porous, and uulonogeneous in composition, aud literally' blow holes and sand," no tuning in the werld will prodice tome to equal the resollance of " 0 . A, B.'ss evenly cut, or cast ' Lastrit!' Nor will it lave the resilience of the aforesam? - Laskit,' or even the ineftaceable nemory of cohesfer attraction and repulsion which is to be found when yumiuabing a mediesal whelk! In all probability the Greek " phylasiper' Pythagoras was alluding to bells funed on the old plan, when the spoke of 'the nusic of tha spears ' 1 (Give it just another eyestrjker, Mr. Liditor. to make it a five tone, please!) As an arclamologist I advombe preserving medirvals and early post-keformation, and any tumed on the old plan which are full of splinters, sound and fury, signilying nothing bit sentiment, hang them up dead! and use them for Angelus, curfew, or odd service bells!
But as a progressive Campanist and Clurchman I adrocate a new peal, of ons homageneous composition and tumed on the true Simpsan principle, leaving a heritage for the gemerations of Clarchmen yel unbort that is worthy, lasting and Jazmonious! In conclusion, "let fulure generations fhaw for themselves a comparian of the tone. whime we inherited, and thai which wo leave to posterity.

## TH? D-FECTS AND E-FECTS

Sir,-How thin musi be $\mathrm{Mr}^{2}$. Barnete's opinion of Simpson thange. when lie states: "It is probahly an accident or the tower" hides theil D-fects.' Now, if the tower hides their D-fects, other towers musi lide their E-fects. I think myself your leaden of this week houchers the vital spot. It seems to me to bo a case of it being always fhe neiglabou's cat which howls. One wonders if it is a case of the fox and the grapes. Feb these eritics indrocate bell bulfers, which, whilt deadeuing the clapper blow, must increase the hum note, for which they have no liking. 'Ouce a Begibucr's. argament soumded all right, wilk a glass of ye olde beverage. It filled the place of the cruet. But " ye bell is not cut from ye solit block,' merely stimmed and in some cases practically untouched, and what pelation rubber is to copper and tin my poor knowledge cannol grasp. We have all heard the wonderful slories of what our ancestors did. No douth our "cum-cestors' will heat similar tales of ourselves. contend that, if a bell is cast henvy enough for its size. Simpson turing will neither damage its fone nor life. - Yours truly, A FTAT.

Sits - 'rowgh never muth of a peal ringer, and now long pata any such effort, I take much interestu in your weekly record of peals, as an untication of whe progress of change vinging from time to time. May I note ane recent feature of this reard that strikes me as pery satisfactory, vime, the darge proportion of peals in the sumpler and easien methads with foolnotes inclicating : first peal "by individual members or by a whole banct? The 'big guns' no longer monopolise the field with " Surprise ' performances; there $1 s$ room for those lumbler efforts which ju many a country protisis represent as much patient perseverance as more conspicuous successes. cxample, in Your record of last week (March 2nd), I note three 10-bel peals, one Treble Bob Royal. one Stedman Caters, and one of Bob Ropal. This latter, the first by all except three of the ringers and the fing as conduclor, with a lady of the 2nd, in lonour of whose npproaching marriage the peal was rung. Of thenty-two 8 -bell peals, 7 were Grandsire Triples, 6 Stedman Triples. 2 Treble Bob Major, 3 Pairt Bob Mrjor, 1 Double Karwich, and 3 in : Surprise ' methods. We aimire the skill of ou" "Surprise 'ringers, and look to them to ughold the highest standards of our art. But, remembering how many change ringers will nover attain to such heights, wo value egtally the modest efforts of a viliage band, and 'flrst peal' successes by unknown ringers.
In the same issue of your paper is recorded a new departure, which to many wild appear an undesiranle precedent, viz, an annual district meeting held ons Sunday. Let us lope that this will not "catch on." It wild do no good, and may do much harm. to the cause.-Yous fath frily:
T. L. PAPILLON.

## WEST WYCOMBE CHURCH BELLS.

## AN APPEAL FOR TELAP.

Tlue litule wilage of West Wycombe, Buckingliam, atrout two miles from High Wycombe, is known to tourists and mamy, athers thioughout the land. This villuge is famous for its church, mansoleun and caros, hall-way up the steep hill, leading to the churel. Eycoted by Hard Despencer, the matsoleum contains variots monunuents to memluers of the Dashwood family, and adjoins the chatrelt, but, unforturately, is seldom, if ever, open to visitols. The Erish Charch, which Is dedicated to St. Laurence, is a remarkable structure, aud stands ou the top of a steep hilh, around which aro remnants of British enrunchments. Inside the church is to be seen the beautiful picture of the Last Supper on the chancel ceiling; the * eye of Judas heine rery moticeable. The font, with the suake and doves (' ovil after good '), and the arm chairs used as pulyit and reading desk, are, also interesting i entranco to the pulpit heing gained by means of gome drawers pulled out to serve as steps! At dine tojs of the tower is a large ball. capable of holeling, it is said, twelve persons and a gallon of beer." Local listorians assert in reference to this ball, "that the dosigner of this church geems to have liad * a screw loose somewhere," for the eccentric nobleman who w'ss responsible for the curiosities of the chureh would call his friends and neighbours together, ascend the tower with them, and hold informal meetings in this queer chamber.
The tower contains six bells, but for mans years they have bean practicatly unringable, and for a long time, owing to fithe daugar of in the church loft bears the date 1688 . Some of the belts in the tower are even older, and it may be interestiug to give their weight and makers: Treble, weight, 5 cwt, makers, Lester and Pack, 1756 : fecond, 53 cwt, Kenry Knight, 1621; filied. 61 cwt.. Josephin Carter, 1581: fourth, 8id awt. Henry Knight, 1620; fifli, 101 cwi., Lester and Pack, 1762; tenor, 13 3 ewt., Thomas Mcars, 1828.

A movement las been on foot for some time to improve matters, with a wiew to relanging, and an estinate was obfafied for a mew oak frame for oight bells and relianging the present six. The tenor of Mr . White, of Appleton. for this work is $£ 266$ 10s. 6 cl . This geatleman also added an estimate for two new treble bells. to coraplete the ring of eight, this amounting to over $£ 128$ 10s. The local friends lave been working tremendously hard by means af fetes, etc., to raise sufficient moncy for the reframing and rebanginy, and, considering the size of tho village, are to be highly complimentard. Now, two generous donors, who wish to remain anonymous, hate offered to provide maney for two new lells, providing the work is pul in hant nt once, and practicslly finished by Whitsubthle. That the arganisers lave done memarkably well as proved by the fact lhat they now require only about £160; and the Chureh Conncil are making herculean efforts to oblain that sum.
These few notes are pemed in the hope flat many among the ringing fraternity will assist with, contributions, ant, if passible, ask their friends to subscribe. The raising of such a sum js a big task for a smali villsge: and whon one comsiders the advantages of a ring of cieght in a church of such historic associatinn, ideal. old-world surroundings, one is filled with hope that the ringers' contribution will he handsome aud worthy of their reputation, Mr. W. A. Day. elhurchwarden, of West Wyeombe, will be mosk grateful lor ally domations towards the cost of the proposed work.

## THE <br> CROYDON BELL FOUNDRY

## HENRY JOHNSON COMMEMORATION DINNER <br> (Continued from page 139. <br> BROTMFERHOOD AND GOOD COM ${ }^{(1)} A D E S E I P$

Mr. J. F. Smallwood submitted the toast of " Kindred Ringitg Societies. He sait there were three objects which it was generally claimed ringiug societies stood for, the dinst was the promotion of the art of change finging, the second was the recognition of ringers as church workers, and flue third was belfy reform; but their sacieties also stood for something else. In promoting the art of change ringing they promoted the spirit of brotherbood and good comradeship (applause). Among the societies represented that night was the An cient Sociely of College Youths, which had stood for nearly three bundred years for the objects for which all their' societies existed. They stood also for progress, mad were looked up to as an example. It was necessary that they should continually introduce new blood into their societies if they were to live to the same great age as the College Youthe, who had a splendid system of perpetuatigg the so ciety by electing thein officers from year to gear. They appointeri stewards who, in a kind of Masonic way, were promoted until they got to the top of the free. It was a great thing for young ringers to look forward to, to reach the highest office in their society. They brongit in new blaot, new enthusiasm and new ideas. Amont the other societies whom they were pleased to welcome were the Royal Gumberland Youths, the Worcester and Distriets Association, the Staffordshire Socieis and Warwiekshire Guild, the Yorkshire Association, which was the biggest ringing society in the country the Ladies' Guild, the Batl alld Wells Association, the Norfly Wales Association, the Llandaft and Jommouth Diocesan Asociation, the Hereford and Salop Guilds, the Gloucester and Bristol Association, the Kent, the Middlesex, the Essex and the Surrey Associations. They wished them all godspeed in their work, and hroped they would continue in their offorts until there was not a singlo belfry in this cotuntry where ringing was umknown. He coupled with the toast the names of Mr. A. A Hughes, of the College Youths, and Mr. P. J. Joluson, hon. secretary of the rorkshire Association,
The loast was cordially drunk, and Mr. Mughes, who first responded, said St Martin's Guild enjoyed a great reputation in twolve-hel] ringing soclefies. They much afmired the very high standard that was setm in Birmingliam, and they of tho College Youths greatly admined the performsmees of the Guild. Particularly would he refer to the peal of Sextuples and to the Treble Bob Fourteen. which were extraordinary performances. In conclusion, he thanked the Guild for their lospitality to the visitors
Mr. $P^{\prime}$. T. Johnson said floty in Yorkshire always had and alwaya would conarect Birmingham with fle greatesth tjaditions of change ringing. Biwmingham had been famed for such men as Thurstans. Tohn and Thomas Daj aud Henry Johnson, and while they were there to do honour to one of the brightest gens in the ringing tradjtion, he clamed flath his association was a lusty infant croated from tho Yenerable societies suel as the College Youths and St. Martin's Guild \{applatse\}. In coming there that night it was an honow to the visitors to be allowed to bo assaciaded with the tradilions huilt up ly that fruild, and he hoperd the Guild would trke their presence as fudicatiog not merely their desire to meet in a fraternal gathering, but for the parpose of honouring rome of the greatesi names that had ever been associated with ehange ringing (applatase)

## A EINT TO WRITERS

Mr. A. P. Smill proposed the borst of ' 'The Ringino World, and appealed to those present to do all in their power to assist in extending the circulation of the ringere' ouly paper. He'said a re on: ceners showed that there were over 30,000 fingere int this country, and it was a disgrace that only a very small proportion supported the paper. If only one-half of the ringers supported if they would probably be able to lave a paper donble the size at half the present price. Proceeding, Mr, Smith condemaed in scathing ferms those who finfleted on the rest of the Exercise letters full of accimony, ill-ferling and bad taste. It was humiliating to think of the suappy, sharling and hasty letters which sometimes appeared from mon who were distinguished exponents of the arl all the whilg they werc at the end of a rope, but who lost their halo when they took up a pen. Ho also Euggested that some of those who could not agree upon theoretical questions slould not, inflict their dissensions hyon the yeaders of a ringing proper, but should find out each other's addresses and concuct their correspoudemos through the post (hear', hemr)
Mr. J. S. Gotismith responded to the toast.
The Chaiman, who said he spoke with an intimate knowledge of journalism, said fingers were a very close body, and whe civcle to which such a paper os : The Ringing World' appealed was exlremely limited, and, flomefore, it behoved everyone to support it. If they did that he was sure the paper would Erow in power nud grow it excellence iapplase).
Aderman Pritchett, in a felicitous speech, proposed " The Chairman.' That night, he said, they lad spent one of the pleasantest and happiest evenings of their lives, and it had beon preatly contributed to by the genial and kindly presence of their chairman lap plause).-The toast wae drank with musical honours.
The Rector of Bimminglam, in responding said lie was prond to ocupy the chair. He hat particulariy enjojed the evening, for one
had felt that a real spirit of frjendliness pervaded the gathering (applause), and he would take away a pleasant feeling of gratulude for mueh kindness shown.
At the conclusion of the speenh-making, the gathering concluded with the National Anthem.
A fenture of the proceedings was the musical programme, some capital songs and tuets being sung by Miss D. Walker, Mr. A. A. Walker, Mr. Dai Thomas and Mr. Wr. Dowding, all of whose efforts greatly delighted the company. The accompanists were Mrs. T. Davies and Miss R. Eaulkiner. Handmell selections were given by Mr. Mansell's party and Mr. T. Miller's party, and both were enthusiastically eucoted.

## DINNER ITEMS.

The dinner programge is always an interesting sourenir of the gathering, and this year was afaim of striking interest from the apt guotations with which it was andomed
Speakers found these quotations aseful peys for somo of their remarks, but an amosing incident was provided by an old Yorkshire toast which leaded the programme. While admitting that it was necessary to go to Birmingham to lsear Stedman Sextuples, Mr. Persy Johnson, the Yorkshire Association's popular secretary. dammed it was necessary to go to Yorkshire to hear this tonst correctily given.
The Chaman seized upon the opportunity to ask the man from Leds to let the company hear the toast in the real vernacular, and great langhter followed the admission of the Yorkshire secretary that he was horn in Loudon. The wast proved too much even for thim.
The 'Jolnison Dinmer' does not ent with the Saturday night's gatlicriag, it is a festival which exlends to the Sunday, and would probably go on thtit Monday if some could hate their way.

Among the company were several who could claim to lave attendeal a considerable number of Tohuson Dinners, and it was the e5th consecutive oceasion upous which Mr. A. Paddon Smith (the secretary) and Mr. Harry Withers lad heen present. Mr. Tom Russam was, however, the only one present who conld clam to fave been at the whole series from their foundation.
An exchange of umbrellas (quite involuntarily) took placa after the dimger on Saturday night, some visitor lieing given in the clonkroom the umbrella belonging to the churthwarden of King's Norton, and leaving his own in place of it. The one that was thken, however, was orle that was much valued by its owner, beinf a presentation umbrella, and if this meets the eye of the visitor who found ou his arrival home that lie had fot the wrong one, he should communicate with Mr. 1'. Laflin, 33, Midand Road, King's Nortou.

## THE PEAL AT HEADCORN

Dear Sir, $-\mathrm{I}_{11}$ reply io Mr. Clarles Iribe's letter, I want to point out, in the first place, that $]$ simply ask Mr. C. Fdwards for the figares of the peal he called. I ant not a busybody in other men's matters, or asking hins, in spito, but just a member of the K.C.A. anxious for right.
I cannot say, sir, that ilvere is my member suffering grievously over tive raliditg of the peal, but I do know that there ato several like nyself anxions to see the figures. I consider that it cons. ceris more than the band that look part, whether tho peal was true or false. I think it concerns all menbers of the Eacreise. Ifowever, with the eighth? Can all these seven forward ble figurets of the pres they ratig; in fact, have they any idea? As regards recordivg the peal, let mo say hir. Tribe may find space to insert it on the eame page as a recemb peal of Bob Major at, Tenterdon. As regards revealing my name. I have no wish to do so at present. Mr. Jdwands has the same opportunity of placing the figures before the Exervise, Which will give him little or no trouble-- Yours etc., $A$ CORRESPONDENT.

## THE RINGER'S OPPORTUNITY.

The notices appearing in another column remind us all, if nothing else does, of the near approach of the Easter meetings. On Easter Monday, and from then until Whitsun more general meetings of associations are beld than in any similar period of the year. These annual meetings provide members with their one real opporturity of the year to make any change in the policy or management of their society if they desire to do so, although, generally speaking, things seems to be so well managed that the utmost satisfaction prevails, and it is seldom we read of any alteration being made in the general conduct of an association. That may be taken to point to a happy state of affairs, and where domestic bliss reigns it would be a pity to disturb it.

It is not to the management of associations, however, that we want now to direct attention, but to the opportunity which presents itself to the ordinary ringer to make a move for the general good of the Exercise. At the annual meeting of an association a member can bing forward a proposal which, if he can find endorsement for it among bis fellows, can be sent on, with an official backing, to the Central Council, which meets at Whitsun. The Council exists primarily for the advancement of the cause of ringing, and while criticism of the Council, on the ground that at times it has done very litlle for ringing, is very easily and very frequently expressed, ringers as a whole do not seem to realise that they may be in part, and indeed largely responsible for this.
Many ringers appear to imagine that when they have voted for the election of their representatives on the Council they have done all that is necessary. There could not be a greater mistake in our view. If they want the Council to be an active and an effective body they should provide it with work, and surely from among the forty affliated organisations, there ought to be sufficient ideas to provide the Council with an interesting as well as a full agenda whenever it meets. In every other annual conference that we know of, where the members are elected by affliated bodies, subjects for discussion come mainly, if not entirely, from the branches, and in the same way the work of the Councll could be made vastly more valuable if resolutions were sent up from the various associations. This subject is not new. We have discussed it in this column before, and we return to it because we believe that the adoption of the principle which we advocate would be for the eventual benefit of the Exercise, and because, beginning at Easter, there will come the opportunities of putting it into operation. There must be scores of ringers

## THE FIGURDS OF THE NORBURY PEAL. To the Editor.

Dear Sir,-I have pleasure in scuding herewith the figures of the paal in question asked for by Mr, Wilkerson. They will meet the wishes expressed in the first and fourth paragraphe of his leter. It may, perhaps, prevent disaypointment to some who wish to attenpt Multi-Method' ' peals, if I may bc permitted to point out that the identify of lead ends alone does not necessarily mean that those mothods which liave this featro in common can be spliced into a true extent, e.g., No. 9 and 16 T.B. wilh wot splice. Mr. Wilkerson's हecond partgraph may, I think, bo so understood. If I shall not trespass too much on your space I will repeat thic rules for splicing given in ' Thte Ringing Worid,' August 23 rd , 1918.
(1) If two or more methods contain the sume changos in a plain course, one of the metliods may be strbstituted for another, wherever a complelo course occurs belween two consecutive bobs.
(2) Certain groups of Treble Bols methods contain the same changes in a piain lead. In this caso a lead in any method of ithe gronps may be substituted for any oher mothod af any lead end of the 720 , be it plain or bobbed.-Yours faithrally, and with goodwill,

## A YORKSHIRE RINGER'S MEMORIAL.

An interesting lithle eveut took place at St. Mathew's Clurch, Northowram, on Saturday, Feb, 17h, in the dedication of memorial tublet which had been erected in the ringing chamber of that church hy the ringers in memory of one of their own members who had fialen in the war. At tho end of the service the riagers and the relatives repaired to the tower, when tho tablet was dedicated by the Rev. C. O. Marshall. ## BELLS, OF ST. ANDREW'S CHURCH, EEDINBURGH. <br> To the Editor.

Dear Sir, -In a recent issue of your journal, a question is raised as to the bells of the above church. I regret that I am not able to stato with defnito suthority whether a complete "peal' in the Treble Bob or any other method was ever rung on these bells, but the following particulars taken from the official decords of the Corporatian may be of interest:-

Edinburgh, 9th September, 1858. The sub-committee appointed to look after Sb. Andrew's bells, lave, during the last three montlis, employed Jonas Baldwin as bell zinger and teacher to the other ringers. They have agred pro tempore that he be paid 4s. per week and 6s. for three assistants at 2 s . per week each heing 10 s , per week in all-the amount formerly paid for ringing those bells from Jume 1st to Scptember 1st), so that $£ 610 \mathrm{~s}$, is $\mathrm{now}_{\mathrm{w}}$ due from June lst to September Ist for said service. They recommend a contimution of this arrangenent.'
They also took the opportumity of the Leeds bell ringers passing thraugh Edinburglo of getting tho bells thoroughly tried and tested, for which they ineuried an expense of $£ 315 s$, 6-l., being extra rajlway expenses, the ringers otherwise acting gratuitously on the occasion.
It was found necessary to facilitate the teaching and obviato the noise which the practising on the larger bells oceasions, to purchase a set of handbells, which the sulb-committee did at an expense of 52 .
'This extraordinary expense of $£ 515 \mathrm{~s}$, 6d. can by no chance be repeated, and the sub-committee hope the committeo will recommend to the Council its payment . . . . The magistrales and Council, having considered the foregoint seport, approved thereof, and authorised the Chamberlan to make paymont aecordiugly."

I may add that this is the oldest of the few ringing peals in Scatland. On 12th March, 1788, " the Lord Provost, who is in London, was asked to take the trouble to purchase a bell or bells for the spire of the said chureh.

Ar estimate was produced from William and Thomas Mears, of Whitcchapel, who offered ${ }^{\text {a }}$ a peal of six good and musjeal bells, in tone and tume to each other, including a new frame, bamging, etc., for $£ 387$ 10s. Subsequently it was pointed out 'that there was a material want to make the bells of St. Andrew's spire a complete chyme, and that was to complete the ocbare. That the expence of two trebles would only cost about seventy guineas. Resolved that two trabie bells he written for in addition to those already made for the said spire.'

On 1st July, 1789, we fiud that the City Chamberlain was authorised "to pay to Willian and Thomas Mears two hundred and seveney pounds fourteen shillings and a penny, tho balance of their account amounting to five hundied and twenty pounds fourteen sinil lings ancl a perny sterling.'
It seems, howerer, that the cost of "langing" was not included in the above account, for on 22nd July. 1789 , authority was giver to the City Chamberlain " to pay Edward \$imous forty-ciglat pounds seventeen shillings and twopence halfpeny, being tho expenses of hit journey from and to Loudon, his expenses here, for his time, atr tendance, and labour of putting up a peal of lells in St. Andrew's Churel.'

Unforturately, the bells are now quite unringable, being in a very bad state of repair. The tenor, if my recollection serves me aright, weighs aibout 14 cwt.-Yours faithfuly,
C. CLEVELAND ELLIS.

Hon. Member, St. Cuthbert"s Socicty of Change Ringers,

## BOOKING EEES.

## To the Editor.

Dear Sir,-I read in your issue of March End the letter on booking fees by Mi*. Fimmer. I must say I ngree with Mr. Palmer when he s.ys that ' there is mole than one remedy. There is. I know that in 1914 raising tho subseription from 1s. to Is. 6 d. had been talked over, the reason being that fle Yorkshire Association could not be carrice on with a Is. subscription and kent solvent. The subscription is now is. 6it. anti I wish someone well up in ligh finance would explain to me how coin of the realn whlue Is. 6d. has, to-day, got the same purchasing power as the 1 s . 6d. it was proposed to nsk for in 1914. It seems needless to argue such things. In 1914 Is. was not enougli; Is. 6d. would just suffice to keep the old flar flying as of you'e. How, then, can Is, 6rl, suffec to-day? To use a Yankecism, "Searcl me!x But I to agvee with Mr. Broadley when he advacates 3d. per person booking fees. Quite a number of Guidds have such iees, and I never heard of any complaints, nether are less peals rung. Ta most of the Guilds to phicli I have the honour to belong that chacge a 3 ch. fee the paad ringing is on the increase, thank goodness. Tours sincerely would glatly pay his 3d. every week.

Foundry EEtabllahed A.D. 1570 (12th year of reige of Elizabeth).

We lear that, after all, Eveslan bells will not be arailable for the record peal atiempt, which it was proposed to make on Easter Monday. It is not unlikely, however, that other hells may be secured.
The cancelling of Eveslam is due to local opposition to a peal of such leagth, and another result has been, Fie hear, the resiguation of Mu. 4 . Middlefon as captain of the local batud.
One of the objections urged rgsinsi the peal, put forward by $\mathrm{Mr}^{2}$
E. A. B. Barmard, who acted as joint hoo. secretary of the Ereshan Tower Bells Restoration Fund in 1910, was on the ground that " the vibrating effects of such a peal, althougli possibly not immediately apparent, might prove most prejudicial to the whole structure of the bell tower
In connection with the opening of the peal of ten at Trowbinge on Easter Monday there is to be a "smoking ' coneert in the Club Room at the White Swall at 7.30 p -m., to which all riugers are invited.
The peai of Doubles pulblishea an liob 23rd was rung at Littio Waldingfield, not freat Waldingriel, as stated.
The new Vicar of Pontefract, the Rev. J. Yonng, in honour of whose izduction by the Archbishop of York, a peal of Kent Treble Hob Royal was rung lash week, is a rimger and a membel of the Yorkshire Association. On the Sunday following ins induction ha visited the belfry, and took part in a course of Grandsire Caters before evening service.
At Bocking, Eisex, the home of J. Murray Hages, Ezra Garter and Sam Hayes, an effort is being made to start, a new band. Bocking was formerly a great centre of Essex ringing, and a place of frequent pilgrimage by College Youths.

About 30 years ago the band became "patd ' ringers-with the iucvitable result. No young hands were brought along, aud as the old ones died out the bells became silent. Tlue Fisser Assaciation is helping in the effort to resuscitate interest, and the church authorities are raising a voluntary company
The handbeli peal to which we recently referred as the firse vecorded perl of Bob Royal 'in hand 'hy the Coliege Fouths, camot claim that distinction. Mr. G. W. Cartmel, the hon. secretary of the Herts Assosiation, informs us that such a peal, the first of Bob Royal by all the band, was rung at St. Alloans on Felb. 16th, 1889, conducted by W. II. L. Buckingham.
'The greatest performance ever clone by any society' was the peal of 6,240 Oxford Treble Boh Maximus at St. Peter Mancroft, Norwich, on March 16th, 1778 , in 5 brs, 22 mins. This peal is recolded in the Cumberland Youths peal book, showing that the Norwich men were at that thme all members of the Cumberlund Society.
It was this peal at Norwich that iuspired the Oollege Youtas to regain the suprenacy for twelve-bell ringing, and eventually resulted in the peal io which we referred a fortnight ago, in which gamuel Muggeridge, single-handed. rang the tenor at Southwark to 7,008 Treble Twelve in whe year 1784. The Norwich peal was rung with lwo men at the tenor.
The Cumberlands were nearly 20 yearg before they regained the vecord, but on March 22nd, 1802. they scoved a peal of 7,104 at Sontinwark, in which J. Marlon raug the tenor in 5 hrs 30 mins. The peal was called by George Gross, junr., but George Gross, genr., also took parli in the peal, as did Witlian Shipway. Malachi Chanmon, James Baruat aud Thonas Pueeves, who were also iu this peal, were with George Gross. senk. in the 12,000 Treble Bob Thoyel, at Shoreditelz on March 27th, 1784-a few days after the College Youths' iriumple at 太outhwark.
At Debenlam, on March L6th, 1767 , a peal of 10,080 Boh Major was rung in 6 lirs. 1 min.
The fund raised to assist the widow and daughter of the late Mr Tom Wallis, of Edenbridge, Kent, amaunted to $£ 136$ 12s., about $£ 10$ of this anmont coming from riugers outside the parish.

Not mamy months ago we had the pleasure of amonmeing that two Kent ladies had stood in a pead together. On Saturday last three resident lady members of the K.C.A, rang in a peal of Grandsire Triples at Marden, vis, Miss Orlebar (Tunbridge Wrells), Mis. H. Eaker (Frittenden) and Miss Thomas (Morsham). They liave established a record for their sex in Kent, and we understand they acquiltel themselves rey well indeed. It was IIs, Baker's first peal witls an inside bell.

## THE GIFFORD MEMORIAL.

A balance sheet of this fund has been issued. The reecipts from subscriptions and bank interest were 226 6s. 9d. The cost of the tablet erected at St. Martin's Clureh, Salisbury, was 224 10s.; the Minor Faculty for evecting the memovial, 125. Gd.; circulars, postages and incidental expenses, 814 As . 3 d .

## BOWDON'S BELLS.

ANOTHER TINE RTNG OT BIGHR FOR CHESIIRE
Afloough Bowdon, or Bogedone, has a chureh history of over thonsind yoars behind it, there is nothing definite as to what bells were there previous to 1714 , but in that year a ring of six, was hung iu an old churct and *Abl. Ruhhall casi us all." Traditiou has it that llis ring was made up of old bells recast and new ones added; when ilie mew church was built tiley were trausferred to it. For some years they have been in very liad ruming order, anditn now they have been recast and two trebles added to complete the actave, the work liaving been entrusted to the well-known Croydon firm of Messrs. Gilleit and Johnston, to whom great eremit is due. Tho juseriptions of the old bells lave been reproduced. and new ones adelerl, Ali are tuaed on the five-tone Simpson primeiple, Jung in a wew thi-steel frame, with bali bearings and ail new fittings. The tenor weighs 141 cwit., and is in the key of F slarp. To this bell is fitted Mescrs. Gillett and Johnston's clapper contol, a very simple device, antoratic in its action, only being effective when the bell is 'up,' thum nilowing the clapper to strike when chimed on the swing. Its funcLon is to lift the clapper away from the sound how after the blow las been delinered. thas allowing the linn to be beard above the rest, with a pleasing and hamonious eftect.
Ou Monday evening, March 5th, the new bells were dedieated hy Whe Lord Bishop of Chester. a goorl comgegation beine present, but those persons who represent, t custom of antiquity amd of universal popularify even in this alleged docaterat aud certainly clanging age, hied themselves to the ringing elimber, where the farnal dedication

## SLMPSON TUNLNG.

## To the Editor

Sir, A Flat Sevently is certamly to be congratulated on his feat of mental gymnastica. His letter is one ble mosr ridiculous you have published tor many a loug day. The platitudes of which he epeaks were of his own inttoduction! He made the most elementary of wis. takes and apparently (like many others) did not like laving it poive ex out to him! But to attribute intelligence only to those who agreo with him is too well known a trick to deceivo anybody. For his rudeness to me I offer hing afreg pardon, but if the opponents of the five-tone principle have no better arguments to offer than those he has pue forward, their case is not a very strong one.
I think Mr. Jerran will bear me out that the destruction of "many good ancient heils, began long before Canon Simpson's time. Tha reason why we lave so few pre-Refomation bells is due to the rise of the art of change ringing-originally bells not being in scale -and the destruction of less valuable, becanse less ancieut, bells has followed with progress in fin aytof tuning to a more harmonic scale, 1 know some antiguarians who almost beav a grudge against the ar't of change ringing because of this result of its spread. As a fact this cannot be contented, but it may be an open question whether the gain does not outweigh the loss. Detolees of the forefone principle may perhaps be allowed an opinion with regard to the further outcone of this destruction without offering any insult to the intelligence of ringers?-Yours faithfully

There was a large gathering of ringers from the Northern Divisiou of the Fssex Association at a meoting at Bocking on Saturday week Iuterest was anded to the visit by the fact that the Bocking Parish Chureh ring of eight bells, noted for thoir fime, mellow tone, had not been rung lalely, due to tho old bund of viugers dyyng out and treup ones not vaking their places. Often members of the Col lege Youths in London came to Bocking to practise mellods which were not rung in tondon and they spent insuructive week-mds with

## JUST BY THE WAY <br> EVESHAM AND PERSHORE.

## To the Fator.

Dear Sir,-I mole with pleasure that a band of stalwarde are at tenpling to beat life Appleton peal of Casters, and at Evesham, Thene at least, they will not be troubied wifle that " mournful fowd rand noise like it pot auciton on a Sadurday night. The trebles aye by Barwell. the tenor is a really grand bell; the oflec seven exude IRudhall in every breath, pud a well-struck peal on them is a feast of music. On a fme day just to lie on the river banks neatla the shade of the beatuiful campanile and hear then is a tovic in itselt. . But in the near viciuity is another feass of music, at Pershore Abbey, reputed 30 ewt. In my humble opiuton they are sonme of It andiall's best, and I want to know why at deplica camot be east to-day of those truly forious instruments. But of Persinore one can without jesting say that. "monc but the bruve cleserve the feir, for he who woulch ing on those Jershore bells must make a long and torthous elimb cind. ing with at aharp lialf left, up a slim get of steps, and cross a none too secure looking drawhridge and enter the cage, for a cage it is, and stabl and ring, like Kahomet in his coffin, suspended 'twixt earth and heaven. On the occasion of the last peal I rang there, the 4 th ringer just looked over the edge of his tago once but that was enough. It was only Rudhall's music hat saved him. On our descent from this ondeal, the fifth ringer discovered the bust, of the conductor acting is a gargoylo on the tower of St. Andrew's Churel just across the roud from the Abbey, and it was too lifelike for words, the ensuingr laughter dispelling all memories of our climb.

I noted with pleasure the various letters re "Simpson tuning," and should like to point out that ane often hears and even reads of - metal beconing tired.' I bare been in the mefal trade for over 30 yeats, aud know how true it is, in the cast mehal trade especinlly. ' trust that the next tine any parish wisheg la bieak up the products of such men as Ihudiall, the faculty will be made so stringent that it will mean penalties an it be disregarded. Chalk, I trust. is anly a foreramer of such actions is times to come. Fons faitituly, ONCT A BEGINNET?

## THE EXAMPLE OF THE M.C.A.

The Midland Counties Association is nut only one of the largest of our ringing organisations, but it is admittedly one of the most go ahead, and thanks to the fact that it has been well managed by a succession of able officers, it stands in as strong a position as any in the country. From whatever point of view one looks at the report which has just been issued for the past year, there is evidence of solid progress. Financially the Association has a very substantial reserve, and, so far as its practical operations are concerned, there is no association which has shown a more progressive spirit. The results of the year's operations must be very satisfactory to all concerned. There are, moreover, certain matters referred to in the report which ringers outside the M.C.A. might well meditate upon. We would refer here to two of them.
The M.C.A. has over two hundred honorary members, and nearly half its income comes from this source. When it is remembered that the active ringing membership is 720 , the large proportion of honorary members will be more fully realised. Such a number of subscribers from outside the ranks of ringers is not obtained without steady and persistent effort, and many of the associations, who are lamenting the falling off of funds, or finding the increased expenses a source of anxiety, might well direct more definite attention to this source of revenue. What the Midland Counties Association cen do others should be able to manage. There are several associations we know whose finances are very largely of a hand-to-mouth kind, and whose energies must perforce consequently be much restricted, who seen to make but small effort to secure honorary members. Perseverance and tact are required to build up a big phalanx of outside support such as the M.C.A. has obtained, but with this example before them there is no excuse for the pessimists to say it cannot be done.

In the peal ringing line, the M.C.A. had an equally successful year, and of a total of 49 peals, which ranged from Grandsire Doubles to Cambridge Royal and Kent Treble Bob Maximus, no fewer than 30 per cent. were Surprise peals. The actual number was 4 , and here we come to our second point, the conducting of these Surprise peals was shared by no less than twelve ringers. Here again is an example which might well be emulated in other associations. If one examines the annual reports of many of our organisations-there are exceptions, of course-one finds that the conducting in the bigher methods is kept in the hands of just one or two men. It does not follow that it is because of any selfisbness on their part; they have shown themselves capable and others have therefore just (Continued on page 178.)

[^16]'left it to them.' The result has often been that when the conductor goes the higher method ringing goes. The very best way to secure the continuance of ringing is to encourage conductors, who, after all, often take upon themselves the role of instructors, so that the falling out of any one of them does not necessarily cripple the band or handicap the association.

## SPLICED' EXTENTS OF MINOR.

COMPOSED OVER 40 YEARS AGO.
Dear Sir, -The splendiel achievennent of the Norbury ringers in ringing a peal of wimor in 30 melhods in seven true extents, calls forth the admiration of every true love: of the art of change ringing, end as the recent issues of 'The Ringing World ' Lestify, it has aroused very great interest in ' spliced, methods extents.
Mr . Dawson, in lis letter, wants to know if the method of splicing is a ' state secret,' and Mr. Fernley. in his reply, says he believes he is correct in saying that the Rev. H. Law , lames was the first to make known and practise the idea ten or twelve years ago. You, sir, in your leading article in 'The Ringing Wort, on Feb, 16ths also state that it is more than ten years since this form of Minor extents was introduced.
By these remarks it would seem that the spliced " 720 of Nivor is quite a new iflea. but 1 would like to point out that I lave a spliced 780 of Treble Hob Minor in niue methods, which was composed by a man who has certainly been dead over forty years.
If found rias among some papers which belonged to my 「ather, and an old ringer here on seeing the figures and writing assures me that they were written by my grandfaliber, who died in 1878, so if that is true it nust lave been composed before that ycar. The extent is written out, every one of the 720 changes, and the footnote states that it was composed by the late James Platt, of Saddesworth Fold. Now, when James Platt died I caunot say, but I find on referring to my father's peal book that a peal of Treble Bob here yecorderl was rung in 1881, and composed by the late James Platt. It also states f this peal was thie first ever rung with the fth at home at wine different course ends and the lenors logether, and was first ruag at Moltram-in-Longlendale on Nov. 51h, 1846.'
James Flatt, therefore, was composing peals nearly eigluy years ago, and has been dead at least forty years, so this spliced 720 mush have been composed long before the Rev. H. Law James made tha idea of splicing knowu.

The 720 with the changes of method and the jead ends is $\mathrm{n}_{\mathrm{B}}$ follows: 23456 British Queen

Of course, some of these methods would not salisfy our presentiday experts of method construction, and are whali neve terned irregular, aud bring up irregular lead ends, hut the chanmes are true.
I have sent the original to Mr. Fernley, and he agrees witls me that considering the time at which it musi have been composed it is a wonderful construcion.
Perlaps there is a reader of 'The Ringing World ' who can tell us more about James Plalt and his compositions, fud help us to find out if he or someone else was first in the feid wilh this very interesting iden of Minor composition.-Youss sincerely,

## A STIMULUS TO WIDER PRACTICE.

Dear Sir.-With four permission I would like to tender my sincere thanks to Mr. Fernley for his letter and figures of tho 30 -methoth peal rung at Norbury on New Year's day. I feol sure the publication will stimulate the practice of splicing Minor methods considerably more than anything clse has done for some time.
There are (as you mentioned in your leading article a week or two since) many new recrite to the Exercise since the rules were publisheil in 1912, who will, I am convinced, appreciate the pulblication inmensely.
I would also like to congratulate the band on their recent performanco in 29 methods, and hatl not the figures been pululished some doubt might laye been cast on the previous peal, as I notice Morming Star has been omitterl.
However, may curiosity has been satisfied and the brikiancy of the Nerbury men further illuminated, sud lere I would like to say. if and when it is decined to isslue certificates of merit, those responsithe for the awards will do well to bear in mind the Norbury men's performanees.- Yours faithfulty,

ABRAHAM WILKERSON,
Hon, Sec., Warwichshire Guild

## DEATH OF A GRIMSBY RINGER.

The dealb occurved, on Marel 8th, at his home at Grimsby, of Mr. Alonzo Wiliam Long. The decensed, who was 42 years of age, underwent an operation in October jast, and, although he was able to gret about again, had a relapse, and passect away as stated. He had been a ringer at St, Andrew's Churcl for over 25 yeats. and was most regular in his attendunce, and always willing and obliging. He had rung 36 peals in various incthods, his last being one of Double Norwich in August last, it being the first in that method in Grimsby.
The fuverul look place on Marcls 13 th, tho first portion of the serrice being beld in St. Andrew's Church, conducted by the Vicar (the Rev. O. ©, Barton), the cornmittal being said by the Rev. Marsden. The service was choral, a brother ringer, Mr. H. Rushby, presidigg at the organ. Amongst those present at church and the gravesido were Mr. A. W. Hoodless (Barton-on-Humber), Mr. W. H. Hayboe (secretary, Grimsby Distriot, Lincoln Diocesan Guild), Mr. A. S. Hill (representing North Eastern Steam Fishing Co.), by whom deceased was employed, and numerous other friends. The coffin was carried to its last resting-place by four ringers: Messis, Slephlerd (St. James'), Brown, Ovorton and Bromfield, and a course of Grandsire Triples was rung on handbells lyy Messis. Seamer Brown. Hoodless ave bromfield. Amongst the numerous wreaths was one from his brother ringers at St. Andrew's, and one from the St. James' band. In the evening a muffled peal of Boly Major was rung, particulars of which appear elsewhere. Deceased was au menber of flie Lincoln Diocesan Guild and the Yorkshire Association.

## PAID AND UNPAID RINGERS. <br> \section*{To the Editor.}

Dear Sir, It has recently been slated that there are 31,454 unpaid beld riggers in places of worship under the Chureh of England. This fact will, no doult, bo of great inferest to your readers. If it were safe to assume that non-association ringers are paid ringers, it would he interesting to compare these figures with the number of association ringers, if ithis can be uscertained. There is no doubt that remuneration for ringing is one of the greatest dangers that associations have to contend with, as it stops the young blood from faking up ringing. Moreover, unpajd ringets are the ones who make the most advafice in change ringing. I have this proved to me every week im my own district. For one iting the paid ringers do not like members of anof her tower coming to give them a hand, even if the former are change ringers, and so, year arter year, they stick in the rut, never getting more flan Grandive.-Yours Lruly,

ALDC. RICTARDSON.

## LEEDS © DISTRICT SOCIETY.

A suceersful and interesting meeting of the Leeds and Distriet Society was held on Saburday, Mareh 3rd, at Pudsey. The bolls were kept going in warious methods duping the afternoon and evening The business meeting was held in the White Gross Hotel, and attencled by members from Armlef, Bramley, Birstall, Ide, Rothorham, Calverley, Headisgley, Holbedk, Minfeld, Leeds Irarish Ghurch, and the local company.
There was more' stom, let of at this meeling than there has theen fior fsome time. Fortunatrely by the thoughtalars and generosity of the local gentlemen, who kindly supplied light refrethmeuts, the members remained calna and brigit.

The Secretary led off by complaining of the jack of offeial support which was shown, and this resulted in Mi. H. Lockwood being elected president pro tem.
Another member complained of Line pool attendance at Birsiall, which le said was a disgrace to this society, especially as the Vicau" had pute a service off for the convenience of the menbers.
Mr. Johnson spoke in a plain and direct manner of the unsatiffac tory support of members at the meetinge. saying that if wes no encouragement to those who arratged them.

## BELFRY GOSSIP.

In our last isstre we recorded "the first peal of Major on the bells at Twicleninam. It is interesting to note that in Benjamin Anmable's MS. (page 181), now in the British Museum, is a recort of a pea! bearing the name of * Midrlesex * which was rung by the "fwickenhan ringers on Junuary 22ut, 1733 , composed by B. Annable. Whether this was a Triplo or Major method we do not know; perhaps somene may be able to tell us.
Among the early peas that were rung was one at Wye, Kent, a peal of Grandsire Triples, on March $29 t h, 1736$, concerning which it was recorded that the band were " je first set that ever rang it in the county, without the assistance of Londoners or others.'

A peal of Grandsire Triples hat been rung at St. Mary's, Dover, on Marcl 26th, 1729.

OL Mrarch 24 til, 1837, a peal of 6,048 Albion Surprise was rung at Liversedge, Yorks. It was, we believe, a method composed by w. Soltenstall.
It was on March 23rd, 1837, Ejijall Roberts tapped a peal of 19,440 changes. Roberts committed suicide in 1865 .
The fust peal of Superlative Surprise Royal was rung at Wukefieted on March 27th, 1826.

Ringers who propose to altend live ammal meating of the Middlesex Association at St. Giles'-in-the-Fields on April 7th will do well to note that admission to the tea witl be by tickel only, which, as will be seen from our notice colunns, must be applied for' by April 4th.
It will be no good complaining lbat they are excluded from the thea if they do wot take this precaution. The committee of the association are determined to act upon this arrangement, if only out of courtesy to the Rector.

Mr. J. Barmett lias just completed 54 years as a ringer at Northallerton, Yorks, and at the age of 74 , took part on Saturday in a peal of Grandsire Triples, Fe has received the congratulations of the band upon his tong service.
Ringers who keep their M.C.A. reports for reference should deleta the compesition of peal 2,599 , published irn the $36 \% \mathrm{~h}$ Report, which is false.

Wilfred Taffender, the youthful son of Lhe Master of the London County Association, has added to the laurels whioli he has begun to gather at such an early age. London Surprise Major, Stedman Cinques and Treble Twelve, have been followed by another peal of Londou and a "double handed' peal of Stedman Gaters. Not bacl for one's first five peals at 15 years of age.

The handbell peal was also taken pert in by another ringer under 16 -one of the coming men in London. Joffery Gammon-and by the veterart, Mr. Joln Carter formerly of Birmingham, now of Park Lane 'and Donglas, Isle of Man.
"Interested ' writes with reference to the geal of Bob Major rung ' in hand * at Saftron Walden on February 25th, and which was clained to be the first handbell peal ever rung by a member of the Salfiron Walden Society, that the late Mr. Nathan J. Pitstow rang a peal of Grandsire Triples ' in hand' as long ago as May 3rd, 1896. This peal wus rung at Mr. W. H. Buckingham's residence at St. Albans, and conducted by Mr. C. W. Clarke, of Bedford
The Ringiug Master of the Worcestershire Association (Mr, Wr. P'age) asks us to request all ringing yisitors to Worcester for the anntal meeting on Easter Monday to go direct in the first instance to St. Helen's tower. They can then be ascorted to any other tower they may wish to visite and this will avoid delay or disappointmeat at finding atower closed.

## LONDON PRE=REFORMATION BELLS.

ST. BARTHOLOMEW'S BOOTH ANNIVERSARY.
The 800th aunivensary of the dedication of the Church of St. Bartholomen-the-Great was celebrated on Sunday, Marolt 11th. The Lord Mayol of Iondon attended morning service in state, when the sermon was preached Sy the Bishop of London. The pre-Raformation peal of five bells was ring by members of the Middlesex, County Association aud London Diocesan Guild, sereral 120's of Stedman and Grandsire Doubles being brouglit round. The following erening a quarter-penl of Grandsire Doubles was rung by C. T. Coles (conducfor), W. Hewett, F. I. Hairs, U. W. R. Grimwoad, R. Sanders. It having been previously announced that the bells mere being rung on this oscasion, quite a large number of parishioners gathered outside the charch, listening to these ancient bells with great interast.

## A SUCCESSRUL YEAR

## A SUCCESSRUL YEAR

Live 37 tln Report of tha Midiand Counties Association, covering the vent 1922 , has just beon issued, and contains over 100 pages. The committees report zecords a gratifyng number of bell restorations, anong then being the addition of new bell $\mathrm{f}_{\mathrm{g}}$ to mako two rings of cight into lels, two rings of six and one of tive into eight, and one of fire into six. In regard to finance, the committeo view with great satisfaction the continued prosperity of the association. The income Hor the year amounted to $£ 9017 \mathrm{~s}$. Of this sum the ringers contrirutions lotalled 248 14s. 6d., while a sum of no less than 242 2s. 60. was subscribed by petrons and hon. members. To the latter the association owes a great debt of gratitude, for without their aid the ringers' annual subseriptions would not suffice to meet the expendiure. The balance in land is $£ 13214 \mathrm{~s} .9 \mathrm{~d}$, and the hon. treasuren las suggested that a portion of this should bo invested. A 'Bell Hepair Fund has been opened, to which several subscriptions have heen already sent, and to which further lielp is specially invited. The conmittee might feel disposed to transfer to this fund $n$ sum agreed pon from tho balance 赫 hand on the general accounts.
The peal ringing record is an encellent one, the number of peals lelig no fewer than 149, made up of Kent Treble Bob Maximus 1, Grandsimg Cuques 1, Cambridge Surprise Royal 6, Kent. Treble Bob FRoral 3, Spliced Kent and Oxford Royal 1, Grandsire Caters 3, Lonton Surprise Major 4 New Gambridge 1, Superlative 16. Cambridige 18. Norfolk 1, Duffield Major 2, Double Norwich 8, Kent Treble Bob 10. Oxford Treble Bob 1 , Bob Major 8 , Stedman Triples 16, Grandsite Triples 19, Minor 14, Doubles 16. The peals in Surprise methods total 46. a percentage of 30.87, which may be regarded as very satisfactory. With a confthuation of the present enthusiasm and suitable opportunities for extersion of knowledge, it will naEurally follow, siys the report, that peals in ligher merinods will take the lead, and it is inpressed upon the diskict committees that, with the association only holding four meetings annually, the opportunities for proression rest largely with them
While considerable attention is given in the report to the progress of peal ringing, it is not forgotlen that the most important of memlers' duties is the provision of good and regular ringing at Sunday services. That this duty is faitlyfully performed, there is not the least doubt, and $i f$, is of ten referred to by the clergy at meetings, which ther attend regularly and in increasing numbers. That the meentive of peal ringing is au inducement for improved striking is a well-known fret, and the committee are convinced that pend ringer Thmong those whe adtend best to the duty above mentioned.
The memblip at the end of 1922 was 922 . comprising 9 patron 193 Lon. members, and 720 ringing members.

## SIMPSON TUNING. <br> \section*{To the Editor.}

Dear Sir,-It was not my intention lo frouble you again, as the hope. widcly shated, that toe daylight that had been let in upon the cause of the 'howl in certain hells funed on the S.P. would lead to some measures baing taken as suggested in Four learier of the 23 rd Fehruary, i.e., "it onglit not to be beyond the wits of the founders and thelr tuners to overconle the drawback,"
Now let us get back to the point at issue:-
Q.-Do certain peals of bells tumert on the S.
A.一Yes!
Q. What is the carse?
A.-Apparentily the harmonics. which shonld be subservient to the lap tome, are too greatly acoentrated.
Remedy: Remove tho calle, thise effecil coases
How to discaver the cause of the ' howl ' has been my aim all throagh, and that is clearly sirown in niy previous correspondence. In spite of this the Rev. C. H. Claske charges me with inconsistency.
It is certainly very cleat that he has, with o steady persistency acompanied with hanter, writien all rovind the subject, but has not once touched the cause of the "bow, which, of course, is the main point of the argument.
The offer to me of a free pardon has its bumotous side, in view of the many personalities contained in his letiers. Having reached threscore years and sia I can afforid to smile, and in return for his magnominity I, with the greatest of pleasure, offer my benign benedietion wilh the fervent hope tilnt lie may aever have a peal of bells in his tower that ' howl." Pax vobiscum. My thanks to rou, si for roul' kind indugence. - Yours truly, A. FLAT SEV IBTH.

## AN OLD RINGING MATCH.

INTERESTING RECORD OF A LANCASHIRE CONREST.
Few records of the doings of ringers in the distant past lave come down to us, and the following interesting account of a match between two wellhnown Lancashire companies will, we are sure, be read with interest. We are indebted for it to Mr. J. Bruce Willianson, who found it rocorded in a volume of the : Sporting Magazine' for the year 1808, under the heading of "Sporting Iutelligeace.
The following announcement appeared iu the June issue:
We lave the pleasure to inform the amateurs in the art of chango ringing that the Oldham Youths of Lancashire have challenged the College Youtlıs of Asliton-under-Linc, in the said connty, to ring then Mr. John Hold's Ten-course peal, of 504 changes, eacli course of Grandsire Tripples. The College Youths have accepted the challenge to ring them for 40 gs . a peal, in the above metbad, containing a true and complete peal of 5,040 changes only, at St, Michacl's Church, Flixton, near Manchester, all in the said county, on the 25 th day of Jung inst. Wejght of the tenor 14 cwt. 2 qr .24 lb .

The story of the contest, is wald in the issue of July, as follows:

## IFARMONIOUS OHANGE RINGLNG.

The Oldham Youths, sometime since, challenged the College Yonths, change ringers of Ashtou-umder-Line, to ring them Br . Jolun Holt's ten-course peal of Grandsire Triples of 504 changes eacla, making a complete peal of 5,040 harmonious changes. The Collegians of Ashitom-under-Line accepted the challenge to ring the above peal for 40 guineas which was staked, aud who have since completed its us the finest style of ringing, and in the quickest time on the new peal of eight bells at St. Miclacl's Church, Flixton, on Fridny, June the $24 t h, 1803$. Weigint of the tenor bell' 34 cwt. 2 gr. 24 lb . yet bell metal.

This wager had caused a spirtit of emulation between those two fine and lofty riuging societies; and warious frials were made of their skili previous to the decision. The College Youths of Ashton-under ${ }^{-}$ Line took the lead fiust (in prachee); on Sunday, the 15uh day of May, they 1111 g at their village a complete peat of hir. Early in the morning of the 29th day of Nay, in honomr af the old Eaglish oak, the Oldiam Youths asconded St. Faul's Gothic tower, at ther villa, and dung a fime peal of Nr. John Folt's Gramisire Tripples, comprosed of 5,040 good pleasing changes, which was eomplefcil in the quick time of two bours and 292 mins.

On the morning of the same dar the College Youths of Aslaton-muler-Line nscended St. Michael's fine Gothic tower, also in honour of tho ancient Englishoak, and most nohly brougbt round a fine-rung peal of ITr. Tohn Folt's Errandsire Tripples, in courses containing 040 beautiful changes, in the quick time of two loturs and $29 \frac{1}{4}$ mins.

On Saturday, Jume 4th, in honour of his Majesty's birthday, the Oldham Youths gasam ascended the Gothic tower at iheir village, and completed a fine peal of H . John Holt's Grandsire Tripples, con-

The aver age speed of ringing this peal was thirty-five clanges eacl minute, and towards the close of the peal thitty-six changes a minute, heing the best and quickest ringing even performed in this kingdom.

Cheshire, they paid a second visit on Sun das morning, June the 1gth, and highly delighted the natives in fhat part of the country witls another remarkably fine rung peal of Mr. Tohn Holt's Gramusire Tripples, in ten connses, containing 5,040 Iarmonious changes, which they completely suld most uobly again brought round in the astonishing quick time of two hours andi 23, mins. Weight of the Mottram tenor 13 cwt. net bell metal.

The abore eight peals being rung for practice we must now approach towards the day of decision. Both companies of aingers met on the Fround at Flixton. on Thursday, $\mathbf{f}$ mie 23 d, 1808 and each altermately ascended the Gobhic tower of St. Michael's Church, and yung pracbice peals, according to their articles of ringing, during the

The two last coutses were rung true, after alf tho misscalling; the single at, last completely made, and round at the clange of 5,012 , being the two weble leada short of the whole peal (on 28 clanges) which entitled the Oldham Youths to the wager of 40 guineas, and was paid to them by the decision of the four censhlens and umpite, who were as follows:

## ANCIENT BELLS.

Although the trouble, which has recently occurred in a Kentish parish through the 'mutilation' of old bells in the process of rebanging, was not connected with a peal used for change ringing, the subject is certainly one which concerns ringers. With the incident at Chalk, and apon whom the blame rests, we have nothing to do, but we bave on more than one occasion in this column pointed out that when bell restorations are taken in hand, the comparatively few really ancient bells which we now possess ought to be jealously guarded. The destruction of bellis of real antiquarian interest in the past has robbed the present and future generations of valuable relics, which, once lost, can never be replaced. Some of these old bells may have been perfectly useless in conjunction with a modern ring, and because of this they have been sacrificed. Those that are gone, are gone for ever, and no amount of lamentation will bring them back. With those, however, that still remain, it is a different matter.

When restorations are contemplated, the fact ought not to be overlooked that these ancient bells, particularly those of the pre-Reformation period, however crude they may be as 'musical' instruments, are, after all, specimens of the bell founder's art which in themselves are archeologically valuable, and which will increase in value as the centuries pass. There is also a sentiment in regard to them which ought not to be ignored, and to put them into the melting-pot is rank vandalism. Where there are precious relics of this kind, and it is impossible to utilise them in connection with a restoration scheme, they ought to be preserved and retained in an honoured place in the church. It is true that such action would involve a greater expense than if the old bells went into the new peal, but we think little of a parish that would not gladly meet this extra outlay to preserve such relics.

We are glad to observe that a strong point is made of this matter in the joint report of the conference between the Central Council and the Society for the Protection of Ancient Buildings. That valuable old specimens of mediæval handicraft have been ruthlessly sacrificed in the past has been one of the reasons why antiquarians sometimes put obstacles in the way of the restoration of bells to make them pealable. It may be urged, and quite rightly, that what has happened has seldom been the fault of tingers; but, as ringers, we look upon ourselves as guardians of the bells, and wherever a church possesses bells cast by an early founder, special responsibility falls upon the ringers to see that such specimens of ancient work do not irretrievably disappear before some authority has had the opportunity of expressing an opinion upon their antiquarian value.

## ELTHAM BELLS TO BE RESTORED．

 TO BE MADE INTO AN OOTAVE．An appeal is being mate for funds for the restomation and aug－ mentation of the bells at EILham，Kent．After the war the Council of the Parisl．Churclı was faced with several problems involving re－ pains to the structuro and furmiture of the church．Of these the most urgent were the eleaning of the orgnn，and the restoration of the bells and clock．The former has ticen completed，and the Coun－ cil now propose to take in hand the more formidable task of restor－ ing the bells and clock．For many years the clock，which was erect－ eni in the tower in 1884 las mot been roing its duty properly as the chief clock of the villarge，party on account of repairs necessary to its own works and partly because the mechanism which connects it to the bells for chiming the hours and quarters is worn out．Fur－ ther，some montlis ago the wheel of one of the bells broke and the Council took the opportunity of having the belfry and clock surveyed $\mathrm{b}_{\mathrm{y}}$ an expert．The survey revealed the fact that the wooden framo－ work andi whecls are in a state of decas，that three of the bells are cracked，and that any money spent on repairs would be wasted－ total restoration being necessary
The history of the bells is lost in the mists of antiquity．Ancient records，however，inform us that in 1467 there were three great bells in the steeple and a Senctus bell of lurass．In 1571 two of these bells were recnst：the peal was again recast and a tenor added in 1610 ： the whole peal was again recast in 1794．In 1879 the tower of the present eharch was completed and the bells rehung on the old frame work．In 1897 the whecls were repaired and fha pells quarter－ turned．Hence，when considening their great age，the condition of the bolls is not surprising，and it has，tinerefors，been decided to embark on the work of restoration，and at the samo time to com plete the peal by the addition of two bells．
This will embatl：（2）Clearing the tower of existing bells and clock （2）fixiug a mew steal fame with eight bells，the metal of the old six bells bcing used in the mew peal：（3）repairing and cleaning the clock，replacing it in the fower and connecting to the bells with modern mechanism；（4）providing a new clack face on the east side of the tower，i．e．，facing up the High Street．
Tha modern melhod of casting and tuning belis，says the appeal， results iu a tone far superior to linat produced by the present bells， and this combined with certain alteralions to the windows of the tower，which will throw tio sound higher，will completely do away With tile ratber barsh tone at present noticeable by those in the close vicinity of the church
The total sum required for this is about e850，and the whole work will be entrusted to Messus．Gillett and Johnston of Croydon． Subscriptions（howewer small and by juslamments if desired）are in－ pited，and may b seut to Captain TT．Anderson，M．C．，8，Sherard Road，Eltham，S．E．9，the hon，secretary and treasurer of the Eltham Bells and Clock Frund．Should a person or group of persous wish to give a bell either as a memorial or from any other motire，the Coun－ cil would gladly allow the bell to he suitably inscribed．
The appeal has the support of many leading people of Ethiam，and it，is interesting to note that the lisp includes the names of the Wes－ leyan and Baptist Minisiers．

## THE BREAKING UP OF OLD BELLS．

## To the Editor．

Dear Sir，With reference to line formal inquiry＇held at Clialk， it should be borme in mind lyy your readers that the founders are not always to blume for breaking up old bells．Founders are busimes people who havo to show the largest profit they can on their year＇s work，and，as an employe of a firm of contractors，T can truthfult say that 90 per cent，of contracting firms would willingly smash up and reast，even the Pearly Gates，an they reeeived the order so to do．Sentiment and business do not agree；the sentiment，if any， should be shown by those who place the order，aud no amount of skilful commercia］traveling ，should allow the placar of the con－ tract to allow himself to be talked into allowing the contractor to Make the contract a＂bigger job，＇by breaking up and recasting． Yours faitafully

The first known long peal of Trehle Bob with the tenors parted was rung at St. Michael Coslany, Norwich, on April 1st, 1727. The tablet in the belfry recording it, says, " A remarkablo peal was rung by the eight persons as under, called the quarter-peal of Oxford Treble Bob, all eight in, or tho Uniou Bob, consisting of 10,080 changes, which they rung in 6 hours 28 minutes on the lef day of April, anno 1727.'

The first recorded peal on the ancient bells at St. Bartholomew-theGreat, Smithfield, was rung io commemoration of the 800th anniversary of the dedication of the church on Wednesday in last week, when forty-bwo six-scores of Grandsire Doubles were rung by five ringers, who, on Saturday, by way of contrast, took part in a peal of Cambridge Surprise Maximus, at Bow!

Congratulations to Migs Melly Johnson, of Hinton, upon calling a double-handed peal of Kent Treble Bob Royal. Mr. F. J. Jonnson has a gifted family of ringers, and must be proud of his ohildren's ability.

## DEATH OF MR. JOHN RICE.

A WELL-KNOWN SUSSEX RINGEIR
The death ocourved recently at Crawley of Mr. Johns Rice, a wellknown Sussex ringer, who was 52 years of age, had for some time past been in indifferent health, and partial paralysis aud other com. plications brought about his death after a short but painful illness He was laid to rest on the Tth of March, near the tower in whick he bad spent so many happy hours. The sad service was attended by a great gatlizring of townspeople to pay their last repects, many local bodies, ringers and friends being present. Besides his interest in ringing John Rice was secretary of the local Co-operative Society a past Grandmaster of the Oddiellows, and was ever foremost in working for charitabie objects in the town.
His loss to ring at Crawley, with which tower he has been associated with for over thirty years, is irveparable. A good ringer and a good striker, regular for service ringing, he was an examplo to all who came in contact with him. Fe was of genial and retirimg disposition, but into any task he undertook he put his whole soul and energy. For some years he served ou the committee of the Susser County Association, and le was also a member of the Sussex Association and Royal Cumberland Youths.
He had taken part in 161 peals as follows: Minor in 7 methods, 8 Grandsipe Triples, 14 (conducted 5) : Bob Tripies, 1; Court Bob Tripies, 1: Stedman Triples, 13 ; Bob Major, 7 ; Kent Treble Bob Major, 3 (conducted 2): Oxford Treble Bob Major, 1; Spliced Oxford and Keat Major, 2; Granta Treble Bob Major, 1; Double Norwich, 13; Alliance Major. 1; Superlative Surprise Major 54 (conducted 1); Cambridge Surprise Major, 9: New Cumberlend Surprise Major, 1; Londor Surprise Major, 2; Stedman Caters. I: Tyeble Bol, Royal, 1; total, 161 (conducted 8). Whis pals lad been rung in 31 difevent towers, with 95 peals at Crawley, including at this church the 9,312 Superlative Surprise Major, in 5 houts 20 minutes on Dec. 26th, 1894; at that time the longest composed in the method.
He leaves a wife nud daughter, besides a host of frienas, to mourn their loss.

## NOMENCLATURE OF MENOR METHODS.

## DENTRAE CODNCIE COMNTTEE'S RDPORT,

As insfructed by the Central Goneil at Lincoln last May, we have riven this matter onir careful consideration, and beg to submit our report.

Wo have been guided in our work by the principles me made known at the Lincoln meotiog, via, by prionity of use, and lay the advisability of retaining as much as possible, consistent with our present definitions, all that has been in use in the past. We have also had fn mind the decision of the Council at London in 1921, that all claims to give names to unnamed methods in the collection should be sent to the librariac within six motatis.
The result of our effort is, we believe, quife in accordance withs these conditious. To secure this we lawe been obliged to get aside a number of clains which were sent in at shorter or longer intervals aifter the lapse of the time allowed. Duder such treatment some of these may be described as 'hard cases,' and we lave real sympathy with all who are concerned in them in their disappointment. But we realised that to have dealt with them othervisa we should lave been obliged to cluaw a dividing line between claims, al! which, nevertheless, share ilu a common feature, viz, being too late. We were not willing to aitempt the sottlement of a question so justly open to a diversity of opinion, nor did we feel our terms af reference required us ta do
It is, of course, open to the Council to modify or reject onl decisions, This We think, will afford the pecessary opportunity for any clamant, who considers himself aggrieved, to renew his claim.
The following is the complete list of the names of all the regulat Minor methods included in the C.O. Collection, and also of those not meluded. For the latter, see = Bell News:' June 6th, 1914, p. 167, and "Ringing World," March 7th, 1913, p. 166.
In the case of metfods to which move than one name had been given before the Council considered the question of Nomenclature, we hape attributed those which our researches slowed to be the firsl given to each method.

## SPLICED 720's OF MINOR.

## To the Editar.

Dear Sir,-There is yet another method of splicing, not used in the Norbury peal. This can best be explained by an examplo. In the Collection of Legitimate (Regular) Minor Methods, pases 14 and 15 , it will be seen that Fourth's Place Delight, No3. 3 and 5 . contain the sume changes in a lead except for tle two middle changes.

## $\begin{array}{ll}\text { No. } 3 \\ \begin{array}{l}623541 \\ 632451\end{array} & \frac{\text { No. } 5}{236541} \\ 3264511\end{array}$

Therefore; if in a 720 of No. 3, three leads be picked out which have tho arme bells in the same position in 4th's and 5th's places at the "lear heal," Method No. 5 can ba substituted for No. 3 in these three leads. Similarly Nos. 10 aud 14 and Fos. 11 and 15 can bo spliced by picking three leads with the same bells in 3rd's and 5th's, as shown by the figures belaw.

Tours faithfully

Fornley and Blood in their replies to our questions, and to point out that the construction that may ba placed upon the reason of our inquiry, as shown in MrWilkerson's first parsoraph, mar not be correct; we were seeking knowledge only.
Wo should like to see some decision by the Selhads Committee, regarding the games of the Minor methods, zuentioned in our latter. We think the cost of printing these on a sheet mould $b_{s}$ small, and willingly would volunteer to undertake this, and the distribution of such slips, if only to prove our belief that the lass would be Emall, ir any.- Yours faithfully

## BOB ROYAL ON HANDBELLS.

## To the Editor.

Dear Sir, -With reference to the hanabell peal of Bol Royal, mentioned on page 168 of your issite of 16th March, it would bo interesting to know whether that rung at St, Albans in 1889 was actually entered in the College Fouths' nooks, and if so, at what date it was insplibed. When Mr. G. F. Woodhouse sent up the report of ours rung at Caius College on 3rd March, 1897, we certainly gathered that up to that time there was no peal of Bob' Royal 'in hand' recorded in the society's books. It is oniy g small matter, but it has ita statistical interert as far as it goes.- Youra truly.

## FALSE METHODS.

## To the Editor.

Dear Sir-On looking througla the hook of Legitimato Methots $T$ sfe there is given Doble Grandsine Doubles, which is not a true method, thero being two false rows beside the hand stroke treble lead 5324 and 4352 . It is impossible to get a true 120. Also there are only thrce triat nethods in Triples, Piz., Grandsire, Stedman and College Singie. Take Double Grandsire, for instance. Thare are three false rows besito the hand stroke treble lead 564732, 764235 and 567243 , so that it is impossible to get a true peal; and the rest are all about the same.- Yours truly,

## THE SUFFOLK DEVELOPMENT.

The situation in Suffolk has come rapidly to a climax and Easter Monday saw, what to those outside ringing circles in that county, must appear an almost sensational development. The first inkling of what might be expected was provided by the notice 'To Suffolk Ringers' which appeared in our columns last week, which announced a meeting at Ipswich to decide upon the formation of a new society of ringers for the Diocese of St. Edmundsbury and Ipswich. This appeared after notice had been given of meetings of the existing St. Edmundsbury and Ipswich Diocesan Association and the St. Edmundsbury and Ipswich Diocesan Branch of the Norwich, St. Edmundsbury and Ipswich Diocesan Association to be held in the same town, on the same day. The upshot of the whole business was that by thirty-one votes to seven at the first meeting, it was decided to establish a Suffolk Guild for the Diocese of St. Edmundsbury and Ipswich, to which a considerable number of the leading Suffolk ringers gave their allegiance, including men who had previously declined to join the recently formed diocesan organisation. Following upon this the St. Edmundsbury and Epswich Diocesan Association was dissolved, and at another meeting, the members present of the Suffolk Branch affiliated to the Norwich, St. Edmundsbury and Ipswich Diocesan Association declined to carry on the branch, and passed a resolution that it should 'cease to exist.'
As a matter of 'legality' this resolution is probably ultra vires, for the branch having been established under the constitution of the Norwich, St Edmundsbury and Ipswich Association at a general meeting of members of the two counties, can bardly be thus disposed of by one section only. As a matter of practical politics, however, the action taken at Ipswich seems to us likely effectively to put an end to an organised branch of the older association in Suffolk. There is nothing to prevent them retaining their title and those members who desire to remain in their ranks, but the future in buffolk seems to be with the new Guild. If one can form any views from the opinions which exist, there have been mistakes on both sides, and it would be a matter of satisfaction if one could believe that the dispute has come to an end. We do not know, however, what the Norwich action will be as a result of Monday's Ipswich meetings. Faced with the accomplished facts the Norfolk members may accept what appears on the faee of it to be 'the inevitable,' drop the St. Edmundsbury and Ipswich part of their title and devote themselves to building up a purely Norwich Diocesan Association. On the other hand it will not be surprising if a still fusther effort is made to retain Suffolk, although with the two ringing stronghold

## MR. E. P. DEBENHAM ELDCTED PREFDFNT.

Mr. W. H. Lanwonce proposed the eleetion of Mr. E. P. Debenrand as his successor in the presidential chair for the coming year, hand in so doing observed that he was gure the seleation was one that would med with the hearty approval of all the members.
Mr. W. H. L. Buckingham, who seconded, said he tas sure they auld not have a bedter prevemt than their' good old friend' (applit.se).
The newlyelectod presiflent sain the Herffori County Association was one that it did them good to belong to, as it brouglit them together as friends. Long might thal. friendship last between those who land " done their bit,' and the youngsters coming on. They land liad come good ones in St. Peter's (St. Albans) during the year, anuł to had been very pleased to see that a certain amonnt of progress init been mane in connection with change ringing by the young ones who harl atiended the district mecting held a few weeks ago, ant again that aflemoon. As to the presidency of the association Mr. Debenliam said loo wond have prefered to wait for two years before ohing that office, as 1925 would mark the completion of his fift venrs as a ringer (applausej. Mr. Debenham said that during his veur of office he would encleavour to attend at least one district meeting in each district, and he would look for good behaviour and punctual attendance nt the distriet neetings (laughter and hear. ieavi. He also stated facetiously: If Eastor is not altered I shall thare an extra three woeks of presidency included in my year. They get measures through so quickly nowadays and they may turn Faster away from the moon: but minless it is tumed away from the monn, I slall have three weeks added to my oceupancy of the position of president.

On the proposition of the Rev. B. H. Tyrwhitt Drake, seconded by $\mathrm{Mr}_{1}$. H. Lden, Mr. Debenlam was re-elected ireasurer, Mr, Debenhati observing, amidst laughter, that; he did not desire to octupy all the offices in that association. "Please don't think I want to be the capital I in the association, he added, to which the Rev. Is. If. Tyrwhitt. Drake fetorted, ${ }^{2} 5$, $f$, is what we want you to be (laugliter).
Mr. Debenham said he aid not want to be saddlod with the deficit which the association's finnuces showed this yoar, and ndded that if towers that were in arrears would forward iheir subseriptions without delay, that deficit would be turned into a balance in band
Mr. ©. W. Cartmel was, on the proposition of Mr. Winney, scoonded hy Mr. W. H. Lawrence, re-elected hon, steretary amidst applause. Prewett were re-elected hon. lithrarian and hon. audihor, respectively, with thanks for their services.

## THE CENTRAL COUNOIL'S AUTHORETY

M1. E, F. Debenham proposed the following alteration to rule, " No pead of 5,000 changes or upwats ons five or moce bells shall bo cintered in the peal book that is mot recognised as sucla by the Central Council of Chureh Bell Lingers, or othor hody for the time being exercising the powers of the Central Council witla regard to peds.' Ho explamed that the object of the alteration was to bring the association juto line with the Central Council witls regard to ble selection of performances that should be regarted as peals. The Contrial Council was the ' Parliament ' of church Lell Hugiteg in England, and if they could not decide, on behalf of the thercise at large, what performances sloould be recognised as peals, he dicl not think the atssociation should decide for itself, and it would be mach betten to leave it to the Contral Council ta dofne.
Mr. Buckinghasn seconded the motion, remarking that he dide not think it was a good thing for the association to ga for poals thato were not recognised by the Central Council; and if they did not recognige the Central Council, it was of no gead sendiag a representa ive to it.
Mr. Ayre inguired what was at ithe back of flae mind of the proposer : was it in reference to the 30 -mechod peal rung at Norbury, or gad it to do with any other method?
Mr. Debenham sad that was not present in his mind at all. We were living in a democratic age, and he thought they lad bether arecept what the Central Council accepted, and leate it there. If the Central Council recognised any performance as worthy of record as a peal then the Fertford County Association should do likewise.
Mr. M. Hibbert ingtired whether, is anyone brought in a great innovation in Minor methods and the Central Conncil disagreed, what line would the association take?
Mr. Debenliam: They must cither nceept it or reject it
Mr. Eten expressed the vicw that unless all the associations came nto line witl Mr. Debenham's proposal, it would be liardy fain to the Hertiotid Connty Association.
The Rew. B. H. Tyrwhit Drake said it smemed that the "splicéd' methad of ringing was excluded under the ald rule, and now if MrDebenham's motion were passed it would be fueluded. Fe dird not think any otller association would be accepting any peal that this association, if they adopled this rule, would be refusiug. unless they went direetly contrary to any ruling of the Cenlmal Commeil. There was no idar of euthing fanyting out, bul rather of including Minor methods.
Mr. Debenhan : It is rather a widening that at namowing.
Mr. Carmmel explamed that Mr. Dehenham"s iclea in bringiag this motion forward was to include everything that was a peal. Torday ringing was making such rapid studes that they dirl wot know what would happen in twelse months" time. The "Hertford Association were going to lead the other associations; they wated to welcome ald the peals that were rung in 20 , 30 , or 40 methods.
The motion was eventually agreed to.

## DISTRICT WECRIMARIES

As district secretaries, Messis, F. R. Bacon (Northen Division), $\pi$. Naslı (St. Abans), H. Eden (Watford) and Wi. II. Latwrence (Tasterli Division) were re-elected, and Mr. W. Ay're was electer to sheced Mr Recve (resigned) for the Westers Division.
Mr. Debenham moved, and the Rov. B. H. Tyrwhit Drake seconderi, a vole of thanks to the Dean of St. Ahbans, and the Figars of St. Peler's. Sit. Michad's zut St. Stephen's Ghuralies for placing their belfries at the disposal of the members for tho anmul fesiomal, Mr. Debenlam making special reference to the adminable address, at the amual service in the Cathedral. delivered bp Mr, G. W. Gartmel, whose words thoy would treasure in the days to come. He referrerl also to the susianced interest which Mr. Cartnae] showed in the work of the association. atud stid if it were hod for him the association would not be in its present flourighing condition.
The Rev. R. H. Tyrwhite Drake jokingly remerked that the Dean of
of preachers that it would be anl excellent thing if he would decide to go ronnd to the small country papishes and give the incumbents there it holiday.
The Dean of St. Albans, in the course of his reply, also alluded to Mr. Carlmel's address, which, he said, was one they would all value, and one which he hoped would aid them in theit work. He shid he liked to look upon ringers as being in a very real sonse warkerg for Gorl. This was the only ineal that could bring about f.rue friendslatp amongst, them. Incidentally the Dean said lie be liever it was fifty years ago his year since the Abbey Society was revived, and ho expressed the hope that the jubilee would be marked by great success. They hat lost their old captain, Mr. Whitbread, who lind been with them for many years, but they were very glad to have as his successor Mr. Goodenough (applause).

## A NEW SOCIETY FOR SUFFOLK. <br> UNITY OF ACTION AGTIEVED AT IPSWICH meetings.

Thare have boen a number of meetings in Suffolk during the last few years which have claimed to speak for the county, but such a chinim has the canls casc been aisputed. There can, however, be no rlaubt nluout the meefings held at Ipswich on Easter Mondny. Suffolk ringerg hati made up their minds thatit was quite lime that Hey managed their own affairs, and at 12.30 they assembled in a crowied mocting ander the Archdeacon of Sudbary as president. Foting papers lisd been sent olt, to all the towers where ringing is carried on in the diocese, and so masy were returned to Mr. Charies F. Bailey, of Loiston, liat le was able to inform the mealiong that an overwhelming majority of bolh towers and ringers were in favour of forming a new society. Ho, therefore, proposed that such a society be new formed.
This was soconded hy Mr. C. I. Sedgley, of Ipswich, and opposed hy the lhev. W. C. Peargon, of Henley, who wanted a joint association of the two counties of Norfolk and Suffolk.
The Rer. HI. Drako said he was really in farour of such a joint nssocinlion. nna lat bean trying to work for it for mearly two years, hut, the mention of such a thing simply infurialed tizeir Norfolk frjemds, so the only practical course was to adopt Mr. Bailey's proposnl, and whem their society wris formed and lad been working some years, ca-oporation might. be possible, but, at present tiv was impuaticable. Fte deujed Mr. Pearson's statement that he had organised this mating; the movement. was entirely spontaneous throughout the countw, mat lis share of the work was confled to posting the motices nut voling papers.

The poposal was carried by 31 against ?
It was fien agroed that the mame of the society be 'The Suffolk Guid of Rhtmers for the Diacese of St. Edmundslury and Ipswich."
The Bishop was then elected patron; Archoteacon Farmiloe, presirtont: Arubdeacon Darling, vice-president: Mr . G. J. Sedeley', Ringing Master: ling Thev. T. Drake, secretary; Mr. C. E. Fisher, treasurer: and the following members, in addition to the distriet seeve taries, on the commitloe, Mr. Ar. Symonds, the Rev. R. If Gardner, Mr. Dixom Mr, Chas Bailer. Mr Poppr. Mr. Charles Mee The rules wero left do the commitine, ambl it was decided to lolet the amual meating nt. Ipswich in Juty

## ST. EDMUNDSRURY AND IFSWTCH ABEOMATION <br> DISSOTVED

A mealing followed at 2.30 of the existing Sti. Edmundstiuny and Ipswicls Diocesar Association, and it was manimously decited that at the rlose of that meeting the society be dissolved. A report of the whole working of the assaciation was read and passerl. and it was decined to ask the secretary to print it, together with a list of peits already rung by the association, out of the existing funds in his hamds.
With regand to tho malters left to this meeting by the previous meoling, it was decided to ask the New Guild to absorb the old associntinn, to bake over the life mombers, and those who have already paid lheir subsertptions, in return for which any balance in hand will ho paid to tho new Guild: f5 to be paid at once on accaunt.
At 3.30 mother mowned meeting was held: this time, of the members of Tha Norwich Dioresan Associalion. Tt only lasted about ten mimins. Afce formal busiuess, Mr. George Wilson resigned the posilion of secrefary pro tem, suying he had fried in wain lo obtain a succossor:- Aftal the chaimman had appealed several times for nomiuations to this and tho oller vacant offices in vain, Mr. I. ## MIDLAND COUNTIES ASSOCIATION.

## ANNUAL MEETING AT DERBT.

It was at Derby in 1882 ,hat the associntion everywhere known by the abbreviated nomenclature of M.C.A. first saw the light; and for many ybars the place was tho solo headquariers. The movement spread, and other towns as great or ereater came into the combine. and ultimately it was decided to visit each of thesc in turn. viz., Burton, Derby, Nottingham and Leicester. Thus, once in every fonr years imgers turn at Easter to one of these centres. in lieir respecLive order, mind on Monday last Derby was the vente. Although a Fopular place, and almost centrally situated, the mifway authorities always sean to gire the celebraton Midiand towa a " miss-in-banlk. No trips are run on Easter Monday. although one can pass throngh and travel for ofied at excussion rutes, but as far as Derby is concomed it is furl fare. The Midand motto of "Senper irlem" is loyally earried out, bab such consorvatism is not compatible with progress. There was a time when Derby went much further-so its tradncers say-and that cyelisis were forlvidden to rirle through the iron gate on a Sunday; in fact, if anyone was seon by the Gundian in Blue to bo laughing, winking, of wagging his can, he was promptiy "run in!' I do not wouch for the trith of hlis, for some of the ringers of Dirlyy are lively enough to ward off depression, and are never averst when they appear before a judge in chambers!
On this occasion the merry lells of St. Andrew were silont, the reason being that they are undergoing relanging and augmentation to ten. Fortanately, St, Luke's bells of 30 ewt tenor, unrung for many yems gave tongue after velianging, as did St. Peter's (83 and a bright sparleling ring of eight at St. Alkmund's. The ten bells of all Sants were also in evidence duriny the day, but. it is much to be desired that the peal should be reliung, reast and sugmented to twelve. Kll sants is a grand old tower, and a lendmark for miles around. No eflotb should be sparent to make the bells worthy of thre church. Among the inders one med could be seen faces from Chesterfield, Bolsover, Burton, Nottingham, Loughboro', and fiom man, places north of the Trent.
The sulb-commitlee appointed to consider the certificate of merit question met at St. Almmunds Instilute. This question, which has been clisenssed in 'The Ringing Workd' has many sides. There are two classes of objectors. one Lhat thands the Surptise nethods are too far ahead for them, and, therefore no afferentiation shoult he marle; the other that their mowess is so well fown thab it would bo infra dig. to mention it! Tlele is another school of thought that thinks differently, and believes that honotr should be given whereover it is dine. The movers in this somene bardly expected it, to ho acoepted offlyand. Few pioneers see the fuition of their labother It usually remains for the after lollowers to garmer the work of the pionerr, but it should merer the forgotten that the impossibilities (!) and ideals of gonoby ages are the conman blaces of to-day! Somm thought that a lest of striking strould he asked lor, in other mords. prize ringing without the prise. A cup was also offered for goort striking, but realising fille half-digested opinion at present extant, it was resolved fo refer the sclame hatk to tho commiltce for further tonsicleration

The general commitice met later in flle same place fo transact that busincss when the mater of finance was diseussed. As notified in the ' report, ${ }^{\prime}$ the Lon. treasurer, Wr. W. Willson, brought forward the qucstion of investing some of the funds in hand. Owhig to the initia tive of the president, Ald, R. B. Chambers, the association possessen a consideratile number of patrons and hon. members, so much so thai their subscriptions alnost equalled those of ringing members. Neves in its history had the M.C.A. bean so affluent, and while the bank balance brouglat little interest on current, account, it was possible io invest in registered stock of Government Loan at de5 per cent. per annum free of tax. This involved the question of trusteeship, and the hon, treasurer suggested hiat f100 be bought, with the president as trustee, After discussion, it was agreed to posipone the investment until the nest quarterly meeting. It was also resolved to allocati $\$ 10$ to the ' Bell Repair Fund," from which a grand of $x 5$ was matdo to the elavel at Castle Doninglen, on condition the work of relnang ing the bells is satislactarily earried out.

A ingers service was held at 4 oclock in All Saints' Church. when the Vers. Archdeacon of Notingham occupied the palpit. Ringerss lymos were used, and the reverend gentieman gave an interesting dis course to an appreciative autience. At the close of the service, a col lection was taken for the Bell Repair Fund.'
Following this, tea took place in the Assembly Rooms, Market Place when about 150 mambers and friends sat down to an excellent repast The mecting was graced by the presence of Mrs. Chambers. Aiss Chambers, Ven, Archdeacon Conybeare, the Revs, R. F. Wikinson. R. W. Filison, M.A. T. S. Wiling J. T. Mumford M.A, and others The business mecting followed on the heels of the ten.

The election of general officers was then proceeded wiblh. Only the present occupams of the offices were nominated, viz., president, Add. R. B. Chambers, J.F.; secretary, Mr. A. C. Wright; treasurer, Mr, W. Willson; and these were re-elected nem con-Votes of hanks to them for past services wele passerl, witl applause.
For the next quarterly meetings it, was resalved to visit Loughboro' at the opening of the carillon in July; Bakewell, Derbyshire, in September, while a place to be chosen was decided on for the January meeting in 1924. Nottingham falls for the annual meeting at Eraster next, according to rota
Thirty-one new members were elected bringing the total member ship up to 953.

In moving a vote of thanks to the clergy for the use of the belle and to the local officers for the excellent, catering, Mr. Willson said that Derby could now consider itselp 'somebody.' It had got into the semi-final for the English Cup at football, laxd licked Leicenter once at cricke (by a fluke) and now it remained to ring mext time on the augmented len at St. Andrew's.
Ringing thoughout the day was of a first-elass order, most of the standard methods being negotiated to the satisfaction of all concerned, while others, who only meet their friends at these meetings, retired to some of the cosy old 'stugs, to be found in Derlyy, where litpuid nonsishment is dispensed, and where they could ring their peals of long ago over again. Ah, well, they were good judges, too, for life is made up of anticipations-and memories.
In the evening, thanks to the generosily of Ald. Chambers, a sacial and "smoker" was given in the Assembly Rooms, when the following itens were well rendered: 'Napoleon, Littleover Fandbell Ringers; song, 'I care not ' (Masil Hoorl), Mr. A. Roome; duet, 'Ring out, wild belis ' (J. Blocksley), Messra. Rooms and Smitr; song, o The bellringer ' (Y. Wallace), Mr. A. $\mathrm{I}^{*}$. Smith: quartette, 'Comrades in arms' (A. Adams), Messrs. ## JOHN NEW'S RINGING BOOK.

BITS FROM THIE RECORD OE AN OLD TWICKENHAME lNKGEN.
The ringing book of John New, of 'rwiokenhan who was born on Juna $141 \mathrm{~h}, 1790$, sets at lest all doubts as to the peal at Twickenham, the other thy being the first of inajor oun the bells, for therein is recorded u compleat peal of Bob Major, 5,040 changes in 3 hours 4 m.nutes, on October 10th, 1810. This peal was rumg by Will Winson 1, J. New 2, J, Bates 3, B. Hamis 4 E. Nelhams 5, E. Unday 6, M. Webla 7. G. Cole 8. and was conducted by G. Cole
This riaging hoals, which has kindiy been lent to us by Mr. T. Beadle. of lsleworth, is extraordinarily interesting. lt was exidently begun by John New ons Octolber 27th, 1811. for it contains his mame and this rate borlly lettered on tha fly leaf. Its principle object semas to have been to place ihe writer in possession of a copy of warious methads hnd compositions, and will great pains and mucla obvions labour he lias copied out tha letterpress and figures relating to many of the methods and peals in "The Clavis," beginning with the changes on three bells and going on tio twelve. Further on, John Now's peals arg recorded, carefully written, ruled round in red, and some of the special performances crudely decorated with designs of bells

Alhougld it, obwious that minch of the writing was done at a later dote, lho owner of the book had apparently completed what fan first set out to do, a few moutha after he started, for on the last page he has iuserihed, ' Patience is a Virtue, Aud that you may See: this Book was begun and linishea by He, Jolu New, Feb. 27 th, $1812 .{ }^{2}$ As the years progressed, quite a variety of mattory was crowded into spare spaces, ranging from the ligures of lanabell tunes, io busines accounts and recipes for minor ailments. Among the last named, for instance, is a recipe by Mr. Thomas Ewington, which was written into the ringing book, apparently, on Dec. 7eh, 1822: "Tincture of Cantherides rubbed on the Face three times a day is very servicenble in the Theumatism, and take one spoonful of tincture of Gum Guaum put into three-quarters of a pint of water gruel going to hod at night.' Perhaps John New was suffering from rhemmatism-
Jolat New rang peals at many of the churches in Middleser and Surrey, for nto that time, betwern 1809 and 1820 there kas an enthtisiastic band of ringers af Twickenlam, and peal tablets still remain at Islowortl and Richmond secording their prowess. Their conductor was Geotye Cole, and he must have been a very able boh calley for' in addition to marny peals of Grandsire, including Holt's Origimal, there twe peals of Bob Mapor, Oxford Treblo Bob Jajor and Roynl, and Stedman Caters. The record of the first peal of Stedman Chtors which they rang, ocempisk a position of speciai prominence itn Jolm New's ringing book. A full and decorated page is depoted to it, and it is thus recorded: : On Sumdry, October the 3 rd . I819, was fung at All Saints' Church, Finluam, Middesex, after the long persevernce of two yenrs and upwards, the arduous task of Steciman Calors. A complete peal of 5.051 clanges, which was Performed in 3 Hours and 12 Ninutes, it heing the firt Peal ever Performed in libat Tower in the Nelbod of Stedman, the Performers wera: Messrs
Tohn New ..................... 1st |Joln Caoper John Barbet ............... 2nal Charles Barber ……...... Zard Scholes Bamford Jehn Strattord ............... 5th

## This Peal was Composed, Call'd ant Rung by George Cole

 Brought Round at Hand and Finished in Fine Stile.'John Now appears to liave been at the opening of the twelve beils at Painswick on October $11 \mathrm{th}, 1819$, to have rung at Glowester on the previous day, and at stroud on the day after, for a record of 'touches' at these places appears on a pare fallowing a list of towers at which lo liad rung Fo was also present at the first opening of Mitsham Bells on Aprii 26th, 1820 , and on Febs. 16 ith in that year lue rang a 'dumb peal for Georpe, the King of Great Britain, the best King ever reign'd in England."
Various bits of doggerel verse intersperse other matters and one ' a Ringer's Song, extols the virtues of a peal of OwFord Trehle Jtolin rung at Richmond, on F'elo. 11th, 1809, presumabiy Jolum Now's first peal-at any rate it is he earliest reoorded in this book. It was a 5,120.

## They did rimg so neat and clear,

That you miglat travol many a mile and not sucla ringing leear.
A Tite young Youtl the Troble rung his mame it was Jom New. The second veteran Nelhams, he did ring bolth just and true, The third, Jem Cole, Well playef his part
Tha' he so lately learnt the art,
The 4tl: Scholes Bamford he did ring, alıhought but. wealk and low, Yet while that he could stand and ring. his rope lie'd ne'er Jet go. The GFth Jack Bates, a staunch bravo Boy
Did knock about to all our joy.
The sixth was rung by William Platt, g noble striker He,
The 7th his nephew, siout poung Jack, his model to a Tee.
They made the Musick of well tell
To Slur or Blur, but Ding, Dong, Bell.

The Tenor by Geoyge Cole was ring, lae call'd the Peal likewise, And had the Londoners been there, it lanilstruck them with sur* prise.
The first Peal ere he rung at alt
He did boti maufully riug and call.
Now since the peal we have gone llorough, so ontly in tho year,
Let's down to Wrhite's, of Stammel True Blae, ant drink his muts browu becr.
And if that will not touch us fine,
$H_{e}$ ' got some gloriotis elder Wine!
Some of the habits of peal ringers a lundred nme more years ago do mot sem to have been vastly difierent to those of the presenti generation.
Jolm New, and at any rate some of the other 'Twickenlam men, were apparently members of the College Youths, for a peal of "Oxford Treble Bob was rang at Kensington on Dee, 8Lin, 1820, "by eight of the Society of old College Youths.'
John New made a family register of his ringing book, and in ill le recorded the dates of his own bintis. and maitiage, and the mames of his childretr and the dates of their lhith. He was married to Tilizabeth Slores at Twickenham Cliurch ons Sept. 4 h, 1814. Que may imagine he was a decorator, glazier and sign witer by trade, judging from his accounts, and lie must have provided a good mans peal boards, for he notes ngainst, some of his peals. As, for instance, one of "Gransire Tripples' rung an Jaster Day, March 29tr, 1812, at Twickentian, ' Frinted the Boan'd for it'.

## SALISBURY DIOCESAN GUILD.

In lis notes upon 1922, publisbed in the annual report of the Salis bury Diocesan Guild, the Haster, (the Rev. C. C. FIughes D'Aeth) says tho year was ane of steady work, and also one in which there have ben some notable restorations of pands. and in at all events one tower, the addition of bells. There have been some uscful combined practices, which must bring forth much good, for it is chiefy througl the help and skill from outside that some of our suall country places can gee tileir tirst insight into scientife ringing. The Hfaster notes with pleasure that there is to he another peal of tean fin the diocese in a district which has been very active in peal ringing during the yent.
Thinks are expressed to the brancli secretaries and the energetto and hardworking peneral secrelary, and the Master once more ask the clorgy to take a little more active pait in the ringers' department of churel work.
The hon. secretary's report also records steady progress. Sunday ringing has been well maintained, and several more parishes lave adopted the Peace Bell on Fridays. Notable among restorations have heen fhose effected in the ancient lowers of St. Mary's Church, Marl borough, and SL. Peter's, Shaftesbury.

## RECOGNITION OF CENTRAL COUNCIL'S RULINGS.

The decision of the Hertford County Association upon the recognition of peals is, we think, a step in the right direction. The primary object of the motion at last week's meeting is to bring the Association's rule more in accord with present-day developments in Minor ringing, but it goes further than this. By accepting for its records only such peals as are recognised by the Central Council, it places in the hands of that body the responsibility for the definition of a peal instead of laying down its own rules upon the point. The old rule of the Association provided that no peal of less than 5000 changes on seven bells or upwasds, or seven 720's rung in any one or more Minor methods on six bells, provided that each $7^{20}$ is called differently, shall be entered in the Peal Book. The new rule is really much broader, and its value fies in the recognition of the Central Council as the final authority for deciding what shall and what shall not be deemed a "peal.'

By accepting the resolution proposed by its new President, the Hertford County Association has set an example which we hope to see widely copied, and out of which we think might be developed the idea, so commendable in theory, but so difficult to put into practice, of giving the Central Council some kind of power to insist upon decisions being binding upon all affiliated societies. The subject has already been discussed by the Council, and some attempt made to ascertain the views of the associations and guilds upon the matter; but the response was only a feeble one, as very few of the organisations replied, or even considered the matter.

The Herts Association, however, has opened up a new line. Voluntarily they have agreed to abide by the Council's ruling with regard to what constitutes a peal. If every Association would do the same thing, the first step towards giving the Council some real power would be achieved, and, having got this stage, the Council could then well draw up a code of rules, relating to peals and other matters, which Associations could be asked to subscribe to as a condition of membersfiip of the Council. Associations which had thus given allegiance, would be in honour bound to stand by their undertaking, and we believe that the influence which would thus be exercised would result in individual ringers giving the same adherence to the Council's rulings. The obstacie to making the Council's decisions binding has been the absence of power to enforce then, but if the initiative could come from affiliated bodies in the same way as the Hertford County Association has shown that it can do, the position of the Council would be quickly and effectively strengthened.

## AN INQUIRY. <br> To the Editor.

Sir, -I am one of a committee now very seriously pondering the necessity or otherwise of "Simpson Tuning.' The peal of bells which cause the pondering are now in the lands of helf founders for sandblasting fud simple tuning. The firm who have undertaken this work, now contend that nothing but Simpson tuning-which entails an expensive recasting job-will give goon resules. Perhaps you could help us to find ont from those who have a chance of knowing, whether the old tusing methods, properly applied, cannot also be made to give good resuits. - Yonrs faitifully,

## KENT COUNTY ASSOCIATION.

THE MERORLAL BELLS FOR CANTERBURY OATHEDRAL.
The annual geueral meeting of the Kent County Association was held on Easter Monday, nt Chathan, when about ninety members from different parts of the county attended. The delightful spring weather was an agreeable contrast to that experienced at Asbford last year, when a grierous northerly blast aflicted even the stoutest chest. True, the wind was in the east, but there was not much of it, and through the greater part of the day the sun shone brightly. Tho towers open for ringing were Chatham (8), St. Margaret's, IRochester (8), Gillingham (8), Rainham (8) and Cliffe-ait-Hoo (8). By kind permission of the Dean, the Rochester Cathedral tell were available from 6 to 7 p.m.
At the committee meeting, held in vestry of St. Mary's, the report of the sub-committee appointerd to examine the tenders for the two memorial bells at Canterbury was read and adopted. It was also docided that auy inscriptions on the bells shouled be in English. The committee agreed that the shillings demanded of the members towarts the cost of the dinuer should be put to the war memorial fund; £3 3 s . was woted towards the rehanging of the bells at, Clife-at-Hoo. Servico followed at 12 noon. It is inferesting to notice that the association service at the last meting held at Clatham in 1901 was the very last held in the old durch before its demolition. The fine old Norman arches in the west wall being part of the origimal charch. much older than the building pulled dowu in 1901, are still retained is the new clurch.
The prayers and lessons were road by the hon, secretary (the Rev. F. J. O. Helmore), and the Rector (the Rev. F. Wiltshire) gave the address from the test (Rom. xxi. 5),' We, being many. are one body in Girist, and everyone nembers one of anolher." Mr. W. E. Pitman, Mus.Bac., assisted ati the organ. Three liymns were sung, the same as those used last year, riz, the Taster Lymn, a special riugers' hymn. and "Light's abode, celestial Salem." The collection for the memorial fand amounted to $E 14 \mathrm{~s}$. 7 d .
At the dinner in the Working Men's Hall the association was honoured by the presenee in the chair of the Mayor of Gatham, Mr. H. F . Whyman, who is also churchwarden of St . Mary's, and 'a bit of a ringer.' The Rector was also present. Besides sundry offials and prominent members of the association there were in the hall one or two celebrities of the ringing world. notably Mr. John Carter, and a gentlenav came even all the way from Birmingham to attend the meeting!
The usual toasts were duly honoured, viz., 'The King, proposed by the Mayor; and ' Archlishop and Olergr, with special thanks to the preacher, proposed by Mr. F. White (T'unbridge Wells), to which the Rector jegponded.
The Secretary proposerl ' fire Health of the Mayor,' remarking that the presence of the chief civic authority at their gathering was most unusual. but for that reason all the more appreciated.-The Mayor, after returning thants, remained for a parly of the business moeting and sigined the minutes.
The secretary then read the report nurl balance sheet, both of hich went to show that the association continued to prosper.
Tho officers were re-elected, with the exception of the auditor, Mr. II. Drake being elected in place of the Rev, P. A. L. Clarke, who is resigning, on taking up the arduous posk of Ticar of Faversham.
Five names having been sent up for representalion in the Central Conncil in 1924, in conlest became necessary. which resulted in the reeleation of the present representatives, the hon, secretary recejing 64 votes, Mr. E. Barnetd $6 \overline{3} \mathrm{Mr}$. J. M. Cheesman 61, Mr, Groombridge 48. and Mr. W. Haiglt 47

This coneluded the business, and the company adjoumed, some to the Chatham tower, and others, it is supposed, to the other towere open for ringiug. A word of thanks is due 10 Mr . S. J. T. Shellock. socrelary of the Chatham bnid, for making sucli exeellent arrange ments for the diuner.

## THE SUFFOLK GUILD,

## COMMITTEE GET TO WORK.

A committee meeting of the newly-formed Guild was hed on April 7th, in Ipswich, and was attended by a very representative gathering. It was clear from those who were present, aud from letters received, that the new move had met with general acceptance throughout the county, and that there would be no lack of enthasiasm to make the new society 'hum.'
In order to get over tho difficulty of enrolling so many new members in time to record peals that are loeing rung, it was decided that all ringers who give their names and sulbscriptions to the diocesan secretary or to the district secrelaries before the annual meeting on July Zist next, be considered as members of the Guild as from Easter Monday
To our report of the Easter Monday meeting, wo might add that in opening the meetingry Aroldeacon Familoe struck the note which was evidently in everyone's mind, by saying that theg wero met as Suffolk men to form a Suffolk Society for Sulfolk ringing.
In supporting the proposal to call the rew society :The Suffolk Guild.' the Rer. H. Drake pointerl out that tho ancient Tanglish Guilds were more like our ringers' socielios than anything else at the present time. They were composed of men who were interested in one particular craft or art, irrespective of class or position, in order to further the interests of that craft or art; and the clergy were inaportant menbers of every Guild. Although they might not have any especial knowledge of the respective craft or art. Moreover, the wort : Guild " was a word which sounded more pleasantly than the sibilant 'society ' or ' association,' while r Suffolk Guild " lad a workmanlike sound, which would endear it to members as years passed by.

## SHEFFIELD DISTRICT ASSOCIATION. <br> LARGE GATHERING AT WORKSOP.

A large number of ringers wisited Worksop on Faster Moindny for the meeting of the Sheffeld Districh and Old East Derbyshire Asbociation, which meets on alternate Easter Bank Holidays in the Norlh Notts town. The rendozvols was the ancient Priory Chureh, and train, tram, motor-bus, bicycle and slurdy legs were all pressed into service to bring the ringers together. There were ringers present from Manchester, Wigan, Bolsorer, Gainsborough, Laneham, Sutton-on-Trent, Sheffield Cathedval, Sheffeld All Exints', Southwell Cathedral, Anston, Treeton. Haudsworth, Tickhilh, Slaveley Townt, Eckington, Warsop, Ordsall, Norton Woodseats, and the local company. During the early part of the day many of the visitors spent that time iu looking round the ancient priory and the newly restored larly chapel, before taking their places at the ropes. The bells weve ringing from $11 \mathrm{a} . \mathrm{m}$, to 9.30 p.m., with two brice intervals for at wedding, and the tea and Divino service, The methods rung during the day were Bob Winor, Kent and Oxfort Trebie Bob, Cambridge Sar prise Minor, Grandsire Triples, Erin Triples, Stedman Triples, Bob, Kent Treble Bob, Little Bob, College Singic, Double Norwich, Daffeh and Superlative Surprise Major, many of the laties present, with infomitable spirit and unbounded confidence, bring their skill. During the afternoon ringers' wives, lady ringers, Mesdames Haigh, Hardwich, Elese. Taylor, Weaver and Winrow were working like Trojans in preparing an excellent. tea, to which upwards of 60 sat down. Earlier in the day, while the writer of these lines was husy preparing tho bells and ringing chamber, some "Meddlesome Matildins
'Henrys' went into the Priong Gatehouse and reduced the seating accommodation from 60 to 40 . Wore we doun-hearted? No. Anrl they were forgiven. 'Wizere there's of will there's a way,' and we borrowed, and hired elsewhere, so that everything passed of as merrily as the proverbial marriage bell.
After tea the usual business meeting was held, presiden over by Mr. J. Lewis, supported by Mr. F. Watkinson, acting secretary pro tenn. Eight new members were duly elected, and the next meeting was fixed for Rammore. Shoffelci, on the frst Saturday in May. when the amual address will he given by the Lard Bishop of Slicffelt, and four or five presentatious will he made at the meeting following.
Tlie Rer. S. Demison, in the absence of the Tiear (Canon d'Arcy) gave the ringers a most hearly welome to Worksop. and hoped everyone would enjoy their risit.
Mr. Chas. Baker (Gains5orough) mored, and Mr. Frank willer (Sheffeld) seconded, a hearty role of thanks to the ladies for providing such an excelfent spread anci devoling their tinge to the task on such a beautiful day: Mr. Willey also alluded, in eloquent terms. to the beauties and antiquities of tho ancient priory.-Mi', H. Haigh hriefly replied for the ladies, and a further vote of thanks to the chairman and secretary and to the Ficar (Canon diArcy) For the use of the belis concluded the meeting.
A short service in the lady clapel, conducted be the Vicar. followed, and the tower was then again wisited, and the bells were lowered ir peal al 9.30.

## BEDFORDSHIRE ASSOCIATION

THE QUESTION ON GRANTS FOR BELL RFSTORATION.
The anntal general meting aud luncheon of the Bedfordshire Association was held in St. Paul's Mission Room, Bedford, on Eastel Monday. The meetiug was preceded by a service in St. Faul's Churck, at which the Kiev. L. Ih. Leviti (curate of All Saints; Bedford) was the preacher, aud gave a most iuteresting and original address.

The Rev. Canon W. TY. O. Baker, president of the pssociation, presided at the lunch, supported by the Rev, L. R. Levitu, Mr. E. Ransome and Miss E. Stcel, vicopresidents, and mombers from mosi of the affilialed towers. A large number of Northamptonshire friends were also present inchding Mr. D. J. Nicholls (hon. secretary of the Central Northants Association). At the busiaess meeting, the President, beford reading the 40th annaal report, drew altention to the fact that the committee had denurted from the usual custom of presenling the report and balance sheet in manuscript, and had had them printed. The report, which was a satistuctory one, and recorded steady progress, was unanimously adopted.

The accounts, which hat been andited, showed a balance in hand of ex4 6s, $1 \frac{1}{2}$ d., beiug an increase of nearly $E I$ ovor that of last yenr. -The balance sheet wis considered very sabisigctory, and unamimously passed.

Canon Baker was unanimusly re-elected president.-In returning thanks, ha said the association luad been in existence over 40 yeurs, and during that time lie had only missed about three meetings.
The vicepresidents, Mr. Charles Herbect (Wobura), Mr, Edwiv
 were reelected, Mr. E. Ranson, in a moving little speech, in reply, said they latd been worthily comanlimented thet nopaing in St. Iaul's. Thouth he had passed fout-score yeats, he loperl to be with them a fittle longer, and then they mighu uncet in another sphere which they Knew notling of but which faith most clearly pointed to.

The hon, sceretary and hon, auditor were both re-elected, the President humorously remarking that they might seem greedy at Duastable to have bath president, and secretary, but added, there was one thing, they didn't fall out much.
Siss Steel thon moved: That a grat be made towneds the festora Eion of Tempsford bells, and pointed out that Tempsford was only a small village, which was wying to taise e450 for rehanging their peal. The hand there was attached to the associntion, but at present Tad no bells to ying on.-My. Harlow seconded the resolution.
The President eqid that in thepast fley had alweps set their face against makintr grants, as they felt, with no special fund, fhey onght bot to use their ordinary funds in that way. The Fon. Secretary pointed out that ab the lact Central Council aneeling, at Lincoln, Lhis question was discussed; and whilo being in heary agreement with Miss Steel, he could not see how they could make grants out of a sub. scription of Is. per year.
-fiter considerable discussion, the Fresident put the following resolution; * That it sum of lwo guineas be given towards the Temps ford Restoration Fund, "and this was cartied namamously.
The formation of a belfry repair fund, as suggested by the Central Council, was ordered to be placed on the agenta for the next anuual meeting.
Canon Baker then maved that a bearty rote of thanks be given the Rev. L. R. Levit for his ardness at the sorvice. He said he had himself given a good many, and had listened to g good many obliers in his time, but he eertainy thought Mr. Levith's was the most original he had ever heara.-The Hew Rev. L A L Levitu in preply, said they hat a funny trick at St. Paul's of turning to him for all sorts of occasions (laughter), fo preach fo extra special congregations, but that was a congregation of frjente, as ringers wewe frieads all the world over (applause). Te would bok forward to mecting the momluers another year.-After votes of thanks lad been passed to the Viears of St. Paul's and St. Peler's for the use of their bells, the ringers wended their way to the towers, and ringing fook place until a late hour.
During tio afternoon the members were very pleased to welcome the Jow Vicar of St, Irall's (the Rev. Wh. A. Robins) who lins been seriously ill, and only allowed to get out of bed in the aflemoon. The reverend gentleman wisited tho ringing chamber at St. Fanl's, and gave ir very learty welcome to the members. He promised at all times to do all in his power to help the association.

A notgwowhy feature of the day was the reyy high shandmed of the ringing: the second toncls being a well-sturek course of Carnbridge Surprise Royal, the first in the connty. Other methods rang were: Stednan Triples and Caters, Grandsire Caters, Bob Major, Donble Norwich and Superlative, Cambrige and London Surprise Major, and Treble Ten, at St. Paul's; and a number of Minor methods at St. Peter"s. Tho gathering was wery succesfuI, aud, in the words of an old member, one of tho best meetings the Bedfordshire Association had ever held."

## OXFORD GULLD 'PASSIVE RESISTERS.'

It is strange to read of the action, reported last week, of certain members of the Oxford Guild in taking up a line of passive resistance by withholding subscriptions because the annual festival is always held at Oxford. This is the first time in ringing affairs that we have heard of the adoption of such an attitude in an endeavour to achieve the desire of a section of the members, and, in our opinion, the policy is a dangerous one. It is likely to lead to the disintegration of any society, and, in any event, the logical result must be that the dissatisfied ringers, if they continue to refuse to pay their subscriptions, will eventually allow their membership to lapseand the place of the annual festival will cease to be their concem at all.

Questions such at that which seems to be disturbing the Oxford Guild must of necessity be settled by the majority of the members who attend the annual meeting, at which every member has the right to be present and vote. We know the argument that is likely to be raised against this; that when the meeting is always held in one centre, those who reside in the distant places are already handicapped in getting such an arrangement altered, because the smaller numbers who can attend from these areas are outvoted by those who have the meeting in their midst. It has to be admitted that there is a very real disadvantage here. But the Oxford Guild has some very live and admirably managed branches, and if there is a really general desire for a ' movable' festival, strongly backed resolutions from these districts would, we have no doubt, carry weight-certainly they would have far greater influence than any policy of passive resistance.
Many Associations adhere to the plan of holding their annual meetings in different places, and usually the scheme works very well, the great points in favour of this scheme being that it brings the principal meeting of the year to the very door, almost, of all the members in turn, and in this way does something to stir up interest and enthusiasm in districts where there may otherwise be little to stimulate them. The Oxford Diocese seems one peculiarly fitted for the application of this arrangement, and formerly adopted it, for there are portions of the diocese, particularly North Bucks, from which Oxford is almost inaccessible for such a gathering as the Guild festival. While the City is, indeed, the centre of diocesan church life, it must be remembered that the men who make up the ringing Guild are not for the most part men of means or leisure, and a journey from the outlying portions of the diocese to the Cathedral is a

drain upon the resources of time and money which only few are able to stand. It seems, therefore, only equiable that the venue of the festival should be moved to the various districts in turn. All the same, the action which has been taken of withholding subscriptions is not, in our view, either right or best calculated to achieve the object which it is hoped to attain. Constitutional methods are wisest in the long run, and in this case " passive resistance, if persisted in, must eventually put the protestors out of court.

IMPRESSIVE CJREMONY AT NEWCASTLE CATHEDRAL.
To the Glory of God and in honoured memory of the members whom wo bless for their unselfislo Sacrifice in giving theit lives in the Great War, this tablet wis erected by the Durham and Newcastle Diocesan Association of Change Ringers.
Thus runs the superseription upon the talnge, conlaining the ammes of 41 members of the Dinham ant Newrastle Diocesan Association, unpeiled at an impressive service in Neweastle Cuthedral ou April 7 th.
The service commenced with the liymm. "God of the living, in whose eyes, followed by an address by the Vicar of Neweastle (Canon G. Newsom, M.A.), who sati many of those present that clay were thinking with molancholy pride of their dead eonnades, who, though hating war, stood forward to offer themselves when the call cante. That was a great doed; and withont them, and others like them. the world migits have become a hopeless place.
After a few prayers, said by the Vicar, a special lymm for rinders. composed by Mra. W. Pemuingion-Bickford. "Tather! King Immortal!' was sung kneeling. During the next hymu. 'O valiant heards, whe to your glory came,' the choin' clevgy, relatives of the fatien, and congregation, proceeded to tho memorial, which is placed on the west side of the southeast pier of the tower facing the belfry door.

Onnou D. Wrillians (Vicar of Bamlmugh), in unveiling the memorial (which is smmounted hy the arms of the two dioceses. enamelled in colours, and has it decorative scroll as a border ormamented with bells), sajd he deemex it a greal honour nad high privilege to be permilied to do so. He owed the homour. not only to the fact that loe took a keen incerest in change ringing, but also to the fact that he representied the helfry whely liad been the hardest hit in the two connties. They faul lost six ringers out of the efflat who had joined up, and one of the six was in Holy Orders. The, were all men of promise whom they conld ill spare. the two counties. ## NEWMARKET'S NEW TENOR.

COMPLITION OF A TWENTY YEARS OLD SCEEMEF.
About twenty years ago the five bells at St. Mary's Church, Newmarket, having become unsafe for ringing were rehung in a new iron framo on steel supporting girders aud the 3rd bell recast, Messis. Taylor and Co, doing the work.

It was loped at that time that sufficient funds would be forthcoming to carry out the suggestion of Mr. F. C. Turner (hou. treasurer of the Jiy Diocesan Association, and of the Beli Restoration Committeb) that a new tenor bell should be added to make the jing of five, which were in the minor key, into a major six. This unfortunately did not materialise, but the commitees agreed to have the frame constructed to carry six bells, and a new tenor added when funde would perait.

Subsequently other work in the church intervened, and the matier dropped for the time being, but the idea was not allowed to $b$ lost sight of. Since the end of the great war, when prices of metal were coming down, the matfor was again taken up, and last November a meeling of the Parochial Churel Council was held to ronsider estimates from various firms, when if was deoided to accept the lender of Messrs. Taylor, of the lamous Iroughthorough foundiy, and the order was duly given.
The new bell arrived recently, and ts a magnificent spetimen of ihe belfounder's art. Its weight is 21 cwt. 14 lb, and note $\mathrm{E}_{\mathrm{S}}$ flat, and is tuned on the Simpson principle. Many of the parishoners visited the church to see tt before fil was hauled up in the tower. The hanging, whind is ou ball bearings, was completed in four days ly Messrs. Taylor's hellhanger, and the bell was yung up and tested by Mr. Turner, who expressed complete satisfaction both with the ease of ringiog, and also to the grand, full and molow tone it gave ont. On the occasion of the dedication, the old five bells were rung before the service. The clergy, consisting of the Ven. W. T. Farmiloe (Archdeacon of Sudbury), the Rev. J. Prankerd (Rector), and the Rev. B. A. Griy, proceeded ta the ringing clamber, which is on lie ground floor, and open to the church. Here the Archdeacon repeated the dedjeation prayers, and a few rounds were rung on the sim bells as the clergr returined to tho chavcel. Pealm 150 was then sung, and the hymn, We love the place, 0 God.' The Archdeacon preached from the text Numbers x. 2. "Make thee two trumpets of silver-' and in the course of his pemarts, said The felt it was not only a plensure, but a privilege to be pernitted to lake part in that service, because he knew it meant the crowning of many years of work giren, he was sure, in a spirit of love and failh for the grenter glory of God.

The hynur, " Lixark, hark, my soulr was then sung, and the eerrice concluded by the Arehdeacom pronouncing the Blessing.
After the service, several touches of Grandsire Doubles aud Bob Minor were rung by the loul ringens, many of the congregation staying to watch whilst others went outside to hear the effect of the new bell and the fash improvernent it has made to the peal, the general opinion, which was fieely expressal, being one of praise for the grand tome of the new hell. Messrs. Taylor and Co. are to bo congratulated on the splentid splice they have made.

## TWO IN A DAY.'

## To the Editor

Sir,-While hearlily congratulating Miss Rose A. Boll on her feat of ringing iwo peats in one day-and this is nore remarkable as one of them was ber first peal-your remarks in ' Belfry Gossip' auent the Leicester lady who did similarly, but, one was false, does scant justice. My daughter Hilda, at the age of 14, rang four peais in thrce days, concluding with two in oue day of Stedman Caters and Donble Norwiols. Both peals were accomplished within 72 hours, and I have yet to read of youth of cither sex equalling this parformance. Montlis afterwards, the composition of the stedman Caters proved to be false, but that does not invalidatic the practical part of the ringing. You cannot put back time and say what has been has never been, and there is no reflection on the ringers in a peal becanse of the fault, of the composer. The fact remains, whatever techuical crror there may he in the composition. Because the winner of a race discovers that the prize is a dud, it foes not disgunafify him or rob hirs of the fact that he accomplisher what ho set out to perform. Of course, I am naturally interested in this. and hate no fartention of forgelting it. What a Gillbertian situation would be catsed if a band rang a long fength of Minor and claimed the record! You could not deny it, yet of every 5,000 of Minor over 4 , 000 are false! I may add, apart from the above, that on August 3rd, 1814. I rang two poals of Superlative and Doublo Noprich for the Cenluat Northants Association, in which Miss Evelyn Steel, of Beflord, took part.-Tours truly,
W. WILLSON.

Dear Sir,-Whilo heartily congratulating Miss Rose A. Fell on her performance on Easter Monday, she is not the first lady for ring two peals in one day. Miss Fhyllis Fare and Miss Elsie Brandon, of Petertorough, bolh rang in liwo peals: a peal of Minor at Burton-upon-Stather, and Bob Major at Barton-on-Humber, Lines, on Nov 12th, 1921. Miss K. A. Jutson of Peterborough, rang in two (onc on tower and one on handbelis) on July 31st, 1920.-Tonrs siu eerely,

ROPERT RIOHARDSON.
Dear Sir,-On Mondar. August 3rd, 1914. Miss E. Steele, of Bedford, rang two peals: Double Norwich at Finedon, and Superlative at Irthlingborough. She was the first Indy to ring two peais in ong diay.-Tomre truly

## NEW PEAL OF SIX AT EASTRINGTON.

 THANISGTVING WTMORJAL DEDIOATED.The new ring of six hells at the Parish Chureh, Eastrington. Yorks, was dedicated on Easter Monday. by the Bishop of Hutl. The bells form a unique memorial, inasmuch as they lave been provided as a Hianksgiving for that safe return of men from the parish who served in the late war.
Thic new bells have been recast from three ancient bells which formerly existed, and dated bauk ta the 15 th and 16 th centuries. The work has been onrried out by the famous firm of Messis. Gitlett and Jolmston, of Oroyicon. An entively new steel and iron frame las also been prowided, and tha bells are hung on ball bearings in the latest and mosit scientific method. They aro tuned on the five trone Simpson principie, in the key of $\mathbb{C}$.
A larre number of visitors attended from Howden, and the sur rounding villages, and extra seating accommodation had to be proFided. The serwee throughout was of a most impressipe charactel. Following tho Bishop's sermon, tho choir and clergy proceeded to the west end of the elutrel to the singing of "Angel voices ever ringing.' The rangregation tumen towards the tower, and the Bishop. ofter boing called upon hy the Vicar, offered suitable prayers and solemnly dedicated the bells to the glory of God and for the benefit of His church and as it thanksgiving for the return of men from this parish who served in the war."

After a bricf silence the hells rang out a short peai
Further prayers by the Bishop followed, and the procession reformed, and returned to the chancel furing the singing of the hymn.
Fling. Je bells, your songs to heaven." The Te Deum was gan immerliately hefore the Blessing, which was pronounced by the Bislap.
In tho coure of lis sermon the Bishop satd the parishioners of Eastrington had carried out a mennorial in a most appropriate manner, and onle which he feared was often fargotlen. At the east end of the churent thep had erected over the altar a memorial to those who liad fallen in the war, and now at the west end of the churen they bad a menorial for all time for the men who roturned कीfoly from the war. Nothing could be more approprinte. Thanksgiving was a thing they shonld alway remember. No one could say it was chance ou' luck when one man was taken and his brother left, and if Gof had spared a man's life it meant that 再e had same mork for that man to do on His belalf. When they heard the bells ring as a call to the elutuch services they sliould renember was a call to ench one of them. and not merely for someone else.
Tho bells were again rung after the servica by the following Howden vingers: F. Smith. J. A. Sherburn, D. R. Smith. J. P. Powls, F. Philpot and J. Thompsan.

Other ringers taking part wero Messrs. J. W. Waker (Howden) W. A. Hudson, A. Hatheld. G. O. Tcry (Hemingbrough), C. F Tohnston and A.J. Trappitit (of Nessrs. Gillet and Tolnston), G. FI. Robingon (Derby), and W, Rohbius (Norlh Cave).

## DOUBLE GRANDSIRE.

## To the Editor

Sir, -Mr. Hins is quite right in pointing out that the six-scoro of Double Giendsire Doubles in the C.C. Collection of Doubles, Minor and Triples is false, aut I must apologise to the Exercise for the mistake. The fact is that Grandsire, Roverso Grandsire and Double Grandsire, Doubles and Caters all break the q sef, rule in their construction, so that you cannot arrange all the rows in plain courses. Triples is, however, rifferent, and the thres false rows which Mr Hims gives, together with the handstroke lead of the treble, are all aut of course; therefore, they uspnot apprear at tho treble's backstroks lead if you ase JIolt's singles, or reverse the rows after an ordinury single; that is, let the bell in the lomit go in front of the treble.
In Doubles you can reverse the rows without singles, and in Double Gramdsire the q sef rule compela you to do so to get the extealt which is given below.

All obriously belong to the same a set, but in tho six-score the third member of this get appeare in this form, and is called a bob the rows coming up the reverse way round, and in composing 21435 Grandsire Caters we have to guard against, this very danger, 12453 and it seems proljable that the cxtent of Double Grandsire 14235 Caters would anly be got by the same rule. To obtain a six-score of Double Grandsire Doubles start from a hob lead, making Jrd's place whencver the treble goes to lead or behind and whenever she leaves the bad or behind. Omit the 3ud's piace whenever $1-2$ change places behind and whenever $1-5$ chango places in front on beliud; this produces 60 jows. Grandsire $\$$ halfway and end.

## ANNUAL MENHTNG HT ST. GLLES-IN-THR-ETEINS

One of the most successful anuual general meetings in the history of the Middlesex Comnty Association and London Diocesan Guild was held at St. Giles'-in-tie-Fields, on Saburday, April 7h, when about 90 members attended, and enjoyed good ringing and excellent company. Divine service was leeld at 4.30 p.m., conducted by the Lector (the Rov. W, H, Dhvies). A stirrius sermon was preached by the President of the Association (the Rev, F. R. Bonsey), who took for his text, St. Jolan wiii. l3-17. Reforing to whe presentday negleet of public worship, which was a considerable worry to all church workers, he asked his hearcers to considew the causes, when, having found them, they would perlaps be able to fand the remedy. If people were asked if they were Christians simply as a means of saring their sonls they uould probably say + Yes,' but that was mot true Chrisfianily, Real Christianity moant a life of servise to others, Curist inever appealer to men to save themselves, but always to serve others. To so many Christianity was not the dominant factor in life, but only an alterthought, a thing for Sunday, and isolated from everyday life. Tho real purpose of Churchgaing and Communiou did nol end in onrselves but was a means to greater end by service to man, a furtherance of the Kingdom of God. This was true of all ehurch worls. It was necessary to eliminato self. Tine reason of an faliog off in ringers was due to men faking up the work in a selfish way, wibhout consecration. It was a sad thing that so many professing Christians hever interpreted religion in such terms. Chureh to many is a formelity, one of life's decent convortions; but it should be a means of curing the social erils of the world, and ridding it of poserty, discase, ignorance, and wice. "We shouldi ask ourselves, added the preacher is our wark real service for God? He is asking if you are helping to win thr world for Tim. Let us do our best to do it."
After the service, an excellent tea was partaken of in the Church House, which was immediately followed tyy tho business meeting. The Rev, T. Ik, Bonsey (prosident) was in the clair. supported by Messis. F. A Milne, J. P. and T. Beadlo (vice-presidents), Wm. Pye (Muster). D. T. Coles and W. H. Hollier (Ion, secs.), G. B. Lucas and R Holloway (District Masters), the Rev. W. H. Davies, and nearly 90 memhers.
The President thanked the members for the great honour they had done lim in eleeting himi President of the Association. It was with a great dosl of diffarence that he xacepted the ofice, as he felf himself to be rimwortlyy. flowever, although ho felt very small amongst wheh gianle of the Exercite as they liad present thet day, lo could ring a liftle, and always did ing with his own ringers on Surdays. He folt it a great privilege to follaw their late president. Mr. King, who was tho best man the association ever had (applause) He started tho associalion, and carried it on almost to to-day, and he was a man that it would be inpossible to replace, He (the spoaker) thanked tie members very much for electing him, and added that ine would do his best to follow Mr' Kino's example.
Arising out af the minntes of the last munal meeting, it was reported that ptans for the brection of a memorial to tile late presjdont whe rearing completion. The funds in hatid amountea to e31 63. 6n., the inscription for the tablet had been decided upon, and it Whs hoped that the work woulr bo put in hand ad an early date. At the request of the members present, a slight alteration was made in the inserintion, and the plans generally werb approved.

BEST PEAL RINGING YEAR SINOE THE WAR
The report and balance sheet were adopted the former being taken as reaci. After dealing with the life and work of the fate President of tho Association, ispecially fin connection with his efforts on helalf of ringers generally, the report statos flat tle peal record for 1922 was the best since the war. Sixty-seven peals were
rung, 146 members tajing part, in them, an increase of eight peals rung, 146 members taking part in them, an increase of eight peals first peals, and 53 their first peals in a now method, or on a different number of bells, including 21 in Surprise methods. Amongst the motro noteworthy of these peals were three of Canibridge Surprise Heximus, one of which was rung at St. Mary-le-Bow. Cheapside, a remarknhle lieavy-bell achievement in atifficult method. The first peal of Midalesex Surprise Royal ever rung was accomplished durng the yenr, and the firet peal of Grandsire Cingues rung by
the nssociation was performed on handbells, conducted by Mr, $A$ f. Pulling. The conductors of peals mumbrred 22. A largo mumber guarter-peals were rupg, no less than 161 lreing recorded, gud it was mentioned that Tealing (St, Marys), Isleworth and Acton led
the way in this Yery satisinctory feature of Sunday Service rivging With 27, 24 and 23 quartar-peals respectively. During the year 5 . liew members were elected, including the St. Mary's, Twicken
band, and the total membership is now 684.
The balance sheet slowed a credit. to the Central Fund of 21617 s prospeetir against 817 Be. 5d. at the end of last year, but with a prospectire cossiderable saving in the casts of the annual report, the the future was looked forward to with confidence.
The whole of the officers of the association were re-elected.

## LIFE RINGLNG MENBERS' SUBFCRIPTION REDUCED

A recommendation made by the Central Committee that the subscription of lifo vinging members he reduced to 5 s . was carried.-In proposing thie, the Hon. Secretary Mr. C. T. Coles) stated that tite recommendation was not made because the higher subscription had been a failure; that not being the case During the threo years the ligher subscription had been in operatian the number of lifo members elcoted was quite up to the usual average, bul it was thought that outrocunty ringers joining the association wita the object of ringing a peal or two should lave the benefit of the first step in reducing subscriptions. The committee only regretted that Whey could not yed recommend the reduction of all subseriplions.
Mr. Wr. Hewett, who stated that he was one of those who had objected to the raising of this particular subseription, seconded, and, as stated above the recommondation was carried.
District Iules I and 5 were altercd, making it in order for the members to elect district officers at tho rospoctive district amual meetings, instead of this being done by the district committeens.

The action of tho hon, secretary, in writing a lotter of sympally io Mrs. Shurtheff, daughter of the late Dr, Nichole, of Boston, U.S.A., on the sudden death of her father, was ondorsed by the members standing in silence for a few moments.
It was decided that the mest anoual general meoting slould bo held ab Fulliam.
Iearty votos of thanks were acoorded the Rev. W. H. Davies for his hospitality to the members of the association that day, and also to Mrs. Devies and friends, who had so nbly assisted at the lea tables. The former very suitably replied, stating that they felt honoured at tho presence of so many members of the association.
Thanks were also given to Canon Carnegie (St. Margaret's, Westminster), the Rev. W. Rennington Bickford (St. Clement Danes), and tho Rew. W $l^{\prime}$. G. Sandwith (St. Barthotonew-the-Great) for placing their bells at the disposal of the members. It was to be greally regretbed that the Rector of St. Clement Danes had to withraw his permission at the very last moment, owing to a serious case of illness near the church
Tha ringing done during the day was of a very raried oature. Quite a large number of ringers visited Str. Bartholomew's, and rang several 120's of Grandsire and Stedman Doubles on the PreReformation pea] of five and made an inspection of the very ancient church, with one exceptiou the oldest in London. Othor members fook part in touches in several methods, including Cambridge aud Bristol, at St. Giles'-jn-the-Fields, whilst after the mr img a liuge company wisited St, Marganet's. Westminster, where Mr. W. Fewett lad all in readiness, and ramg touches of Graudsire and Staman-Gaters, Treble Ten and Cambridgo Surprise Royal.
A very pleasant meeting ended all too quickly.

## THE NAMING OF METHODS.

One of the most mysterious things about ringing is the curious manner in which certain words and names have crept into use in connection with the art. They have come in the process of time, though no one knows their real origin. The mists of the past surround them, and in these days we cling to them largely for the sake of tradition, but without knowing exactly why they came to mean what they at present convey, or how they came to be used. How many people, for instance, can tell us why the word 'Grandsire' was applied to the method, or whence comes the word 'Bob' as applied to Treble Bob? So with many of the names applied to other methods, they are presumably just the designation given at the caprice of composer or ringers, and in not a few cases they are ludicrous, and would seen so to ringers were it not for their familiarity. There is no reason, however, why these absurdities should be amplified and perpetuated when the opportunity occurs to remedy some of the ridiculous appellations of the past. Yet, in the report of the Analysis Committee of the Central Council, which is to be presented for adoption at the meeting at Whitsun, there appear names for methods which some may think picturesque, but which we venture to believe will be a laughing-stock to the majority of ringers. To give such names as Dahlia and Geraniun, to mention only two, to Treble Bob methods seems to us sufficient to kill the methods for ever. We can only think the Conmittee adopted flower names for some of this group because some unimaginative persons in the past designated a few of the earlier methods by titles such as 'Tulip ' and 'Primrose.' Then, too, they have retained such a name as 'Trinity Sunday' for a Treble Bob method, 'Francis' Gentus, for a third's place Delight, and ' Ringers' Surprise 'for one in the highest group.

The Committee tell us that they have been guided in their selection by priority of use and the advisability of retaining as much as possible, consistent with present definitions, of all that has been in use in the past. There can, however, be no advantage in extending the absurdities of the years gone by, and while there is much less objection to the word "abbey' or 'castle " as part of a title, there can be no gainsaying tile fact that nothing sounds so weil as the plain name of a county, city, or town applied to the names of the methods we ring. There is still a vast number of such names left, and if there were not sufficient of these, even the rivers would have given us a better type of name than flowers. At any rate, we fancy there is something a little more impres.

sive about such titles as "Thames," 'Severn' and 'Trent,' for instance, than 'Bluebell,' 'Fuchsia' and ' Marigold,' which, pretty as they may be in themselves, savour of fairy stories and nursery rhymes, instead of a serious art. If it is desired to preserve the ancient names which were given to some of these methods, it should have been sufficient to place them on record with a reference to the new desiguation, and thus kept the identity of the ancient titles from being lost. For the sake of the dignity of the art we hope the Committee will feel inclined to take back their report and amend it so that the Exercise may be rid of some of these absurdities. At the same time the question of naming new methods might be taken in hand by way of laying down some lines for the future. Only last week the Leicester men, ringing the first peal of Mr. Arthur Craven's new method, felt that the name given was-not a suitable one. It is difficult to dispute an author's right to call his creation what he chooses-that is how some of the names in the past were handed down to us-but if the Council expressed their views as to the limits within which titles should be found, it is more than likely that they would be readily accepted, and, in any cvent, when the day arrives that all affiliated associations acknowledge the rulings of the Council as binding, the Council will have power to change any names that do not comply with their requirements.

## ANCIENT WILTSHIRE BELLS RESTORED．

The ancient village of Ogbourne St．George，Wilts，lying in a pretby valleg between two ridges of the celebrated wiltolire Downs，las charming pastoral surroundings，and just below the venerablo parish charch the clear waters of the Ogbourne，a Lributary of the Kemet， flow placidly by．The church containg a grand old ring of five bells， with a nable tenor，described in Church Bells；by W．C．Lukis， M．A．，F．S．A．，as follows：－

1．To bee the Iaading bell，
To prayes and ring well．
I was given by Master Thomas Baude，R．T．，July fifteentlie， 1625.

2．God be our guyd．IR．B． 1603.
3．Gere thanks to Gol．R．B． 1603.
4．William Goddard，William Dixhon，Curuchwardens．William Purdue and Thomas Purdue， 1652.
5．William Goddard，William Dixon，Gurchwardens．William Purtiue and Thonas Purdue cast meo 1652.
For many years these beautiful bells have been pructically uuringr－ abie buth they lave recently been relhung in a new steel and iron frame with entirely new futings and ropes by Messrs，Gilleti and Johuston，and，needless to say，the work has been admirably dono． The tono of the bells las been greatiy inproved by careful tuning．
The Vicar（the Ikev．A．H．Smith，M．A．）has worked with oharacter－ istic energy iu collecting tie funds amounting to sj75，and a fur－ ther sum is reguiced to curry oul somo necessary tepairs to tho tower and the provision of a now floor．
A dedication service was held on Saturday，April 14th，when the openiog ringing was performed hy lacal ringers，and their experi－ ences were not too happy，the transformation to the eusy－going luelis somewhat upsetfing them，and one enthusiast soon harl a stay off．A number of ringers from neighbouving towers were also plesent，and the bells wers kept going until a late hour．
The riugers were entertained to tea in the Parisif Room by the Vicar，to whom a vote of tharks was aceorded for his kind lospitality．
The Rector＇s subject in his sermon was a unique one．It was based on simplicity and the snperiority of all things yepresonted by simple words or monosyilables．＇In the farm，＇he said，＇you，have the sheep，the borse，ho com，the ox，the poat，corm，wheat，hay．In life youn have love，light，food，slcep．All tha best things were ex－ pressed by simple words．What more musical word could you find than that of＂bell＂p＂The preacher congratulated the people of Og－ bource on their efforis which had culminated so successinuly that day，and on the compasatively short period which hacl elapsed from the inauguration of the scleme to the completion of it．He greatly regretfed that indisposition had prevented the Archideacmon of Willi－ shire from performing the ceremony，which he had been ealled upon to do in his place．
At the conclusion．Mry E．Bishop，of Swindon，proposed a liearty wote of thanks to the Wicar for his lospitality，aud expreseed his en－ tire satisfaction at tho cxcelleat way in which Messr＇s，Gillett and Johmeton had restored the lells．Mr．O．F．Johnston seconded the vote of thanks，and expressed the hape that the Ogbourne ringers would soon master the art of change ringing．
Thus another of Wiltshiro＇s grand old rings bas been restored， and it is safo to say that if the bells．Frame and fittings ure properly cared for they will continue to ring ont then mossiages for many generations to come．The tonor is $18 \frac{1}{2}$ owt．in E．
In the adjoinitg village of Ogbourne St．Andrew there is another interesting ring of five bells，with a Pre－Reformation tenor，and the Rev．W．C．Lukis in tho book allowe referred to says：：The tenor belt of Ogbourne St．Andrew，which was cast in the 15th century，ant weighs about 15 cot．，cannot be surpassed for richness and dignity of＂tone．＂The bleck，letter inscription is＂Trinitatem adoremus．＂

## ARCHDEACONRYOF STAFEORD SOCIETY．

The last quarterly meefing of the society＇s year was hald at Sedgley on Saturday，April 14th．Bewween forty and fifty members attend－ ed，which was a very fair muster，considering the inclement weather which prevailet．

A sliont service was beld in diurch，at which the Rev．Dr．Swindell （Vicar）delivered a helphit address．A bountiful tea was provided in the Scinolroom by the wives of local ringers and was greatly en－ joyed．The Rev．Dr，太windell was present，and gave che company a warm welcome to Sedgley，os well as a litter fatherly advice．－A vote of thande to him for his address and the use of the bells，etc．，to the orgetitst，and to the ladies who attended to the wants of the inner man，Was moved by the Rev．C．H．Barker，and carried with applause．

Handbells were brought into use，and several dunes were played． The ringing during the afternoon and evening comprised the four standard methods as well as touches of Cambridge Surprise and Double Norwich Major．

The Rector，in responding to a vote of thanks for his hospitality， said that as he had expected，the tesirability of the octave being completed in the tower of his beatiful old elurch had that after－ noon been pointerl out to him，hut ho was afraid it was impossihie at prosent．
It was depided to hold the next distriet meeting at Sunderland，on Saturday，June Znd．
After a walk round the beautifin gardens of the Rectory：the bells were again set groingr，and a 720 of Double Oxford hrought round．

## MIDDLESEX COUNTY ASSOCIATION．

## SOUTH AND WEST DISTRICT．

A most successful meeting of the Soulls und West District was hedd at Ruislip recently，when between 60 and 70 members and friends attended from Acton，Battergea，Brockley，Beaconsfield， Cheken，Claphann，Camberweli，Chiswiek Ealing，Fulham，Heston， Hounsiow，Hillingdon，Hanwell，Hammersmith，Iskworth，Kensing－ ton，Slaines，Windsor，Willesden，and the looal company．The rimgin管 commenced at 3 p．m．，under Else leadership of bhe Master （Mr．Robert Holloway），Tea，which had been arranged by the hon．secretary，was partaken of by 40 members，including the vice－ president（Mr．T．Beadle）．Again visiting the church a short tonoh was rung for service，which was taken by the Vicar the Rep．W． A，G．Gray），a lady ringer kindly presiding at the organ．
After the service，the Vicar visited the ringing chamber，when the customary vote of thanks was accorded him and others，whose kindaess will not readily be forgotten．Ringing was further in－ dulged in until 9 p．m．．the methods ranging from Bristoi，Cam－ bridge and Superlative Surprise to Grandsire，the higher methoda being for the finst time rung upon the bellg since their restoration． The＂go，of the belle is excollent in spite of sevent feet of rope． Silenes had long regned supremo in the old flint tower，and this added much to fhe enthusiasm displayed，and was partly responsible for the large gathering，while last and not least was the socinl side， which fulfilled to the full the views expressed in the article upon ＂Friondship in the Belfry；which appeared in a recent iesue of ＇Tho Ringing World，＇

Our tame diarist got a little mixed last weok with regard to Mr. Williem Rock Small's birthday. He was Worn on Nov. 12tin, and not April 29th, 1838, so the congratulations were a little previous. The
B]ack Country Veteran' lias been a ringer for more than 60 years, but his advanciug age now provents him from adding to his 330 peals.
Thene is still with us anolher veterau, who fifty-five ycars ago today took part in the 15,840 Kent Treble Bols at Bethral Green, by the College Youths. This is Mr. Ted Horrex.
Seven jerrs earlier, on April 27th 1861, the Ancient Socjety rang the then record of Stedman Cinques, 8,580 , at Cornhill.

## THE "COLLEGE YOUTHS" CERTIFICATE.

Dear Sir, I was asked by the Mailor. and oftcers of the Ancient Societ, of College Youths at our last business neeting on the 17th inst., to forward the following informalion, which we think will be of considerable interest to the Emercise, riz., that the cerlificate of the society was engraved by none other than the groat Bartolozzi himself.

Francesco Bnrtolozzi was born in Forence in 1725. In Venice, Florence and Milan, he etched seperal piboes on sacred subjects. I should be much obliged if yeu will kindly publish this information for the benefit of those nembers of the society who are scattered throughout the country, as it is only $\mathrm{b}_{y}$ means of your valuable periodical that we canl get sueh information to them especially as it enlances the actual ralue of the ectificate, which several experts assure me is now worth to collectors anything hetween 15 s. to 3 grineas. -Yours faithfully,

## THE CROYDON BELL FOUNDRY

## NEW BELLS AT TROWBRIDGE.

## FIRST PEAL OF TEN IN WLISHIRE.

There wis a great day for ringers at Trowbridge on Easter Mollday, when the hwo new bells added to the existing oclave to make the first peal of ten in Wiltshire were opened. The bells have been added by Messis. Llewellins and James, of Bristol, and are inseriberd as follow :-

Treble ( 5 d ewt.) - $\quad$ Lest we forget.' Harold Butelier, a parish church ringer, killed iu the Great War. P. A. Nash, M.A., R. B. liector. W. IT. Stanley and $F$. W. Saxty, Ohurchwardens. S. F, Hector, Ringing Master: C. Mi. Lansdowu, F. H. White, F. P. Garlick, HL Ledbury and J. A. Cooper, Committee. Eister, 1923.

2nd (64 cwt.).- In gratitude, 1914-1918.' Lucy Mackay.
This refers to the safe return of the late Mrs. Mackaf's sons from the war. The aame of the firm which cast them is also on each bell.
gathering of nearly 300 fingers was pregent for the opening, Among the towns aud willages represented were London, Bristoi (which sent thirty or forty). Bath, Wells, Newport, Frome, Shaftes hary, Warminster, Westhury, Devizes, Chippenham, Swiodon, Melkshav, Midsomer Norton, Powsey, Bratton, Steeple Ashton, North Bradley, Bislap's Caunings, Rowde Seend, Radstack, Holt, Bouruemouth, Milverton, Bradford-on-Avon, Hilperton, Wootton Bassett, Colne, Bromalam, Theading, etc.

The proceedings began with two houre" ringing on the old eight beils, and then, asgembling outside the Town Hall, the dimgers formed a procession and marched to the church, headed by the Comrades" baud. The church was fuli to overtlowing. A service was held, at which the Rev. P. A. Nasb, Rector. gave a shorl address of welcomo to the ringers, and referced to the circumstances leading up to the addition of the two bells. The lesson, from the service appointed to be used by the Salisbury Diocesan Guild of Ringers, was read by whe Rev. F. Li. Edwards, Fectol of Kington Magna, Gillingham, who is general secretary of the Guild. The actual 'openine ' of the enlarged parl was rlone by Trowbridge ringetrg, followed by a touch by a picked banc? from Bristol towers.

After b He service there was tem at the Town Hall. The chairman of the Devizez bramoh, Mr. C. D. ITegimbothom, opened the proceedinfs after Lea, and in the course of an interesting address, said: "This is a red-letter day in the Church listory of this county, and in the history of the Devizes brauch of the Diocesan Ringing Cuitd, for we have wiluesser tho formal opening of the first peal of ten bells in both. We are I bink, quite naturally, resy proud that our brauch of the Guild shomld have this homour. I have heard that this brameh also contains fhe frst peal of eight rung as an eight for ringing in the whole nounts, viz, at Bishop's Camings, mad if this is true we lave an additional reason to be proud of our [ramel. We naturally think on an oceasion like this of the donors, througla whose generosity the peri of elglat in the parish clurcla has been aurmented to tent As most of you are aware, one of the bells was given by the late Mrs. Mackay in grateful memory that flurough the mercy of Gonl her two sous were spared in the recent deplorable European conflict. Ono cannot help thinking what a splendifl method of showing gratidude to Amiahty God this is. The other hell and the remander of the work, inclucling the chiming apparatus, has been enabled to be carried out througl the generosity of Trowbridge citizens (nof of one denomination only), and they may well be proud of the result. We are told on all sides to-day that the prevailing elements where Church work and wouship are concemed, are "apasiny's and "tudiflerence" But 1 say " Mr. Apalhy " and " Mr. Indifferenee ${ }^{1 / 2}$ never caused a clumph bell to be hung in their lives. No! To organise work like this needs patience, needs hope, needs a burning and unquenchable enthusiasm, and in the Trowbridge ringers, and especially in the man for many pears their leader, you have these gualities pepmonifert. I refer to Mr. S. J. Mector.'
Mr. Heginbothom went on to refer to the great general improvements whtch had been effected in the belfries during the last thirty jeals, and went on to speak of the constructive programme which he would like to see carvied out. 'First and foremost,' he continued. 'Wo want, a more definitely pronounced recogntion of ringers as Charch warkors. To emable us to achiere this wa must have hoarty co-operation lefweon clemy fild ringers. I strongly recommend that one or more fingers from every lower get a place on their respectwe parochial chnch councils. which now regulate and control parisin finnees, and with the assistance of the inoumbent obthin from them a grant, however small. either from an offertory or the freewill ofering funds, in airl of their Ringing Guild branch funds. A course like this woutd fave far-reaching advantages. The ringens woult have belter chances of obtaining instruction in change ringing. It Would also hring lefore them the fact that they must not be selfish and imapine their own tower and their own packets are the only consideration. From the incumbent's point of view it. would prevent any remarks, such as I have frequenty heard, that the ringers are unrecognised by himself or the other Church workers, and quite maturally he would expect to see that the branel, funds to which his parish had contrihuted, were properly expenden, and as a cortseguence would take a greater interest in the Guilds is a whole, and
in his own branch in particular. Secondly, I wish to see more mobility on the part of the ringers. Enen if they sre only round ringers they can and should visit other local towers, and rubbing shoulders with their fellows is bound to make them feel more keenly the bond of fellowstip and brotherhood which unites all who take patt in ringing the alurch bells. I want to see all ringers recognise their responsibilities. Never was there a time when sterling men and true were mone wanted in the Church and by the Churelt than to-day. If ringers and choristers-many of you are botl-especially the younger generation, will recognise their responsibilities there is no need to be disheartened. In the course of my wanderings over the South of England I have never met a body of men who on the whole are mare genial, more ready to help a comrade in distress, more ready to extend the hand of good fellawship. than church bell ringers: and as loug as the Church Ringing Guids ean count among their followers such men as Mr. Cave of Bristal; Mr. King, of Batlı: Mr. F. Green, Whe secretary of this branch, and others here present too mumerous to mention by name, we can look forward to the future with an unclouded wiston.

The Rector also spoke a few words, and the Rev. F. Ll. Edwards thanked tho Trowbridge ringers, on belialf of the Salisbury Guild, for the kinduess extended to the visitors.
Two bauds of handbell ringers came from Bristel, vepresenting respectively the Guild of St. Thomas in that city and the Guild of St. Philip. They gave"exbibitions of ringing outside the Town Hall before the processiou started, aud again from the platform of that building after tho tea, and were listened to with interest and arprectation.

Ringing was later resumed at the parish chureh, and seweral good tonches of Grandsire and Stedman Caters were rung. From every point of view the day was most successful.

## DEVONSHIRE GUILD

## THE COMLNG JUBLLEE.

One of the most successifu meetings of the Hifl-Devon branch was held at Kingskerswell on Saturday last. Ringers were present from Exeter, Chrisıow. Buckfastleigh, Plymonth, Dartmouth. Torquay and Paigutom. The mombers wero met at the church by Mr. Georga Facey. the local caplain, and the bells were soon seb going, some well. struek touelics of Keat Treble Bob, Stedman and Grandsire being rung. At 5 p.rn. the members adjoumed to the Lord Nelson Holal, where Hostess Sitter provided a splendid tea, the Vicar (the Rev. G. H. F. Fagans joiulag ihe members.

At the subsequent business meting Mr. H. W. Wilkes presided.
Mortonlampstead was chosen for the next guarterly meeting, and i.he claaimat tharked the Tricar for the use of the helis, also for joining them at tea.
In replying, the Vicar said it gave him great pleasure to welcome de Guild, an? he hoped they would soon pay them another visit. MIF. II. J. Hole (hon. secretafy) said he was pleesed to amounce that since the lush meeting foum hou, members lad been elected; also tire Rev. Brown and his band of Collatou, where a new peal of bells are to be orected rext week.
Tre Rer. E. S. Powell, general secrelary of the Guild, reminder menabers that neat year would be tho juthilee of the Guild. which was formed in 1874. He urged them to try and achiero something to commemorate hue mend. - Jressrs. E. Sheplerd and Richardson (Exeter) inlso addressed the meeting, and firtlier ringing was then indulged in at Coffoswell and Kiugskerswell towers.

## A NEW RECORD AND A PRESSING NEED,

One more record has been added to the annals of ringing. By their performance at Stoney Stanton on Saturday, that brilliant young band of the Midland Counties Association, who since the war have reached the highest standard in peal ringing, have settled, presumably once and for all, the longest length of Cambridge Surprise Major. Their peal of 12,986 changes is the limit obtainable in the method-until a composer can find something longer. We feel constrained to add this qualification, even though at the moment anything more than last Saturday's length is not, believed possible, for we have in mind what has happened in regard to other methods in the past. The success achieved at Stoney Stanton is a crowning effort on the part of a band whose performances have been of no mean order. and they will receive the hearty congratulations of the Exercise.

This peal raises once more the necessity, upon which we have dwelt from time to time in this column, for an official record of all compositions, in order to set at rest any question of disputed authorship. In the case of this record peal of Cambridge Surprise Major, three well-known members of the Exercise are said to have laid claim to the composition. Each has indisputably constructed this record length, and their compositions, we are informed, although not identical, are so far alike as to come within the definition of a 'variation.' The ringers of the peal made an effort to solve the riddle without arriving, we believe, at a wholly satisfactory result, and they have, therefore, appended the name of Mr. E. Hims, who appearsi to have been the first to publish it. If there had been in existence an official record of all compositions, this question could not have arisen, because the first author to register the peal would be entitled to the credit, in the same way as a person who patents an invention or registers a trade mark.

Before the Central Council meeting last year we advocated setting up such a reference file of peal compositions, and the proposal got before the Council in the shape of a motion, but it was loaded with another scheme to put the onus of proof of peals upon the Council. ## WARWICKSHIRE GUILD.

QUARTERLY MEDTING AT STPATEORD-ON-AVON.
It is quite a number of years since the Guild visited Shakespeares Listoric town, 1909 being tho last occasion, and a good uumber of members and friends availed themselvas of the opporturity of visiting the grand old church and making the acquaintance of the bells, upwards of 30 being present on Saturday week from Berkwell, Bir mingham, Coventry, Eraington, Nuraaton, Stoke, Tredington, and the local band. They were met nad cordially welcomed by Mr. Haynes, the leader of the local men, Mr. Wright, and several others: who lad everything in capital order, the bells and their fittings being exidently well looked after. Grandsire and Stedman Triples were rung during the afternoon.
Councilfor F. P. Lawson had kindy made arrangements for tea a tha White Swan Hotel.-The business meeting followed, presiderl over by the president (tho Archdeacon of Warwick), and the ques tion of a priated report was discussed, the bon, secretary beinr instructed to obtain eatimates.
Arraugenents were made for the monthly meetings in each dis trict, the hon. districteretaries being asked to arrange them in their own districts to the best aduantage, Nuncalou and Coventry districts taking tho first and third Saturdays in each month respectively.
A discussion took placs respecting menbers contributing to the cost of the deport, and ultimately it was decided to leave thr mitter in the hands of the ranual meeting in July.
Four new members were duly eleated.
A slight alteration of Rule 4. defining the qualification of hand bell ringers as members, was carried.
The Ringing Master (Mr. A. Roberts) moved a learty vote of thanks to Canon Melville for the use of the bells, and expressed the lope that flie interval between this and the neat meeting at Strablord would be much shorter than the time that had elapsed since the last.-The Arehdeacon seconded, and at the outset regretted it was not possible to have the Guilds' service in church. He congratulated the hon. secretary on being able, at the first attempt. to get the right side of Canon Melville, succeeding where he himself lad failed. He stated he knew previous applications for the bells had hecs persistently refused, but ho felt sure if the conditions of the Canon's permission were carried out it would not be long before Stratford was agsins visited.
After ter some hood ringing was accomplisbed, the methods rung being Grandsire and Stedman Triples, Double Norwich, Cambridge, and Bristol Surprise.

## BELFRY GOSSIP.

Noxt woek we shall publish the Central Council's Analysis of the peals rung in 1922.
A unigue performance is recorded in our peal columns. In a peal at Southampton two ringers took part, each of whom lost an arm in the latel war.
The conductor of the record peal of Cambridge Surprise Major on Satarday (Mr, Harold J. Poole) is still some months short, of the nge of 23 years.
I'lis performance stands out as one of the most remarkable of onr tire. A casual glance of the composition would be enough for most bob callers.

Although ini. Poole's peal ringing career only commenced in July, 1920. he has rung to diate 94, and has conducted peals of Stedman Triples and Catens, Treble Ten, Superlative, London and Oambridge Major, and Thoyal. He also rang in the 10,400 of Real Double Superlative, and a 13,440 of Bob Major, and has also rung peals of Double Norwich, Treble Twelve and Stedman Gingues. Not a bad collection in 23 yeans!
This record length is one not likely to he displaced in Cambridge Surprise Major, for, as far as present knowledge goes, this 12,896 is the extent of the method.
The Ancient Society of College Youths must have a valuable possession in the plate of their cerifioate engravedi by the great Bartalozxi. In view of the discovery, made after grent search by Capt. F. A. Yorke, a copy of the certificate lias beom sent to the British Museum.
Tho plate was probably engraved bewween 1790 and 1800 , but the figure of the century has been altered to keep pace with the times.
Twenty youre ego next Friday, viz., on May 11th, 1903, the record penl of London Surprise Major, 14,112 changes, was rung at King'a Nortion.
On May 10th, 1777, the Royal Cumberland Youths rang 10,200 Trehle Boh Royal at Shoreditch in 7 lirs. 40 mins.
Fifteen years later, on May 7th, 1792, the first peal of Graadsire Boh Maximus was rung at Southwark.

A long peal of more than a century ago, although not even at that tine a record, was the 12.312 Grandsire Cators at Painswiek on May 5 th, 1817.

The first peal in Dorset, Grandsire IMriples, was rung at Bridport O未 May 5th, 1887.
By an error it was indicated in our report of the death of Mr. 1 W. Grimes that lie took part in the Jong peral of Oxford Treble Bob at Debenlam in 1892. Mr. Grimes did not ring in the peal, although He was steeple keeper at the tower at the time.

Peals are never certain until thes last change rolls round, and it is certainly 'counting your chicken before they're hatched. "to write the report of it before the ringing begins. $A$ condactor in a tower in the South Eastern Counties, however, did this on the Royal Wedding day, lenving only the time to be filled in, in order to get the report into the local paper mext morning. In this case the peal came off.
Mr, Richard Newton, of Boston. U.S.A. and formerly one of the ringers at Manchester Town Hall, was martied at St. Paul's Cathedral, Boston, on April $9 \operatorname{th}_{\text {, Fo Mrs. A. Nelson. In the erening the bride }}$ and bridegroom were present at a dinuer of the staff of the Morchants' National Bank, and wore showered with rice and confetti and good wisles.
Mr. T. E. Sone, of Harwarden, Buffis Brae, Dunfermline, Fife, will le pleased to hear from any ringers in Scotland.

Owing to preksure on our space on account of the many peals rung for the Royal Wedding, numerous peals and reports, as well as letters to the Etitor, are unaroldably held over.

## LONDON RINGER'S SUDDEN DEATH.

We much regret to reoord the sudden death of Richard F. Forwart, which took place on April 24th. Deceasell was returning lome in the evening by tram when death took place. He had been employed for several years by the London County Council as a lam conductor, elthough he was a gurgical hoot maker by profession.
Mr. Forseard was a native of Cranbrook, Kent, where he learat to ring a bell, but it was only during the last two or three years that he had taken up change ringing. $H_{e}$ was making very good progress indeed, considering that his opporbunities for practising were limited owing to his duties. A member of St, Leonard's, Strontham, local band, he also mot the Ancient Society of College Youths whenever ho was able. All his peals have been with the tenor behind, and he was a reliable man in this position, whether on 8,10 or 12 bells.

Tlae funeral took place on Tucsday al Streatham Cemetery, and was attended by members of the Ancient Society of College Youths, who paid the usual mark of respect.

## THE EXTENT OF CAMBRIDGE SURPRISE MAJOR.

 RECORD PEAL RUNG AT BTONFY STANTONThe nttenpt by members of the Midand Counties Association for the record length of Cambridge Surprise Major was successful at Stouey Stanton on Saturday, the peal comprisilig 12,896 changes, being rung in 7 hus, 35 mins. Congratulations will go out to the band ripon their success.

It is possible there may be rival claims ta the authorship of the composition, which we give below. Before attempting the peal, the band made efforts to decide the question, and lave anpended to it the name of Mr. E. Hims, who first published lis figures in "Church Bels on Felbruary 28 z lh, 1902 . Qthe clamants. We understand, gre Mr. J. W. Washbrook and Mr. F. Dencl. Mr. Washbrook's composition appeared in * The Ringing World; ou April 14th, 1911. Alt three compositions are variations of each other, aud the peal as rung is yet another wariation.

On Saturday last six good men and true, the piok of the regiment, atfended by one lady and myself, boarded a bizs which was a cross between a bun wagon and an undertaker's vais, hound for that willage of musicians and pigeon flyers, Stoney Stanton. Just to show the contrariness of the sex, the lady said, "I hope the get it, just to stop some of them for a bit." Anyway, the old bus functioned aili right, and wo arrived in the to hear our good friend the steeplekeeper geiting the bells thp. ## DEATH OF WELL-KNOWN NORTH NOTTS RINGER

 AN APPRECIATION.The passing of Clarles Crawford, of Lavehans, and late of Ewst Markham, Notte, removes from the ringing district an juterestimg personality. His genialcountenance was an index to his heart. Eis tace was sunlit, and lie was a pleasing conversationalist. He came into North Notte in the early 'eighties,' at a time when there was a deartl of change dingers, wnd settled down at East Marklam as a farmer and miller. He was not there many yeats batore he com menced to work with assiduous perseverance to have the old fous bells rehung and wo ney trebles added to makg a ring of six, nud succeded in teaching his own band of riugers, afterwards conduct ing for them a peal of 5,000 changes. It is difficult to say how many peals lie lad rung, but he rang lis two first at Doucaster, under the conductorthip of the late Thomas Hattersley of Sheffield.
Aithough he was 67 years of inge, physically ho seemed to be en dowed with pedperua! youth. He rang his last 5,000 witli the writer on the South African Peace Day, May 31st, 1908, a peal of Kent Major at Gamsborough, He lad, however, rung several since, but ne record has been kept.
He would oycle 20 miles for a "bit of good ringing," and abay tell you he was guite a young man. The last time I rang with bim, after his long cycle ride, was at North Colinglams and Sutton-onTrent, when he loolsed the picture of robust health. We plamed many things for 1923, but ' Man proposes, God disposes.' The word seems to be divided into burce main classes: those who will not wor under any cincumstances; those who work only when duiven; ant those who work willingly and do too autuch. Charles Crawford belonged to the last class.

Yon might at times disagrec with his opiaions, but he never left you in doutat as to his mental whereatouts
To all bauds of ringers who visited East Marklaam his hearty we conse and hospitality awaited them. Eis left land nover knew what his rigltt hand gave arfay, and lee wos instrumental in helping many struggling villagers in their distress
He broke a blood-vessel on April 13th, lingered until the 17 h , talh ing most of the time of his demest, cherished ringing friends, past ald present celebrities, and then passed peacefully beyond the veil.
He was laid to rest on Firiday, April onth, in that peacaful, pi Euresque little gyaveyald of Tast Markhan, beneath the sound the bells he loved so well, aud there we leave him " Until the dr breaks and the sladows flec away.

## HERTS COUNTY ASSOCIATION. <br> SOAP AND WATER IN TET BELTRY

In his ammal repart, presented to the members on Enster Mo day, the Hon. Secretary of the Herts County Association (Mr. G. Cartmel) referred to the high state of effiency rovealed by a perusal of the peal list, which comprised one liandbell peal fthe first of Grandsire Cingues by the association), and 33 tower bell peals fron Minor to Cambutge Maximus, the association lueing tha first to have rung peals of Cambrirge Surprise on all numbers from six to twelve bells. The 'Service Ringing Page' of the " Ringiag World" had also offered ample evidence of real progress amongst various bands Most useful work had been clone in all the districts, but in the wat ford district the atbendance at meetings had been small. The general secretary appealed to the members in that area to rally round their district secretary even if it entailed the giving up of foothall matches. The thanks of the association were dug to the distriet secrelaries for their splendid work

After referring to ble loss, by death, of Mr, Jolin Dennis, of Kneld worth. Mr. F. Waterton, of Tring, and Mr. G. W. Steabben, formerl of St. Albans, who died somewhat tragically as the result of an acei dental shooting effray in Mexico, the lon. secretary went on to say that he was glad to notice that ' The Ringing World 'had recently commented upon the care of ringing chambers. Although there are still to be found some in that county which were made tho receptacle of the church's rubbish and unwaited furniture, pet on the whole their belfries were well kept. Fivery belfyy should have weekly sweep, and periodical application of sapp aud water. In man cases this could best be arranged by the xingens themgelves or b arrangenent with the respective Parochial Church Gouncils. The r port concluded with thanks to the anditor (Mr. J. Prewett); the hou members, without whose welconle financial assistance tle association' gphere of usefulness would he somewhat restricted; and the incum hents thlough whost gemerous permission members had been able to indulge in peal ritiging. There are still some towers in Hortforishir where change ringing is not pratised and it woild be a step formar If some of theso coulal be 'roped in ' befote the association enter

## THE PROPOSED SUFFOLK SETTLEMENT,

The difficulties which have arisen in ringing attairs in Suftolk, on account of the establishment of the new diocese of St. Edmundsbury and Ipswich, carved out of the old dioceses of Norwich and Ely, seem to be in a fair way of settlement. The recommendations which the committee of the Norwich, St. Edmundsbury and ipswich Diocesan Association have drawn up, and which we have no doubt will be accepted by the members, provide in effect for the restriction of that organisation to the present diocese of Norwich, thus leaving the county of Suffolk without a rival association to the newly-formed Suffolk Guild. The Norwich Diocesan Association will retain its touch with its Sufiolk members by constituting them non-resident life members upon payment of a sum of two shillings on the top of this year's subscription.

We think the recommendations which are now made will be generally looked upon as satisfactory, but the position has to a large extent been forced upon the committee. Faced with the fact that its branch in Suffolk refused to function as an integral part of the Association, there was little to be done, except to drop the attempt to embrace the new diocese, a large part of which had, neither geographically nor by tradition, any connection with the former diocese of Norwich. The desire among many Suffolk ringers for an Association of their own, coupled with the official backing which the new organisation for St. Edmundsbury and Ipswich has got, made any such attempt to hold East Suffolk and to "penetrate, West Suffolk almost foredoomed to failure, and the committee have been wise in realising this position.
The steps by which it is proposed to retain the Suffolk members as 'non-resident life members' may prabably meet with some criticism, as being not altogether generous. Members of 35 years' standing are to become honorary life members, but any lesser period of membership will involve the ringer in a further payment of two shillings on the top of his current subscription. This may be a comparatively small matter, but the treatment of performing members ought scarcely to be on any worse footing than that of honorary members, who, if of eight years' standing, may, on leaving the district, be excused, under Rule VII, from their annual subscription and become life members. This, however, will probably be dealt with when the recommendations come up for confirmation.
We are glad to see the possibility of this vexed question of Suffolk apparently so near settlement, and if the

members in that area are retained under satisfactory financial arrangements there is no reason wiy the best of good feeling should not continue between the two counties. Many Suffolik ringers of to-day have the most loyal affection for the old Association, and while circumstances have made the break almost inevitable, we have no doubt they will see to it that their membership remains, although under changed conditions. From a pealringing point of view the loss of two such centres as Ipswich and Leiston is a serious matter for Norwich, but doubtless efforts will not be lacking to replace these with equally active towers on the other side of the border.

## NORWICH, ST. EDMUNDSBURY \& IPSWICH ASSOCIATION. PROPOSED DISCONTINUANCE OF SUFFOLK ORGANISATHON

A special genoral committoo meeting of the Norwich and St. Edmundsbury aud Ipswieh Diocesan Association was held in the Welfry of SL. Peter Mancroft Cluurch, Norwich, on Thursday, April 26th. th the absence of the president (the Dean of Norwich), the I(ow. W. C. Pearson (Vicar of Henley, Suffolk) was voted to the chair. Supportiny him were Mcessrs, G. P. Burton, J. E. Burton, W. L. Duffieti, Denison Hayward, r. Knights, C. S. Tuthill, and A. L. Coleman (general secretary).

Letters of apology for non-athendance were received from the Rev A. G. Bisth Messis, C. D. Borrett, F. K. Berretr, D. O. Holmes, G T. Pegnall. E. J. Goate and E. E. Diaper.

Mr. A. $\mathrm{j}_{4}$. Colenan, $\mathrm{j}_{\mathrm{p}}$ reviewing the present position of affairs in comection with the St. Edmundsbury and Ipswich Diocesan Branch, satil that a new movemeat had been developing in Suffolk some weeks prior to its elimax at Ipswich on Easter Monday, and there had resulived from the meetings uff Ipswich on that day:-
(it) The formation of a new gssocintion (the Suffolk Guild).
(b) The dissolution of another association the St . Edmundsbury nnd $I_{p s w}$ jel Diocessan Association).
(c) The disbandment of a third body (the St. Edmuadstury and Tprwich Brancla of the N. ant St. ©. and I. Diocesan Association).
All these changes were of vital interest to Suffolk ringers, while 1.14e last pamed concerued inlimately the riugers of the N. St. E. naid I. Association also. The membors then present at Ipswich had rieclined to elect offecrs, and haf passed, instend, a resolution, 'that this branch cesse to exist,' Such a resolution, however, was uliera vires, as the branch laving leeed conslituted under the auspices of the Norwich, St. Edmundsloury and Ipswich Diocesan Association, could only be dissolved constitutlonally by and with tha consent of the whole assaciation. So comparalively few ringers had been preEenl it that meeting that the resolution was open to question as heing representative of the opinion of the members in Suftolk. He had, therefore, taken steps to obtain ab furst hand a real expression of opinion of that brameh, and he had now available something quite dohnite to $\mathrm{l}_{\text {ry }}$ before the committec. He had issued a circular and fucstionnaire to ali the district secretnries and leaders of companies in the Suffolk Branch. Tlie questionnaive was as follows:-
1.- How mavy ringers in your district or company have defnitely decided, to your knowledge, to continue membership of old Association: and their mames?
2.-How many ringers altogether do you anticipate will continue?
3.-Do you think it desirable under present circumstances to conthnue our N. and St, Ed, and Ipswich districts as organised? Or, if not, in any other form?
4.- Do you desire a clango in tille? If so, what do gou suggcest?
5.-Other romarks.

## COMMITTEDS RECOMMENDATIONS.

Tha replies received to that date represented some 222 members, of whom $n$ large majority decided to continue their existing memhership, viz.: 76 as honomay life members (non-resident), 120 as annual subseribers (to be presumed), Saven replies were adverse to continuation of district organisation; five yeplies were in favour of contimation of district organisation. As regarde the title two only replied in favour of the retention of tho present title; thrce were in favour of modification; while eiglit expressed a preferenco for reverting to the original styla, "The Norwich Diocesan Association, ${ }^{\text {² }}$ to cover the arca of the Norwich Diocese only. The majority, however, had expressed no opinion on this important point. Mr. Coleman udded that hare wero several seplies still outstandiug, End he loped the members would kindly send them in before the general meeting of the Association, to be held at Pulluam-Market on SaturAny, June 2nd.
Aftar a long discussion the committe decided to recommend at Hhe general mecting of memhere, that it is not desirable under the present circumstances to contirue the district organisations in Suffolk, mad twa proposals were put forsard for the future title of the Associntion, viz.: (a) The Norwich Diocesan Association; and (b) The Norfolk Guila (for the Diocese of Nonvich).
To mont fhe wishes of the members desiring to retain their memFership, it was resolved to recommend that ati members of 35 yems stanting should be excused any further sabscription; and, ipso facts become honorary lifo members (non-resident); also that all Euffolk memthers who havo paid their subscriptions for 1923 should, with a turther payment of 2 s., berome, ipso facto, lonorary life members (non-resident) in lieu of the usual fee 5s., and that members who liave not paisl their subseriptions for the curvent year will, on paymeat of two years' subscriptions ( 4 s .), become, ipso facto, honorary life members (non-residem). For new members the fece will be 5 s.,

The Secretary amounced that tho branch meeting to be held at Pullam Market on Whit Mouday, May 2lst, had been postpouol to Saturday, June 2nd, at Pulham Market, and would be constituted a general meeting of the association. Much of the business to be transacted at that meeting concerned the menbers of the Suffolk branch, and he hoped that they would be well represanted on that occasion.
It should be poted that any alterations in the constitution of the association will, under Association Rule XI, have to come up for confrmation at the annual general meeting of the association in September nart, and in the meanwhile the association stands constituted as hitherto.

A hearty rote of thanks was passed to the Rev. W. C. Pearson for kinuly presiding over the meoting.

## CENTRAL NORTHANTS ASSOCIATION. <br> GENERAL SECRETARY'S PRACTIOAL SUGGESTIONS.

There is a striking featared in the report of the general secretary (Mr. D. J. Nichols) of the Central Narthants Association, which has just been issucd. It is very pratifying to record, hed says, the steady growth of the Guilsborough district, which has increased in member ship and added one new tower to its number during the yoar. I regret, to say the Northampton district las lost 46 nombers who have been erossed off the books, which include the ringors of St. Sepulchre, Northampton, who have heen members of the associatiou for man? years. I hope they will reconsider their decision, ane before the year is out join the association agaiu.
The number of towers now in union with the association is 65 , decrease of two from last jear. There aro now 450 members, a de crease of 46 from last year, being 43 honorary and 407 ringing members. I would like to call the attention of mernbers to the fact thal there are 26 towers out of the 65 in union with the association which lave not a completer baud of ringers to cmable them to ring all thri bells for the Sunday services.
A great many bands, continnes the reparl, were depleted during the war, which is no doubt still being foll. But I venture to sug gest that there are other reasons which have also some bearing on the question which includes:-

Differences bedween ringera and clergy.
2. Differences amongst ringens themselves.
3. Not enough probationers being brought along to fill up the gaps as thoy occur from various chuses.
4. Those in control of the belfry not having sufficient patience in leaching begimmers.
5. Not snfficient opportusity heing given to promising young ringers to bet es conductors.
6. Others staping away because they do not get ringing "suitable to their taste when there are learners in the tower.
I would sincerely ask the members to give the question their consideration, and in doing so I would like to make the following sug-gestions:-

1. That the committee in each district bring luefore their members that it is desirable that efforts be made to get a complete baud of ringers in eacll tower.
2. District committees should consist of members who are prepared to take an active part in wisiting and assisting the local bands in the district.

That it is desirable that the association should draw up a list of ringers who would be sompetent to give instruction in their district.

That the association allow outror-pocket expenses to instructor: for a stated number of wisits.
The report shows that 44 peals were rung during the year 1922, in which 18 ringers rang their first peal, and 17 weye awarded the association's certificate for laving rung their first peal on a working bell. The association had a satisfactory year, fimancially, the receipts on general account being $£ 5713 \mathrm{~s}$. Gd., and the expenditire . . 46 11s, 512d., leaving a profit on the year's working of . 11 ll 2s, 3tyl. Grants were made to Petervorough Cathedral and Grafton Under wood, of $£ 55 \mathrm{~s}$. and $£ 3 \mathrm{3s}$. respectively, from thie Belfry Repairs Fund for bell restoration. This fund now stands at 15828 . 9d. Thanks are extended to Mr. R. F. Turner on retiring from the position of district sceretar's after' soversl years' hard work.

## THERECORD PEAL OF CAMBRIDGE SURPRISE

To the Editor.
Sir,-I was always under the smpression that I was the first to obtain the 12,896 Cambridge Surprise Major in the early part of 1907. In August of that year I rang a 5,084 in the method which was an offspring, also the same thing as publishing the full extent. The fact that the 5,024 turned out false makes no differcupe whatever. The 5,024 was the coveted peat or missing link of the day, and a lot of people were surprised of the discovery.- Yours. etc.

## BELFRY GOSSIP.

The zention made in this column last week of a peal report being writteu out before ther peal was rung, recalls the fact that at Guild ford some years ago a board was actually written lefore the peal (Stedman) was attempled, and it was openelt three days later! 'That,' remarks our correspondent, was a "bit hot.", And we agree. Can anyoue go one bettier?
On May 12th, 1788, at Wakefeld, "a new composition peal of Tripple Bob Tripplea, called Wakefied Delight, consisting of 5,040 in 8 courses comploak, was rung. 'The same set of ringers without changing a man or setting a bell begna another peal of Oxford Single Tripples in twelve courses, consisting of 5,040 called wakefield Surprise, Beath these peals consisted of 10,080 changes were performed, including Raising and Settieing the beils in seven hours and one minute, and wero rang with a exactness and nice distinction, an instance never before done in ye Kingdome.
The ancient report goes on to say, "What adds to the singularity of this performance is-Thete were two fathers, five sons, five brothers, four cousins, one uncle, one nephew, yet only eight persons add onty two names.'
May listh is the anniversary of two long peals. One was 12,096 Graudsire Cators at All Saints', Fulham, wung in 7 hours 50 mins, on Whit Monday, 1837.
The other was the 8,8 , Soperlative Surprise Major at Loughborough in 1894, composed aud couducterl by Nathan Pitstow. The present president of the Central Council look part in that performance.
An interesting recorl has been made by Mr. and Mrs. F. I. Hairs, who have now rung together, handbell peais of Grandsire Triples, Caters and Cinques, Stedman Triples, Caters and Cinques, Bob Major, Roysl and Mifamus, and Kent Treble Bob Major, Royal and Maximus, as well as Double Norwich Hajor.
The peal at St. Margaret's, Westminster, the report of which was published Last week, was Mr. IL Ellis 200th peal. The asterish notifying this goti into the wrong place. Mr. F. G. Nowman, against whose name the 'star' apporred, rang his ro0th peal over 30 years go-in Jalluary, 1893. to be exact.
The answer of the ringers of the long peal of Cambriage Major to 'A Flat,' ye their alleged aspirations for' the future, is simply this-' You're another!?
There will be no ringing on the bells of St. Nicholas' Chureln. Ghisiehurst. until further notice. A. crack has developed in the fower, and the bells require rehangiag.

The peal of Stedman Triples rang at Canterbury Calhedral for the wedding of the Duke of York calls for a line of explanntion. A start was made for a peal of Catens, but one of the band being taken ill, it bad to be abandoned, and Triples was substituted.
According to the 'Lincolnehire Estandard' they do nor do things by halves at Boston. It is reported that for the Royal Wedding, the Parish Church vingers raug ' 1,200 pals of griandsire doubles and 350 poals of grandsire trebles ! In reality it was something far less innposing.

## STEDMAN CINQUES RECORD,

All being well, twelve menbers of the Ancient Society of Collage Youtlis will attompt a peal of Stednana Cinques ( 15,051 changes), at Soutlinvark Cathedral on Whil, Monday, commencing about 8.30 .

## REPORT OF THE ANALYSIS COMMITTEE

In presenting the report for another year, the commithee cousider it a matter for congratulation that it slhows the Exercise to be iu such a progressive condition. While the recovery from the effects of the war is gradual, sucl a condition is well in view. Each year the number of peals rung steadily increases, and as there is every indication of this growth being maintained, it should not be long before the big totais of inmediate pre-war years are surpassed.
The analysis for 1932 shows that 253 mare peals have been rung than in the previous year. The increase in tower bell peals exeects this number, being 365 , while peals on handbells have decreased by 12. The totals for the year are as follows:-

A grand total of 1,885 penls, this being only 474 sloort of the record number.
The Norwiclu aud Jpswich Diocesan Association retian their position at the head of the list for both peals and points, their total being 204 peale, including 23 on haneibells, and 3,476 points. This is an increase over last year of 15 peals and 140 points. The number of other Socicties whicla rang over 100 peals has iucreased by one, being hree as against two as follows:-
Midland Counties Assoeiation, 149 tower bell peals and 2.754 points: Kent County Association, 188 penls (including 3 on handbells) and 1,799 points; and the Lancashire Association, 102 tower bell peals and 1,646 points. It may he noted that while the last-named association has rung exactly the same number of peals as last year, the points value bas increasea by 197. The Durham ant Newcastle Dioresan Association again luave the highest average points per peal, 30.77 for 22 peals (including 1 on landbells) and 677 points. They ero run wery closely by the Soceety of Royal Cumberland Youths willz 28.18 for 11 tower bell peals and 310 points, St. Martin's Guild being third with 27.69 points for 36 peals (including 15 on handbells), nd 997 points.
The total number of Surprise peals excluding Minor, is 232, an increase of 44 over 1927, clearly slowing the advance is quality as arell as in quantity. Crmbrifife continues to advance in favour, showing an increase of 2 peals of Maximus, 2 of Royal, and 17 of Major; it is also much preferred by Minor ringers. London Major has advanced consiticrably, 37 against 24 peals; while Superlative Major shows a small increase of 5 peals; Bristol has only lield its own with 15 peals. Other Surprise methods rung are: 2 peals each of Clifton and Micdlesex Foyal, 2 of Premier Major, and 1 each of Norfolk, Suffolk, Dublin and Laneaslive Major. Grandsire and Stedman run a olose mace as the farourite method. there being 347 peals of the former and 332 of the latter, excluding Doubles.

Of Major methods, while Fent and Oxford Treble Bob slow 172 peals, a decrease of 17 , Double Norwich contimues to ageend, showing 148 peals agaiust 112 for 1921 . Triples have iucreased by oxactly 100 penls to a total of 505 . Minor and Doubles have also gained ground, slowing 433 peals against 368 last year.
The records show that 690 have joined the ranks of peal ringers, ant in addition 7 lave rung their first peal on tower bells, 12 their first away from the fenor, 73 the first inside, and 52 their first on handbolls; 18 first peals have been rung by local bands, first on the bolls 51, aflev rehanging, addition, etc., 28 . and in the mothod on the hells 199; 85 made their debut as conductors. First pealers of Doubles numbered 18, Minor 88, Triples 34, Majar 104, Caters 57, Royal 51, Cinques 30 , Maximus 12. First peals ${ }^{\text {F }}$ in the method ' were rung in Deubles by 17. Minor 170. Triples 209, Major 627, Caters 120, Royal 94, Cinques 33 and Maximus 13. The number of mufled peals Whs 84, and there were 19 faremell peals; 74 peals were rung in honour of the Royal Wedding, 58 being on tho day of the ceremony.
Performances worthy of special mention are: The first pod on 14 handbelis, the method being Stedman Sextuples hy the St. Martin's Guild the first peal of Real Double Superlative by the Durham and Newcastie Association, and the record leogth. 21,363 changes of Stedmen Caters by the Oxford Diocesan Guild.
A pleasing feature of the year's work is the number of now methods: Clifton and Middlesex Surprise Rogal; Dulblin Premier and Lancashite Surprise Major, Cambridge Court Boh Major on handbells, and in addition the Granta Fariation of Treble Bob Royal for the first time on tower bells.
A rather unusual feature is the peals on 7 bells, two omitting the And, and one without the tenor. The noreltry of the yenr was a peal on handbells rung in bed.
The recording of the peals shows that mucle more eave is taken by those sending them in for publication. The committee however, are still troubled by elight errors. For instance, the name of the same conductor sometimes appears with different initials or with then roversed, and it is dificult to decide without inquiry whether it is the same person or not. If such errors are not corrected by those responsible, the committee witl be compelled in future to record them as prblished.
The conductors of five peals and upwards are shown on the following Ifst. The frgures in brackets slow the number of handbell peals conducted: 64 peals, A. H. Pulling (43); 36 peals, (7. T. ## THE CENTRAL COUNCIL MEETING.

When, last year, the Central Council was induced to fix its next meeting place at Salisbury, the members were promised that they would receive a hearty welcome in the ancient Southern City; and, judging from the programme which has been arranged by the Special Comnittee of the Salisbury Diocesan Guild, the social side of the gathering bids fair to exceed in its attractiveness any preceding meeting of the Council-and many most enjoyable functions, notably at Newcastle, can be recalled. For the first time there will be a recognised headquarters from Saturday until after the meeting. This, in itself, will be a great advantage in many ways, for hitherto the members have had to make their own meeting places if staying over the week-end. Then, in addition to the ringing which will be provided, there will be organised excursions, and the official ceremonies on Tuesday will include a welcome by the Bishop of Salisbury in the morning and a reception at headquarters by the Earl of Shaftesbury in the evening. These features will add to the importance as well as the pleasure of the gathering.

As to the business meeting itself, the agenda, which is not overburdened, provides a variety of subjects on which members will find opportunity to talk, but there is little that is likely to prove really contentious. Committee reports always form an important part of the morning session, and the report of the Museum Exhibit Committee will be awaited with interest, inasmuch as the Exercise is likely to learn upon what lines the exhibit at the South Kensington Museum is to be organised. Among the resolutions of which notice has been given the suggested recommendation that first or record peals should not be rung for a society outside the limits of that society's area, is probably the only one that may be seriously challenged.

There have been a few cases in the past where the first peal in a method for a society has been rung outside that society's area, such, for instance, as the first peals of Norfolk and Brighton Surprise for the Norwich Association, which were rung in London. Then, too, the record peal of Bristol, rung at Hornchurch in Essex, was a Middlesex Association peal. It may be an ideal to ensure that first peals and records should be rung within the area of the society to which they are credited, but it is another thing to get the principle accepted by ringers. There is, moreover, one serious obstacie to its general application. How can the Salisbury Diocesan Guild, for instance, ring its first peal of Stedman Cinq̧ues, or Treble Bob, or Cambridge Maximus within its own borders, when it has not got a twelve-bell tower? The Salisbury (Continued on раge 306.)

[^27]Guild may not have aspired to these heights of method ringing yet, but we instance the Salisbury Guild because the subject is to be discussed at Salisbury. The argument applies with equal force to other societies, and we see no reason why a society should be debarred from the first peal in a method obtained outside its borders if it has not got the facilities for ringing it within its area. Even if the word 'first' is to be taken as meaning the first cver rung in a method anywhere, we think the same argument applies, and the proposer may find some difficulty in disposing of this serious obstacle to his suggestion.

## BATH AND WELLS ASSOCIATION.

DUNSTER BRANOH ANNUAE MDETING.
West Somerset ringers were well represented at the annual meeting of the Dunster Deanery branch of the Bath and Wells Diocesan Association held at Dunster on Saturday, April 2Bth. A little practice on the bells preceded a sarvice lield at the Parish Ghurob, which was conducted by the Rev. W. T. Reedor (Vicar of Dunster, and Rural Dean'), assisted by the Rev. G. L. Fitzmaurige (President of the Branch). The special form of service for ringers was used, Miss Sorby presiding at the organ. Mr. Reeder gave a particularly suitable address, in which he impressed upon his hearers that ringers were really God's ministers, and as such they should strivo to make their ringing a religious act.

After the service tho members assembled at the Memorial FIall for tea, to which they were entertained by tho Vicar. At the anmual mebting winich followed, the Rey, G. L. Fitmarurice presided. Messages of regret at inability to attend were regeived from the Rev. W. P. Holmes (Porlock) and the Rev. T. S. Dawson (Oarhampton). The towers represented at the meeting wore Cutcombe, Minehead, Williton, Sclworthy, Dunster, Clipstable, Timberscombe and Stogumber.
The hon, secretary (Mr. G. Stacey) presented the report for the past Year. This stated that tho branch held meetiugs at Cutcombe, Timberscombe, Porlock aud Old Cleeve. There had been $81 \mathrm{new} \mathrm{mom-}$ bers and one honorary member elected, the present strength of the paying mernbers being about 106, as compared with a prewar strength of 120. They bad to record the loss, through death, of Mr. R. Hole. Dunster; Mr. O. Gale, Exton; the Rev. H. McCririck, Wiveligcombe; the Rev. F. A. Folkard, Sampford Brett; and thg Rev. F. K. Warrem, Exton; and while two members, the Rev. C. B. Bradburn. Selwortliy, and the Rev. T. Hawkes, St. Decunau's, had left the distrieb.

Having decided on Monksitwer as the venue for the nexi quarterly meeting, the moeting proceedec to the anmual elections.-The Chat man cxplained that he would be shortly leaving Cutcombe for Bromp. ton Ralpli, so that he would not be so much in touch with the branch. and he suggested that they should elect a loeal president. The Rev. T. S. Dawson (Carhampton) was thanimously elected president for the ensuing Jear, and a vote of thanks was accorded to ML. Fitg maurice for the interest he luad taken in the branch, to which he suitably responded.
Mr. G. Stacey's re-election as hon. secretary was attended by a warm appreciation of his serviees from the chair. Other re-elections were Mr. H. Phillips (Timberscombe) as representative on the geneyal committee of the association, and Mr. W. Hoyle (Minehead) as Ringiug Master. Three new members were elected, viz. Messrs. Th. Webber (Thmersombe), Whirush and T. Elliott (Bunster).

The thanks of the members to the Viear for allowing the use of the tower for the ringing, for officiating at the service, and for his kindness in providing toa; and alse to Miss Sorby. the organist, were expressed in the form of a resolution by the cliaiman.-Mr. Stacey, who seconded, spoke of the great interest which Mr. Recder took in the association. He attributed the fact that the gathering that day was not larger to tho absence of any band of ringers at Dunster. He reminded those present of thle excellent band which Dunster once had, and referred to Dunster as the home of change ringing in West Somerset. In past years they had there the best band of ringers in the West, and he suggested that if the few ringers remaining there would put their backs into it, and form a new band, in which the association would help them, they night, have a good band again there.

The Vicar thanked Mr. Stacey for what he lad said, and intimated how plonsed he was to weloome the associntion to Dunster. They had not gob band of ringers there, he said, but he hoped that this would be remedied soon.
After the meeting the members again adjourned to the church, and thave spent the time in riuging Grandsire and Stedman Triples until about 8 p.in.

## WINCHESTER DIOCESAN GUILD.

 WIFCHESTER DISTRICT.A district meeting was held on Saturday. May 5th, at East Tytherlep and Lockerloy, both peals heing available during the afternoon and evening. Touches of Grandsire and Sterman Doubles ant Triples, Double Court, Bob Minor and Major were rung. The tea and meeting were held at tho Star Inn, presided over by the Ringing Master (Mr. G. Tilliams), supported by the Vicar of Ease Tytherley, and member from North Stoneham, Gurdridge, Bishopstoke, Romsey. Portsea, Ringuood, Lymingtoy, Salisbury and Wincheater.
The Vionr was elected an honorary member of the Guild, nad a vote of thanks was passed to line respective incumbents for the use of the bells. This was acknowledged by the Vicar of East Tytherley, who assured the members of a welcome at any time they came fo Tytherley for a peal or combined practice.

Afterwards further ringing took place at both towers. The next meeting is fixed for Augusf $25 t h$, at Hurgley.

## WORCESTERSHIRE ASSOCIATION.

## SOUTHEIKN BRANGH MEETING.

By kind invitation of tho Vicar, the Rev. S. H. W. Lovedt, the quarterly meeting of the Southera Brancl was held at Toddington on Saturday, May 5th, and in spite or the inclement weather, this was well ationded. A pleasing foature was the presence of the Hev. A. D. Penuington (Rector of Alderton) and the Rev. D. Fitzmaurice (Vicar of Hampton), this being proof of the increasing interest taken by the clergy in ringing activities. Among other visitors were Messrs. IL Colley, semr., and H . Colley, junr. of Wooten Wawen. The association's special form of servico was conducted in the Parish Ohareln, the full choir heing present, and the Vicar giving an original and instructive address. Tea, provided through the generosity af Mrs. Andrews and the Vioar. was partaken of in the Village Eall.
The Vicar presided at the subsequent business meeting, at which geveral new members were elected, and en invitation to hold the summor meeting al Radsey was accepted.
Subject to tho approval of the Vicar, it was decided that the quariarly peal be atternpted at Toddington, with Mr. Geo. Aslley as conductor. ant tho hope was oxpressed that it would be found posgible to ring ihe peal with an entirely local band.

Attention was drawn to a paragrapin in the anmal report, unging local bands to attempt more peals in preference to peals rung by mixed bands.
Votes of thanfs (which were carried with applause) wore passed to the Vicar for the use of the beils, his address, and presiding at the neeting: to tho organist and choir for their services, and to all who provided for or assisted with the tea.
The musical peal of fix bells were woll utilised throughout the afternoon and evening, Sterman and Graudsire Doubles and various Minar methods being rung.

## LONDON COUNTY ASSOCIATION.

A most excellent practice of the Southern District was Gelel on Saturday, May 5th, at All Saints', Fulham, with its fine ring of ten. In the early part a 504 of Stedman Triples was rung, and later mernbers aftended from all parts, including some from Birminglam, Crayford, Grexnhithe, Kent, and Walton-ou-Thanes, who took part in iouches of Stedman Gaters, Treble Bob Royal, Cambridge and Ion fon Surprise.

## LINCOLN DIOCESAN GUILD.

## THE SOHIPME FOR A PEAL OF TWWHWE AT TEE

 CATHEDRALThe annual meeting was held at Lincoln on Saturday, April 28th, and was, as usual, attended by a lavge numher of members froma all parts of the counly. Tlue bells of St. Peter-al-Awehes, St. Peter-at-Gowts, and St. Botolph's wence set going carly iu the afternoon and the Cathedral bells were also araj]able from three oblock until evensong at four coclock. There mat be fow catiedrals where the services are more beautifully rendered than at Lincoln, and to many members, who visit the city only on very rame occasions, one of the most appreciated items in tha day's proseedings is the Cathedral service.

Tea was provited in the Conoperalive Hall, after which the usual business meeting took place, Mr. F. F. Linley prosiding.
All the officers were re-elected as follows: President. the Dean of Lincoln; Master, the Rev. II. Law Janes; secretary, Mr. T'. W. Stokes; treasurer, Mr. F. F. Linley.
The balance theet and report were passed as printed. The latiter showed that during 1922,58 peals were rung (one mote that in 1921), including tho of Cambridge Surprise Royal. The methods eung gensrally again indicated a dectded improvement in whe standard of ring ing throughout the Diocese. The Grimsby baud has scorca peals of Double Norwich; Lincoln secorded Stedman and Double Nomwich, eud Market Deeping was doing well in Minor ringimg.
The question of the Cathedral Bells Memorial Fund was again brought forward, and discusged at some lerrith. A considermble sum of money still remains to be raiserl to complete the amount required for the proposed augmentation of tho Cathedral bells fron oight fo twelve, but there appears to be a confident feeling that if an organised and determined eflot is made during the coming Jent, the long desired object will $\mathrm{b}_{\mathrm{b}}$ attained.
Votes of thanks were passed to the Dean and Chapter. and to fhe incumbents of the various city chtrelies for the use of the hells rluring the day, zud to Mr. Linley for presiding.

The towers were again pisited. and the lrells kept going until nime o'clock. The ringing included Grandsite and Stainan Triples, Plain Bob, Treble Bob, Double Norwich, Cmbbidge, Surerlative and London Surprise Major, basides many Minor methods at the two six-lwell towers.

## BELFRY GOSSIP.

The table of handbell peals published last week omitter, by a Iypographical error, to show the handbell peal of Stedman Cinques rung by the Worcestershire Association, although it, was inciuded in the total and the points, and also in the general table.
The weight of the tecor of the recently augmented ring at Nantwich is 14 cwt, 2 gr .18 lb . In a peal report last. week it was given as 2 owt. less than this.

Mombers of the Central Coucil upon reaching headquarters, the Cathedral Hotel, Milford Street, Salisbury, will be able to obtain a neatly printed souvenir programme giving particulars of all the arrangements made for their bsneft.
Much interest is centred in the College Youths' attempl next Monday to set up a new Stedman Cinques record. It is a buge under taking on a peal of bells wibh a tenor of 50 cwt ., and if they are successful the men at the back end will deserve gold medals, although thoy will probably appreciate some of the contents of the Coffee Pot better than medals when tho bells come round.
There will probably be many listeners, voluncary as well as involun, tary, and of this we may be certain, therg will be a good poal, or none at all.
By the way, the length is curious; it is the same whether read forwards or bakwards-15051.
Henes more power to the elbow (or should it be elbows?) of the twelve good men and true, who will ' ascend the tower of the Cathe dral Church of St, Mary, Southwark, on Monday noxt, and may they have the satisfaction of hearing the hells run home!
They will not be alone in their long peal effort. Members of the Chester Diocesan Guild intelld to start on a 17,280 Kent Treble Bob Major, at Over, Cheshire, on the same day.
The present: Treble Bob record is the 16,800 of Kent, ruag ab Mottram, in 9 hws. 40 minuteg on June 8th, 1906.
Before that the record was 16,608 , the 40 th anniversary of which performance in the Kent Variation heing, curiously ellough, to-day This was also rung at Mottram, the tine being 9 hrs. 48 mins.

On May 18th, 1846, Thomas Thurstans' 'masterpiece, the four part peal of Stedman, was rung for the first time. This was at St. Martin's, Birmingham, Fenry Johnson being the conductor.

In 1777, on May 19th, the College Youths rang 11,080 Kent Treble Bob Royal at Shorediteh in 8 brs. 2 mins.

Fifty years ago next Monday, Matt Wood conducted the first peal of Grandsire Triples in Scotland.
May 2lst also is the anniversary of a 10,061 Grandsire Geters at Wednesbury in the year 1861, and of the 13,054 Stedman Geters at Cheltenlam in 1888.

Tuesday is the anniversary of the 17,024 Double Norwich Major at Kidlington, which was rung on May 22nd, 1899.

Owing to the spire of St. Michael's Ohurch, Southampton, being unsafe, the peral of eight bells cannot be ruag. The bells are at present at the Groydon Foundry all ready for lianging, and will remain there till the defects of the spire are put right.

Of course, it was sure to come-a peal of Bristol Surpriso Major by that band of Leicester ringers who have been making history lavely. It was the first in the method by all the band. but we warrant it won't be the last. And there is that 19,000 odd by the Rev, E. Law James waiting to be rung!

Six members of one family in a peal of Cambridge Royai-the first by alt the band and by the association-is a noteworthy incident. The peal was rung at Gosforth. and the family party were from Whiter Bay, comprising six Goftons.

It was in the carly part of 1901 that Mr. Fred Dench produced his 12.896 Cambridge Surprise Major, not 1907 as stated in his letter last week.

Last week the report of a peal at Birling, Kent, was claimed as the first of Major on the bells. Mr. W. Short of Ment, writes that the opening peal at this church was one, in which he took part, of 5,088 Kent Treble Bob Major on May 19th. 1891, by the All Hallows' Society. Tottenham. It was rung for the Midalesex Association, conducted by G. B. Lucas.

Dear Sir,-In your issue dated May $11 \mathrm{th}_{1}$ a notice of the Gloucester and Bristol Diocesan Association contained an inaccuracy on mp part. ## TEE PEALS ANALYSIS. POINTS FOR ILANDBBLT PEALS.

## To the Editor.

Sir, Tha publication of the report of the Peals Analysis Committec is an event which is looked forward to with much interest by ringers generally, and the information and details contaived therein bagr eloquent tribute to much thorough and painstaking work
Nevertheless, I must confers I was surprised whon I saw the umber of points awarded for the peal of Steclman Scxtaples rung on handbells at Birninghan. Here, oertainly. the Analysis Committeo liave not erred on tho side of gonerosity, and one certainly wonders upon what grounds the committee thought fit to award only 38 points.

I am of opinion that the allocation of points for handhell peals, as compared with tower bell pealg is a matter which needs a certain nmount, of overhauling.

To quote one instance: A peal of Stedman Cinques on handbells re ceives 32 points. whilst a peal of Grandsire Ginques reveives only 13 points. From the hand bell ringers' point of view, the latter is probably as difficult as the former.

I think, therefore, that points allotted for handbell peals should be on an altogether different hasis to those allowed for tower belt peals. Perhaps ye shall be favoured with the views of some of the more prominent handbell ringers on this subject - Tours, eto.,
39, Longford Street, DerEy. $\qquad$ J. FRANK SMALLWOOD

## SALISBURY DIOCESAN GUILD.

## APATFY OT THE CTERGY.

Riugers of the Salisbury Diocessu Guid assembled in consiterable numbers at Marlborough on May 3rd for their annual meeting. Botlt towers were open for inging during bine day, and towehes in various methods were ring, while a party also visited Ogbourne St. George, where Messis. Gillett and Johnstor: have iccently relumg the bells:
At the busiucss meating, the Mastar (Major O. C. FIughes D'Aeth); who presided, remarked that as that was possibly the last occasion on which he should have the opportunity of addressing the members of the Guild in his presens capacty, be sloould like to say a few words on 4 subject which was very close to bis heart. In his report for 1922 he once more asked the clergy to take a little more active part in that particular deparment of Church work. He felt bound to say that in his journeys thout the dioceso he liad found what a irjend liad called a certain amount of apathy on the part of a certain number of the elergy. In foing to a belfry the generally asted whether the parson took any intorest in the ringing, and the reply he generally got was that they seldom saw the parson in the belfry. But as long as the Guild existed they had to remember that they wer. not morely a guild of ringers but a guild of Church workers, and that as suth they were entitled to-asy claimed- a certain amount of respect from some of the clergy. The clevgy did not as a rule go to the recognised practices and ofter up a prayer that their work night be blessed by God, and le feared that the time was coming when ble bands of ringers would become merely social olgenisations for ringing only without any thought of God. He was socry to say that in many churches, including same belonging to their own Guild, the ringers did not attend worship in God's house : they called others to prayer aud praise, but did not themselves attend the services. Suroly there must be something wrong in thatHe was sorry to complain, and though he had notheng to say against The clergy lue conld not help thinking that many clergymen paid fewer "isits to their belfries than to their dentists. Such things ouglat not to be. Turnilug to the other side of the picture the Master said ha knew of one charch not very far from Marltorough where there were seven ringers, six of whom were also in the choil. They not ouly thought of their bolls but of the church as well. He mould that thal were the gencral practice. The best ringing was as a rule to be found in churehes where the parson took an interest in his fingers. Ela did not like to see ringers walk out of ehurch when the sorvies commenced. Prayer should not be left to a laymun in the presence of the parson. If this apathy continued he was afraid they would tend to become a mere social club that knew not God. Fle trusted the clergy would forgive him if ho had said anything to rufle them. What lie fird said was meant to furfltor Elie good work of the Guild so that it might be not only a guild of rimgers but a guild of workers who could praise God it the end of the rope as well as in their places iv the Gluych sorvices.
Arising out of the minuter, the Haster said they felt rather abeslnod and somewhat anoyed at their last meetin咅 at Lome Regis to hear that the Dean and Chapter of their Cabladral had throwa cold water and completely extinguished the small spurt of energy which they tried to put forward in raising what they thought was a suitable memorial to the ringers of the diocese who fell in the war.
The statemont of accounts presented by the hon. secretary and fiensuler (Rgw. F. Li. Edwards, Kington Masma), showing a credit balatace of $5151 \mathrm{~F} .7 \frac{1}{2} \mathrm{~d}$., was approved.

## ELIOOTON OF OFFICERS.

The Master, lon. seoretary and treasurer, and lion, assistant secre tary (Mr. T. Herwey Beams, Bradpole) were all re-blected
Thanking the Guild for the honour they had again done him, the Master said he must ask them to look round and find another Master uext year, as ho thought it was time they had a younger and more energetic ringer for the office. When the time came it would be with great sorrow that le would give up the mastership, because he loved tho work. in carrying out, which fo whs greatly indebted to the branch secretaries for their loysi support, not, of course, forgeling the hard work of their general secretary.
Mr. H. R. Hopkins (Kington Magna) and the Rev. A. D. H. Allan (thimborne) wera elected auditors, and the Rev. Canon Myors, the Rep. O. Wood, Mr, J, R.Jerram, with the officers of the euild and brarches were re-elected on the conmittee.
The meoting elected as representatives on the Central Council Mr. T. H. Beams, Mr. A. F. Martin Stowart (Wimbornel, the Rev. F. Il. Edwards, and Major C. Q. Hugles D'Aeth

The instructors in elangs ringing are Mesgrs. G. T, White (Dor$\underset{\mathrm{F}}{\mathrm{ch}} \mathrm{W}$ (ter). J. E, Wilthire (Seend), S. Hillier (Deviges), T. H. Beama, F. W. Townsend (Poolc), 5. J. Hector (Trowbridge), and H. Taylor (Sielksham), and the inspector of belfries is har. $J$, $\mathbb{R}$. Jerram (Salisbury).

## ALTPR ${ }^{-1 T I O N ~ O F ~ R U L E S . ~}$

Rule 3 was remodelled thes-The secretary of the branch shall collect subscriptions from members on a date not later than the last meeting of the branch held befors Christmas and forward same to
the general secretary at the end of the year, retaining not more than one-lnalf of the subscriptions for local expenses, and at the same time send a brief report of the $\mathrm{ygar}^{\prime}$ s work together with a Eummary of the braneh accounts.

In future rule 4 will reed- Fach company slall appoint one of is members as belfry correspondent. It sholl bo his duty to colleet sub. scriptions and defiver them to the secretary with a correct list of their mames at or before the Iast meeting of the branch held before Cluistmas in each year', also to doal with comununications.

## DIOCESAN WAR MEMORLAL.

On tho question of the proposed memorial to ringers who fell in the war, the Hon. Secretary said that as members of the guild were aware they were not, allowed to erect the memorial in the precincts of the Cathedral. Samo time ago, howaver, ho had an interview with the Dean who spoke to him about a design he had in hand for improving the war memoriat in the Cafhedral to consist of the restoration of one of the ancient chapels in suck a way that it could be used for public and privato worship as a memorial chapel. In the course of that work there was to be constructed across the entrance to the chapel an onk screen, and there was a place on each side of the screen where it was desired some panelling should be introduced, and the Dean suggested that the guild should undertake to provide the panelling. The Guild liad in land a sum of wis collected for the purpose of a memorial, and if a further sum of about £20 could be raised the guild of riugers could be offeially associated with the diocesan memorial.

Tho meeting approved the suggestion, and referred the matter to [1e branches, and eppointed a committee, consisting of the Master, secrelary, and assistant secretary to receive their reports, with poter to act.

## KIVGTON MAGNA TOWER.

The Rex. F. Ll. Eduards remarked that they Thad als ancient fower to the church at Kington Magna which was in considerable need of restoratian, and they were endeavourfor in a village of 350 inhabitants to paise sufficient money to put the fower inlo effective repair so that thor could continue to wse the five bells without fear of ondangering the sufeb of the tower. The Guild had sometimes made tranta for such a purpose, and he would leave it to those present to say whether or not they would make a small grant towards his own church.
The Master observed that if there were nay bells rung anywhere in tho diocese if was at Kiugton Magna. The vitgers were nof only dingers, but they regnlarly mbtended the house of God. He suggested that the Guild nake a grant of $\mathrm{El} \mathrm{I}_{5}$.
Dlimatoly the moeling voled fove guinens lowards the object, and Mr'. Fetwards thanked the fuild for its moxpeoted act of generosity. FFST OE CENTRAL CODNCII TO SALISBURY.
The Master faid lie supposed that most of them knew thet tho dionese was being honoured with a wisit from the Central Council at Salisbury at Whitsmn. The oxeasion would be quite unique as ho beliover the Central Council had never before met in the beatiful cathedral of the citv of Salishury. The visil would cntail cer tain expense. The Guild proposed to Eake the Council to Wiltor House by nommission of the learl of Pembroke on Whit, Sunday, and they would afterwaide be laken to cortain eight and fen bell towers. The Wimborne bramel hat already made a coutrihution towneds the expmises of the visit, find he ventured to suggest. fliat the Guidd misht helo them in some way.

On the proposition of tha Rev. C. Cox the Guild decided to make a grant, not exceding e5. for the purnose.

Members afterwards altended a special service at. St Peter's Church, Where an appropriate address was delivered by the Rector (the Rev. D. Toste). The visitors foregathered for tea in the Sessions room at the Town Tall.

The Vicar also spoke of the excellent yualities which Mr. Jefferies possessed.
Mr. J. A. Waller, the senior churchwarden, in making the pre gentation, said thow mucli he apprewiated the services $\mathrm{b}_{\mathrm{Y}}$ Mr. Jefferies. He hoped he would long be spared to assist in riaging the bells.-Mr. J. Gouid (eaptain of the ringers) also spoke of Mr. Jefferies' good work as a riugar, and endorsed all that had been said of him.
Mr. Jefferies thanked the parishioners for their great kindress towards him, and lroped the younger generation would contiuue to parry on tha work.
The ladies also had a present for Mr. Jefferies, the gift consisting of a painting of the elnurch, which was suitably inseribed, so that Mr. Teferies may be reminded of the pleasant time be load spent in the ehurch.

## PROPAGANDA AND INSTRUCTION.

A correspondent puts forward some pertinent suggestions, in a letter which we publish, in connection with the Management of Associations, and he emphasises the importance of greater propaganda and instructional work by the ringing organisations. These are two subjects upon which we have frequently dwelt in this column, and too much emphasis cannot be laid upon them. Many of the associations do very little in either direction, and, apart from periodical meetings, leave the instruction of beginners to the chance interest of some neigfobouring ringer, and propaganda to take care of itself. Yet, as a matter of fact, these two things ate of real-indeed, vital -importance. The former will raise the standard of ringing and increase the number of change ringers, the latter should be first directed to interesting the clergy of those towers where they are at present ignorant of or indifferent to the objects of ringing associations.

With regard to instructing begioners in the art, there are some ringers who do not agree with the principle of paid instructors. Voluntary effort is no doubt best, and before fees are paid out an association, of course, would have, to be satisfied as to a ringer's efficiency as an in, structor, but where a man who has the ability to impart knowledge to others is prepared to give his time to instructional work, he ought at any rate to receive his out-of-pocket expenses. The question of instruction is by no means a simple one. Given a capable instructor and a keen and intelligent band, much good can be done in a very short time; but effort is wasted unless tutor and pupils show the necessary qualifications in their respective roles. Another important consideration is how long the instruction should be continued in the case of a receptive band. It is frequently the case that as soon as a few six scores of Doubles can be rung the instructor is withdrawn and the band left to shift for themselves. This, it our opinion, is a very bad policy. To reap the full advantage, the instructional course ought to be continued well beyond this very elementary stage, and one of the reasons for the frequent failure of these courses is that the work is not contimed as far as it nught to be-

On the question of propaganda, there are fev associations which work on any settled plan. An occasional meeting at some tower unaffilated with the organisation is held in the hope of winning the support of the incumbent and the ringers, and qusually, be it said, this brings success, but the infrequency of such meetings would make it, in the case of some associations, a question of years before all the towers could be reached. What is wanted in many parts of the country is a big "push," with propaganda work organised on comprehensive and sustained lines.

## SHEFELELD DISTRICT SOCIETY.

## A YEAR OF PROGRESS.

PRESENTATION TO MR. SAM THOMAS.
The annual meeting of the Sheffeld Distuct and Old East Derbysline Amalgamaled Soniety was held ut the Church of St. Joln-theEvangelisli, Rammoor, on Saturday, May 5th, and in spite of a disappoinlingly wet afturnoon, proved yery successful. About 80 ringers and frionds finchding quite an number of ladies) were present from Sheffield (AlJ Snints', Pitemonr; bhe Cathedral, St. Mary's, Handsworth, St Marie's RoO., und St, Joln's, Rammorr, Barnsley, Bolsovor, Jolstenstone, Chesterfield, Doncuster, Dore, Eckinton, Ecclesfield, Nortlı Wingfield, Norton, Rewnarsh, Rotherhem (Parish Chureh and 'St. Stepliens), Whiston, Wortiey, etc. The peal of eight bells (tenor 15 cwt ) was kept going at intervals from 3 p.m. to 9 p.m., scme rery good striking being accomplistued ia ali the standard and several Eurprise methods. It nob being possibie for all the members to be in tho tower at once, many took the opportunity of making a closer acguaintance of this exceedingly beautilul church, one of the finest examples of modern architecure in the country, and of admiring its noble proportiong and decorationss The church, though moderu, already has something of a history, and its fine environment siluated in one of the most delightifl of the many beartiful suburbs of Sinetheld, overlooking the beauties of Eudelifie Fale and the hills leyoud, coupled with the almost undimited [acilities for ohange ringing aud the warm welcome always extended to visiting bugers, make iti an idoal fieadquarters for the society.
Tho first chureh louitt fom designs by Mr'. E. M. Gibbs, and corzecraled by Arehbishop Thomson in 1879, was, with the exception of the tower and spire, totally destroyed by fire on tho first Sunday moruing of 1887 . Tho fine organ and many beanafiful memorials ail perished in the Dames. Rebuilt from designs by the same architect at a cost of alout 824,000 , it was reopened in 1888, and a tablet in the porch records the fact. The present beatiful building is in a style inffuened by Frencir Gothic. The spacious and lofty nave has 750 sitings, athements a stalely apperance A notable feature is the tiforitum, unusual in parish churches, and an apsidal chaveel. As might bo expected in suchs a wealdhy tisirict, the chuch has been emiched by many beantiful and costly gifts, includiug eome very beautiful windows, and a fine orghu. The bells, fhough a musical veal, and one on winin thero havo been many notable performances, aro hardly up to the exceedingly high standard of the rest of the chuph, and it is the hopo of the local company that the church matr one iny possess a fine peal of ten to harmonise with its other beaufics.

A short musical service was hold in the churel, opening with the To Deum, and including some well known hymans, which were heartily fang by those prescot, An inferesting address was given by the Vicu (the Rev. J', R. Lee Nielolls), himself an enthusastic ringer, and an incumbent who, in the Sheffield Diocese at any rate, holds the uniguy distinction of being Ringing Master in his own tower, and who is spile of many and urgent calls ou liss time, including offen two semmons on a Sunday, is seldom airsent from his place in the belley.

A toa was held in Parish Hall followed lyy the annual business meeting, at which the Vicar prosided. Tho balance sheet (which showed a small balance on the right side) was presented, and a short. report of the previous year was given by Mr. Sam Thomas, who explaned that he had leen usked to undertake the duty; the lato secrobary (the Rev. J. T. Amies) latring left the distriet, and the now secmary not having yel been officially appointed. The report showed a gratifying year of progress, with a membership reaching 300 and 30 affiliatefl lowers. Ahout 85 peals has been rung in most of the standard methods, and several Surprise methods, iududing Norfolk ant Cambridge.

## IRECOGNITION OF MTR, THOMAS'S VALUABLE WORK

At this point the Bishop of Sheffelf arrived, and after being given a henty repeption, and expressing his reguet flant pressure of other ongagements had preventad his earlier attendance, at once pracaeded 10 maked if presentation to M1. Sim Thomas, ot the reauest of the efnimman. The presentation, which had been kept a secret until the last moment, and came as a complete surprise to MI". "Thomes, bonsisted of a very laindsome smoker's cubinet fitted up with tobacco, tikars and cigarelites), wilh a suibable insoriplion on an attached phato, atud an oxcoptionaly beautiful illumimated and framod address, worked by Mr. Tom Lee, of Norton, himself a change ringer, and one whose work in illuminuting penl records and the like is well Inown in the district. Tha midness, dated $1890-1925$, recorded Mr. 'homis' 35 yours' association with change ringing in the disurict, and his 21 yonrs' nssociation with the Sheffeld District Society, for mang tears as prosident, and laber as its seeretary. It reoognised his untiritg and disinterested efforts in the canse of change ringing, partimularly in the traintng and encouraging of soung bands and concluded by expressing the lope that he might be spared for many years to earry on his good work, and asking his apceptance of the
presentation with the most, cordial good wishes of the society. It was signed by all the afficers of the society on behalf of the subscribehs.
The Bishop again expressed his regret ab the fact that other engagements had interfered with his presence at the meeting, but stated that at all costs lie had been determined to be in time to make the presentation to Mr. Thomas. He knew weil the value the work of the ringers, and especially of mon like Mr. Thomns, threw themselves heart and soul into the work, and he could Bishop, bear testimony to the appreciation in Which their services were held, and especially those of Mr. Thonas, in sticking to if and persepering in the task of training up and encouraging young bands Ho had the greatest possiblel pleasure, he said, in presenting thes tokels to Mr. Thomas on behalf of the society, it associating lime solf with its sentiments and in wishing the recipient a long ami bappy life. The text of the address was then read out by Mr. Lewis (president).

Mr. Thomas, who confessed himelf taken completely hy surprise and romarked that everyone had been in league against him, and that he felt quite unable to make a speech, assured those presem that he felt that he did not deserve what liad been done, and cx pressed his sincere thanks to the subscribers. What he valued most tens the wanimity and spontaneousness of it all. Ho assured those presemb that ho was no back number yet, and that he slould continue to do ail that he could for the art. He asked to be excused from saying more, as he felt too full and too affected to speak.
It might perhaps be mentioned that tho presentation was in tha first mainty due to the disinterested efforts of the lato secretary (the Rev, J. $\mathrm{F}^{2}$. Anieg), whose depawne from the district was much regretbed, and whose services to the somety, thougln short, were much appreciaterl. An appeal was sent ond to the various towors in the society, and only a small subscription was asked for, but the re sponse, ruch to the gratification of the organisers, was conaideratily begond expectations, and camo as a further proof of the esteem Which Mr. Thomas is Leld.
Following the presentation to Mr. Fthomas, the sociaty's silvel ap and framed certificate, for the best year's abtendance for Sumdr Sorwice ringing, were presented by the Bishop to Mr. F. Wrakineon representing the Fandsworth company, the Bishop genially remarl ing that lu always seemed to be presenting things to Handsworth thuy lad a splendid Rector, and did well in overything that they took up.
Other calls on his time intervening, the Bishop hat to leave this point, and smilingly dechired a formn vote of thanks-an jn formal oms was, however, accoried to him as he rose to leave, in the slipe of very heaty applanse

(12th year
of relgn of Elizabeth).

The first peai of Stedman Gsters (composed and called by Jolm Reeves) was rung on May 28th, 1787, at St. John's, Horsley Down, London. We never hear of these bells being rung now. There is probably good reason for il. Tlio bells, we believe, are hung in three tiers, and the belfry is exceptionally small.
The record peal of Bristol Suprise Major $(15,264)$ was rung at Hornchurel, Fissex, on May 286n, 1912.

On May $29 t h$, 1901 , the first (and only) peal rung on the gea was acemplished on the es. 'Cambria, betweens Dulslin and Folyliead, and the same day the frst surprise peal in Wales was rung.
The first peal of New Cumberland Surprise was rung at Burton on May 3 lat, 1886 , and on the samo day of 1898 the 'four eights ${ }^{3}$ of Stedman Caters were rung on handbelis at Aston.

Birminglam ought not to miss the celebration of an interesting peal next Sunday week. Exactly 150 years ago on June 3 ral the first twelve bell peal in Birmmgham wat rung. This was a 5,324 Grandsire Cinques, and doubtless this will be fittingly commenorated in the tower, where, probably, more twelve bell peals have been rung than anywhere.
A peal of Kent Treble Bob Major was rung at Carisbraoke, Isle of Wight, last week. It is believed that the previous peal of Treble Bob on the island was rung on the old Carisbrooke bells by the College Youths, in the Oxford Variation, over a century ago; the band arriving by sailing boat from London via the Straits of Dover.

The Newcastie Cathedral Guild lave been ' broadeasting ' handbell ringing. On the Royal Wedding Day they broadeasted from the Neweastle station a touch of Grandsire Triples. On Sunday week they opened the evening wireless concert with some popular changes on eight bells and 70 changes of Grandsire Triples. These were taken much slower than on the frst occasion, and the difect, was reported to bo muoh better. The experience shows that changes should not be rung fastur than 16 or 18 to the minute for broadeasting pur. poses. The Guild again opened the programme on Whit Sunday eveniug.

Miss Vera Robingon, daughter of the Iate Rev. F. E. Robinson, rang her first peal on May 16ils. It was for the Oxford Diocesan Guild, of which lier father was for so Iong the Master.

Six of the band who took part, in the peal at. Corston on Saturday lave a great appraciation of the energies of the other two (Messrs. Knight and Stowal), who, when the usual meaus of travelling failed them through overcrowding, promptily set out to waik the seven miles to the tower, and thus enabled a start to be made only 35 minutes after the appointed time. Owing to another engagement, the Master of the Bath and Wells Association (Rector of Carston) could not, as he usually does, welcome the whole of the band in the tower before starting, but he wished success to those who were prosent.
Last Saturday week the restored peal of six bells at Blessington, Co. Wicklow, Ireland, were reopened, after restoration, by ringera from Dublin. On the following day a sharp skirmish took place in the village between Free State and Republican troops!

Four resident lady change ringers of Kent took part in a peal of Grandire Triples last Saturday at Marden, all of them ringing 'inside 'bells. This is going one befter than flee previous occasion, when three resident Kent ladjes raug in a peal at the same tower about ten weeks ago. Miss Thonins cycled from Mersham, a distance of, approximately, 24 miles, and rode the 'iron horse' home after the peal, making in all somewhere near 50 miles.

## MIDDLESEX COUNTY ASSOCIATION

The meeting of the South and West District was held at St. Mary's, Ealing, on Saturday, May 12th, and was attended by nearly 40 membors. Ringing commenced about $3 \mathrm{p} . \mathrm{m}$., with several touches with the Ringing Master Mr. R. Holloway, present. Service was conducted by the Rev. F. $\dot{L}$. Rees, who gave an excellent address, and welcomed the association on behalf of the Vicar (the Rev. C. J. Gharm, who, after service, entertained the wisitors to tea at the Church Fall, his kindness being much appreciated
The Rev. F. L. Rees presided over the tea and business meeting, at which a hearty vote of thanks was accorded to the Viear and Mrs. Sharp for their kind hospitality. Thanks were also given to Miss Sharp (the organist), the Rev. F. L. Rees, Mr. Hunnisett for as sistance and welcome on behalf of the local ringers, and Mr. Page for his instruction in making the St. Mary's band so efficient in change ringing.

The Ficar paid a brief risit and received a great ovation. He acknowledged the thanks accorden to him. After some liandbelf lonches the tower was again visited.

## STEDMAN CINQUES RECORD.

## COLLEGE YOUTHS' WONDFRFUL PERFORMANCE

The adtempt to beat the recard length of Stedman Cinques made by members of the Ancient Society of College Youlbs at Southwark Calhedral on Monday was successful. The intention was to ring a peal of 15,051 if possible, and although this length was not accomplislied, a peal of 12,675 changes was brought, round in 9 lirs. 47 mins., thus exceeding in length any previous peal on twelve bells.
Tho task was a stupendous one, and one which reserves the admirathon of all ringers. For more than nine and threequarter honrs those firelve men rang some of the fincst Stedman Cinques that ever were heard. for all listeners agree that from first to last the ringing was magnificent, The beils went oft into clanges ab two minutes past nine in the moming. and so even was the ringing that the hrst fen couress came up in 62 minutes, the neat ten in the same time, and each of the two succeding ten courses in only one half-minute more. Howr after hour the ringing wenf on with clocklike regularity, but after the record had begn broken it was deemed wise to bring the bells round, for Mr. Alfred Peck on the tenor was Fecling the strain of the long sustained effort. No one can wondar at that. To ring a 50 cw . bell for that length is a tremendous triumph. and everyone must agree that a 12.675 in liand is worth a good deal more finn 15,051 in the hush, so to speak. Great credit is due to everyone of the band, and it slould not be forgotten that there were, in addition to men of tried merit and long experience, two youlins in he peal one of whom. Wilson Rushton, is only $17 \frac{1}{2}$ yearg of age.
One of the thing which enabled the peal to be rung was the attention, given to the bells bt Mr. Albert Hughes, who foux or five times during the peal went up amang ithe bells, and with great coolness and dexterity oiled all the bearings.
When the bells rall smoothly round. a considerable namber of ingers had assembled, and the sucessful hand reeived the hearty congratulations of ali.
Soutirwark Catherira! las been the scene of some great ringing triumphe in the past, and among the greatest of early performances were peals on these historic bells. The first peal of Treble Bols Maximus ever rung was achieved here by the College Youthis on March 12th. 1758. and various longer lengiths in this method were rung tilere until on March 22nd, 1802, the Cumberlands palled off a 7.101 in 5 hrs, 30 mins ., 'the greatest perfomance ever done an twelve bells, which was compleatod by twelve men only.' This peal look prececlence, in point of length. of the 7,008 , rung in 5 hrs .48 mins. by flae College Youths in $1784^{\circ}$ at the same church.
$A_{5}$ far as we are aware there have been no exceptional lenglus of tedman Cinques rung at Southwark, although in au attempt to beat the then Painswick record of 8,448 (made in 1858) over 8,000 changes were rung in aboul six and a lialf hours, the peal being upset througlt ronfusion cansed during 'lighting up ; in the beliry. The peal was ffterwards rung at Cornhill in 1861, the length heing 8.580, and the time 6 hus. 41 mins.
The sticceeding longer lengths in the method were 9.238. in 6 hrs.
 11.111 in the same tower, rung in 8 hrs. 2 mins. on Dec. 26 th 1901. There are still two survivors of the 1881 peal, Messis. John Buffery net E. Johuson, junt.

## PEAL ATTEMPT AT OVER ABANDONED

Owing to ane member of the band being unavoidably prevented? on taking part in the long peal attempt at Over on Monday last. he enterprise was abandoned, as the shortncss of the notice readered impossible for a substitute to be found. Tho band hope to mate the attempt now on Augist Bank Holiday.

## A SUSSEX RESTORATION.

Many welcomed the joyous pealing of the clurch bells at East Grinstead, Sussex, after many months silence owing to repairs.
After evensong. ou Sunday, May 13 th, the Ficar the Rev. W. W. Younde) conducted a special dedication of the seventh bell, which hat been recast. Afterwards a 504 Grandsire Tripics was rung by T Potter 1. G. Tizzard 2, G. Hewitt 3. N. W. Hope 4, H. Coomber 5, Tullett 6. J. Wren (conductor) 7, S. Chesson 8. In addition to the recasting of the geventh bell, all lave been retuned and rehumg on ball beariugs, and the result appears to be eminently satisfactory. The work lias ben done by Messrs. Mears and Stainbank, the firm tilat cast the original bells L 10 years ago.

## A HALF=PEAL.

## NANTWICH BELLS.

AUGMENTATION AT A FINE OLD GHESHIRE CHURCH.
The ring of bells at Nuntwich, Clieshire, have just been auganonted to eight by Messes. John Tuylor and Co., and as already recorded, the first peal was rung on them on May 5th. The histery af the old bells bac recently beon told in the Nantwich " Parish Magazine." 1n the year 1600 there were five bells in the tower. In 1608 tho Great Bell. was new cast, by George Lee, of Congleton, the weight being 2,300bs. In the following year the 4tin was recast, at the same time that " the timber worke of the roufe of the steeple, weathercock poole and the tow foures in the stueple were new made. The next reference to the bells in the recordg is in 1669 and is as follows: "Our Grat Bell in Nantwich, being alove 2000 li . in weighta, chaunced to be cracked, and was cast anew at Welligton, in Shropshirc, by one Clitheroe. Robert Parker, Mercer, and Jon. Dean Barber, Churchwardens anno 1069 , whin cost the parish near exio.' Forty years lator it was deemed advisable to recast the whole peai, and the Wilbraliam Journal states: ' Sept. 17th. 173. The five hells belonging to the Churel of N. Were taken down in order to cast into six by Abram Rutuall.'

The bells cast in the year bufore Queen Anne died have remained until the present day, and one did not even require tưning when the recent restoration was carried out. The rehanging of 1713-14 was, however, marred by a tragedy, for the registers record under date January 22nd, 1714: 'Mark, son of Mark Topham, Kill'd by the 4tb bell Clapper.'
The peal, as humg by Ahram Rudhall, consisted of six hells, of a total weight of sorme three tons, the largest-tuned to the mote F weighing about 15 cwt.. and measuring about 3 ft. 8 in . neross the mouth. The inseriptions are as follow:" (Treble) Prosperity to this Town and Parish, A.R. 1713, (2) Poace and Good Neighbourlood. A.R. 1713, (3) Abr. Rudhall cast us all. 1713 (4) God save the Church and Queen Ann. A.R. 1713 , (5) Prosperity to all our Benefactors. A.R. They wers liung in a massive lumphrey Hales, Ghurchwardens, 1733. They wers lung in a massive onk frame hut this aranugenent was never quite satisfactory,' sinys the Parish Magazime, 'tending to Whow considerable strain on the tower, and making good ringine somewhat difficult. Apparentily little attention was given to them until 1878. In this year the hells were quarter-turned, the rame was rcpaired find strengthenebl, and new whecls and ropes hiter]. at a cost of $£ 1138 \mathrm{~s}$.

## THE MANAGEMENT OF ASSOCIATIONS．

## To the Editor．

Sir，－Four reporis of numerous anuwal meetings of Associations held recently provide much materisl for refection concerning the management of these bodies．For instanee，some Associations liavo practically doubled their balance on the general fecount in a year＇s working，athers have such huge balances that thes are considering the investment of the same．Whatever can be the eventunl use for it ${ }^{2}$ On the other hand，at least one Association lias discussed motion to increase the fee for memberslijp，and jet another has agroed to charge bd for a copy of the annual report！At the same time，there is a notable albsence of any stabistical matter，e．g．，the number of members and towers belonging to each Association com－ pared with a year ago，or the porcentare of towers afiliated to each Association as against the towers with rings of bells unaffiliated in each area，etc．

As to the finsucial aspect，I cannot fhink of any benefit aceruing from the accumulation of large balances，for surely it must be far more advantageous to ketep the membership fee at a lower basis and thus encourage more to join．It must be admitted，too，that members in remote country districts get very little for their money However，I think the systen of the Bath and Wells Association in this respect is worth copying．Next，as to the printing of the annual reports which，owing to abmormal conditions，las become a serious item．I consider eacls member ought to be presented with an an－ nual report of the essential facts，statistios and financial state of the Association to which they belong，together with the list of officers rules，otc．，which could all be printed on a 4 －page leaflet if the spaco were properif utilised．The printing of the list of peals which at pre－ sent entails the Iarrest proportion of expense could then lee dealt with as a supplemental report，and sold at cost price，which I consider would be a far better method of raising tise necessary money than a booking fee for peals and much less trouble to everyone concerned． By the way，$T$ should like to mention that I haye maver yet sean peaks set out in a report in an economical manner．It would fon quite easy to print nine peals on a demy 8vo．page by prinfing them in three columns．

Lretly，as to propaganda work undertaken by the Association，I have an insistent feeling that we are not roing allead with the same energy that wo did in years past．Thinty jears ago my Diocesan Association was giping instruction to fire hands in one year，but for some Fenrs now they have done nothing in that direction． there is still an inexplicable ignorance with many incumbents and bands of ringers concerning the objects of an association to be over－ come．Is it not possible that the issue of an informing circular from time to time would increase lheir knowledge and interest？At any rate，one feels that there is a great work yet to be accomplished．May I also recall a letter which you kindly printed in your jotirnal some t．wo years ago anent the desirahility of introducing change rizging in leisure hours in our publio sehools and theological and training colleges，through which the future clergy and schoolnasters gene－ rally pass？I suggested a deputation from the Diocosan Association immediately concerned in eacl area to point out the great adrant－ agos to ctudents，especially those intending to take up work in the Clurch，of making themselves acquainted with the art，and to offer． on behalf of their Aspociation，the voluntiary services of qualified in－ structors You，sir，vory kindly published a leading article on the subjert，and suggester that it might be considered by the Gentral Conncil．I think every good ringor agree that the parson who is an enthusiastic ringer is a valunble asset in their work，and generally good fellow withal－Yours faithfully．

## MIDDLESEX COUNTY ASSOCIATION

ENJOYABLE MEETING AT STANMORE.
In remarkably fino weather, a meeting of the Nortin und East District of the Middlesex County Association ant London Diocesan Guild was held at Stanmore and Harrow Weald on Salurday week, upwards of 50 members and friends attending from all parts of the counly, and from the neighbouring districts of Bushey, Oxhey and Watford. Excellent practice in several methods was obitained until 5 p.m., when a. Ehorts service was held at which the Rector (the Rev. S. F. L. Bemays) gave a very lielpful and sympathetic address, which was much apprecinted. An excellent tea was provided in the Church Institute, ant, at the subsequent buisiness meeting, eight new members were admitted, including seven members of the local band.
The hon. secretary (M1. C. T. Coles) gave a hearty welcome to the several menbers and friends from ' over the border,' stating that it was one of the best features of their meetings that they were always pleased to see ringers from other Associations, whether members of their own Association or not, and he gave the visitors from Hertfordshire as cordial a welcome us he was sure thoy would give to their Middlesex friends at their owu meetings.
It was amounced that a date had bean provisionally fixed for the anveiling of the memorial to the fale president (Mr. Arthur T. King), and, subject to the necessary faculty being received in time for the work to bo completed by June 16 th, the ceremany would cake place on tlat date.
It was flecided that the mext meeting of the district should be held at Barnet on the date mentioned, in comection with the unvailing. Should, however, circumstances not permit of this arrangement to be carried out, the next meeting would be held at Nortlaws.
Other inportant items of business inuluded a congratulatory vote to the band that had rung the long peal of Cambridge Surprise Major al Stoney Stanton; and also a sincere vote of condolence to the relatives of the Into Mr. William Grimes, for ten years a member of this Association, and father of one of the most brilliant ringers this society ever had amongst its members.
Votess of thanks were passed to all who liad contributed towards the success of the meeting, including the Ilector of Stanmore and the Vicar of Harrow Weald; also Mr. Highes and Mr. Furness, tho tower. keeper, nud to the organist, and those who lad preparcd tea.
Aftarwards a further visit was paid to the tower. The bells, which now number oight, were in continuous uso until nearly 8.30 , and the many methods rung rauged from Grandsine to London, inciuding four Surprise mothods. The bells, whilst rather noisp in the beliry chamber, are of good tone, and constitute a very nice ring, with a tenor of 12 ewt. It is hoped that the noise in tile belfry will soon be obvinted.
Several members paid a visit to Harrow Weald, where Mr. J. Furness gave them a hearty welcome, and rang several touches of Plain and Treble Bob Minor aud Stedman Doubles.

## THE CENTRAL COUNCIL MEETING.

As a 'social' event the Central Council Meeting at Salisbury surpassed any that had gone before it, and the Salisbury Guild, and particularly the Committee responsible for the arrangements, can look with satisfaction upon their efforts to provide for the comfort and entertainment of the members of the Ringers' Parliament, and the Council are greatly indebted to them. The programme, however, went further than merely catering for the pleasure of the visitors, and had the result of giving a new impetus, as it were, to the claim of ringers to be recognised as Church Workers. For the first time in the history of the Council, they were welcomed by the Bishop of the Diocese in which they were meting, and it was clear from the Bishop's speech that he is under no doubt as to the position which ringers should occupy in the organisation of the Church. It is to the great advantage of church bell ringing that a dignitary such as the Bishop of Salisbury should publicly welcome a body like the Central Council, and this one feature of last week's meeting alone would make the Salisbury meeting a memorable one. The circumstances of the Council's meeting do not always render it possible to bring it into the same touch with the head of a diocese as on this occasion, but what was done at Salisbury is a precedent which we hope may be followed on many future occasions.

The business side of the Council's visit was interesting, without having any striking features. Sufficient material was found to provide a meeting of several hours' duration, and despite some waste of time and discursive discussion, there was 'something attempted, something done.' Most of the Committees were able to report progress in the various directions in which their work lay, but we must defer to later issues comments upon details. The notices of motion on the agenda were neither numerous nor, as it turned out, generally acceptable to the Council. Three resolutions were 'turned down' by one means or another, and only that relating to the truth of splicedmethod peals on seven or more bells was carried. There has scarcely been a meeting of the Council at which there has been so little debate upon subjects which come under the heading of 'notices of motion.' Indeed, the Council seemed to consider them hardly worth discussion. It is a pity that more of the affliated associations do not send up switable subjects for discussion by the Council. Tbere ought to be among the many organisations that exist, a sufficiency of ideas upon matters closely affecting the welfare of ringing and ringers, to provide the Council every year with a really serious agenda to debate. Until this is realised and acted upon, there will always be a weakness reacting upon the usefulness of the Council.

## GUILD OF DEVONSHIRE RINGERS.

## NEXT YEAR'S JUBMEED.

The annual general mesting was held at Cullompton on Whit Monday. A service was held in the Prish Cliurch, conduoted by the Vicar, at whicli there was an attendance of over 150 . All told, thero were present at the dimner and meeting no less than 186 members and visitors-almost a record for the Guild, 22 bands in union being represented, besides ringers from Oroydon, Hersliam, Tauntou and Bridgwater

The annual report for 1922 , which showed steady but real edvance in the progres of elange ringing, was brouglat forward by the general secrotary (tho Rev. W. S. Powell), and seconded by the genera! treaguret (Mr. T. G. Baytlett), who described how the accumulated funds wero boing expended in meeting the out-of-pocket expenses of instructors to bands of learners.
The membership of the Guild for 1922 consisted of 72 honorery, 123 life, 283 performing, and 115 associate members, togetler with four lady associates making a total of 597. representing a. net inerease of 84 in the coure of the year. There were 42 affiliated bands, as grainst 36 in 1921
The President (the Rev. M. Kolly) moved a resolution dealing with the coming jubiles of the Guild, whieh was founded on March $2 l_{\text {st }}$, 1874. He himself was elected a member an Jume 17th 1874 , and in a moving speech he outlined the progress made during the intervening period both in the status of the ringeir and tlie practice of change ringing, whioh was practically unknown in the South-West at the time of the fonndation of tho Guild. He made an urgent appeal for unity among ringers, the lack of which, where it exists, being in all respects disastrous. He pointod out that the Devon Guild wis the earliest of all similar associations in the cotintry, and that its jubile would, therefore, occur before nny other.- $\mathrm{H}_{\mathrm{e}}$ moved the following resolution, which was arlopted: "That the general anmual meeting on Whit Moaday, 1924, take the form of a julbilee festival held in Exeter, and that the service be in the Cathedral, if the Dean be willing. That in order to celebrate the occasion further it is delsirable that oreff band in union should endeavour to accomplish during the year onding Marel, Zist, 1924, something phich, it has not prewiously done to further the advance of change ringing in the Diocege of Exeter. The members of each band will themsolves decicie the form of this undertaking. That the Guild organise a peal of Grandsire Cinques for the jubilee if sanction cau be ohtained. ${ }^{\text {s }}$
All the officers of the Guild were re-elected.

## BELFRY GOSSIP.

His many friends in England, as well as in Ireland, will learn with deep regret thab Mr. Gabriel Lindoff has lost his wife. Mrs. Lindoff was slaying in Gogland for her health, and only on Thursday Mr. Lindof rexeiven a reassuring letter from lier: On Frikny she passed away suddeuly. The decpest sympathy will go out to Mr. Lindof in his bereavement.
A thanksgiving peral was rung at Alrewas, Stafis, on Tuesday week. for the recovely of the Vicar from serious illnes. The bells at this church lave recently been recast, and two trebles added by Messrs. T. Taylor and Go., of Louglibarough, hpon whom the splendid work done refiects the greatest credit. The tone and "go' of the bells is all thiat can be desired.

A correspondent, writing with reference to the bells at St . John's, Horsleydown, where, as mentioned in this column, the first peal of Stedman Caters was rung, says that ho surveyed this ring in March with the wiew to teaching a band, but found it impossible to ring the bells, the strap jrons of several having snapped, and some having no ropes. The Vicar and churchwardens would like to lave the bells rung, but the parish being a poor one, they cannot raise the necessary money for the restoration.

The Saftom Walden Socioliy celebrates its tercentenary on June 27t.J. Ih has an unbrokeb history of 300 years, almost, an unvivalled thing in ringing annals, and there ought to be a record gathering of ringers for this unique cvent. The Mayor and Corporation are taking a hand in the celebratfon, particulars of which are announced in an advertisement.

Wilfred Taffender, son of the Master of the Iondon County Association, las achieved yeb another distination. Having rung "inside" for a peal of Loudon as his first peal, and achieved other performanees of great merit he has now rung his fist peal as conductor, this being a peal of Stedman Triples (his first), which he called from a non-observation bell! And his age is 15 years!

Owing to a fete being held at Lrong Melford on June 23 rd mext, in aid of their bell restoration fund, the Lavenham ammal gathering will ibo postponed. Notice of the event will apperv in the 'Ringing Worle in due time.

The peal of Stedman Triples, rung at Preston on May 15th, and reporfed in our issue of the 25 th . was rung in 3 his. 16 mins . (not 2 hus. 16 mins.).

The bell of Great Brampton House, Herefordshare is rung six fimes daily by the Ringing Master of the Diocesan Guild, excepting when loe is ringing a larger bell at one of the parish churches.

June 4th is the anniversaty of the opening of two woll-knowa peals of bells. In 1762 the new peal of Ion at Bow, Gheapside, were ruag fou the first: wime, and in 1814 the bells of St. Nicholas', Liver-I-col, were opened.

The long peal of Oxford Treble Bob Major ( 16,608 ) was rung in 10 hus 32 mims, at Debeuhnm on Jung 6th. 1832, and an June 8th, 1906 the 28,800 in the Kent Yariation was rung in 9 liss, 40 mins., at Mottram, Cheslite.

The repport of peal rung at Burnham has been sent without the number of changes.

The Bishop of Salisbury, the Dean and the Archdeacon of Sarurn diended the meefing to welcomp the Council.
The welcome extended to the Conncil by the Bishop of Salisbury was a very hearty one. He shid they lad done wisely in choosing that city is a place of roecting, far he felt, sure they would admire it and fall in lote with it, ns everyone did who came there. He welcomed them as Bishop of that Diocese, because he wanted to do all he could to encourage the work they did. He had the greatest possible opinion of the whole work of hell ringing, and le clamed to know a little about it, bocause he liad lived in a country for seventeen jears where there were hardly any bells, and coming back to the sound of the bells made a real difference. There were two peals of bells in his diocese of Brisbane, ant when the went there one panl whis in aboyance. He remembered what a tremondous effort Wa, made by a few old Englishmen to get the bells relung. They shrugeled until they got them done and floy were now lung as the Cathedral bells of Brisbane. Continuing, the Bishop said from the noint of wiow of history he felt the bells were a real and elonuent link with the past. Bells had been associated with the main episodes of the life af the nation, thoy expressen the people's joy and eporrow, they lad expressed the people's warlike spirit. As a citizen he felt that bell ringing, especially in the country places, provided an agreeable and delightful occupation for their young men, anif he wondered why young mem had not taken it up more freely, lrecause it combined so many things-skill, and interest and good exercise. As a elergyman. he felt the connection between the young men, who rang the lenls, and the clergy of the parish eluwhes generally ought to be a Fry real one (applause), and lie was sure it could be made a very real one. It did not follow that the clergy need know how to ring, but cortajoly was his tesire"that the clergy should take the greatest interest in the belfry (applause). Whon he had a churet where there was a pen] of bells. he was fremuently up in the belfry, and those ringers
were most faithful not only in their ringing, but in their attendance at cliureh (appluise). As between the elergy and the bell ringers there was a real link, which should be kept up. In conclusion, the Bishop added that although Lhey welcomed that Conncil to Salisbury, the mosl, belatiful city in England, they also felt honoured by their coming there representiog as they did such a wide interest (applause).

The President, on behalf of tho Council thanked the Bishop most warmily for his kiudness in coming to lheir meeting, and for his inspiring and helpful address. It was a matter not ouly of interest, but of very great lemefit to them, to know that the head of that diocese came to welcome them as loybl chtreln workers in England (applange). Although the Council had met for 30 tobars, it was only within the last two years or so that they had beon honoured by the presence of any cathedral dignitary to welome them. They were welcomed at Gloucester by the Dean, and at lincoln by the Desu, but that was the first, time they had had a Bishop to address them (applause). They had also had the Dean wifl them, and the Aychdeacon of Sarum. They were glad to be welconed by those who held such high office in that diocese, and thanked them for their kindress (applause).

The Bishog briefy replied, and then left the meeting witl the Dean and Auchedeacon.

The audited accounts, a summary of which we gave Inst week, were passcd, on tho motion of the Rex. II. Law James sccouderl by Canon Elsee.

## ADVERSE BALANCE ON PUBLICATIONS.

The Hon. Librarian, in presentiog his accounts, reported that contrary to custam he had to declare an adversa balance on the year's working, and liad to ask the Council to refund to him the sum of L2 15s. Quite acenrately. the balance on the ycar's working was anly adreise to tho amount of 155 . It would bo remembered that at. Lincoln it was voted thal a sum of 5 s per volume should be allowed to him for binding copies of ' Beli News 'for the library. He had had eiglit volumes bound, which thus accounted for the fR. Thero is now for the purpose of reference a complete historical record of ringing from 1871 to the present date. The thanks of the thic. With regard to thee $15 s$, he had realised by sales of publicathons an smonnti within 9s. of last year, but, the contributian from the 'on sale or return' source was short of last. year to the amount of over e3. Accordingly, between them they had only realised fis 16s. Bd., which did little more than cover the cost of advertising. However, the books were finding thoir way among ringers. During the year he hat bought in 30 copies of "On the Preservation of Bells, and had sold them nearly all. He had no more copies of 'Rules for an Association,' and only a very few of 'Rules for A Company, whitel the "Collection of Misor Methods : would at the present rato hardly last for two years. There had been a fair de mand for the loaft of the "Treble Bols Peals Coliection." Th" Librarian added. I should like to put on reaord that I am eonstanlly being asked for a book for beginners. There is not, I believo, on the markot such a book at anything like the priee af eyen the mosk expersive of the Council's publications, which are chiefly for the more gdvanced, and I venture to suggest tlat the Council should beat this in mind."

## FALSE COMPOSTTIONS.

Mr. G. P. Burton prainted out that a great mally peals in the Collaction of Peals, were false compositions. Ringers purchased these boaks thinking that the compositions were truo; they chose ous and rang it, and perhaps found it wes falge. He suggested that tho librarian, before issuing further copjes, slould stamp in the books that these peals were false, and that there was no guarante日 that any of them were true. The worst feature was that they sold the books as official publicalions of the Council, and it was a very bad thing for them to let them ga out with false compesitions in them.
The Librarian said he had written to tho Rev. H. S. T. Richardson that the Peal Collection Committee should take in hand the proving of all peals in the collection. Mr. Richardson lad replied that le thouglat it was a good idea, and asking to be suppled with oopies of the collection. These had been seat to hims. Fo (the librarian) thought he had better bo authoriged to slamp each volunse with a notice that the fruth of the peals was not graranteed.
Mr. W. A. Cavo said he did not Iike eifher of the suggestions. To indicate that the compositions were not guaranteca would render the book almost valueless to those ringers who did not trouble about proving. He considered it would be best to find out the peals that were false and issue a sliz.
Mr. J. A. Trollope sajd so far as the Boh Major Collection, for which he was responsible, was concerned ho believed there was only one false peal; but le would undertake to lef the librarian know which was false, and also to go through the peals of Double Oxford and certify them.
The Rev. H. Law Jemes undertook to go through the Double Norwicli collection in the same way
Mr. A. H. Pulling suggested that wher the falsp compositious had been ascertained they should be adverlised in "The Ihinging World'

for the benefit of those ringers who had already purchased these books.

The suggestion that eiach of the false, compositions should be stamped was gegreed to, and the librarian's report was adopted, an offer by the Rev. F. J. O. Helmore ta present a copy of 'Campanology ' to tite library, being accepted with thayks.

## RINGERS' ROLL OE HONOUR.

The Fon. Librarian reported that at the last Council meeting he was instructed to prepared a Ringers" Roll of Jionour. Tmmediately afterwards be wrote to all secretaries of associations, enclosing their lists (which he had been keeping since the Nortlimpton meeting) for revision. He asked especially for ringers' names, initials, towers and information as to their membership in other associations in order to avoid repetition. He received the last of these returns on the previous Sadurday: He dealt with then as they were returned, and he had each mans mame clearly written on a separate card, together with his intials and his tower, and Guild or association. There would be betwben 1,100 and 1,200 names. It was for the Council now to say in what mammer they should he presorved. Whem the matter was brought up at Lincoln an offer was made to wite the names free of charge in a book to be provided. but in wism of the mumber of names (nearly double what soas anticipatod) loe hardly liked to mention the offer. He sugtested that a small commitlee be appointed to deal with the matier, the Council maming an approximate sum to be experded. The librarian edned that the Standing Gommittee had had the matter under consideration, and suggented that fhe names be written in good "copper-plate", writing upon leaves of good paper, these leaves to be afterwards bound into a book. Illumination should be on the title page only, which should eontain these words:

Chureh Bell Ringers Memorial Fook of the Great War, 1914-1918.
They whom this work commemorates were murnbered among those who, th the call of King and comatry. lelt all that was dear to them, endured hardness, faced flanger. and finally passerl out of the sight of men by the path of duty and self-sacrifieg, giving up their own lives that others might live in freedom.'
Then should follow the list of names, with initials. the town to which the man beloumed, and in brief form, his Enitd or association. The Sianding Chmmittee suggesten that this shoulil he rone at a cost hot exceding fon. That cost might he very much less if they could lave the same or a cimitar offer as that mado last vear. It was for Tho Gouncil to accept these suggestions, or to propose a sub-commiltee to act with lim.
Alremman J. S. Pritchett, said he would be loath to linit the cost to , 250. although lict ameerl that not more than fe20 should be taken from tha funds of the Comeil. If. howover, it cost more than $£ 20$ to do it pronmily. he supmested thes might raise the balance by means of subseripxions among themselves, for many of them mould gladly subserib to make this list worthy of the Conncil tapplausa)
The aronosals made by the librarian were adopted, and the mator was left in his haurls. the suggetstion heing added that the question of the most suitable paper and mnst durable ink to be enployed. should lis left to authorities at. ite British Museum to decide.

## HEREFORD DIOCESAN GUILD.

## RAPID GROWTH.

The annual featival was beld at Fereford on Whit Monday. The proceedings comprised a service in the Ladye Gapel of the Cathedral, with an address by the Bishop; luncheon in the Old Oak Room of the Boothe Fiall Hotel, presided over by tho Bishop, and the businces meeting.
A simple but very beautiful sorvice was conducted by the Rev. G. W. Tumer, Wiear of Madley, lson. genoral secretary of the Guild, the special form of service being used. The Iev. H. D. Wall (diocesph missioner) presided at the organ, and the Rev. IR. A. Lyne read the lessons. The collection, which was for the memorial tablets fund, smounted to 82.
The Lold Bishop, in a very thoughtiul and Lelpful address, satd that discipline, co-operation and sincerity, were the chief factors which made for success in bell ringing, and these were exactly the characteristics that were most wated among mon. He believed the bell ringers were doing a great servica to the diocese. Some 120 bell ringers were present and listened with rapt attention.
At the lunch there were present 111 vinging and lon. members, representing over 30 parishes. An oxcellent hot dimmer was enjoycd.Afler the loyal toast, Mr. O. Edwards, Ringing Master, proposed the health of the Bishop and clergy, and thanked the Bislop for his address. The Bishop responded, and proposed tha health of the Master, Mr. J. Gr. Buchanan, who bed been an officer in the Guild since its birtl, 37 years ago; six years as hon, secpetary, amd 31 years a.s Master.

After the Mas [er had yoturned thathe, Mr. W. H. Fussell proposed the health of the Guild in an interesting and eloçuent speech.
At the business meeting the officers were reelected. -The mecounts showed a balance of efo ${ }^{2}$ s. 4d. being an incranse of 21018 g . 4d. The balances of ${ }^{2} l_{10}$ districis amount to $£ 42$ IJs, 2d. There are 76 tower in minion with the Guid, an incrase of six, and 605 ringers, an increase of 45: holl. members increased from 58 to 80.
The annual report, of the Guila shows that the organisation is in a very sound condition. Sixty parls were rumg in 1922 . against 28 in 1921, and the repart comments thet these are a sign of increased slill and groat, kasmess. The man who lag rung a peal will never cease to remenber that he is a bell ringer. The Guild is in a very antisfactory financial position. tho districts hiving added 55 12s, 34 , ta their halames, and the Central Tund elo 18s. 4d. to ils balance instead of losing e15 as last year. This is due party to a windfall of e4 4s, for two life honorary members, partly to the reduced cost of printing the report, and parily to tha grymend by the districts of half imstean of a thind of their receipts. The fimancial stablitity is to a hered 58 ; in 1922,80 . With regatri to probationers, the report stateg Elint, fon' disfricts out of ten havo 110 probationers. This is a sign of weakness. Tis sither means that wemb-has been no growth, or that members are, contrary to rule, admitted to full memherslip without first being on probation. Experience shows that what mon obtain easily they ralue lighty. Even where ringers' suluscriptions are paid out of a local fund, probationers, should bos required to pay thoir 2s. Gil. on admission to the tower. The association's war memorjal is Io cost about ej55, but only ahout e $E 11$ lias been received from 35 towors. It is hoped the oflee towerg will quickly send their coutributions. The report adds some words of advice. suggesting that all
memberg should take a copy of " The Rkinging World,' and dat cach members should take a copy of "Tho Ringing World,' and that cach tower shond pay out of ifs funds for a copy. This should he done,
says the report, not only for flie adrantage of each tower, fut also says the report, not only for the adrantage of ench
$n_{5}$ o duty for the admancomeat of ringing generally.

## THE STEDMANCINQUES RECORD.

Dear Sir, May I be allowed to offer my wery hearty congratutations to mys colleagues in London upon their meritorious performanee at Southwark Cathedral an Whit Monday, especially to Elant wonderful old weteran, Mr. Clablis E. Whimey. I huve no wish to single out any one man in particular-even Mr. Hughes" part whs wonderfulbut I think ewery ringer in the country will acknowledge with puide and ploasure Mr. Whinney's extraordinary feat and marvellous endurance botlis mind and body for such $n$ lengthy porion. I know from experience that St, Savjours bells are mol toys to hande, and I suppose one gets wsed to Mr. Whinney's almost automatic accuracy in all methods, but apart from that, the physical strain upon fo man
of 65 is enormous and bound to tell its tale. I am sure all of lis brother ringers will join me in wishing lim continued good health and strength to carry on the woudedful worth he is doing. and that his very alert mind and equally active body may hold out to add further laurels to an already envious career.
This performance an the part of onch individual riager to say noth. ing of tho responsibility incurred hy tho popular conductor, Mi. Bert Langlon, merits the widest publicity-Yours faithfull

The lon. Lreasurer's balance sheot was incomplete owing to one branch not having sent their returns to him in time, and was referred back for the second year in suecession.
The Hon. Secretary pointed out the need of action either by the Central Council or the Association to grevent operlapping of district. associalioms into diocesau areas. ## 'A CITY OF BELLS.'

## EXETER'S NEW PEAL OF EIGHT.

St. I'tomas' Churels, Exeter, with ils lofty pinnacied tower, is now in possession of a magnilicent ring of eight bells, which have been provided by the great gencrosity of Mr. Edgar Stroud Plammer, the Vicar's warden. Farmerly there was a ring of Eix, which fell into tilapidation in the early years of the century, and fually had to be abandoned for ringing in 1916. Mr. Ilummer was interested in a scheme of restoration as a result of the representations made to him by Mr. W. J. Southwood, the hon. secretary of the Exeter district of the Devan Guild. Al first the recasting of tha cracked Sth and the rehanging of the bells was contemplated, but ereatually tr. Plummer decided to maire himself responsible for a complete renovation and augmentation, with the result that gxeter possesses yet another peal of eight bells, and is rapidly bocoming a 'City of Bells,' having not only the peal witl heaviest temor, but, for its size ancl population, probably the greatest number of lingable pests.
The 'ectoration at St. Thomas has been worthily carried out by Messrs. Gillett and Johinston, of Choydon, and the tenor is now 14 cwt. $5 \mathrm{gr}, 8 \mathrm{lb}$. The two new bells are inscribed as follows:

Treble: Remember Eigar Stroud Plummer and Evelya Lis wife, who first gave this bell, 1923

Thorg is neither speech nor language, but their voices are heard among thein.
2nd: Remember Edgar Stroud Plummer and Evelyn his wile, who first gave this bell, 1923.

## "Ring out the old, timg in the new,

Ring out the false, ring iu tho true.
The old six bells wore east in 1789 by the Penniuglons, and the reble, recast in 1901, had added the name of General Sir Redvors Buller, V.C., who was then patron of the living. The recast tenot is inseribed:-

James Buller Esq. Patron: Ohr. Churchill. Viear, I.P.. C.I. 1789
The six old hells were recast and rehung, and two der trebles added as a gift from Edgar S. Plummer, Crossmoad, Exeter. The Lord Jislap of Eseter. Patron: Fubort G. Chalk. Vicar; Edgar' S. Plummor, Edward J. Fenson, churchwartens; Gillett and Johnston, Creydon, 1923.'

The Bishop of Eveter dedicated the bells at a special Festival service on Whit Sinday, and following the rdedicatory prayers the bells were rung for the first time Ty the St. Thomas' band siz., J. Hosgood, W. J. Shobbrook, W. S. Robert, 'T. J. Stokes, A. MonkIny, . Hoss, C. G. Routley and A. H. Goad. The ringers were attiren dassocks, which is guite a novelty. Tt adds, doubtless, to the semplinces of the proceedings, where the ringing chamber to open to the church, but is hardly likely to increase the comfort of the ringers. The Bishop concluded ais appropriate and thoughtful semman by ree marking that the bells should not be rung merbly as a pastime but as part of a great service and thic worship of God. The church bells
 cither in choir or puipit. Let them esteem those bells-thank God for the gift, and say a prayer for the riogers and douar, and pray that fing message of the bells would reach some soul.
After the dmatication service the bells wore rung by St. Sidweil's band, and after evebing service by the Cathedral company. Mr. Plummer entertatned the ringers ta tea.
Not the least intoresting of thew day's proceedings was the unreiling in the evening of a 'Ringers' Tablet," placed in the tower entrance to the thtich ias an rppretciation of $\mathrm{Mr}^{2}$. Plummers generosiby. Man, W. Southwood crowned his many exts of kindness in connection with the installation of the belis by designing a handsome pak tiblet subserihed for br jingers (past and present) who rasired to set on record their feelings of gratifention and appreeiation. The taklet-gwe leet longe and tro feet slx haches deep-bears an incised inscription, and illuminated panels on vellum. The jnscripdion is as follows: "St. Thomas' Church Beils. Aupmented to a peal of eight, the old six being entirely recast and the bells rehung in an inon frame with ball hearings by Gilleti and Jolmston. of Crovdon. The whole of the alsove being the generous gift of Engar S. Plummer, eight years warden of this parish." The lefthand panel contains the inseriptions on the belis and the right-hand panel the mames of the St. Thomas ringers who first rane them. The tablet also contains particulars of the weights of the bolls, and the fact that the St. Sidwell's band rang after the dedication and the Cathedral band after evensolng. The fablet was unveiled hy tlae Vicar. who based his sermon on ringing. There was a large congregation.
The wark of providing a raised ringing chamber, puting in a new Hoor under the bell cage, and certain repairs to i:lie structute of the lower. have been undertaken by the parish, and repretents an exnemtiture of atont als0 or E160. The eliming apparatins is to be put in order, and it is hoped lo carry out this work winen the clock chimes al'e being adjusted.
In connection wikt the restoration of the hells Messers. W. It Southwood and Co. have issucd $a$ souvenir benklet, the sale of which fin, mach is intended to angment the St. Thomas Cluarch Tower Fump Tlae sourenir contans much intoresing matier agd several stcellent plotooraplss.

## OVERLAPPING.

The question raised at the annual meeting of the Gloucester and Bristol Diocesan Association with reference to the overlapping of ringing organisations is a very important one to many societies. In the case of the Gloucester and Bristol Association we learn that forty per cent. of the membership of the overlapping society is drawn from the diocesan area, and if these ringers are not members of both societies, it can readily be realised that this position of affairs must seriously affect the numerical and financial strength of the Diocesan organisation. Although no action appears to have heen taken, it was suggested that the Central Council might take this matter up, so that overlapping might be prevented.
Such action by the Council would bristle with difficulties, and in the present stage of the development of rigging organisation would probably do more harm than good. There are many areas in which more than one society operates, and for the most part, what rivalry there is, is of a most friendly type. Instances could, of course, be mentioned where the official feeling between the societies thus placed is not altogether cordial, but any outside interference in the direction of delimiting spheres of operation or influenre would not be taken kindly. Unless there are clear-cot geographical boundaries, there is always risk of the 'offence' of poaching, even in cases where each society recognises the presence of the other upon its territory, and whatever action was taken by way of arranging existing cases of overlapping there would be no future guarantee that new societies would not from time to time spring up.

Where there now exist two societies covering one area, to the detriment and not to the mutual support of one another, our view is that the safest and most hopeful line to follow is to seek amalgamation. Whether such a step is possible in the diocese of Gloucester and Bristol we are not in a position to say, but action upon this basis was successful in Lancashire, where the Liverpool Diocesan organisation joined forces with the Lancashire Association. On the other hand, we have such cases as the Leeds and Sheffield district societies thriving within the borders of the Yorkshire Association, supported by leading members of the county organisation, and carrying on together irs the most amicable fashion. When, bowever, the position is otherwise, it is lamentable to find two bodies, which might form one strong whole, suffering from the actions of each other, to the detriment, often, of membership and finance, and most certainly to the art of ringing. Unity is strength in this as in other matters, and it should be the object of all to see that weakness, brought about by the division of strength, does not harm the cause which both have at heart.

## BELFRY GOSSIP.

The ancient peal of bells al Holy Trinity Ghureh, Gidleiglt, have just been removed from the tower. Three of them are by Robert Norton, 1430; the other hell by W. Bennington, 1641. They are to be tumed, and a new bell added. Thase bells being of such a good age and shape, Messrs. W. Aggett and Sons have recommended that they should be saved by tuning and adding a new bell ta make the peal. They will be rehung on modern principles.

During the next fortright the old bells at Wibhiel, Bodmin, Cornwall, will be removed to Messrra. Aqgett's Bell Works. Two of the bells fell througli the tower floor, three are still in the bell frames, All nre to be recast, and a new tenor bell added, and the whole re lung in new fittings.

On June 9th. 1850, the first peal in America was rung. This was a peal of Grandsire Triples (Holt's ten-part) called by Hemry Haley as Philatelphia. There were two tcnormen, one of them, il one-legged man, riuging the bell for the first if hours.
Feileved to be the first peal of Grandsire Maximus out of London, a peal in this method was rumg at Birmingham on Jume 12th, 1815.

Cope, of Líchfild, stating that he rang in a peal of Stedman Triples at Barton-under-Needwood on Oct 1311. 1906, by the Burton branch of the Midiand Counties Associatiou and that he is under the impression that there had been a peal in this method rung there previously by the Burton men.
The time of the peal rung at St. Andrew's, Holborn, on May 26th, published in out last issue. should have been giren as 3 hrs. and 22 mins.
The St. John-fhe-Baptist Sociely, Leytonstone, have held their enstomary iwo days' ehcursion, and set about it with the same onergy that always marks these annual excursions, Amongst olher ringing. the brought round eighteen complete $720^{\prime}$ of Suprise Minor!

## ROWLEY REGIS BELLS.

## AN APPEAL.

To the Editor.
Dear Sir,-I take the liberty of appealing lhrough your columns for belp towards reinstating the peal of bells of the ancient parish of Rowley Regis, Staffordshire

Tha clinch was destroyed by fire in June, 1913 when so many other churches and public buildings were being sncrificed in a politj cal empaign of that period.

After lying in zuins for fen years the church is now being rebuilt Tha tower has been built as high as the nave roof, but ihe Chirch Conncil being already in debt to the extent of over 29,000 cannol undertake the completion of the fower and installing the bells.
A public effort is being madel by the four daughter churches of Blackheath, Old Hill, Cradloy Heath and Tividale to completo tho tower, and also help toward the f4y0 to rehang the bells. Rowley Regis is are of the poorest parishes in the Black Country, where there are practicaliy no industries.
The bells, undamaged by fire. were angmented to eight in 1887 by James Barwelk. Tine original five were by Matthew Bagley, of Chal combel 1694. The tenor, 13 ewt., was recast in 1848 by Mears, and again in 1881 by Blews.
